It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the Editor.

"Paul Pilgrim, Private of Horse"—a very intelligent soldier, we have no doubt—ought to have received more attention from us; but the columns of the Gazette have been unfortunately too much crowded for the insertion of his letter.

In reply to the many questions which are put to us every week respecting the best drill book, we can only say that in our opinion the only manual for Volunteers—at least it teaches clearly and well all they can ever want to learn—is the new edition of the "Drill Book," prepared by Colonel Daniel Lyson, C.B., of the Adjutant-General's Department, whose experience and practical knowledge as a battalion officer and as Colonel and Brigadier in the field admirably qualify him for the task of preparing such a work.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 31, 1860.

The desultory debate in the House of Commons on Colonel Sykes's motion for the production of papers, on Thursday night, has had no result, except to increase the anxieties and quicken the apprehensions of those thousands of officers whose future is bound up with the fate of the Indian Army. They must still "wait"—still hope on, or dread on, as the case may be—till the Minister comes down with a scheme which, whatever it may be, is doomed to encounter a severe opposition. Whatever the nature of that scheme may prove, we trust, for the honour of Parliament and for the interests of the empire, no attempt will be made by the Government to make it a party question. Lord Palmerston, calling Mr. Bright's attention to the constitutional principles that honourable gentleman is apt to overlook or ignore, availed himself of the occasion to draw off the dogs, and to turn them from the game they were hunting down so eagerly; but it must be confessed that the command of the field would have been more worthy of praise if the successful sportsman had been good enough to give up the object of the run, and had laid the papers on the table of the House.

It is three years since the Company's native army in the Bengal presidency and the north-west provinces mutinied, and thus at once raised the question, even whilst we were engaged in fighting them, as to the nature of the body that was to replace the faithless Sepoys. In addition to the regiments of that army which remained or were forced to be faithful to us, the native army of the Madras Presidency and the native army of the Bombay Presidency, with few exceptions, adhered to their standards, and fought with us against the common enemy. It is unnecessary to remark that the Europeans in the Company's service, to the number of 24,000, or 25,000, were the first to meet the fury of the mutineers, and the earliest to teach them in the field that their number, their discipline, and their courage were worthless in the presence of British soldiers. The question then raised has been much discussed; it has been turned and viewed on all sides by the ablest men in India and in England; and, if we are to judge from the debate of Thursday, it is still far from a satisfactory solution.

We can, however, anticipate the future course of Parliamentary action in reference to this vital problem. The Indian Minister will come down to the House with faggots of extracts, bundles of opinions, boxes of papers, ready labelled and docketed, and will blow out a great *omelette soufflée* of a speech, in which he will seek to suit all tastes that can be at all brought to hear the smack of amalgamation and Horse Guards patronage, which will undoubtedly give flavour to the whole. He will be supported by the officers of the Army, by the large class whose sole notion is "an Imperial Army under one Head," and by some of the members who regard the change with favour on the ground of its supposed security, facility of working, and ultimate cheapness. It will be fiercely opposed by the mass of the old Indians, by men of great authority and experience, by some military officers of much weight in Liberal circles, by those who can give no better reason for their antagonism than dislike to the power of the Horse Guards or of the Secretary for War, and by the Ultra-Liberals, who may see in the scheme a project for an enormous increase to the standing army. The difficulties in the way of amalgamating the armies of India and of Great Britain are enormous; but we do not think they are insuperable. The objections to a local force are very grave; but the most powerful were not adduced by the speakers against that form of an army for India in the debate. It would ill become us to attempt to lay down our opinions with any air of authority on a subject which has been illuminated by the sparks struck out in the conflict of arguments of such men as Sir James Outram and Lord Clyde, of Bartle Frere, John Lawrence, and the tried public servants in India and at home, who have taxed their best energies to propound a sound system of reorganisation for the Indian Army. But we may be permitted to express our belief that there is danger in absolute and entire amalgamation, as there is certainly injustice in it, to the two native armies of Madras and Bombay. There is some danger to the discipline of our troops; there is still greater risk to our rule in India, by introducing an army which will regard the country with cold dislike, if not with positive hostility; and which merely sojourns in the land in sufferance and disgust, instead of regarding it as the sphere in which they must run all their course of service, and find the rewards of long-continued duty and high professional ability. On the other hand, the advantages of amalgamation are many. But whether the armies be fused into one,—as we believe will be the case, at least the attempt will be made,—or a local army be organised, it is our fear that we will overtax the energies and the means of the British people in providing the raw material of the soldiery, and possibly in finding the means of paying a portion of the expense of maintaining them in case the financial scheme of Mr. Wilson breaks down, which is, we think, not quite unlikely. In a word more we may say, that we consider it utterly impossible to garrison India by European troops, whether they be Queen's or local regiments. They must, as our lights go, have a supplemental force of native battalions and squadrons—something more than mere police—to guard our frontiers, to keep marauding tribes in order, and to be ready to take the field.

We have received several communications respecting the manner in which the rule which prescribes that no Staff appointment is to be held for more than five years is being carried out. We are reminded how officers are changed from one appointment to another; how General Forster ceases to be Deputy-Adjutant-General, only to become Military Secretary; how Lord William Paulet gives up a Brigade, only to assume the command of a District; and how General Wetherall is consoled for the Adjutant-Generalship by the Northern command. Our correspondents characterise the whole thing as the Staff "shuffle," the Staff "juggle," the Staff "job," and use other similarly severe expressions. Whenever a job or a juggle is attempted, we trust we shall know how to speak of it; but in the present

Digitized by Google

instance, we confess the more we consider the manner in which the new regulation is to be carried out, the more we are convinced of the extreme difficulty of framing any arbitrary rule, the observance of which would give general satisfaction, or secure to the body of the officers of the Army that fair share of Staff employment of a high class to which all who are qualified are taught to look forward. The changes now taking place which are the more immediate object of attack, are not in our opinion open to the objurgation with which they are visited, inasmuch as they are to a great extent exceptional. Most of the officers about being transferred from one Staff appointment to another, took office under a system which taught them to consider that they were permanently settled; and when that system was changed, we do not think it can be made a justifiable ground of complaint that a little generous consideration has been shown. That spirit is so seldom manifested by the authorities to military officers of any rank, that we should not be disposed to quarrel with it, even if we were not persuaded that it was little more than that measure of respect for the vested interests of individuals by which every piece of administrative reform is tempered. As applied to such of the present changes as come within this category, therefore, we cannot avoid deprecating the strong opposition of our correspondents; and they themselves will, we doubt not, agree with us in reconsidering the matter more impartially than they were likely to do under the first impression, created by what undoubtedly wears the appearance of an unwarrantable violation of the spirit of the regulation.

Even when we look upon the question as regards the future, apart from such an exceptional or transitional state of things as that to which we have alluded, it appears to us very difficult, if not absolutely impossible, to meet the case otherwise than by a reliance upon the good sense and justice of the Commander-in-Chief. No rule our ingenuity can devise would cure the evil. The present regulation simply prescribes that no Staff appointment is to be held for more than five years; the only interpretation being that at the end of five years an officer is to resign, and must not be re-appointed to the same place. If it were added that he was not to be transferred or promoted to another Staff appointment, the addition would prove of a very negative character, as a six months' interregnum every five years would make no practical difference. If, indeed, it were distinctly laid down that no officer serving five years on the Staff should be eligible for five years more Staff service during his life, then unquestionably a constant accession of fresh blood would be obtained, but few military administrators would recommend such a change. What officer would think it worth his while to go through the Staff College, if the employment for which he then qualified himself were to last five years and no longer? What officer would go upon half-pay in order to get an office which, or the like of which, he must never hold again, after the completion of the quinquennial period? How would it answer at the commencement of a war, for example, to refuse an officer a Staff position because he had before been on the Staff and knew something of his work? Nobody is better calculated to make a good assistant-adjutant-general, for instance, than an officer who has been a good brigade-major; but, if a rule, such as we suppose, were in operation, he must for ever renounce any idea of the higher place from the fact of his having completed a qualifying course in the inferior one.

It is thus to our minds clear that, in effecting a reform, we must not go altogether by rule and compass in the business. Staff appointments, subject to the new educational arrangements, must be left very much to the discretion of the Commander-in-Chief, checked and regulated by public opinion. The minor Staff appointments, on their vacation by the present occupants, will be filled by those who have passed the Staff College. What the Army has a right to expect in those higher offices where patronage is the sole ground of choice, is that they should not be left for generations in the hands of one particular set, as they have been for years and years past, but that a fair distribution should be made of the good things of the Service, among those whose capacity and intelligence fit them to discharge the duties that are involved.

Some observation begins to be made respecting the delay in re-appointing the Select Committee of the House of Commons, to which had been referred the organisation of our military establishments. The question is a most important one, the Committee a most competent tribunal to investigate it; and it is not satisfactory that its settlement should be procrastinated unnecessarily. Sir De Lacy Evans asked a question in the House on Thursday evening as to the intentions of the Government upon the subject. Whether or not the usual inaudibility of the gallant general was infectious we cannot say, but in recording the Secretary for War's answer, the report says, "Mr. S. Herbert's reply was addressed to the hon. and gallant gentleman, near whom he was sitting, and was inaudible in the gallery."

Those of our military friends who are opposed to the plan of filling regimental Lieutenant-Colonelcies by selection, will be pleased at hearing that the practical difficulties in the way of carrying out the project have induced the Secretary of State for War to pause before adopting the recommendation. It therefore appears not improbable that the purchase system will remain upon its present footing.

We have much pleasure in stating that Her Majesty has given orders for the promotion of Lord Seaton to the highest military rank, on the termination of his command in Ireland. There is no officer living who has been entrusted with a greater number of responsible positions, not only in the military service, but as a civil administrator, and in every one of them he has amply justified the confidence of his sovereign. A prominent actor in the great events which made the fame of the glorious old Light Division, fifty years ago, it might be expected that Lord Seaton should have long since sought the well-earned repose that now awaits him; but even at this period of his life, in the very command which he resigns to-day, he has shown all the physical activity of a young man, while (it is no disparagement to them to say so) the generals who served under him felt that at a field-day they could not hope to compete with such a consummate master of the military art. The whole Army will receive with pleasure the bestowal of the rare dignity of Field-Marshal upon one of its worthiest and most respected chiefs.

The Military Authorities have determined to increase the age at which candidates shall be eligible for appointment to commissions in the Army from 17 to 18 years; and no young gentleman under 18 years of age, can, after the 1st of July next, present himself for examination for a commission.

We hope we shall have no more "Great Tasmania" cases. To avoid the repetition of such "slave ship horrors," let us not have *retired* medical officers, like Dr. Fernandez, placed in charge; let not the ships be overcrowded; above all, let the Survey Committees do their work. The more the case is inquired into the worse it appears to be. Why Dr. Fernandez did not insist on sending the troops on shore at St. Helena, or on going into the Cape, does not appear. Neither Dr. Forsyth, Major Patten, nor Major Atkinson, appear to have visited the ship at all. The result is all the more discreditable, inasmuch as the officers say the soldiers "were the best conducted men they ever saw!"

Our excellent contemporary, *Le Moniteur de l'Armée*, has distinguished itself by a most extraordinary fidelity to the cause of the insurgent and mutinous sepoys in India. Without the smallest shadow of foundation for its assertions, the last number of that journal declares that Nana Sahib (who is probably dead), Feroze Shah (who is thousands of miles south of the supposed locality of the Nana's followers), and the Begum, who is a refugee in Nepaul, although it is not true that she has been surrendered to us, are at the head of "numerous partisans." It is further stated that we have directed against them numerous expeditions without result, and that one in particular, in the west of Nepaul, completely failed. We assure our contemporary these expeditions are as imaginary as the armies of the insurgents. Feroze Shah is still at large, wandering in the deserts of Central India with a few fugitives; the rest are "leather and prunella."

The rumour respecting the new Military Secretary, to which we gave currency, will, in all probability, be justified by the event. Major-General Forster will succeed Sir Charles Yorke, but will not immediately enter upon the duties of Military Secretary. For some little time he will continue in the office of Deputy Adjutant-General.

Sir James Yorke Scarlett will on Monday assume his new office of Adjutant-General to the Forces. His successor in the Portsmouth District, Lord William Paulet, will not take the command until the 1st of May; and, meantime, Major-General Forster, of the Royal Engineers, will act as Commander-in-Chief of the District.

Colonel Brook Taylor, formerly of the 85th Light Infantry, and for some time past Assistant-Adjutant-General of Militia, will succeed to the command of the 1st Infantry Brigade at Aldershot, with the rank of Brigadier-General. Brigadier-General Russell will command the 2nd Brigade, vacated by Major-General Spencer.

The Earl of Cardigan resigns the appointment of Inspector-General of Cavalry to-day, and Major-General Lawrenson enters upon the duties. Sir George Brown assumes the Irish command to-day; and from this all the other new Staff appointments which we have notified from time to time will take effect.

Colonel William Lygon Pakenham, now Earl of Longford, is expected at Southampton by the next Alexandria steamer, on his return from India, where, as we have already stated, he has been obliged to resign his office of Adjutant-General, from ill health.

Lieut.-Colonel the Hon. R. Charteris, of the Scots Fusilier Guards, has been appointed Aide-de-Camp to His Royal Highness, the General Commanding-in-Chief, in the room of the Earl of Westmoreland, who has resigned.

Captain Charles Williamson, 4th battalion 60th Rifles, has been appointed Aide-de-Camp to Major-General Pringle Taylor, the new Commander of the troops in Jamaica.

Captain W. Dutton Naper, 11th Regiment, has been appointed Aide-de-Camp to Major-General Bloomfield, commanding the 2nd brigade of the Dublin division.

We understand the friends of the late Director-General—and they are many—are about to form a committee for the purpose of erecting a memorial to be raised in honour of that excellent officer.

LATEST INTELLIGENCE.

HOUSE OF LORDS.—FRIDAY.

In answer to some observations from the Earl of Camperdown, Earl de Grey and Ripon stated that it was the intention of the Government to give a fair trial to the Whitworth and Armstrong guns, and to give the preference to that which should be the best.

A short discussion took place relative to the Chinese expedition.

HOUSE OF COMMONS.—FRIDAY.

In answer to a question from Mr. E. Egerton, Lord J. Russell stated that no supplementary treaty with France had yet been arranged.

Mr. Longfield asked the noble Lord what progress had been made in the settlement of the San Juan difficulty.

Lord J. Russell said that all that had yet been done was that a plan of settlement had been proposed on each side, but neither had yet been adopted. About 800 American troops and a battery had been established on the island, but the men were now reduced to 100 in number, and the battery had been removed. It was understood that 100 British mariners were to be placed in the island, in order that there might be a joint occupation by the two countries.

Mr. Adderley called for some information relative to the intentions of the Government as to a better apportionment of the expenses for the defence of the Colonies between the Imperial and Colonial Treasuries. Four millions, annually, were devoted to the military defence of the Colonies, towards which the Colonies contributed only four hundred thousand pounds, or less than a tenth. To defend these Colonies twenty-two thousand men were necessary. This force was scattered over the world, and when an emergency arose, and the mother country required all the men she could obtain, it was found necessary to raise German and Swiss legions. This state of things ought not to be allowed to continue; and understanding that a committee appointed by the late Government had investigated the subject, he wished to know whether the Secretary for War would consent to the production of their report.

Mr. Sidney Herbert admitted that the existing arrangements between this country and the Colonies upon the subject referred to were not satisfactory. Under these circumstances he would not object to the production of the report.

Mr. Maguire called attention to a petition from certain Polish Refugees who served in the Crimea, and represented that they had been unjustly treated in having a bounty, which they said was promised, withheld from them.

Mr. Sidney Herbert declared that the statements of the petitioners were altogether erroneous, and that they had been paid every farthing due to them, for which they had given a receipt.

Sir R. Peel made one of his dashing speeches about the annexation of Savoy; after which the House proceeded to the consideration of the financial bills of the Government.

A question respecting Naval Courts-Martial was put in the House the other evening by Captain Jervis, who asked upon what principle officers in the Royal Navy, tried by court-martial, were unable to obtain a copy of the depositions of that court until a year had elapsed from the date of the court-martial. Lord C. Paget said that the depositions were kept back in order to allow time for allaying animosities and ill-feeling; but any prisoner under trial was allowed to have the assistance of a friend. The whole proceedings took place entirely in public, and the prisoner and his friend had the opportunity of taking notes of all the evidence.

The Greenwich Hospital living of Bellingham, in Northumberland (patrons, the Lords Commissioners of the Admiralty), vacant by the resignation of the Rev. J. Thompson, on appointment to the flag-ship of Rear-Admiral the Honourable Sir Henry Keppel, K.C.B., has been conferred by their lordships on the Rev. R. P. Powell, chaplain Royal Navy; seniority, 1846. Mr. Powell's last service afloat was in the Waterloo, flag-ship at Sheerness.

In consequence of the vacancy in the representation of Harwich, caused by the elevation of the Hon. W. Campbell to the Upper House, a new writ must be speedily moved for. Mr. A. C. Crookshank, Assistant Commissary-General, who is nephew of Sir Fitzroy Kelly, and who is connected by marriage with the landed interest in the neighbourhood, is coming forward as a candidate, with fair hopes of success. Although a very young man for his rank, Mr. Crookshank has seen much service in the Crimea and elsewhere, and has gained for himself many friends, particularly in the Cavalry division before Sebastopol.

SEAMANSHIP AND NAVAL DUTIES.*

No better proof of the talent and zeal existing amongst the working officers of Her Majesty's Navy need be adduced than the number of able works and writings which have recently appeared upon the condition, the theory, and practice of their hard-worked and ill-paid profession. Apart from a mass of pamphlets upon the future organisation of the Navy, dealing with the questions of naval defences, standing naval forces, the efficiency of officers, and the discipline of the seamen, there has appeared almost annually a fresh work treating of the practice and theory of seamanship, in which sailor-authors have endeavoured, and not unsuccessfully, to simplify the science.

One of the most valuable of these well-intentioned works is the book just published by Lieutenant Alston, and it reflects no small credit upon the industry and powers of observation of an officer who, as midshipman, mate, and lieutenant, has doubtless had to labour hard in the long and tedious routine of "three watches" on board Her Majesty's ships of war. Old enough as a sailor to have learnt seamanship in that rough school which existed before steam thrust sailoring aside, Mr. Alston is still young enough to appreciate the wants of his comrades, and to desire to place within easy access of those anxious to acquire it the noble art of rigging, equipping, and handling a man-of-war. There was the day that all this was forced upon the young novice; he could not help becoming a sailor, otherwise than by quitting the Navy and turning guardsman or parson. In the present day, the want of practice in seamanship, the increased employment of steam, and the concentration of attention to naval gunnery, have, however unavoidable the circumstances may be, materially affected the seamanship of our men as well as officers. Happily at this juncture, the officers of the Navy appear to have determined that, what they could not acquire or perfect themselves in by practice, should not be lost sight of, but that, by a regular system of education in the "youngsters," and reading in the "oldsters," they would still preserve a knowledge which is most essential to all those who go to sea in ships, and without which the proudest steam fleet Great Britain can produce will be perfectly lost and powerless at any moment that a coal depôt should fail them or engines become useless.

To the midshipmen of the fleet, therefore, our author dedicates his work and principally addresses himself, whilst there is much in his book which captain and admiral may profitably peruse and note. To the midshipmen we cordially recommend, not only the curious manipulation of rope, block, thimble, and spar, by which a ship is rigged, and the manœuvring of sails and rudder, by which life is imparted to those huge vessels, containing a thousand living creatures and a hundred guns, but we urge attention to the kindly advice and earnest counsel of one whose heart must assuredly be in the right place. Our children must be sent to sea young, if they are ever to love and know that hard profession well and zealously; it is only early that they can be trained and broken in to its habits of discipline and its severe labours, as well as absence of luxury. But, in parting with them thus early, every parent knows how much the risks are increased of their doing well in after life as far as their moral and religious welfare is concerned. They may become good sailors; but it is best known to many an English household how many a one, who was the hope and pride of a family, has become an outcast, a wreck, a shame. The temptations are very great in the early stages of a young sea-officer's life, and he is often too young to know right from wrong, until wrong has led him too far astray to recover himself. The Admiralty have established a rule that the training ships for naval cadets should be stationed at such arsenals as Portsmouth, where vice rides rampant, and where our poor seamen and their wretched partners hardly attempt to disguise the frailties of our nature. The low theatre, the oyster-shop, cigar divan, skittle-alley, and still worse resorts are striving against the vigilance and care of a zealous captain, backed by some half-a-dozen able lieutenants and naval instructors. The contest is hardly a fair one, for boys will be boys; and we believe that the same causes which originally obliged us to break up the Royal Naval College at Portsmouth, will induce the Admiralty some day to train the cadets at a quiet sea-port on the coast of Great Britain; but, in the meantime, we know of nothing more likely to keep these young spirits in the straight path than awakening amongst them that noble spirit which Lieutenant Alston invokes in his introductory chapter. He there tells them how perfectly compatible with excellence in seamanship, and ability as a captain or admiral, is that noble spirit of practical faith, which has, in times past as well as in the present day, enabled so many gallant seamen to rule their conduct as "good, wise, and temperate English gentlemen." Let them see, let them read, that a man may fear his God and have faith in his Bible without being a milk-sop or a canting hypocrite; and those boys who are hereafter to be, in the troublous times a-head, the safeguard of our homes, will travel unscathed through the ordeals of their earlier days in the Navy, and be hereafter as great a comfort to England as they will be terrible to her foes. That is the tone we desire to see awakened in our Navy. We desire to see officers who shall be actuated by the high motive that they, next to their Maker, serve alone their Queen and country; who shall make their profession their study, glory in it for itself alone; and when the hour of trial or battle arrives, shall remember that, though the enemy be strong or the danger imminent, that they are as nigh heaven on sea as by land, and then do their duty as their forefathers did. Nothing will do more to bring about this healthy tone in the naval service than such works as the one now before us, coupled with the ensamples and action of leaders like that admiral who, after the terrrible combat on the Peiho, tells of every man's gallantry and sufferings except his own; and in bowing to defeat—(for who can do more than merit victory?)—nobly says, that it did not please God to crown his first efforts with success, and energetically prepares to renew his attack on his enemy.

The spirited publishers of Mr. Alston's work have brought it out at a price which must suit all sailor pockets; and the illustrations are so excellent as to render still more clear the terse and able explanations which the gallant author has appended to them. That the book is already a naval favourite we have every reason to believe, and we doubt not but that the mercantile marines of England and America will likewise appreciate its value, and that before long it will be found in the chest or pocket of every young sailor.

* *Seamanship and Naval Duties.* By Lieutenant A. H. Alston, R.N., H.M.S. Excellent. (Routledge, Warne, & Routledge, London.)

HER MAJESTY'S LEVEE.

Her Majesty held a Levee last Wednesday, which was very numerously attended. The following officers of the Army and Navy were presented on the occasion: Captain A. W. Adair, 52nd Light Infantry, on exchange from Coldstream Guards; Lieutenant-General Sir J. Aitchison, on being made a Knight Commander of the Bath; Lieutenant G. Airey; Captain Alston; Commander A. P. Arkwright, R.N.; Sir W. G. Armstrong, C.B., on appointment as Superintendent of Royal Gun Factories; Lieutenant G. Bannister; Lieut. P. D. Barclay, on appointment to the Royal Artillery; Capt. Barry, on his return from Bengal; Lieut. D. W. Becher; Lieut. H. J. Bell; Lieut. J. L. Bell, on appointment to the Royal Artillery; Colonel Bent, on appointment as Aide-de-Camp to the Queen; Ensign J. M. Benthall, on appointment to the Military Train; Captain C. S. B. Bivar, on promotion; Captain Blackett, on appointment to the Staff of the General Commanding in Ireland; Captain J. Bleaymire; Lieutenant J. Blockley; Mr. Bradford, Deputy-Inspector-General of Hospitals, on appointment as Hon. Surgeon to Her Majesty; Lieutenant H. M. Bromley; Lieutenant-General Sir T. Brotherton, on appointment to the King's Dragoon Guards; Lieutenant W. E. D. Broughton; General Sir George Brown, on appointment to the command of the forces in Ireland; Major P. A Brown, on return from active service in India; Lieut.-Colonel Browne, on promotion; Vice-Admiral Bruce, on appointment to command at Portsmouth; Dr. A. Bryson, R.N., Inspector-General of Hospitals and Fleets, on appointment as Honorary Physician to the Queen; Major Buchanan, on appointment to Depôt Battalion; Captain R. Williams Bulkeley, on his return from India; Cornet Thomas Williams Bulkeley; Lieut.-Colonel A. Butler, on return from foreign service; Lieutenant H. Campbell, R.N.; Major-General the Earl of Cardigan, K.C.B., Inspector-General of Cavalry, on appointment to the Colonelcy of the 5th Dragoon Guards; the Earl Cathcart, on accession to the title; Lieutenant H. Cautley; Commander W. C. Chapman, R.N., on return from the west coast of Africa; Lieutenant A. H. Chapman; Lieut.-Colonel the Hon. R. Charteris, on appointment as Aide-de-Camp to His Royal Highness the Duke of Cambridge; Major E. Chippendall, on return from India; Commander H. Christian, on return from foreign service; Lieutenant R. W. Chute, on appointment to the Royal Artillery; Captain Campbell Clark; Lieutenant S. C. Clarke; Captain the Hon. G. H. Windsor Clive, on appointment to the Coldstream Guards; Colonel Cooper, on return from service at the Cape; Captain R. Coote, R.N., on appointment to Her Majesty's ship Victory; Lieutenant W. H. Collins; Lieut.-Colonel T. R. Crawley, on promotion to the command of the 15th Hussars; Major-General Sir Michael Creagh, on appointment to 73rd Regiment; Colonel D'Aguilar, on appointment to Royal Horse Artillery; Colonel J. H. E. Dalrymple, on promotion; Lieutenant P. Dauncey; Lieut.-General Sir H. Ferguson Davie, on promotion; Lieut.-Col. Daubeny; Brevet-Major Dawson, on return from India; Capt. Deedes, on return from India and appointment to Staff; Captain A. D. Denniss, on return from India; Ensign H. F. Dent; Lieut.-Colonel Hon. D. F. de Ros, on promotion; Colonel Dick, on promotion; Major H. Dinning, on his return from India; Dr. Dominichetti, 75th Regiment; Major-General Hon. A. A. Dalzell, on promotion and appointment to the command of the Cork District; Dr. T. R. Dunn, R.N., Deputy-Inspector-General of Hospitals, on appointment as Honorary Surgeon to the Queen; Ensign A. D. Eden, on appointment to the 26th Cameronians; Ensign T. G. Ebrington, on appointment to 91st Regiment; Lieutenant A. Featherstonhaugh; Captain J. P. Field; Cornet T. P. H. M. Filgate; Ensign D. Forbes; Lieutenant A. Ford, on return from India; Col. Fraser, on appointment as Vice-Lieutenant of Aberdeenshire; Lieutenant Hon. H. T. Fraser, on appointment to Scots Fusilier Guards; Lieutenant G. G. H. Fulton, on return from India; Dr. Gordon, Deputy-Inspector-General, on return from foreign service; Captain A. W. Garnett; Ensign R. B. R. Glasgow; Commander H. D. Grant, R.N., on promotion and return from India; Sub-Lieutenant A. W. F. Greville, on appointment to the 1st Life Guards; Lieutenant-Colonel Hadfield, on promotion; Lieutenant A. B. Haig; Colonel E. Blagden Hale, on return from active service in India; Lieutenant F. C. Hallett, on appointment to the Royal Artillery; Major Harman, on his appointment as Assistant-Inspector of Volunteers; Major W. D. Harris; Lieutenant-Colonel B. Harrison, on appointment to the command of Prince Albert's Hussars; Captain R. Decy Hassard, on his return from India; Lieutenant H. Hawkes, R.N.; Lieutenant G. S. Hawthorn; Colonel Leith Hay, on his receiving the Companionship of the Bath, and on return from India; Lieutenant W. J. Heaviside; Lieutenant A. J. Hepper; Captain Herford, 90th Regiment, on promotion and return from India; Dr. J. Hilliard, on his return from India; Lieutenant E. C. Hilton; Lieut.-Colonel Hinde; Lieutenant Hook; Lieutenant Hoare; Lieutenant T. W. Hogg; Captain G. W. Holmes; Lieutenant T. Howard; Lieutenant G. Hughes; Major G. Hume, as Assistant-Inspector of Volunteers; Lieutenant H. Hunter; Mr. J. H. Ker Innes, Deputy-Inspector-General of Her Majesty's Hospitals, on receiving the Cross of the Bath, and return from foreign service; Captain G. E. Jarvis; Major Jervis, on promotion; Captain R. Johnson; Captain L. Jones, on return from service in India; Major the Hon. F. Keane, on appointment as extra Aide-de-Camp to His Royal Highness the Duke of Cambridge; Lieutenant Viscount Kilcoursie, Her Majesty's ship Hero; Captain F. Kingscote, on appointment to the Staff of the General Commanding in Ireland; Colonel E. King; Lieutenant F. W. Knight; Ensign E. B. K. Lacon; Mr. Laing, M.P.; Lieut.-Colonel F. Lambton, on promotion; Ensign Hon. C. G. Legge; Captain T. Leith; Lieutenant C. Levett; Lieutenant E. M. Lloyd; Dr. Logan. Inspector-General of Army Hospitals, on appointment as Honorary Physician to the Queen; Commander Lowther, R.N.; Lieut.-Colonel R. Luard, on appointment as Assistant-Inspector of Volunteers; Second Lieutenant E. H. B. Lysons; Sir J. Macandrew, on return from India; Major-General Day H. Macdowall; Lieutenant A. C. C. Mackenzie; Lieutenant J. Cosmo Macpherson; Lieutenant F. H. Macnaghten; Lieut.-Colonel M'Donald, on promotion; Lieutenant J. M'Loughlin; Lieutenant E. Mather; Major-General Matheson; Captain Maund; Lieutenant J. Mayon, on his return from Lucknow; Lieutenant J. T. B. May; Colonel G. Mayow, on promotion; Brevet-Major Meara; Lieutenant C. H. Mecham, of "Hodson's Horse," on return from India; Colonel Melvill, on return from India; Lieutenant E. Micklem; Lieut.-Colonel B. Milman, on promotion and return from India; Lieutenant E. S. Milman, on his return from India; Lieut.-Colonel C. Morris, on appointment as Inspector of Artillery Volunteers; Captain A. Morrogh; Assistant-Surgeon A. B. R. Myers, on appointment to Coldstream Guards; Captain E. D. Naas, on appointment as Adjutant of the Royal Carnarvon Rifles; Lieut.-Colonel St. John Neale, on return from Bosnia, and appointment as Secretary of Legation in China; Major Nelson, on appointment as Assistant-Inspector Rifle Volunteers; Major H. Nicoll, on his return from India; Lieutenant G. A. Noyes, on appointment to the Royal Artillery; Captain E. Ommanney, R.N., on return from foreign service; Lieutenant W. H. O'Shea; Sub-Lieutenant H. J. R. Osborn, on appointment to 1st Life Guards; Lieutenant C. H. Palliser, on return from India; Lieutenant H. G. Palmer, on appointment to Royal Artillery; Lieutenant W. H. Patton; Major-General Lord W. Paulet, on appointment to the command of the South-West District; Lieut.-Colonel Peacocke, on promotion; Lieutenant W. Peck; Lieutenant R. P. Pennefather, on appointment to Her Majesty's Indian Engineers; Lieutenant T. Phillips; Cornet Charles Phillips; Captain James Pope, on his appointment as Adjutant of the 2nd Royal Surrey Militia; Captain G. Brinewood Potts; Lieutenant Arthur Prinsep, on his return from India; Second-Master Thomas R. T. Quinn, R.N.; Colonel Julius Raines, C.B., on promotion, and receiving the insignia of the Bath; Lieutenant E. C. W. Raynsford; Ensign J. W. Rhodes, on appointment to 60th Rifles; Ensign Desmond F. F. Richardson; Lieutenant J. J. Robertson; Lieutenant H. Robinson; Lieutenant H. C. Rowcroft; Ensign F. P. Rowley, on his return from India; Major-General Rumley, on appointment as Vice-President of the Council of Military Education; Brigadier-General David Russell; Captain Russell; Lieutenant Christopher J. Russell; Captain G. B. Rutherford; Lieutenant H. T. T. Sandes, on appointment to the Royal Artillery; Lieutenant D. J. K. Sangster; Lieutenant G. C. Sartorius; Lieutenant Reginald Sartorius; Lieutenant Joseph Henry Satterthwaite; Lieutenant H. B. Savory, on his return from service in Bengal; Lieutenant F. Schack, on appointment to the Royal Artillery; Lieut.-Colonel Simpson, C.B., on his return from active service in India; Ensign B. Simner, on return from service in India; Lieutenant John H. Smith; Major W. H. Snell, Hon. Artillery Company, on promotion; Captain J. G. Sparke; Lieutenant F. P. Sprague; Cornet Thomas Astell St. Quintin, on appointment to the 10th Hussars; Captain W. Stacpoole, M.P.; Major Henry Miles Stapylton; Lieutenant James Stewart; Lieutenant J. C. Stewart; Major-General Stuart, on his return from Indian, and promotion; Lieutenant G. Strahan; Mr. Leopold Victor Swaine, on appointment to the Rifle Brigade; Lieutenant Sweny, on appointment to the Royal Marines; Lieutenant Peter G. Tarbet; Major-General Pringle Taylor, K. H., on being appointed Commander-in-Chief at Jamaica; Lieutenant-Colonel A. Taylor; Lieut.-Colonel Thackwell, on return from Canada, and appointment to the Staff in the South-Western district; Captain E. Tierney; Cornet Charles A. Tisdall; Lieutenant C. Trench; Captain James de Vic Tupper, on promotion and return from India (23rd Royal Welsh Fusiliers); Captain J. T. Ussher; Ensign F. H. Vanderzee; Lieutenant C. T. Vandeleur; Captain Vaughton, on promotion, Royal Marines; Lieutenant M. A. Walker; Lieutenant Charles Wallinger, Royal Engineers; Lieutenant E. T. Warry, Royal Artillery; Lieutenant J. W. Watkins, on return from India; Lieutenant W. H. Weldon; Lieutenant-Colonel Whitmore, on appointment as Military Secretary to the General Commanding in Ireland; Assistant-Surgeon J. Williams; Captain Charles Williamson, on being appointed Aide-de-Camp to Major-General Pringle Taylor; Colonel Eardley Wilmot, on appointment to be Colonel on the Staff, and to command the Royal Artillery in Canada; Lieutenant Charles Turville Wilson, Mititary Train, on promotion; Samuel Bampfylde Windsor, Chaplain to the Forces; Lieutenant V. Wing, on appointment to the Royal Artillery; Lieutenant Charles W. Whinfield; Colonel Robert Wood, on appointment to the brigade at Colchester; Assistant-Surgeon S. J. Windowe, on his return from India; Major Charles F. Young.

Lord Clyde has issued an order directing that steps may be immediately taken by officers commanding regiments, to cause all shakos and cavalry helmets in their possession to be sold, and the amount realised to be carried forward to the credit of Government.

MASTERS OF THE ROYAL NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The long-expected Circular, by which the masters were to gain so much rank and pay has appeared.

Let us examine the original pay of the master, and ask what has he gained by the recent Order in Council?

Nothing—literally nothing!

It has been allowed that he should reckon one year more time of second master qualified for master, sooner than he otherwise would if he happens to possess that year of time—2*s.* per day, which, under such circumstances, may be considered as equivalent to the gift of a few pounds from the Board of Admiralty.

With all our desire to see the surgeons of Her Majesty's Naval Service being done ample justice to, we cannot but compare the full-pay of the masters with that of the surgeons, as established by Order in Council of 13th May, 1859; to wit:

Servitude.	Master.	Surgeon.
10 Years	13*s.*	15*s.*
15 Years	15*s.*	18*s.*
20 Years	18*s.*	22*s.*
25 Years	20*s.*	25*s.*

It should be borne in mind that the surgeon never receives less pay than 15*s.* per diem, while a master under five years is only entitled to 10*s.*, and under ten years, 11*s.* 6*d.*

In pointing out the relative difference between the difference of pay of the surgeons and masters, it is not for the sake of invidious comparison, but to call attention to the fact of its having been declared in the House of Commons by the authorities that the Admiralty would do the same justice to the masters, &c., as they had recently done to the surgeons.

We will now compare the rank of the two classes of officers:

MASTERS rank	SURGEONS rank
with, but after, lieutenants in the Navy and captains in the Army.	with commanders in the Navy, and, according to dates of commission, with majors in the Army.
After 20 years' service, the master remains as above, and junior to an acting lieutenant, who has only passed a provisional examination for a lieutenant before the very master who was at that time his superior. The mate and acting lieutenant, being then only of 5 years' experience at sea and nineteen years of age, are to control the above old officer of 20 years' standing.	After 20 years' service, with captains in the Navy, and lieut.-colonels in the Army.

We now touch upon the relative difference of the half-pay of surgeons and masters:—

MASTERS.* Under 5 years, 5*s.*; above 5 years, 6*s.*; and over 6 years	*s.*	*d.*	SURGEONS.	*s.*	*d.*
to 10 years	8	0	to 10 years	11	0
„ 15 years	10	0	„ 15 years	13	6
„ 20 years	13	0	„ 20 years	16	6
„ 25 years	15	6	„ 25 years	18	6

Following the Order in Council relating "to masters' attendants" to have permanent rank with commanders, this may be very well, and a step in the right direction; but it is the master serving afloat who requires to be moved from his present degraded rank and position, which is most anomalous and unsatisfactory.

See third article of Circular, wherein it is provided that masters when "recommended, &c., for distinguished services," shall be considered eligible for promotion to the rank of commander, and that second masters shall be eligible to the rank of lieutenant; but as this is only recapitulating the Order in Council of 1846, and which we regret to state has never been carried into effect, it has thereby deprived the deserving officers ranking as masters of their just rights, more particularly during the late Russian war, when their services were so eminently successful on all occasions.

This supposed advantage, then, is no new boon, and probably will only be acted upon with the same amount of indifference for the future as heretofore, by the spirit of the Order not being carried into effect.

It is to be remembered that, in the evidence given last year before the Royal Commission, "there never had been a master promoted to the rank of commander in compliance with the Order in Council of 1846," although many of such deserving officers had been strongly recommended for such promotion, and many a gallant act to this day is without recognition, for want of interest. We utterly condemn the paragraph relating to second masters who have served seven years at sea, before they be eligible for promotion to the rank of lieutenant.

It is a positive insult to common sense. Contrast this with a midshipman, who is only to serve eighteen months as a naval cadet, and three years and a-half as midshipman, counting five years as sea time, and of the age of nineteen, to be eligible for the rank of lieutenant, while the second master, from the limits to his age of entry, would, in all probability, reach the age of twenty-three before he could receive such rank, however strongly recommended.

We have noticed with pleasure the excellent remarks of Sir James Elphinstone and Mr. Lindsay in the House, who were members of the Royal Commission, touching upon this important subject.

We trust these few remarks, given in earnest towards the well-being of the Royal Naval Service, may be promulgated throughout the length and breadth of the land, and that it may serve as a warning to many promising young officers in the merchant service to understand well their position before they are led away by "honied words" to leave the "gold" for the "gilt" gingerbread? I am, &c., J. M. K.

The president and members of the Dublin University Zoological and Botanical Association purpose presenting Captain Sir Leopold M'Clintock, R.N., LL.D., with an address, thanking him for what he has done towards advancing the knowledge of Arctic zoology and botany, accompanied with the presentation of a copy of the new *Encyclopædia Britannica*, bound in morocco, and enclosed in a ship book-case. The address will be moved by the Rev. Dr. Todd, and seconded by the Rev. Professor Haughton, F.R.S., V.P.

* It is the same with the masters' half-pay as the full under 10 years, having reduced the rates respectively of 5*s.*, 6*s.*, and 8*s.*, per diem, while the surgeon is never below 11*s.* per diem.

THE ROYAL GAMBIA MILITIA ARTILLERY.

Bathurst, Feb. 13, 1860.

The town of Bathurst, Gambia, for the last three weeks has been in an unusual state of excitement occasioned by the new Governor having embodied and called out by special ordinance for twenty-one days' training, with pay, the Artillery Militia of this colony.

The last three days of the period the Governor devoted to a review, ball practice, and an entertainment *al fresco*.

The review was a great success, but as the men were for the most part recruits, the result of the ball practice was anxiously looked forward to on the following day. To the surprise of all, the young gunners proved themselves apt scholars, for the shots told on a target of twelve feet square at a distance of 400 and 600 yards with surprising accuracy.

The next day the Colonel and Governor provided a substantial dinner for the corps under a large tree in front of Government House, where the men partook of their chier's hospitality. The *élite* of the colony were present, and added a charm to the gaiety of the scene.

The target, which had been riddled the previous day, was placed in a conspicuous position, and gaily decorated with flowers.

After dinner the Governor arose, and addressed the regiment as follows:—

"At home in England, at the conclusion of 21 days' training, the lord-lieutenant of a shire or county generally meets his regiment of Militia in this way, and gives the men paternal advice before they break up to their several occupations. As Colonel of this Colonial Corps, I now endeavour to carry out this time-honoured custom; and it affords me great satisfaction, as an old soldier, to express the admiration I felt at your performances yesterday.

"It was your first occasion of firing ball of 60 rounds; you placed 28 in the target, including 2 in the bull's eye (cheers); you naturally are exulted, and cheer at the recollection of your skill. But softly. Let us not take the credit to ourselves, but give it truthfully and generously to our instructor, the adjutant, through whose skill, zeal, and perseverance, you have been made in only twenty-one days very tolerable gunners. He has taught you a new trade, he has given you a knowledge of a scientific branch of the profession of arms of no common order.

"I take this occasion to make clear to your minds a practical illustration how theory blends itself with practice when the opportunity offers.

"I remarked last evening that whilst Nos. 1, 2, 3, and 6 guns made very fair practice, No. 4 gun never missed the target! This puzzled me, I knew we had no old soldiers in the ranks. I asked the name of the 'Captain of the gun,' to use a sea-going expression, and I was told it was Sergeant Delacombe, the schoolmaster of the Catholic school. There was much in this. Here is a man of education and observation who brings all his book-knowledge, the well-known laws of gravity, or the attraction of projectiles to the surface of the earth, to bear on his present practical duty of laying his gun so successfully as he did on a given object (cheers).

"I am pleased to hear, by your cheers, that you are not jealous of the public praise the sergeant has now received. Why not endeavour to emulate this skill and perseverance; you are all in your glorious youth; try to pass your leisure hours in acquiring useful information; associate with such companions as Delacombe rather than the crowd of unfortunate men I see nightly round the grog-shops. Remember that the first Stephenson began life as a common workman; indeed, I doubt if his wages were a dollar a day.

"I told you in the Liberated African yard one month ago the object of a Militia. A wise legislator bestows the blessings of peace on his country by being always prepared for war. Because I walk with a stick it does not follow I am to use it over my neighbours' shoulders; every right minded man shrinks from war. I repeat it, *bella, horrida bella*. As governor of this colony, I have had access to the records, where I see that my gallant predecessor Colonel O'Connor deeply felt for suffering humanity, and all the sad affliction caused in this town by the loss of those brave men who fell at Sabbagee. If it were in his power to recall life, right happy would his noble heart be to forego the honours bestowed by a grateful sovereign for his ultimate victory.

"You are now incorporated as a moral help to the colony; yesterday the sound of your guns reverberating over the country, spoke in a language well understood on both sides of this noble river. Let that suffice, and now having given you praise, take from me admonition. You talk too much in the ranks—the fault of all young soldiers: observe the Zouaves on parade; one voice is heard only, and that is Captain Antons. I stood on the deck of the Sharpshooter as she beat up the river; not a sound was heard except the calm and clear voice of Captain Gibbons. You are now at liberty to disperse to your homes and various callings; occasionally once a month I will require you to attend parade, to prevent your forgetting what you have learnt so well.

"Let us conclude by drinking only one toast, in which all here—ladies and gentlemen, non-commissioned officers and private soldiers—will join—

"'The health and long life of our beloved Queen—God bless her.'"

This toast was drunk with right good will by both races, African and European, the former continuing to wave their glasses in delight long after the Europeans had sat down. Lieutenant Ingram, of the regiment, now rose, and expressed his thanks to the Colonel, in the name of the men, for the entertainment. He was followed by Adjutant Nicholson, who drank the Governor's health.

This was the first public occasion the society of the Gambia had of meeting together since the late epidemic; and all felt hopeful, that the darkest hour being nearest the dawn, there was a good time coming for the social and commercial interests of this little satrapy.

On Saturday, Mr. C. Warner, a fine young man, about twenty years of age, manager of a linendraper's business, carried on under the name of Hopkins, in Chapel Street, Somers-Town, put an end to his existence by shooting himself with a pistol. He had been to drill with his corps, the South Middlesex Rifles, at Knightsbridge, and was seen walking along the street in his uniform in a very excited state. On his arrival home, he rushed up to his bedroom and shot himself.

MALTA.

SEAMEN'S INSTITUTE.

A bazaar, in aid of the funds of the above-named Institution, was held at the Auberge de Provence, Valetta, in the early part of this month. The time thus chosen for recruiting the funds of the Sailors' Home was a most wisely selected one, there being then no less than sixteen vessels of war of various sizes in harbour, a fleet which, even for Malta, was unusually large. The arrangements connected with this fancy fair were such as to reflect credit upon all concerned in it, and a special meed of praise is due to the managing committee, who seem to have overlooked nothing either in the original design or the subsequent carrying out of its details. The spacious Bazaar-room was tastefully ornamented with man-of-war flags, a species of decoration which is not only the readiest, but, when skilfully disposed, constitutes a most effective drapery. The stalls were so placed in line along either side-wall as to leave a considerable central space for visitors, which was bounded on the further end by a refreshment table, which was not only a great convenience but a source of profit as well. The ladies who presided at the stalls, and thus by their presence as well as by the discharge of onerous and tiresome duties, contributed much to the success of the good undertaking, were Lady Frederick | Kerr, the Hon. Mrs. Hobart, Mrs. Codrington, Mrs. Cleugh, Mrs. Forbes, Mrs. Fellowes, and Mrs. Semple, all of whom were assisted by young lady friends, fair adepts in the art of amateur shopkeeping.

The muster of naval officers was considerable—all four admirals being amongst the earliest arrivals — and, as many military officers were also present, the garrison was duly represented. The third being a day of free admission, many "blue jackets on leave" were present, whose trim appearance and orderly conduct as they went from stall to stall purchasing little presents for "sweethearts and wives" far away, could not fail to have attracted favourable notice, and prove—were proof necessary—that the exertions made for the welfare and comfort of seamen are not thrown away. The receipts, which at the close amounted to a sum little less than 400*l.* sterling, were not only a triumphant proof of success, but a valuable accession to the treasury of the Seamen's Institute, which will thus have been raised (at all events for some time to come) above the position of deriving its existence solely from the precarious source of voluntary subscription. The British seaman, ever gallant and courteous, owes a deep debt of gratitude, not only to the many friends of the Navy who sent contributions of work from various parts of the world, but to those ladies, who by unwearied attendance at the stalls for three successive days, proved unmistakeably the lively interest they took in the objects of the bazaar.

The governesses of the Sailors' Home may well be congratulated on the improved financial position in which it now stands, and the utmost care should be taken, by keeping up the supply of late newspapers and new publications, as well as a selection of modern books of travel and lighter literature, to make the house attractive to seamen by day, as well as a comfortable home for them by night.

GIBRALTAR, 21st March.

The Hannibal, 15 days out from Malta, arrived here on the 19th inst., having encountered adverse westerly winds during the first week of the passage. The leak in the screw-alley, the existence of which was known before the ship left Malta harbour, increased slightly during the rough weather. In addition to her ordinary complement, the Hannibal brought 97 supernumeraries:—of these, 9 were officers; 44, seamen and marines, invalided; 29, part of ship's company of the Tartarus, paid off at Malta on the 20th ult.; and 15 boys. The names of the supernumerary officers are as follows:—Chief-Engineer John Bell, invalided from the St. Jean d'Acre; Paymaster Charles L. Cartwright, with Assistant-Engineers James Hansford, John Craig, William Willings, and Gunner William H. Lewis, all late of the Tartarus; Assistant-Engineers Wm. Robinson, from the Orion, and William Clarke, from the Terrible; also Gunner William Bartlett, invalided from the London. The above officers and men were this day discharged from the books of the flag-ship to those of the Vulture, for passage home.

The squadron at The Rock now consists of the Hanniba (flag), Renown, James Watt, Agamemnon, Doris, Scylla, Vulture, Mohawk, and Quail. The Scourge is at Tangiers. The Firefly has just arrived, nine days out from England, and will in all probability proceed to-night to Malta. The Vulture is being inspected to-day, prior to her departure for England; she will start for Spithead, carrying supernumeraries, invalids, &c., either this evening or to-morrow morning. The war is of course the all-engrossing topic here, and every day ushers in news of later date. Notwithstanding the meeting between Muley Abbas and Marshal O'Donnel, report of which was brought by the steamship Persian (on the 16th inst.), from off the Teutan River; the utmost activity still prevails, and stores of all sorts are being landed, in despite of bad weather, from the transports laying off El Martin. The tramway to the town of Teutan is nearly completed, and every preparation for further hostilities is progressing, should the negotiations said to be going on daily between the Moorish authorities and Marshal O'Donnel prove unavailing.

The Archduke Ferdinand Maximilian and the Archduchess Charlotte of Austria paid a visit to the Spanish camp on the morning of the 18th inst. The Dandolo (steam-corvette) which conveyed the illustrious party arrived at the mouth of the River Martin on the evening of the 17th, but the Royal visitors did not land till the following morning. Marshal O'Donnel had a guard of honour in waiting on the beach at an early hour on the morning of the 18th, and received their Highnesses in person, accompanying them to Teutan, to camp, &c. The Dandolo returned to Gibraltar on Sunday evening, when the Archduke, Archduchess, and suite went on board the Elizabeth, bound for Gravosa and Trieste. The Governor of Gibraltar, accompanied by Lady Codrington, called upon their Imperial Highnesses on board on Monday the 19th, and in the afternoon of the same day the Elizabeth went to sea. A telegram from Malta announces the departure of the Delta on the 18th, in consequence of which she will not in all probability arrive here *en route* to England before to-morrow, the 22nd inst.

Digitized by Google

GIBRALTAR, 22nd March.

The Delta arrived here this morning *en route* to Southampton, carrying 150 passengers. From Bombay for Southampton :—Mrs. Atkinson, infant, and English female servant; Mrs. Dawe and 2 children; Mrs. Mason; Rev. Mr. Fairer; Mr. and Mrs. Harris, infant, and child; Mrs. Rance and infant; Mrs. Bates; Colonel Right Honourable C. D. Plunket; Mr. Dover; Dr. Arden; Mr. and Mrs. Young, 4 children, and native female servant; Mrs. Swaffield; Miss Penney and English female servant; Mr. Roberts; Major Prettyjohn and 2 English servants; Paymaster-Sergeant; 14 Dragoons; Mr. Croughan; J. Hubbard; J. Ross; T. Perkins; C. Whittle; H. Learmouth, and Miss Richards. From Alexandria :—P. King; Major Lake; Mr. Costello; J. Parkinson; J. Devine. From Malta :—Dr. Wallace, R.N.; Mr. Fittock; Sergeant McLeod, Sergeant Graham, Corporal Smith, 3 non-commissioned officers, Royal Artillery, and 27 men; Privates Hitch, Cressy, and Sellar, 19 women and 43 children, and 3 Firemen. Besides the above, there were for Gibraltar Messrs. Gemeno, Gonsalez, and Braine.

The Delta brings news of the close of the Ionian Parliament after a stormy and useless sitting, which began by debating "whether the Lord High Commissioner had, or had not, a right to open Parliament in person." After hearing each other to the full upon this point, the members went on to consider the "Civil List," and by no means approved of the proposed reduction of their own salaries by ten dollars a month each. The Budget was a signal for the production of Ionian eloquence evoked by the clash of separate insular interests. The duty on currants is a much vexed question, and one on which there is a great division of feeling. Those islands exporting currants are in favour of reducing the export duty on fruit. A commission has been appointed to regulate the financial state of the Ionian Islands. The Orion having met with an accident something similar to that of the Royal Albert at Syra some few years since, the engineer of the dockyard has been despatched from Malta to this ship. The Cadmus left on Sunday. The Lapwing is expected here from Malta, and the Firefly goes up to join the fleet this day. The Vulture left for England last night.

LORD SEATON AND THE IRISH COMMAND

The Lord-Lieutenant entertained at dinner on Thursday week Lord and Lady Seaton, and a large party, who were invited to meet the noble and gallant general previous to his retirement from the command of the forces in Ireland. In the course of the evening His Excellency proposed "the health of Lord Seaton" in his usual happy and appropriate style, to which Lord Seaton replied in the following terms :—"I beg to offer your Excellency my best thanks for the honour which you have done me in proposing my health, and for your kind remarks in referring to my services, military and civil. On this occasion, on which I see so many of my comrades and friends whom you have had the goodness to assemble and select, I cannot but avail myself of the opportunity to express the satisfaction and pleasure with which I have held, under your government and immediate control, the important command intrusted to me, and to repeat my acknowledgments for the arrangements which your Excellency sanctioned, by which the transaction of all military affairs connected with the civil government had been facilitated, and the departmental business advantageously carried on. Nor can I refrain from assuring your Excellency how much the officers employed with the divisions of troops in this country have been gratified by your attention to them, by the interest you have taken in all military concerns, in our reviews and field movements, and by your presence among us, so encouraging to soldiers in the discharge of their duties. I leave Ireland with the greatest regret,—Ireland quiet and prosperous beyond example at any former time,—where I have made so many friends and acquaintances, and where my five years of command have glided on so agreeably, satisfactorily, and almost imperceptibly, that I can scarcely believe my period of service completed. I have only again to express my sincere thanks for all your kindness, with my wishes for your health and happiness, saying to your Excellency and your guests 'Vale,' and hoping that the country may long continue to thrive under your Excellency's beneficent government."

An address was presented to Lord Seaton, on Thursday, by the Lord Mayor and citizens of Dublin, and noblemen and gentlemen of Ireland, who tendered to his lordship the expression of their "unfeigned respect, and of deep regret that the time had arrived which must terminate his official connection with this country, and more especially with this metropolis."

In the House of Commons this week an inquiry was made respecting the Government intentions respecting fortifications, which Lord Palmerston thus replied to : "The House is aware that a commission of military officers was last year appointed to consider what additional defences were necessary for the protection of our dockyards and of certain other points of our coast. The report of that commission is still under consideration by the military authorities, and has not in a final shape been submitted to the Government. There are two considerations connected with such arrangements : one is what defensive works it would be desirable to erect, supposing that the Government had an unlimited command of men to man them, and the other is what defensive works are absolutely necessary without requiring for their occupation a force larger than would leave a sufficient army to operate in the field. These are the questions which are still under consideration. As soon as the report is laid before the Government in a final shape, it will be the duty of Her Majesty's Ministers to take it into consideration, and to determine what course it will be proper to take upon it. When that has been done, I shall have to lay the report before Parliament, and to state what course the Government, after full consideration, recommends the House to take with regard to the matters to which it relates."

His Serene Highness Prince Victor Langenberg Hohenlohe, accompanied by Lieutenant Commander Hawke, R.N., visited Woolwich dockyard on Tuesday afternoon, and after an interview with Commodore Superintendent the Hon. J. R. Drummond, C.B., inspected the establishment.

THE INDIAN MEDICAL SERVICE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In common with the rest of the Indian Army, the medical officers of the Indian Service look with great anxiety for the Government plan, now understood to be near its maturity, for the re-organisation of the Queen's Forces in the East. On investigation, I find that the English Army medical officers number about 1025; those of the Indian Army, about 990. In the English Army, the proportion of surgeons to assistant-surgeons is much larger than that in the Indian Army; being, in the former, 1 to 2, while, in the latter, it is very little more than 1 to 3. This is a striking anomaly, and must be rectified if the two Services are amalgamated.

A point which will be found to embarrass the promoters of amalgamation of the medical Services is, that promotion in India is at present much slower than that in the English Army. The average time now for an assistant-surgeon of the Indian Army to get his promotion is 15 years; that of the English assistant-surgeon is 6 or 7 years. Now the question naturally arises, if amalgamation were to take place, would all assistant-surgeons of the Indian Army of above 6 or 7 years' service be promoted before their juniors of the English Army? If so, those juniors would have a fair right to complain, for their promotion would thus be retarded for several years; and yet, if some such plan were not adopted, old Indian assistant-surgeons would find comparative youths placed over their heads! It is true that if a hundred surgeons or so were added to the Indian Army, that is, if a hundred assistant-surgeons were promoted, as they well might be, the difficulty would be in some degree overcome; but still I apprehend all would not be smooth, and the authorities would have to exercise some ingenuity in reconciling the various interests concerned.

Then, again, there is the question of the warrants. It is well known that great dissatisfaction is felt by the Indian medical officers, because of the warrant which has been given them, on the ground of its inferiority to that granted to the English Army medical department.

It is true Sir Charles Wood asserted in the House of Commons the other night, in answer to Mr. Bayley, that, "as regards pay, rank, and position, the Indian medical officers are on a footing of perfect equality with those of the Queen's service;" but it would be easy to show that such is not the case, and that the Indian medical officers are on an inferior footing in many respects to those of the English Army.

Take, as one instance alone of this, the position of the late superintending surgeons of the Company's Army, men of an average of 32 years' Indian service. These will now rank *below* English deputy inspectors-general of 16 or 20 years' general service. Look again at the mode of promotion for distinguished service in the two armies. In the English Army an assistant-surgeon, who has distinguished himself, gets substantive promotion; a real boon. His brother assistant-surgeon in the Indian Army only receives brevet-rank, which carries no pay with it, and is in fact a useless honour.

That the new scheme for the Indian Army should smoothe down all asperities, and as much as possible assimilate the two Services, that it should even provide for their complete amalgamation in process of time, is, I believe, very desirable; but it is equally necessary that the plan should be announced before long, and that a large body of officers should be relieved from their present painful suspense.

I am, sir, your obedient servant,
AN INDIAN ARMY SURGEON.

THE LYONS MEMORIAL.—On Saturday afternoon, a meeting of the friends of the late Lord Lyons and the subscribers to the fund for erecting a suitable public memorial to his memory in St. Paul's was held in the library at Bridgewater House. In the room was a small model of the proposed memorial, the execution of which has been entrusted to Mr. Noble, with whose admirable works of this kind the public are familiar. The figure, which is to be of heroic size, will be in Sicilian marble, and, from the sketch model submitted to the meeting, which was warmly approved, is likely to be all that can be desired by the friends of the late gallant peer, or the profession of which he was so distinguished an ornament. Lord Clarence Paget took the chair at the meeting. After passing a glowing eulogium on the late peer as one of the ablest and most distinguished naval commanders which this country had produced, he proceeded to state that at the time the memorial fund was commenced it was thought desirable, for many reasons, to place a limit upon the amount allowed to be subscribed by each person, and the sum thus raised now amounted to 650*l.* The execution of the statue had been intrusted to one of the most able of the sculptors of the present day, Mr. Noble, who had undertaken the whole work for the sum of 1000*l.*,—an offer so moderate that he was sure Mr. Noble had made it in more than a spirit of friendship for the late lord, as such a sum would hardly do more than pay for the actual labour and material required for a work of such magnitude and importance. The fund, however, was still 350*l.* short of the amount required. He was sure that when it was made known that this small deficiency existed, it would soon be made up. It was stated that a most eligible site for the proposed monument in St. Paul's had been granted gratuitously by the Dean and Chapter.

A question respecting the Lucknow prize-money put in the House of Commons on Thursday evening elicited from Sir C. Wood the fact that the Treasury had proposed that a different scale should be adopted from that which usually prevailed, their suggestion being that the scale should be the same as that adopted in the case of the Russian war. The effect of the proposal would be to increase the shares of the private soldiers, and to diminish that of the officers of high rank. The authorities at the India Board stated they had no objection whatever to such an arrangement; and that was the state in which the matter stood at the present moment. Sir Charles could not say among what troops it was to be distributed.

The appointment of Mr. Longmore to the School of Medicine at Chatham will cause a vacancy in the camp at Colchester, of which that able surgeon is now P. M. O.

INEQUALITIES OF SERVICE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—On reference to the Army List of 1st Jan., 1860, I find that whilst there are 19 captains actually doing duty with their regiments who have served for 25 years and upwards on full-pay, there are the same number of majors who have served less than 13, and of lieutenant-colonels who have served less than 18 years on full-pay in the Army.

The average total service of these 57 officers stands thus :—lieut.-colonels, 16 years; majors, 10 years and 10 months; captains, 27 years; and I find that whereas one of the lieut.-colonels attained his present rank in 9 years and 2 months, and that one of the majors attained his in 7 years and 7 months : one of the captains now doing duty as such has actually served 43 years on full-pay, and 3¼ years on half-pay, and was present at the Battle of Waterloo.

Is this inequality caused by any mal-administration of the present system of promotion? or is it the necessary consequence of evils inherent in the system itself? or, again, supposing it to be the result of one or other, or of both of these causes, could it have been, or can it be now remedied by measures consistent with the maintenance of the present system?

My impression is that all of these questions may be safely answered in the affirmative, but I only venture to bring the subject forward now, in the hope that it may meet with the attention and consideration to which the long, and in many instances distinguished, services of the old officers concerned entitle it. I am, &c., A FIELD OFFICER.

MUNIFICENT GIFTS.—A benevolent lady, who withholds her name, has offered the National Lifeboat Institution to defray the cost (amounting to 720*l.*) of four lifeboats and their equipments, which the Society has decided to station at Newquay and St. Ives, in Cornwall, North Dundrum Bay in Ireland, and Buckie, on the northern coast of Scotland. Each of these places is noted for the frequency of the wrecks in its vicinity; and at some of the stations, much lamentable loss of life occurred during the heavy storms of last winter. A few years ago, the philanthropic donor witnessed a fearful shipwreck on the Irish coast. Shore boats, one after another, attempted in vain to reach the distressed ship, whose crew were lashed to the rigging. The shrieks of the poor men were indeed very pitiable; but when they saw that help from the shore had completely failed to reach them, their cries, which were distinctly heard on land, became piercing and distressing in the extreme, and were only silenced by the raging sea engulfing them in its bosom. The lady then determined that on a favourable opportunity presenting itself, she would defray the cost of several lifeboats, to be stationed on various points of the coast. That opportunity has come, and she has, with no small satisfaction, given prompt effect to her decision. Hereafter her gifts will be blessed and cherished in many a home which would otherwise be bereft of a husband, father, or brother.

We have more than once alluded in these columns to the administrative break-down in the transport of the Artillery to China in the Himalaya, and the intended return home of the 14th Light Dragoons in the same ship. Mr. Sidney Herbert has given in the House of Commons the following explanation. "On the 22nd of December last, he said, a telegram was received from Lord Elphinstone, proposing that the Himalaya, the ship in which the batteries of Artillery were sent to Alexandria, should bring home the 14th Dragoons, which he proposed to send by ships which were going from Bombay to Suez. We accepted that proposal, and upon the following day telegraphed our acceptance of it, sending duplicate telegrams, one by Trieste and the other by Marseilles. It is impossible for me to say what happened to those telegrams. All we know is that they were never received at Bombay; and it is very difficult now to ascertain their fate, because there is a fault somewhere in the telegraph line through the Red Sea, which prevents the transmission of messages by it. The Himalaya remained at Alexandria a certain time, after which, mainly owing to the activity of the officer in command at Aden, another steamer was procured, that which had been sent by Lord Elphinstone having broken down on the passage between Bombay and Aden, and the batteries were sent on. The Himalaya did not return entirely empty, because she proceeded to Malta, and there embarked a battalion of Infantry, which she conveyed to Barbadoes, to relieve a regiment which was about to come home. It is difficult to estimate the expense which has been caused by the delay at Alexandria. The Himalaya is a Queen's ship, and therefore there has been no question as to demurrage; but I must say that I do not see what precautions could have been taken beyond sending telegrams in duplicate by two different lines. The letters which we wrote at the same time of course arrived much later, and, as our telegrams were not received, Lord Elphinstone despatched the 14th Dragoons by the long sea passage instead of sending them, as he had proposed, to Suez."

On the motion of Mr. Bathurst, the following return has been ordered by the House of Commons :—Return, showing the number of persons who have received Queen's commissions as quartermasters of the militia of Great Britain and Ireland, specifying their rates of retired full pay, half pay, or other pension for previous line or other service, and for what length of service, together with their rates of disembodied pay.

We (*Staffordshire Advertiser*) are informed that a few days ago Government inspectors were surveying Cannock Chase, with a view to test its availability as a site for the proposed midland arsenal and depôt for 10,000 troops.

Colonel Lindsay has given notice in the House of Commons that after Easter he will move for leave to bring in a bill to repeal the Act of 49th of George III., which renders it illegal to exceed the regulation price of commissions.

A number of Armstrong guns which recently passed through the various descriptions of proof at the practice range are now being shipped at the Woolwich pier for Milford Haven, Pembroke, and other coast stations. The Lord Panmure, screw steam-vessel, is also shipping ammunition, &c., for Ireland.

The steam ram La Normandie has just been launched at Cherbourg. A new vessel exactly similar, to be called the Napoleon I., is to be laid down in the slip just vacated by La Normandie.

COLONEL HARRIS.—Another Waterloo officer has been removed by death, making the fifth recorded within the last four weeks. Col. Sir T. Noel Harris, K.H., died at his seat in Kent, on Friday last. The deceased officer was born in 1785, and was son of the late Rev. Hamlyn Harris, rector of Whitehall, Rutlandshire. The gallant colonel served in the campaigns of 1811, 1812, and 1813 in the Peninsula, during which he was in constant active service. In the autumn of the latter year he served with the allied armies in Germany and France up to the surrender of Paris in 1814, and was present at the battles of Grossbergen and Dennewitz, and the battles at Leipsic of the 16th, 18th, and 19th of October, 1813. He passed the Rhine with the army under Marshal Blucher in the January of the succeeding year, and was present in all the battles and engagements up to the capitulation of Paris. The late Sir Thomas Harris served in the campaign of 1815, and was present at Quatre Bras and Waterloo, at which last battle he lost a limb, and was otherwise severely wounded, and had two horses shot under him. For his military services he was made a Knight of the Royal Hanoverian Order in 1830, and was knighted in 1841. He had received the silver war medal and four clasps for his services in the Peninsula, and had received also the Order of Military Merit of Prussia, and the Orders of St. Anne and St. Vladimir of Russia, for services before the enemy. He for some years held the military appointment of chief magistrate at Gibraltar, and was one of the Grooms of Her Majesty's Privy Chamber. He attained the rank of lieutenant-colonel in the army in February, 1823, and retired on half-pay in 1830.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BELLAIRS—March 23, at 38, Eccles Street, Dublin, the wife of Major Bellairs, Deputy-Assistant Adjutant-General, of a son.

BRIGHT—Feb. 11, at Dinapore, Bengal, the wife of Lieut.-Colonel Bright, H.M.'s 19th Regiment, of a son.

BULLER—March 25, at Manor House, Farnham, the wife of Captain J. Hornby Buller, of a daughter.

CARDEN—March 26, at Belle Vue House, Camberwell, the wife of Captain Carden, H.M.'s 77th Regiment, of a daughter.

DUFF—March 23, at Paris, the wife of Thomas Fraser Duff, Esq., Captain 1st Kincardineshire (Fetteresso) Rifle Volunteers, of a son.

DUCKET—March 22, at Nightingale Lodge, Anglesey, Hants, the wife of Clarke A. Ducket, Esq., Surgeon R.N., of a son.

EVELYN—March 22, at Onslow Crescent, the wife of Colonel Evelyn, of a son.

HARRIS—March 23, at Updowne Eastry, Colonel Sir Thomas Noel Harris, K.C.H.

HOGGE—March 23, at Nice, of bronchitis, aged 73, Colonel Hogge, K.H. (late 20th Regiment), of Glocester Place, Hyde Park, and of Aylsham, Norfolk.

Advertisements.

ROYAL ITALIAN OPERA, COVENT GARDEN.
SEASON 1860.

MR. GYE has the honour to announce that the OPERA SEASON of 1860 will commence on

TUESDAY, APRIL 10TH,

and to submit to the Nobility, Gentry, Subscribers, and the Public, the following outline of the arrangements:—

ENGAGEMENTS.

Madame GRISI,
Who is engaged for Twelve Nights, and who will appear in those parts which have chiefly contributed to her great popularity, during her long continued, and brilliant career.
Mademoiselle DIDIÉE,
Madame TAGLIAFICO,
Madame LEVA,
Mademoiselle RAPAZZINI,
(Her First Appearance in England.)
Mademoiselle GIUDITA SYLVIA
(Her First Appearance in England.)
Madame MIOLAN-CARVALHO,
(Her Seventh Appearance in England.)
Madame PENCO,
(Her Second Season in England.)
AND
Mademoiselle ROSA CSILLAG,
(From the Imperial Opera of Vienna, her First Appearance in England.)

Signor MARIO,
Signor LUCHESI,
Signor NERI-BARALDI,
Signor GARDONI,
AND
Signor TAMBERLIK.

Signor RONCONI,
Signor TAGLIAFICO,
Signor PATRIOSSI,
Signor POLONINI,
Signor VAIRO,
Signor ROSSI,
Monsieur ZELGER,
Signor GRAZIANI,
AND
Monsieur FAURE,
(From the Opéra Comique, Paris, his First Appearance in England.)
Principal Danseuse,
Mademoiselle ZINA RICHARD.

THE FULL ORCHESTRA AND CHORUS OF THE ROYAL ITALIAN OPERA.

Director of the Music, Composer, and Conductor, MR. COSTA.
Chorus Master ... ... Mr. SMYTHSON.
Poet ... ... Signor MAGGIONI.
Leader of the Military Band ... ... Mr. GODFREY.
Leader of the Ballet ... ... M. NADAUD.
Maître de Ballet ... ... Mons. DESPLACES.
Stage Manager, MR. A. HARRIS.
The Scenery by MR. WM. BEVERLEY, MR. GRIEVE, & MR. TELBIN.
Artistes Costumiers—MADAME MARZIO & M. HENNIER (*from Paris*).
MRS. JAMES AND MR. COOMBES.
The Machinery by ... ... MR. SLOMAN.
The Appointments by ... ... MR. PRESCOTT.

On the First Night of the Season will be performed Meyerbeer's New Grand Opera,

D I N O R A H,

being for the Seventh time on the Italian Stage.
Dinorah, ... Made. MIOLAN-CARVALHO.
Her Seventh Appearance in England.
Corentino, ... Signor GARDONI.
Hoel, ... Monsieur FAURE.
For whom the part was originally composed by M. MEYERBEER, his First Appearance in England.

On TUESDAY, April 17th,
Mademoiselle ROSA CSILLAG, of the Imperial Opera, Vienna, will make her First Appearance in England, in Beethoven's Opera,

F I D E L I O,

which will be produced for the First time at the New Theatre.

In the month of May, will be represented, for the First time on the Italian Stage in England, translated and arranged expressly for the Royal Italian Opera, Flotow's Opera, entitled,

S T R A D E L L A,
The Principal Character by Signor MARIO.

Madame Grisi will make her First Appearance this Season, in Donizetti's Opera,

L A F A V O R I T A,

which will be produced for the First Time at the New Theatre, with New Scenery, Costumes, and Decorations.

During the Season will be performed, for the First Time these Eight years, Cimarosa's Opera,

IL MATRIMONIO SEGRETO,
Supported by

Madame PENCO, | Signor GRAZIANI,
Maddle. DIDIÉE, | Signor GARDONI,
Made. MIOLAN-CARVALHO, | Signor RONCONI.

In June will be produced, for the First Time in England, an Operetta, in One Act, composed by Victor Massée, adapted from the French, entitled,

LE NOZZE DI GIANNETTA,
The Principal characters by
Madame MIOLAN-CARVALHO and Signor RONCONI.

One of the greatest features of the present Season will be the Reproduction of Meyerbeer's Grand Lyric Drama,

L E P R O P H È T E,

the First time of its being performed these Five years.
The representation of this great work, when originally produced at the late Theatre, formed one of the most remarkable epochs of its career as an Italian Opera, for, when considered as a combination of Dramatic construction, Lyrical composition, and as a vehicle of great Scenic effects, this Opera stands unrivalled. The increased area of the Stage of the New Theatre, together with the many advantages arising from the improvements in its construction, will afford means of representing the several Great Scenes in this Drama not hitherto possessed by any Theatre in Europe.
Jean of Leyden, ... Signor TAMBERLIK.
Fides, ... Mdlle. ROSA CSILLAG.

In addition to the above New Productions and Revivals, other Works of the Répertoire of the New Theatre will be given, and with the following alteration from the casts of last Season:

LES HUGUENOTS .. Meyerbeer.	LA SONNAMBULA .. Bellini.
IL DON GIONANNI .. Mozart.	Amina, first time, Madame MIOLAN-CARVALHO.
IL BARBIERE DI SI-VIGLIA .. .. Rossini.	I PURITANI .. .. Bellini.
Rosina, first time, Madame MIOLAN-CARVALHO.	LA TRAVIATA .. .. Verdi.
OTELLO .. .. Rossini.	MARTHA .. .. Flotow.
LUCREZIA BORGIA .. Donizetti.	Lady Henrietta, first time, Md. PENCO.
LA GAZZA LADRA .. Rossini.	IL TROVATORE .. .. Verdi.
Ninetta, first time, Madame PENCO.	ZAMPA .. .. Herold.
Fernando, first time, Monsieur FAURE.	FRA DIAVOLO .. .. Auber.
MARIA DI ROHAN .. Donizetti.	Zerlina, first time, Madame MIOLAN-CARVALHO.
NORMA .. .. Bellini.	IL GIURAMENTO .. Mercadante.
	RIGOLETTO .. .. Verdi.
	Gilda, first time, Madame PENCO.

In order to strengthen the Casts of the Operas of *Don Giovanni* and *Les Huguenots*, Madlle. ROSA CSILLAG has kindly consented to sing the part of Elvira in the former, and Made. MIOLAN-CARVALHO that of Marguerita de Valois in the latter.

FOUR CONCERTS.—In addition to the foregoing Operas, FOUR GRAND CONCERTS will be given during the Season; Two in the Morning and Two in the Evening. One, at least, of these Concerts will take place in THE NEW FLORAL HALL.

On the occasion of the Second Concert, which will take place in the Theatre, will be produced, for the First time in England,

GLUCK'S CELEBRATED LYRIC WORK, ENTITLED
O R P H E U S A N D E U R Y D I C E.
Illustrated with Costume, Scenery and Decoration.

To these Four Concerts all Subscribers to the Opera, whether to the Boxes or Stalls, will be entitled to the privilege of Free Entrée.

THE SUBSCRIPTION WILL CONSIST OF FORTY NIGHTS.

Terms may be known on application to Mr. PARSONS, at the Box-Office, under the Portico of the Theatre.

Also of Mr. MITCHELL, Messrs. EBERS, Mr. HOOKHAM, Messrs. CHAPPELL, Mr. BUBB, Bond Street; Mr. SAMS, St. James's Street; Mr. HAMMOND, and Messrs. CRAMER & Co, Regent Street; and of Messrs. KEITH & PROWSE, Cheapside.

OFFICES—41, Moorgate Street, London, E.C.

INCREASE OF CAPITAL.

By the issue of 12,500 new shares of 5*l.* each, 1*l.* to be paid on application, 1*l.* 10*s.* on allotment, 1*l.* 5*s.* four months after allotment, and the remaining 1*l.* 5*s.* eight months after allotment.

This Company was formed in September, 1858, with a subsidy of 24,000*l.* per annum, for the purpose of establishing a postal service between Australia and the several provinces of New Zealand, and has already afforded periodical and regular commercial intercourse between the towns and settlements of Sydney, Auckland, New Plymouth, Nelson, Wellington, Canterbury, and Otago.

The service commenced on the 1st November, 1858, and has continued uninterruptedly to the present time, giving entire satisfaction to the general and local Governments of New Zealand and the colonists generally. The growing requirements and rapidly-increasing importance of the several places frequented by the Company's vessels, and the stimulus imparted to commerce by the institution of regular communication having necessitated an extension of the service, a supplemental contract was entered into, in April last, with the Colonial Government, raising the subsidy to 30,000*l.* per annum, at which sum it at present stands.

The fitness of the steamers for the service in which they are employed has been amply proved, they having invariably performed their voyages under the stipulated times. The colonial establishments at Sydney and the ports of arrival and departure in New Zealand are complete, and have been organised with due regard to economy and efficiency.

Although the business and connexions of the Company had to be created, and the opposition of established and competing interests subdued, the progress of the trade, and the results of the working to the present time have been highly satisfactory. The Directors were enabled, at the first Annual Meeting, held 23rd September last, to declare a dividend of 7½ per cent. per annum (clear of income-tax) for the first nine months from the payment of call, after making ample provision for depreciation, repair, renewal, &c.; and they are now in a position to propose a second dividend at the same rate to the 31st December last.

The experience of each successive voyage has shown a marked and steady improvement in the traffic returns, the ratio of increase being such as might be expected from the astounding development of the colony of New Zealand, as exemplified in the subjoined table, from the returns of trade, showing the relative value of exports, imports and duties, during the first quarters of the years 1858 and 1859:

	1858.		1859.
Imports	£136,130	...	£360,820
Exports	92,168	...	253,702
Customs...	31,126	...	41,884

The English population of the colony in 1851 was 49,738; in 1858, 95,254. The land under cultivation in 1851 was 29,140 acres; in 1858, 140,946 acres. Cattle in 1851, 34,787; in 1858, 137,188. Sheep in 1851, 233,043; in 1858, 1,523,316. Horses in 1851, 2890; in 1858, 14,912.

Under the original contract with the Imperial Government, giving the Company the 24,000*l.* per annum, they were bound to send out four vessels to perform the service stipulated for; but the additional subsidy of 6000*l.*, and a still further one of 3500*l.*, conditionally granted, and to commence on the 21st of October next, render it necessary to despatch immediately to the colonies a fifth steamer, of 800 or 900 tons register. By adopting this course, the Directors will be able satisfactorily to meet the exigencies of the Company's rapidly increasing trade; and while fully performing the conditions of their contract, afford the required accommodation to the colonists. The Government, in consideration of the Company undertaking the additional services, have agreed not to grant subsidies to any other vessel during the 10 years for which the present contract was concluded.

On the recommendation of the directors, the shareholders have empowered them to increase the capital by issuing 12,500 shares of 5*l.* each, to be fully paid up in the manner above mentioned. The subscribed capital will thus stand at 187,500*l.*, of which 125,000*l.* will be paid up, leaving 62,500*l.*, as at present, uncalled.

The business already secured to the Company will afford a handsome dividend on the aggregate paid-up capital. Calculations of prospective profit are unnecessary, the experience of the past working conclusively proving the remunerative character of the undertaking. Moreover, the Directors have succeeded in obtaining a considerable reduction in future premiums for insurance, while the average cost of coal is now much lower than the estimate. And when it is remembered that these constitute the two most important items chargeable against revenue, it will not appear an unreasonable expectation that the earnings of the Company's fleet from their passenger and goods traffic alone will very shortly be sufficient to meet every expense, including colonial and home establishments, leaving the subsidies intact.

By order, JAS. WORLEY, Secretary.

Applications for shares may be sent to the Secretary, at the Company's Offices, 41, Moorgate Street; or to Messrs. Field, Son, and Wood, Stockbrokers, 9, Warnford Court, Throgmorton Street, London, E.C. Each application must be accompanied by a payment of 1*l.* per share, in part of the 2*l.* 10*s.* payable on allotment. In the event of any less number being allotted, the balance (if any) will be immediately returned.

N.B. Interest at the rate of 5*l.* per cent. per annum will be allowed on all sums paid in anticipation of calls.

Full reports may be had at the Company's Offices.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Inter-Colonial Royal Mail Steam Packet Company (Limited).

Gentlemen,—Having paid the sum of —— pounds to Messrs. Lubbock, Forster, & Co., to the credit of the Company, I request you will allot me —— new shares of 5*l.* each, which, or any less number allotted, I hereby agree to take, and to pay all calls thereon, in accordance with the terms mentioned in the prospectus.

[Here state name, profession, address, and date.]

If not convenient to make the deposit with the bankers of the Company, this entire form, accompanied by cheque for the amount of the deposit, may be sent by post to the Secretary.

LYONS MEMORIAL.—AT A MEETING

held at Bridgewater House on Saturday, March 24, Rear-Admiral Lord CLARENCE PAGET in the Chair, the following Resolutions were agreed to:—

Proposed by General Sir George Brown, and seconded by Admiral Walcott,

That the model submitted by Mr. Noble be approved of, and that the Committee be requested to continue to receive subscriptions for erecting a marble monument in St. Paul's Cathedral.

Proposed by Thomson Hankey, Esq., M.P., seconded by A. H. Layard, Esq.,

That this Meeting be adjourned to Saturday, May 5, for the purpose of then deciding on proceeding with the work.

The following subscriptions have already been received:—

THOMSON'S REGISTERED FOUR-WHEELED DOG CART excels other inventions of the kind in commodiousness, elegance, lightness, and economy. Manufacturer and inventor, WILLIAM THOMSON, Coachbuilder, Perth.

In addition to the testimonials already published in *The Field* and elsewhere, the following have been recently received:—

"Dalhousie Castle.

"SIR,—I have tried the Dog Cart several times, and am much pleased with it. I consider it a most perfect carriage of its kind. W. MAULE RAMSAY, Colonel.

"Jan. 20, 1860."

"Edmondstown, Feb. 29, 1860.

"MR. THOMSON,—I have received the Dog Cart safely. In justice to you, I must say that a neater, lighter, or roomier cart I have not seen. I shall have pleasure in recommending it. I remain, &c., &c.,

"ARTHUR COSTELLO, Captain, late 7th Dragoon Guards."

Drawings will be forwarded on application.

DIVING APPARATUS.

C. E. HEINKE, SUBMARINE ENGINEER, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

MR. MARKWELL, Wine Merchant to Her Majesty, Nos. 35 to 40, & 45, Albemarle Street, and 4, Stafford Street, Piccadilly, London, W. Naval and Military Messes supplied.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, HORATIO MORGAN, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

THE KOH-I-NOOR (OR MOUNTAIN OF LIGHT) CANDLE.—The name of KOH-I-NOOR has been appropriately given to a new and BEAUTIFULLY TRANSLUCENT CANDLE, manufactured only at the WEST OF ENGLAND SOAP AND CANDLE WORKS, AT PLYMOUTH. They are preferable in appearance to Wax or Spermaceti; are equal in brilliancy of light and durability in burning; and are supplied at *one-third less cost* than Wax and Spermaceti. West of England Soap and Candle Works, Plymouth.

NOTICE.—"BEWARE OF IMITATIONS."

LEA & PERRINS' "WORCESTERSHIRE SAUCE" is pronounced by Connoisseurs to be a most agreeable addition to every variety of dish.

*** See the names of LEA & PERRINS upon every Label, Bottle, and Stopper.

Sold by Messrs. CROSSE & BLACKWELL, London; and by Dealers in Sauces generally.

Sole Manufacturers—LEA & PERRINS, Worcester.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission,
Author of "Adulterations Detected," "The Urine in Health and Disease," &c.
Wimpole Street, 20th January, 1860.

CURES OF ASTHMA, COUGHS, &c., BY

DR. LOCOCK'S PULMONIC WAFERS.—From Mr. Oldham, Chemist, Market Place, Wisbeach. "Gentlemen,—From the great quantity of your Wafers I have sold, I have had an excellent opportunity of witnessing their effects, and I have much pleasure in being able to inform you that several obstinate cases of asthma and coughs have been completely cured by their use; and indeed, their efficacy is general in diseases of the lungs. W. T. OLDHAM."

DR. LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs.

TO SINGERS AND PUBLIC SPEAKERS they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.* per box. Sold by all medicine vendors.

TEETH REPLACED, DECAYED TEETH RESTORED.—Mr. A. ESKELL, Surgeon Dentist, supplies patented Incorrodible Teeth without extracting Teeth or stumps, on his never-failing and painless principle of Self-adhesion; rendering detection impossible. Articulation and mastication guaranteed. Decayed Teeth rendered insensible to pain, and stopped with his Osteoplastic Enamel—of the same colour as the Teeth, permanently useful, and lasting unchanged for years, (a most important discovery in Dental Science!) Loose Teeth fastened, &c. Hours, Ten to Six. Consultation free. Charges strictly moderate. 314, Regent Street (opposite the Polytechnic), W., and Bennett's Hill, Birmingham.

A BOON TO NERVOUS SUFFERERS.

THE NEW MEDICAL GUIDE for gratuitous circulation. A NERVOUS SUFFERER having been effectually cured of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, by following the instructions given in the MEDICAL GUIDE, he considers it his duty, in gratitude to the author, and for the benefit of others, to publish the means used. He will, therefore, send post free, on receipt of a directed envelope, and two stamps, a copy of the book, containing every information required to make work, if he values his health, happiness, and peace of mind."—*British Critic.*

Address, JAMES WALLACE, Esq., Wilford House, Burton Crescent, Tavistock Square, London, W.C.

ROYAL TYRONE ARTILLERY.—TO PENSIONERS, BANDSMEN, AND OTHERS.—WANTED, a competent person for the appointment of TRUMPET MAJOR on the PERMANENT STAFF. One who can instruct on the Drum and Fife also, preferred.—Applications, with testimonials, to be forwarded to the ADJUTANT at Moy, Co. Tyrone, Ireland.

ROSS, CAITHNESS, SUTHERLAND, AND CROMARTY RIFLE MILITIA.

WANTED, for the Permanent Staff of the above Corps, a BUGLE MAJOR. Besides having a knowledge of the Bugle, he must also be able to play the Cornopean, and lead a small Brass Band. Application, with testimonials, to be made to ADJUTANT STEWART, Dingwall, Rosshire.

WANTED, a BAND SERGEANT for the 2nd Battalion 25th Regiment. Reference to be made or testimonials sent to President of Band Committee 2nd Battalion 25th Regiment, Preston, Lancashire. All communications to be post-paid.

A DRILL SERGEANT WANTED, for a Rifle Company in the East Riding of Yorkshire. He must be thoroughly competent to Drill the Company, and produce unexceptionable testimonials of character and competency from his late commanding officer. One who has obtained a First-Class Certificate from Hythe would be preferred. Apply by letter only (prepaid) to T. P., 40, St. James's Street, London, S.W.

DRILL AND MUSKETRY INSTRUCTOR WANTED, for the 2nd Herefordshire Volunteer Rifle Corps, a competent person, with proper testimonials of ability and character from his Commanding Officer, and a certificate from the School at Hythe. He will also have to act as Armourer.—Apply, with terms, to the Commanding Officer, Ross, Herefordshire.

VOLUNTEER GUARDS.—Gentlemen of the required standard (six feet and upwards), desirous of JOINING THIS CORPS, are requested to state at what hours they could most conveniently attend drill, as arrangements are now being made with a view to meet the requirements of all. Candidates are urged to apply without delay, that they may qualify themselves to act with the Corps at the ensuing Review, and on other occasions during the summer.

The uniform may be seen, and the cost ascertained at 38, Conduit Street, W.

The Drills at present are on Mondays from 7 to 9 P.M., at Allen's Riding School; on Wednesdays, from 5 to 7 P.M., and on Fridays from 7 to 9 P.M., at Hungerford Hall, Strand; at all of which personal applications are received. Communications to be addressed to E. F. D. WALSHE, Esq., Hon. Sec., 38, Conduit Street, W.

QUEEN'S (WESTMINSTER) RIFLE VOLUNTEERS, PIMLICO DISTRICT.

HEAD QUARTERS—29, Upper Belgrave Place, S.W.

Members' Names, and Subscriptions and Donations received at the above address, every day between the hours of 8 A.M. and 6 P.M. The Adjutant will also be in attendance every Monday, Wednesday, and Friday, at 11·30 o'clock, A.M., to transact the current business of the Corps. Members drill every morning from 8 till 11, and on evenings from 7 till 9, at the Carlton Ride.

GROSVENOR, Lieut.-Colonel.

LONDON IRISH RIFLE VOLUNTEERS. OFFICES, 7, JOHN STREET, ADELPHI.

The Members of the Corps will assemble for drill during the ensuing week as follows:—At Burlington House, Piccadilly, on Tuesday, from 5 to 7 o'clock: at Hungerford Hall, on Tuesday evening, from 7 to 9; and on Thursday, from 5 to 9 o'clock: at Wellington Barracks, St. James's, in uniform, from 5 to 7 o'clock. Members are enrolled at the offices daily, from 10 to 3 o'clock; where all information regarding the Corps may be obtained, and where all communications for the Council are to be addressed.

DONEGALL, Commandant.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

PATRONS:—
Her Most Gracious Majesty the QUEEN.
His Royal Highness the PRINCE CONSORT.

At every Examination for Naval Cadetships since May, 1857, Pupils from this Establishment have taken the first or second places. Those Pupils who have entered the Army and Military Colleges have been equally successful.—Applications to be addressed to the Rev. E. BURNEY, M.A., Gosport.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, 12th March, 1860, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Warren, Trollope, Payne, Loveridge, Passy, Haggarth, Horne, Orton, Harrison, Higgins. 41 Naval Cadets passed from North Grove House in 1859.

W. BELL, Chaplain;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

AT THE LATE COMPETITIVE EXAMINATIONS, the following successful Candidates passed directly and on First Trial from Mr. DE BURGH'S MILITARY ESTABLISHMENT, Dublin, no pupil of his having failed.

ROYAL MILITARY ACADEMY, WOOLWICH.—Examination commencing January 4th, 1860.—Mr. W. J. Galway; Mr. J. L. Morgan; Mr. R. A. Livesay; Mr. Carlile Greer.

Mr. Galway obtained 4433 Marks and the Tenth Place; and Mr. Morgan 4108 Marks, and the Fourteenth Place. These high Marks were obtained without the aid of Classics as a subject of examination, those for Mathematics alone having been 2555 and 2110 respectively.

The gentlemen who passed from the UNIVERSITY OF DUBLIN were also pupils of Mr. De Burgh.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—Examination commencing January 16th, 1860.—Mr. H. P. Hardinge obtained the SECOND PLACE on Marks less by 32 than those of the First Place.

ROYAL MILITARY COLLEGE, SANDHURST.—Examination commencing November, 1859.—Mr. O'Neil Power, Tenth Place.

DIRECT COMMISSIONS IN THE ARMY.—Examination commencing February 1st, 1860.—Mr. A. Clarke (Marks 5334); Mr. G. Yco (Marks 3805); Mr. Meredyth (Marks 3640); Mr. Burton (Marks 3140); Mr. Knox (Marks 2715); Mr. L. Norman; Mr. J. Mansfield.

Mr. DE BURGH'S references to the parents and relatives of present and former Pupils include the following:—Right Hon. and Rev. the Lord Bishop of Meath; Right Hon. Joseph Napier; Ven. the Archdeacon of Meath; Major-General Gough, C.B.; Colonel Lake, C.B.; Colonel Morgan, R.A., Swansea; Colonel Knox, J.P., Thurles.

N.B. Immediately after Easter there will be a few vacancies for Resident Pupils.

19, Trinity College, Dublin, and 6, Harcourt Street, Stephen's Green, Dublin.

ARMY, INDIA CIVIL SERVICE, &c., EXAMINATIONS.—A Military Tutor, who has several CANDIDATES for the above reading with him for the NEXT EXAMINATION, will be happy to MEET WITH OTHERS, resident or non-resident. His Establishment can be highly recommended by persons of very high standing, whose sons have distinguished themselves. One obtained nearly the highest number of marks at the India Civil Service Examination last year. The best masters on every branch of education are in attendance, and the house, library, and general management afford every facility for rapid progress without cramming. Terms, &c., on application to M. A., GREGG'S, Porchester Library, Queen's Road, Bayswater, W.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, officers who had read at this Establishment have twice come out first on the list.

Apply to Captain LENDY, Sunbury, S.W.

EDUCATION.—BRIGHTON.

FRENCH, GERMAN, AND CLASSICAL SCHOOL, 15, Eaton Place, Kemp Town.

PRINCIPAL—MR. L. W. SCUDAMORE, B.A.

Pupils prepared for the Army, Civil Service, Oxford and Cambridge Examinations, &c. French and German constantly spoken. Terms moderate. References to the friends of pupils, many of whom have taken high places at the above Examinations.

NAVAL CADETS, MARINE CADETS, WOOLWICH, ADDISCOMBE, and the various other Examinations.—A limited number of gentlemen thoroughly and expeditiously prepared by a talented staff of professors. A seaman rigger and drilling serjeant-major attached to the establishment. Terms moderate and inclusive. Address Mr. ARTHY, 6, Sussex Place, Southsea, Portsmouth.

THE ROYAL NAVAL SCHOOL, for qualifying the Pupils (whether sons of Naval and Marine Officers or not) for the Naval, Military, and Indian Services, and for mercantile or other pursuits. The Easter holidays will terminate on the 11th of April next. By order of the Council,

ALFRED EAMES, Secretary.

New Cross, Kent, S.E., March 27, 1860.

MILITARY EDUCATION IN GERMANY. A Member of the University of Oxford, experienced in tuition, is forming a Class for the above object. Any officers who may wish their sons to join him may obtain particulars and references by addressing, TUTOR, the Union, Oxford.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"NEW GUN.—Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times.*

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

NICOLL, 114, 116, 118, 120, 142, 144, Regent Street, W.; 22, Cornhill, E.C.; and 10, St. Ann's Square, Manchester.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,

JAMES COULSON & Co.,

Beg to intimate that their only London Depôt is at No. 46, PALL MALL, S.W.,

A few doors West of the Army and Navy Club.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARR, Chemist, 171, High Holborn, London, W.C., in bottles, 1s. each.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of CROSSE & BLACKWELL, 21, Soho Square, London, W.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND

Are at all times to be obtained of

PHILLIPS AND COMPANY, TEA MERCHANTS,

WE may have a magnificent and efficient Army, a well-drilled and numerous Militia, and swarming legions of eager Volunteers; but if Great Britain loses her supremacy at sea in war time, she loses her commerce, her colonies, her garrisons, her great dependencies, and distant empires. Let the command of the Channel be taken from England for a week, and she runs the risk of invasion in Ireland and of insult on all her seabord. The whole fabric of our social life is so complicated—our nervous system has become so concentrated—that shocks which were before merely irritating and alarming—such as that given by the apparition of the Dutch fleet in the Medway, or by the American cruisers chasing our linen ships in the Channel, and looking in at Belfast or Newcastle—would now be very serious national calamities. As to our trade and commerce, thanks to the judicious manœuvring of the diplomatists at the Paris conference, a right which Great Britain claimed at sea was abandoned in a moment of generous cosmopolitan philanthropy, and the result will be that in the next war we shall see such exports and imports as we may like to engage in carried under a neutral flag. But it is useless to expatiate on the consequences, in all the varied forms of shame and humiliation to which this country would be exposed, notwithstanding the utmost perfection in her land defences and military forces, should our Navy, by any combination of circumstances or disastrous chances, suffer a defeat in a general action, which would leave her rival a temporary command of the seas. We might—no doubt would—retrieve our fortunes under a better system; but in proportion to the length of time which elapsed ere we re-asserted our predominance, would be the mischief inflicted on our interests and on our prestige, and if much delay took place, injuries irreparable and ruinous might be inflicted on the empire. Sir Howard Douglas well observes, that the manning of our Navy was so promptly accomplished by compulsory service in former days that the dangers which menaced the country were averted oftentimes by the consciousness of the enemy that our fleets were prepared to meet them. That source of security has departed. France, relying on her maritime inscription, and mailed men-of-war and rostrumed steam-galleys, scarcely conceals her belief that she is at last in a condition to strike blow for blow with us, and is as little anxious to suppress the desire which animates her for the advent of the conflict. All her professional literature is directed to confirm her hopes, and to show reason for the faith that is in her; nor will she relax her efforts till she is in a position—in the words of an official of the French Admiralty, whose essay in the *Revue Contemporaine* has been duly quoted in the official *Moniteur de la Flotte*—to fight "not for predominancy, but for equality on the seas." Now, we say at once, we can have no rival near that throne. If France lost her fleet to-morrow, she would still be a tremendous military power, capable of shaking the whole continent of Europe. If England were deprived of that

> Unde nil magis generatur ipso,
> Nec viget quidquam simile aut secundum,

an empire falls to dust. What are we doing in order to place these French calculations among the finer sorts of pure mathematical abstractions? We are building ships—and more ships.

We are hammering away at a gong-like machine, called the Naval Reserve, which makes much noise, but has very little else in it; and we are raising up boys who will be good sailors some ten years hence. "It will," says Sir Howard Douglas—and what he says deserves attention, even though his words are but the indorsement of a truism or a platitude,—"it will signify little that we have abundance of ships and of the materiel for arming them, if the brave men who are to serve in them are not forthcoming at the time of need," so long as France can get 120,000 sailors from all classes of her maritime press-gang machinery, backed up by any number of gunners and soldiers. In case of need we are in an unsafe position, if we rely on a present force of 65,000 men, without any Reserve at all; for we must scatter that force broadcast over all the seas of the world, whilst France can collect and mass her marine battalions in the ports of her own coast, and abandon her little colonies till she has leisure to look after them, on the expected annihilation of our marine. Let us suppose that we are the best friends in the world, and that all these speculations are purely hypothetical. Our neighbour indulges in them: so do we. Amid the ablest and most experienced of those who see the danger of our present condition and propose to remedy it, is Admiral Bowles, the second edition of whose pamphlet, "A Militia our only Real Naval Reserve," first published in 1856, is now before us, accompanied by the draft of heads of a bill for raising such a force, dated 1st June, 1854. The gallant officer who, after a long career of active service, was at the head of the Coast Guard for nearly 20 years, saw the "Continuous Service men" broken up in consequence of a pecuniary pressure on the Ministry, in 1856; and, seeking for some measure to "place our Naval Reserve beyond the power of political and parliamentary fluctuations," worked out the heads of the bill before us. The bill in effect provides that the Queen, by Order in Council, may constitute, in portions of the maritime counties, to be called Naval Militia districts, a body of Naval Volunteers, the deficiencies in the appointed number of which are to be made up by ballot in the district. The men of this Naval Militia are to be enrolled for five years, with a bounty of 6*l.*, and a monthly pay of 2*s.* 6*d.*, with the same pay and allowances, when called out for training or service on shore, as the ordinary militiaman, and when they are at sea they are to be paid the same wages as men in the Royal Navy according to rating. The Naval Militia are to be divided into two classes: the first, men under 30 years of age and childless, to serve as may be expedient for the full term of enrolment; the second, men over 30 years of age, and men having two or more children living, to serve only on shore, or within 100 leagues from shore, if called out. The districts so formed shall cease to be included in any subdivision under the Militia laws, nor shall any Militia ballot be held for it; and all persons in it who would be exempted from the Militia in case of ballot, shall have the same privileges in respect to this force, except seamen, seafaring men, and free watermen of the Thames.

It is obvious that if the Volunteers do not enter freely, and the ballot is resorted to in order to make up the deficiency, that our Reserve will assume something of the character of a conscription. But what are our present Reserves? Why 3000 men of the Coast Guard, the expense of which has risen from £450,000 to £900,000, since it was transferred from the Customs to the Admiralty! The Coast Guard contributed 2400 men to the Baltic fleet; but many were old and past their work; and Admiral Bowles more than hints that Sir Charles Napier's description of them was only too true. In reference to the other schemes, that of the Committee of 1852 and the Reserve instituted by the Royal Commission in 1859, this is our author's opinion:—"The first is by universal consent allowed to be the worst possible description of local militia, and the latter, although presented to the public with every advantage of explanation and encouragement, has so totally failed, that after three months of most strenuous exertions, the total number of entries, good, bad, and indifferent, scarcely exceeds 500;" and he hopes "that while time is still afforded us, we may desist from trying any longer these dangerous and delusive experiments, and resort to the only plan which long experience teaches us to be perfectly successful in our military system, and which may therefore be applied with tolerable confidence to our Naval arrangements."

If it be true that our great bounties, our promises, the advantages of an unusual and most liberal character offered to our sea-faring population, have only induced about 500 sailors to enter their names on the lists of the Naval Reserve, and that the only auxiliary force consists of 3000 Coast Guardsmen, it is assuredly time for the Government, in the face of contingencies of which all men are speaking, to consider and to act upon any plan which promises to prepare us for the crisis that may be at hand, of which M. De Mondy warns us: "Nous ne voulons pas lutter avec l'Angleterre pour la domination des mers, mais seulement pour leur indépendance;" or, of that still higher ambition, which the *Revue Européenne* discloses in hailing the advent of the day when "l'opinion emue demandera une augmentation de personnel et ne reculera pas devant un budget, qui doit nous donner une *prépondérance* Européenne."

Our leading contemporary last Thursday copied an extract, headed "Defences of the Channel Islands," which contains several inaccuracies. It is true that the Duke of Wellington attached great importance to the fortification of the Channel Islands; but after careful reconnaissances, his Grace and Sir John Burgoyne came to the conclusion that Alderney was the only one of the group which could be put in a state to hold out against a superior force. It was resolved, therefore, to take steps to make that island as strong as possible; and after twelve years' labour, Alderney is a little Gibraltar. It is only two miles long, and three-quarters of a mile broad, with shores very difficult of access, fortified by powerful self-sustaining works at short distances from one another, and is altogether so powerful and compact, that it is safe to consider it all but impregnable with a garrison of 2500 men, of which 400 are Alderney militia.

Its harbour will not hold fifteen line-of-battle ships, nor even five. It is a very small harbour, but with deep water, only suitable for single cruisers, or a very small squadron of three or four vessels; it forms a secure coaling station, look-out, and place of refuge for our cruisers, and a shelter for any of our merchantmen chased by an enemy. But the chief value of Alderney is, that it is exactly opposite Portland, and only about fifty miles from it, so that the stations form, as it were, the gates of the English Channel, and enable us completely to command it. It is also of immense importance as a place of shelter to our merchantmen if chased by French cruisers or privateers, as, by possessing secure strongholds on both sides of the Channel, sailing vessels can fetch either one or the other whatever may be the direction of the wind; they cannot, therefore, be cut off from their own shores, which is the way in which our merchantmen mostly fell a victim to the St. Malo privateers'-men during former wars.

It was intended originally to have constructed harbours both at Guernsey and Jersey, and that of St. Catherine's was commenced with that view; but Sir John Burgoyne always counselled the authorities to concentrate all their efforts upon Alderney.

There is a good, substantial, casemated citadel at Jersey (Fort Regent), and a fine position at Guernsey, defended by some permanent works; these islands are however so close to France that it would be easy to throw a large force now-a-days into either of them which we should have no power to resist, and these works would fall sooner or later; but Alderney, though it is closer to France than either, is so small and compact that we have been able to fortify it in such a way as to prevent an enemy landing at all, and we therefore expect to be able to hold it against any force.

The other two islands must depend for their safety very much upon our fleet.

THE ARMY.

2nd Life Guards. The mortal remains of the late Earl of Longford have been removed from town for interment in the family vault in Ireland. A troop of the regiment escorted his remains to the railway station.

2nd Dragoon Guards. We have to record the death of Captain J. T. Ling, of this corps, which occurred on his passage home on the 28th of February. Captain Ling entered the Service in 1846 in the 14th Light Dragoons, with which regiment he served in the Punjab Campaign of 1848-9, and acted as Major in the Turkish Contingent in the Russian War. He was promoted to be Captain in the 91st Regiment in 1855, and on the formation of the 18th Hussars, was transferred to that regiment, from which he exchanged into the Bays with Captain Jarvis. By his death Lieutenant Logan and Cornet Lever obtain promotion without purchase. The latter officer is son of the popular novelist.

3rd Dragoon Guards. Colonel Smith, C.B., is on sick leave to May 31.

8th Hussars. Cornet Rawlins is on sick leave to Mussoarie Hills to the 30th of September.

12th Lancers. Colonel Pole has arrived home from India, preceding his regiment.

14th Light Dragoons. Mr. Hunt (the ex-Sergeant who wounded Cornet Browne on discovering that the latter was improperly intimate with Mrs. Hunt) has been committed for trial at H.M.'s Supreme Court at Bombay, and will be arraigned at the ensuing sessions. The offence, says an Indian paper, for which Mr. Hunt is committed, is not so much an offence against Cornet Browne as against the laws of the country to which Mr. Hunt belongs; and no disinclination on Cornet Browne's part to prosecute Mr. Hunt can possibly be allowed to prevail.

15th Hussars. Detachments which had been ordered to Roscommon, in aid of the civil power, have been directed to Clare, where their services are required to preserve the peace at the election for that county.

16th Lancers. This fine regiment was inspected on Saturday last by Major-General the Earl of Cardigan, K.C.B., at York Barracks. Unluckily, the weather was most unfavourable, a heavy rain falling without intermission nearly the whole of the day, and consequently the troops were not turned out for field exercise. Lord Cardigan inspected the regiment in full marching order, and afterwards saw the rides of the officers, non-commissioned officers and privates in the riding-school. He next inspected the stables, the appointments and trappings of the horses, and the barrack accommodation, regimental books, and performed the other usual routine duties appertaining to the office of inspector. The noble earl expressed himself highly satisfied with the admirable state of efficiency and discipline in which he found the regiment, circumstances of which he should not fail to make a very favourable report to his Royal Highness the Commander-in-Chief. After partaking of luncheon with Colonel Foster and the other officers of the regiment in the mess-room, the Major-Gen. proceeded to the railway-station, when he left for London by the 4·5 p.m. train. It is understood that the regiment is to be removed to Aldershot, but the exact date when this will take place has not transpired.

17th Lancers. Captain Gibsone has arrived home in charge of drafts of regiments from Calcutta.

Royal Artillery.—Brevet-Major Palmer's 1st battery, 1st brigade, Garrison Artillery, has left Woolwich for Shoeburyness, to relieve Brevet-Major Clifford's 7th battery, 2nd brigade, ordered to proceed to Dover. Two additional batteries are about to be added to the Depôt at Woolwich, to be named the 9th and 10th batteries, for the purpose of embodying the corps of non-effective men employed in the garrison, such as officers' servants, and men who, under ordinary circumstances, are not subject to parade and drill. Since the disuse of corporal punishment, which has been unknown at Woolwich for many months past, it is stated that the crime of desertion is of less frequent occurrence, as verified by the official returns from the corps of Royal Artillery and Royal Marines, as well as the other divisions of the Army stationed at Woolwich.

Captain Inglefield's (No. 1) and Lieut.-Colonel Dixon's (No. 2) batteries of the 35th Brigade, now stationed at Plymouth citadel, are under orders to proceed to the Channel Islands to relieve two batteries ordered to Portsmouth, where they will do duty for two batteries of the 3rd Brigade, who are to join the head-quarters in the citadel. An exchange of batteries has been sanctioned between second Captain L. B. Brabazon, of the 4th Brigade, and second Captain J. T. Brown, of the 2nd Brigade. Referring to General Regimental Order of the 5th November last, the restrictions upon discharges by purchase is removed for the present, and applications received by commanding officers may, if they have no objection to the discharge being granted, be forwarded for the necessary orders.

The following removals and appointments of master-gunners has been approved by His Royal Highness the General Commanding-in-Chief:—Master-Gunner James Watson, from Green Castle, Lough Foyle, to be master-gunner at St. Mawes' Castle, vice Mitchell, appointed to the Military Train; Battery Sergeant-Major Samuel Sloane, of the Coast Brigade, to be master-gunner at Green Castle, Lough Foyle, vice Watson; Quartermaster-Sergeant William Swanston Sprent, of the Coast Brigade, to be master-gunner at Scarborough Castle, vice Dawson, about to be pensioned. Several detachments of Royal Artillery have recently left Woolwich to complete the batteries stationed at Malta, Gibraltar, and Corfu.

In consequence of the large number of cadets, comprising the theoretical and practical classes at the Royal Military Academy, Second Captains T. C. Molony and Brackenbury have been appointed as additional instructors in artillery at that institution. The following general regimental order has been issued from the Adjutant-General's Office, Royal Artillery:—Experiments having been made for the purpose of testing the enduring power of the 68-pounder gun of 25 cwt., it has been found that guns of this description may be fired continually with service charges at high angles of elevation.

Recruiting for the Royal Artillery having been entirely suspended, orders have been issued for the immediate return of the recruiting parties of that regiment in Ireland to their respective batteries, where their services are much required.

Royal Engineers. — The following alterations have recently taken place in this corps:—Colonel Wulff, late Commanding Royal Engineer at Harwich, has retired from the Service on full pay, with the rank of Major-General, and Colonel W. C. Hadden has been appointed to the command at Harwich; Colonel Alexander Gordon has been appointed Commanding Royal Engineer at the Cape of Good Hope, in succession to Major-General Bolton; Lieut.-Colonel Laffan has been appointed to Portsmouth; Captain and Brevet-Colonel J. L. A. Simmons, consul at Warsaw, and Major G. A. Leach, on the surveying service, Dublin, promoted to Lieut.-Colonels; Major White, ordered from Devonport to the Cape of Good Hope; Major the Honourable Hussey Fane Keane has succeeded Lieut.-Colonel Maude (appointed to the Master of Horse Department in Her Majesty's Household), as extra Aide-de-Camp to His Royal Highness the General Commanding-in-Chief; Captain Morrison, lately arrived from the West Indies, has been appointed to Sandhurst College; Captain the Honourable J. J. Bury is on sick leave; Major Elphinstone, being specially employed, has been placed on the supernumerary list of the corps; Captain Duff, from Aldershot, appointed to the command of the A troop Royal Engineer Train at Chatham; Lieutenant Dixon, ordered from Dover to Halifax; Lieutenant Goodall, from Dover to Jamaica; Lieutenant Blunt, from Dover to Shorncliffe; Lieutenant Maud, from Chatham to Dover; Lieutenants Halkett and Oldham, from Chatham to Sheerness; Lieutenant Fellowes on passage to the West Indies.

Although no official announcement has as yet been made to that effect, it is generally understood that the Adjutant-General's department of the Royal Engineers will shortly be removed from Chatham to Whitehall.

According to present arrangements, the 18th company of Royal Engineers, under the command of Captain R. Hawthorn, now stationed at Weymouth, will shortly return to head-quarters, Brompton barracks.

The A troop of the Royal Engineer Train, under the command of Captain R. W. Duff, R.E., will vacate their quarters at Chatham on the 16th inst., and proceed to Aldershot, where they will be stationed during the summer.

A court-martial has been held at Chatham Garrison on a driver of the Royal Engineer Train, named Geo. Hamilton, a man of exceedingly bad character, for desertion. He was sentenced to be again marked with the letter "D," to be imprisoned for 168 days, and to be placed under stoppages until the value of his kit is made good. He will undergo his term of imprisonment in Fort Clarence, Rochester.

Grenadier Guards. On Tuesday the 1st battalion moved from the Wellington to Portman Street Barracks, and the 2nd battalion from Windsor to St. George's Barracks. Six officers and 110 men of the 2nd battalion have gone from Dublin to the Curragh for musketry practice.

Coldstream Guards. The 1st battalion has moved from Portman Street to Wellington Barracks, and the 2nd battalion from the Tower to Windsor.

Scots Fusilier Guards. The 2nd battalion has moved from St. George's Barracks to the Tower.

2nd (or Queen's) Regiment was at East London at the end of February, waiting embarkation for China.

14th Regiment. The 2nd battalion will proceed from Mullingar to the Curragh Camp on the 12th instant, there to be stationed. The left wing of this regiment arrived in the Indiana, Captain Wright, at Gibraltar, on the 27th ult. The detachment numbers some 300 in all, and is commanded by Major Holworthy. A long sea voyage, irksome even to sailors when unemployed, is, as may well be believed, still more so to soldiers, who are there like fish out of water. Under circumstances like these the gallant 14th have already discovered the advantage of being embarked in a ship commanded by an officer such as Captain Wright, who, to the frank, manly bearing of the British sailor, adds the considerate mind and urbane manner of a well-bred man. To permanently secure the services of such officers for the transport branch of the public service would be a boon to the Army in general, inasmuch as naval officers, not having had any experience of passenger ships, are by no means—however well disposed—so capable of making passengers comfortable and happy.

20th Regiment. Four officers and 142 men have left Dublin for the Curragh for rifle practice.

26th Regiment. Seven officers and 172 men have left Dublin for the Curragh for rifle practice.

28th Regiment. It has been decided to send this regiment by bullock train to Nusseerabad, which will occupy fully two months, as the regiment is 1300 strong, and as only 25 men can be forwarded at once on the line between Mhow and Nusseerabad. Lieut. Webb is on his passage home.

31st Regiment sailed from Bombay for China on the 18th of February.

40th Regiment. A detachment of the 40th arrived at Fort Pitt Hospital, from Australia, on Sunday night, having disembarked from the Wellesley. The number of men who embarked was 24 of all ranks, with 13 women and children, the whole in medical charge of Assistant-Surgeon Mines. The Wellesley sailed from Melbourne on the 25th December, the passage home occupying 99 days. During the voyage one of the troops died, and another, who had become insane, is supposed to have jumped overboard, as he suddenly disappeared.

41st Regiment is shortly expected to arrive in the Perseverance and Himalaya at Portsmouth from Jamaica. The service companies numbering 27 officers and 683 men will proceed to Aldershot.

44th Regiment. The depôt is under orders to leave Colchester Camp for Southtown, Yarmouth.

47th Regiment. A general court-martial was held at Shorncliffe, on Wednesday, to try private James Curtin, for striking Lieut. R. P. Hawkes a violent blow on the cheek. It appears Lieut. Hawkes had given Curtin three days' confinement to Camp for being twice late at parade; Curtin remonstrated, saying he was nine years clear of the defaulters book, and, on the lieutenant repeating his order, he rushed at him and struck him. The result of the court-martial will, of course, not be known until the confirmation of the proceedings at head-quarters.

49th Regiment. The head-quarters are on their way home from Barbadoes in H.M.S. Himalaya. The regiment, numbering 27 officers and 773 men, will be stationed at Aldershot.

Royal Marine Light Infantry. The whole of the officers and men of the Chatham division of Royal Marine Light Infantry were drawn up in their barrack-square on Wednesday, for the purpose of hearing read the finding and sentence of a district court-martial passed on Private William Hughes, 77th company, for desertion under very aggravated circumstances. The prisoner deserted upwards of a year ago, and subsequently enlisted into the Sussex Militia, where he made a false attestation, and received the usual bounty, whereby he defrauded the Government of a considerable sum. The Court sentenced him to be marked with the letter "D," to be imprisoned for 168 days, and to be placed under stoppages until the entire sum he received as a bounty has been refunded.—Twenty-six non-commissioned officers and men have joined headquarters at Chatham from the screw steamship Hawke, 60, at Queenstown.

53rd Regiment. Lieutenant W. H. J. Clarke has arrived home from Calcutta in the Warrior Queen, preceding his regiment, now on their passage to England.

56th Regiment. Lieutenant Bythell is appointed A.D.C. to Brigadier-General Hale, commanding the Scinde division.

70th Regiment. Lieutenant Tovey arrived at Bombay on March 10, with a draft. The regiment has moved from Rawul Pindee to Cawnpore.

79th Highlanders. Lieut. Lord Louth, recently arrived from Bombay, has been attached to the Kurrachee Depôt, for the purpose of proceeding with a draft up the Indus.

83rd Regiment is ordered from Nusseerabad to Belgaum, whither it will have to march in the hot season of the year. Lieut. Chamley is on his passage home.

86th (Royal County Down) Regiment, stationed at Gosport, has received orders to hold itself in readiness to proceed to Aldershot in about 14 days.

87th Royal Irish Fusiliers. Assistant-Surgeon Collins, M.D., has arrived in England from Calcutta in medical charge of invalids.

88th Regiment. The depôt under Major Gore is about to move from Colchester Camp to Southtown, Yarmouth.

92nd Highlanders are ordered to Dugshaie.

93rd Highlanders. A marriage is arranged, and will take place during the approaching summer, between Colonel Leith Hay, C.B., of Leith Hall, Aberdeenshire, of this regiment and Miss Hamilton, of Craiglaw, Wigtonshire.

98th Regiment. Lieutenant W. H. Lawe has been appointed Commandant of the East Indian Regiment now stationed at Raneegunge. This is a new corps, equipped and armed as a European regiment, but composed of half-castes.

Rifle Brigade. The 2nd battalion, under Colonel Percy Hill, is ordered to Subathoo.

A district order issued at Portsmouth on Saturday announces that Her Majesty having been pleased to require the services of Major-General Sir James Scarlett, K.C.B., as Adjutant-General of the Army, he will be replaced in the command of the south-west district by Major-General Lord William Paulett, C.B., to whom, on and after the 1st of April, all orders and communications will be made through the usual channel. The order further states that "Major-General Sir James Scarlett cannot relinquish the command he has now held for the last two years and a half without expressing to the officers of his staff, the district, and garrison how much indebted he feels for the zeal and ability they have evinced in assisting him to carry on the duties of command." The gallant General, during the period of his command at Portsmouth, has gained the respect and esteem of all ranks and classes, and will be accompanied by heartfelt wishes that he may long be spared to fulfil the duties of the high office to which he has been appointed.

Three hundred workmen, employed in the laboratory department of the Royal Arsenal, Woolwich, were discharged on Saturday, and 500 artisans, employed in the royal carriage department, have received notice to leave on the 14th inst. This reduction, it is understood, will be only of a temporary nature. In the rifled ordnance department additional hands have been constantly set on. The War Department has completed the purchase of 170 acres of marsh land, extending from the Ship and Lobster Inn, Denton, near Gravesend, to Shorne Mead Battery, for the purpose of constructing a practice range. The Government has also obtained possession of an eligible site for the erection of new barracks at Gravesend. This Department has also accepted tenders for the erection of numerous model cottages, to be used as residences for married soldiers, on a site of land between the Cadets' Barracks in the New Road, Woolwich, and the Grand Depôt at the Artillery Barracks.

Orders have been received at Fort Pitt for the following medical officers to proceed to the stations named:—Assistant-Surgeon J. Martin, to Jersey; Assistant-Sugeon W. Cherry, to Shorncliffe; and Assistant-Surgeon J. Smith, to Canterbury.

Canterbury.—The whole garrison paraded in the cavalry square on Tuesday afternoon to witness the presentation of good conduct medals to three privates of the 8th Hussars and a private of the 70th Regiment. The medals having been presented, the troops marched past in slow and quick time, looking thoroughly well. During the last year the recruits have grown taller and stouter, and many of the men begin to have the form and bearing of made soldiers. The Volunteers have begun their trial of skill before the butts, and proved themselves promising shots. They fired five rounds at 150 yards, and averaged five points, some obtaining as many as nine. A new rifle range is shortly to be provided, and then the troops will be exercised at 1000 yards, whereas now the longest distance is 450 yards. Many expect that the superior education of the Volunteers will give them an advantage over the regulars after a period of training; and certainly the first experiment made by the East Kent Volunteers on Tuesday tends to confirm that opinion. Mrs. Tempest, schoolmistress of the 3rd class, doing duty with the 4th Depôt Battalion, has been promoted to the 2nd class, as a reward for her steady attention and successful teaching, as

Digitized by Google

reported by Colonel Armstrong, C.B., and Captain Gleig, R.A., Deputy-Inspector of Military Schools.

Major-General the Hon. A. A. Dalzell, having arrived at Cork, has assumed the command of the troops in the district.

The following valedictory general order has been issued by Field-Marshal Lord Seaton, G.C.B. :—"Dublin, 30th March, 1860. The approbation of the general commanding the forces in Ireland having been so often expressed in respect to the efficiency and good conduct of the troops in the divisions under the immediate charge of Lieut.-General Gascoigne and Major-General Eden, resulting from their active superintendence, and the exertions of major-generals in command of brigades, it would appear unnecessary to advert further to the very satisfactory state in which his lordship finds the divisions, brigades, and the several corps in this command. But on the occasion of his relinquishing the appointment which he has held in this country for some years, he thinks it due to the officers he has mentioned, and to the heads of departments, and commanding-officers of corps, to convey to them his best thanks for the able assistance which he has received from them. It is gratifying to Lord Seaton to refer particularly to the unremitting attention which Lieut.-General Gascoigne has devoted to the instruction of his division, whether concentrated in camp or distributed in garrisons, as well as to the admirable conduct of the detachments of artillery, cavalry, and infantry, when called on, frequently at a very short notice, to discharge local duties of a description which could not be properly accomplished but by that order, method, and forbearance, which the strictest discipline alone can ensure."

The Medical Department of the Army has decided on establishing a sanatorium and invalid establishment at the Cape of Good Hope, for the reception of the sick and disabled troops belonging to the various corps serving in China. A number of medical officers will be required for the new establishment, and these will be dispatched as early as possible.

The following changes in the Medical Staff are arranged. Dr. Ker Innes, C.B., relieves Dr. Longmore at Colchester on the 9th instant. Staff-Surgeon Macqueeen from Colchester, Staff-Surgeon Mostyn from Maidstone, Staff Assistant-Surgeon Heazle from Colchester, and several other medical officers, have been ordered to proceed at once to do duty at the Sanitarium just established at the Cape for sick and wounded troops from India and China.

The following general regimental orders have been issued from the Adjutant-General's Office, Royal Artillery, signed by Colonel Bingham, Deputy Adjutant-General :—"Officers commanding Royal Artillery in the districts concerned, will obtain the sanction of the general-officers commanding the troops, to the following removals of officers :—Colonel C. L. D'Aguilar, C.B., from Dover to Ipswich ; Lieut.-Colonel Brandling, from Norwich to Dover ; Captain Saunders, from Plymouth to Norwich ; Captain Addington, from Calcutta to Plymouth ; Second Captain Le Mesurier (by exchange with Second Captain Downes), from Woolwich to China."

The Commander-in-Chief in India has decided that ten batteries of artillery in the Bombay Presidency be reduced to the peace establishment of 105 horses. The horses with the batteries in excess of this number to be borne as supernumerary till absorbed by casualty. The remaining Light Field Horse Batteries will for the present retain the establishment of 125 horses.

A General Order has been received at Chatham garrison, from the Horse Guards, cancelling the order previously issued for the employment of the class of men known as the military commissionaires, as messengers, office-keepers, &c., in the public departments.

Sir Charles Stuart is likely to succeed Brigadier Shortt in the command of the Bombay garrison.

MONTHLY MILITARY OBITUARY.

Lieutenant-General John Wright, K.H., retired full pay, Royal Marines.

Major-Generals—Redmond William Brough ; Henry Charles Russel, from Royal Artillery ; Matthew Charles Dixon, retired full-pay, Royal Engineers ; John Tothill, retired full-pay, Royal Marines.

Colonels—Edward William Bray, C.B., retired full-pay, 39th Foot ; William Hasloe Phibbs, retired full-pay, Staff Officer of Pensioners.

Majors—P. John Stapleton Barry, Royal Engineers ; Robert Webb, retired full-pay, Royal Marines ; William Macdonald, half-pay, Royal Marines.

Captains—Thomas Blakiston Houston, 4th Foot ; J. Lambert Edward Baynes, 60th Foot ; Thomas Fraser, half-pay, 83rd Foot ; George Foot, half-pay, Royal Artillery.

Lieutenants—Francis George Holme, 20th Foot ; Edward Moore, Gold Coast Artillery Corps ; S. J. M. Maxwell, Royal Artillery ; James Milne, retired full-pay, 5th Vet. battalion ; Warner Reeve Spalding, retired full-pay, 8th Vet. battalion ; John Priest, retired full-pay, Royal Artillery Drivers ; Charles Kelly Cooper, half-pay, 52nd Foot ; John Sharpe, half-pay, 54th Foot ; John Henry Wilson, half-pay, 97th Foot ; A. Heddle, half-pay, Royal African Corps ; Adolphus Ludewig, half-pay, 4th Line Battalion, King's German Legion.

Surgeon William Lorimer, half-pay, 49th Foot.

Assistant-Surgeon Frederick Howard, half-pay, Royal Artillery.

ARMY GAZETTE.

WAR OFFICE, PALL MALL, APRIL 3.

Chaplain's Department—The Rev. Matthew Robert Scott, Chaplain Royal Artillery, to be Chaplain of the Second Class ; April 10. The Reverend Walter Melvill Wright, Chaplain Royal Artillery, to be Chaplain of the Third Class ; March 14.

ADMIRALTY,—MARCH 29.

Corps of Royal Marines—Gentleman Cadet James Sandys Bird to be Second Lieutenant, Gentleman Cadet Suffield Hamilton Browne to be Second Lieutenant, Gentleman Cadet Wilbraham Evors Evelyn Morley to be Second Lieutenant, Gentleman Cadet Montague Philip Hall Gray to be Second Lieutenant, Gentleman Cadet Michael Allen Stapylton Bree to be Second Lieutenant, Gentleman Cadet Frederic Vincent Godfrey Bird to be Second Lieutenant, Gentleman Cadet Percival Robert Champion to be Second Lieutenant.

WAR OFFICE, PALL MALL, APRIL 6.

Royal Artillery—Second Captain Andrew Orr, on the Supernumerary List, to be Captain ; Second Captain Charles Rowland Hill to be Captain, vice Brevet-Major Henry, placed upon the Supernumerary List ; March 24. Second Captain Patrick John Campbell to be Captain, vice Vandeleur, placed upon the Supernumerary List ; March 26. Lieutenant Joshua Frederick Betty to be Second Captain, vice Hill ; March 24. Lieutenant John Kelly Holdsworth to be Second Captain, vice Campbell ; March 26.

BREVET.

The second Christian name of Major-General Harrison, on retired full pay of the Royal Artillery, is Robinson, not Richard, as stated in the *Gazette* 23rd ultimo.

Lieut.-Colonel and Brevet-Colonel Brook Taylor, unattached, to have the temporary rank of Brigadier-General while in command of a Brigade ; March 12.

THE WHITWORTH AND ARMSTRONG GUNS.

Since the conclusion of Mr. Whitworth's valuable experiments at Southport a tabular summary of the result of each trial of the 3, 12, and 80-pounders, at different degrees of elevation, has been carefully prepared. This table shows such marvellous results to have been obtained with each description of ordnance, both as regards range and accuracy, that we give it to our readers.

The table is as follows :

Summary of Experiments with Mr. Whitworth's Rifled Cannon at Southport, showing the Mean Range and Deviation of all the Shots fired at each Experiment.

Date.	Calibre of Gun.	Elevation	A. No. of Shots Fired.	B. Range. Yards.	C. Longitudin. Deviation. Yards.	D. Lateral Deviation. Yards.
Feb. 22	3-pounder	3°	10	1579	12	·52
15		10°	5	4174	27	1·17
16			5	4190	87	5·5
23			10	3842	48	3·23
15		20°	4	6793	58	4·83
16			4	6960	69	8·58
22			5	6647	109	7·4
22			4	6421	94	4·25
23			11	6663	33	3·83
15		35°	4	9015	96	10·92
16			5	9580	81	19·33
22	12-pounder	2°	5	1247	24	·85
16		5°	5	2324	11	1·57
22			10	2336	16	1·08
23			10	2219	22	2·09
21		7°	4	3049	17	.5
21			4	3098	9	·54
16		10°	5	4027	50	3·31
23			10	3774	37	3·1
15	80-pounder	5°	2	2575	36	2·33
			2	2574	30	1·66
23		7°	4	3493	8	·58
16		10°	2	4700	30	·5
22			4	4409	50	5·17

All these experiments, be it remembered, were conducted from first to last by amateur gunners, without accident or delay of any kind, and during the prevalence of wind and weather, both about the most unfavourable that could well be imagined for obtaining good average results of range alone.—*The Times.*

STATIONS OF THE BRITISH ARMY.

Corrected up to 7th April, 1860.

[Where two places are mentioned, the last-named is that at which the Depôt is stationed.]

1st Life Guards—Windsor
2nd do.—Regent's Park
Royal Horse Guards—Hyde Park
1st Dragoon Guards—Bangalore ; Canterbury
2nd do.—Lucknow ; Canterbury
3rd do.—Mhow ; Canterbury
4th do.—Brighton
5th do.—Aldershot
6th do.—Meerut ; Maidstone

THE NAVY.

ADMIRALTY—MARCH 31.

APPOINTMENTS.—Commander E. Scott to the Centurion.

Lieutenants C. E. S. Woodman to the Centurion, G. H. Barnard to the Nile, and C. G. Fegan to be additional to the Ajax.

Acting Third-Class Assistant-Engineer J. Gill, to the Asia, as supernumerary.

APRIL 2.—Commander S. H. Henderson to the Megæra.

Mate C. R. Forrest to the Donegal.

Naval Cadet W. B. Walpole to the Conqueror.

Acting Third-Class Assistant-Engineer T. Wilmott, to the Fisgard, for service in Widgeon.

Engineers W. H. Croxall, promoted and appointed acting second-class assistant-engineer to the Asia, for charge of machinery of the Philomel; S. Harrison, promoted to the rank of second-class assistant-engineer in the London; W. Smith, promoted to second-class assistant in the Grappler; E. Aitken, promoted to second-class assistant-engineer in the Melpomene; W. Inglis, promoted to second-class assistant engineer in the Hydra; and J. Jessop, promoted to second-class assistant engineer in the Magicienne.

Acting Second-Class Assistant H. Benbow to the Intrepid.

APRIL 4.—APPOINTMENTS AND PROMOTIONS.—Captain F. A. B. Craufurd, to the Archer, vice Courtenay, invalided.

Commander E. W. Lang, to be Inspecting-Commander of the Coast Guard, vice Balfour, whose period of service has expired.

Surgeon J. H. Carruthers, to the Orion.

Paymaster A. H. Martin, to the Falcon.

Assistant-Surgeons L. H. J. Hayne, to the Formidable; and J. W. S. Meiklejohn, to Greenwich Hospital.

Acting Assistant-Surgeon J. G. Fitzgerald, to the Royal Albert.

Assistant-Paymaster in charge G. M. Blyth, to the Crocodile.

Master's-Assistant H. F. Woods, to the Rhadamanthus.

Second-class Assistant-Engineer T. J. Sweeny, to the Rhadamanthus.

Acting Third-class Assistant-Engineers A. Wilkins and E. Wimshurst, to the Asia, as supernumeraries.

Assistant-Engineer G. Treviss, promoted to the rank of Chief Engineer, and appointed to the Fisgard, for charge of the machinery of the Barrosa.

APRIL 5.—Commander A. H. Hoskins to the Wrangler, commissioned.

Chief Engineers P. Wood to the Asia, for charge of machinery of the Sutlej; T. L. Walker, to the Asia, for charge of machinery of the Frederick William; E. J. Burnley, to the Cornwallis; and C. Wright, to the Fisgard, for charge of machinery of the Devastation.

Agamemnon, 91, screw, Captain T. Hope. A court-martial was held on board this ship on the 23rd of last month at Gibraltar, to try James Brown, A.B., on charge of desertion and fraudulently receiving the bounty. He was found guilty, and sentenced to eighteen months penal servitude.

Albion, 90, was brought to the Devonport dockyard on Tuesday and placed in the basin, preparatory to her being converted into a screw.

Alert sailed from Panama on the 27th of February, and arrived at Realijo on the 3rd of March, with despatches.

Amethyst, 26, Captain S. Grenfell, was expacted to be at Panama in May, waiting orders to return to England. The date of this advice is Feb. 1st.

Arethusa, 50, sailing frigate, has been brought up to Chatham dockyard, preparatory to being taken into dock to undergo the necessary alterations to adapt her for a 51-gun screw frigate.

Ariadne, 26, screw, Captain E. W. Vansittart, is awaiting orders at Spithead. On her recent cruise to the westward under canvas she experienced very strong westerly and north-westerly breezes, reducing the canvas to close-reefed topsails and reefed courses. The ship behaved remarkably well throughout the cruise; was always under perfect command of her helm; tacked beautifully in heavy cross seas; was very easy, and gave every promise of being fast under her canvas. Three-fourths of the Ariadne's crew are for the first time serving on board a man-of-war.

Atalanta, 16, Commander T. M. S. Pasley, is expected to arrive in England the first week in April.

Bacchante, 51, screw, is expected to hoist the pendant about the 12th instant. She is to have two of Armstrong's guns included in her armament. Commander Josling, of Her Majesty's ship Queen, has had the offer to become her future commander.

Boscawen was in Simon's Bay at the end of February.

Buffalo was at Ascension on the 5th ult.

Buzzard was at Rio Janeiro when the last mail left.

Cæsar is to be stationed at Naples. It was first intended to send Her Majesty's ship Victor Emmanuel, but as that name is unpalatable at Naples, the Cæsar was sent instead. Lieutenant Paget, of the Cæsar, was invalided on the 31st of March, and Lieutenant Trollope, of Her Majesty's ship Marlborough, is appointed to the Cæsar.

Castor, 36, gun-frigate, Commander J. Palmer, fitting as a training-ship for the Naval Coast Volunteers is completed, and left Chatham on Wednesday for Greenhithe. She has only a portion of her armament to receive on board—namely, her main deck guns, which will consist of 18 32-pounders, each 56 cwt. and 9 feet 6 inches long.

Centurion, 80, left Plymouth on Wednesday morning, it is supposed for Lisbon.

Conqueror, 101, Captain Sotheby, C.B., was placed in Keyham Basin on Wednesday, and subsequently taken into No. 3 dock, to have her leaks stopped.

Dee, 4, paddle, Master Commander Thomas C. Pullen, has been placed under the steam basin sheers at Portsmouth to get out boiler and machinery for the ships fitting at that port.

Devon, lighter, Jennings, master, arrived at Devonport on Tuesday, with stores from Deptford.

Diadem, 32, Captain H. Cockburn, left Plymouth Sound on Wednesday under canvas for the westward with sealed orders. She was detained a short time to receive her new commander.

Duncan, 101, steamer, is completing her machinery in the steam basin at Portsmouth, previous to being placed in the 2nd class steam reserve.

Euryalus, 51, screw steamer, Captain Tarleton, C.B., has commenced shipping her boilers in the steam basin at Portsmouth.

Firefly arrived at Malta on the 28th ult. from England, and was to proceed on her surveying duties about the middle of this month.

Forte, 51, screw, Captain E. W. Turner, is expected to arrive at Spithead from the Thames on Wednesday next.

Galatea, 26, 800 horse power, was undocked on Thursday at Chatham, and sent to Sheerness to be fitted for the second division of the steam reserve.

Gladiator, 6, steam-vessel, Commander, H. D. Hickley, was at Jamaica on the 9th March last, all well. Expected to sail for Saint Thomas's in a few days.

Hannibal, 91, screw, Rear-Admiral G. R. Mundy, C.B. By a letter from this ship at Gibraltar, dated the 28th ult., we hear that Captain Connolly, to the very great regret of all who knew him, and especially the officers of the Hannibal, was about to invalid, and return to England.

Hardy, gun-boot, had arrived in Simon's Bay, *en route* to China.

Havoc, gun-boat, is reported as having arrived in Simon's Bay, on her way to China.

Hero, 91, Captain Seymour, at Devonport, will be out of the hands of the shipwrights and joiners about the 6th of May.

Howe, 120, lately launched from Pembroke dockyard, was to leave that port on Monday last had the weather been at all favourable, but the wind continued S.W., blowing fresh throughout the day. Preparations were making to leave the following day, Tuesday, for Devonport. The Howe was launched on the 7th of last month, and considering her great size and the stormy weather which the riggers have had to contend with, the greatest praise is admitted to be due to Mr. Paul, assistant master attendant of Pembroke yard, under whose command they have done wonders in hastening her fitment for the cruise round.

Immortalité, 51, steamer, is completing her machinery in the steam basin at Portsmouth. She will soon be out of the hands of the mechanics, and placed in the 2nd class steam reserve.

Landrail was on Thursday hauled into the fitting basin at Woolwich, preparatory to being docked and got ready for sea.

Lapwing, 4, screw, Commander M. F. O. Reilly. Arrived at Gibraltar on the 28th ult. from Malta.

Leopard was at Monte Video, by the latest advices.

Marlborough, 131, screw, Vice-Admiral A. Fanshawe, C.B., Captain the Right Hon. Lord F. H. Kerr. Lieutenant Henry Carr is doing duty as flag-lieutenant of this ship.

Meander, 44, was at Ascension on the 5th of March.

Megæra. The funeral of the late Commander James Hunt, of Her Majesty's troop steamer Megæra, took place this week in the burialground attached to the Royal Naval Hospital at Haslar. During the time the ceremony was taking place the men-of-war in Portsmouth harbour lowered their ensigns to "half staff."

Nautilus, apprentice brig, Lieut.-Commander Grant, was taken out of dock at Devonport on Tuesday.

Nelson, 91, screw. This ship has recently been converted, and has now received all her machinery. It is expected that her trial trip will take place some time this month at Stokes Bay.

Nile, 90, screw, Captain Barnard, at Devonport, has completed her fitment, and is ready for trial. She is expected to sail about the 12th inst. for the North American and West India station, where she is to receive the flag of the commander-in-chief.

Oberon was at Beunos Ayres by the last advices.

Octavia, 50, sailing frigate, has been placed in No. 9 dock at Portsmouth, for lengthening and conversion to a screw.

Osborne, 2, paddle, Admiralty yacht, Master Commander George H. K. Bower, having repaired defects, has hauled out of No. 8 dock into the steam basin at Portsmouth.

Pelorus. By a letter dated the 17th of February, the following information has been received at the Admiralty relative to the accident which occurred on board Her Majesty's ship Pelorus at Hobart Town in January last:—"Lieutenant A. H. Balliscombe and Alfred Gough (gunner's mate) have recovered, and are at their duty. Thomas Graham, A.B., is at the hospital, at Hobart Town, and writes word that he will rejoin in a week or so. William Beard, A.B., and J. W. T. Minshull, are so nearly well that they will be off the list in a day or two."

Powerful, 84, line-of-battle sailing ship, has been docked at Chatham, where she will be lengthened and converted into a screw steamer.

Prince of Wales, 131, steamer, is receiving her machinery in the steam basin at Portsmouth, preparatory to being placed in the 2nd class steam reserve.

Pylades, screw, 21, Capt. M. D. Courcy. By advices from this ship, we learn that she had taken a freight of 2,210,247 dolls. to Panama, where she had her machinery repaired. She was to go to Mazatlan to relieve the Amethyst, from which last-named port she was expected to receive another bullion freight, in July next.

Ranger, about to be commissioned for the west coast of Africa, was inspected at Woolwich on Thursday by Sir Baldwin Walker, K.C.B.

Retribution, Commodore Edgell, arrived in Bombay on the 10th of March, having left Aden on February 29.

Rinaldo, 17, screw, in the steam-basin at Portsmouth, has her screw shipped; it is expected that her boilers and machinery will be put on board with all despatch. It is rumoured that this corvette will speedily be put in commission, as great results are expected from her, in consequence of her peculiar construction.

Royal George, 104, was taken from Devonport dockyard on Tuesday, and placed in Keyham basin under the shears.

Sanspareil. As the report of the existence of small pox on board H.M.S. Sanspareil still prevails, it may be well to state that the complaint has altogether disappeared from among the officers and crew of that ship, the solitary case which she had on board when she arrived at Queenstown having since been cured, and no other case having occurred.

Simoom. We have received the following letter from Her Majesty's screw troop-ship Simoom, dated "Singapore, February 22, 1860. We arrived here yesterday, 41 days from the Cape, and 93 from England. All well on board. We proceed in a few days for China. In Banco straits we fell in with the Ringdove, and gave her a tug along, as she was short of fuel. The Renard sailed from here to-day for Penang to tow up a troop-ship, which the Scout will convoy to the northward. The Pearl leaves in a day or two with the 44th Regiment, half the Regiment being on board the Pearl and the remainder in a transport. The Ringdove is refitting, and when complete goes to Penang to forward along any other ships. The Esk is the senior officer's ship here. We are the first batch of soldiers out, and, as operations do not commence before the middle of April, we shall be in plenty of time. The mail steamer starts to-day, so we are lucky in having time to write home. Our passage from England has been good; no lives or spars lost, nor sails split. Off the Cape we had a shower of ice, and pieces fell in ragged shapes, weighing from 3 to 6 ounces. Several men were hurt, but luckily none were aloft at the time or they must have been knocked off the yards. It lasted only about a minute; had it been of any long continuance it must have cut our sails from the yards, besides doing other damage. As the ice fell on the decks it sounded below like shot being rolled about overhead. No one on board ever saw or heard of the like before, and it, as you may imagine, quite astonished us. It was no hailstorm, I assure you."

Siren. A court martial is to be held to-day on board the Victory at Portsmouth on Lieutenant Graves, lately arrived from the Brazils in this ship.

Snake left Simon's Bay for China on Jan. 19.

Sphynx was in Simon's Bay at the end of February.

Spy was at Monte Video, by the latest advices.

Stork, tender to Excellent, made some good practice on Wednesday off Southsea Castle, at long range.

Sutlej, 51, steamer, receiving her machinery in the steam-basin at Portsmouth. She will receive her engines in the course of a fortnight.

Trafalgar, 90, Captain E. G. Fanshawe, left Plymouth Sound on Wednesday morning, probably for Lisbon.

Terrible left Malta on the 25th of March for England, with invalids.

Torch, 5, screw gun-vessel, having been completed at Chatham dockyard, has been undocked, and is preparing for her trial trip to test her machinery, after which she will join the steam reserve.

Tortoise, 12, was at Ascension on the 5th of March.

Triton. On the 13th of February a bark captured by the paddlewheel steam-vessel Triton, 3, Lieut.-Commander Robert H. Burton, was condemned by the judge at St. Helena as a prize. When captured she had 453 male and 141 female negroes on board. When condemned there were 398 men and 114 women; all the others died in the interim.

Victoria, 121, screw. This noble ship was warped into No. 7 Dock, Portsmouth, on Thursday last. It was supposed that in consequence of the Victoria carrying her beam so low down in the water, there was no dock of sufficient width at the bottom to accommodate her while being coppered. We have much pleasure in stating that the apprehended difficulty is overcome. After receiving her machinery, the Victoria dipped very much aft in consequence of her heavy weights being placed abaft the midship section, her draft forward being 15ft. 6, and aft 21 ft. 6, or just 6 feet difference, and the blocks upon which she now rests are arranged upon an incline, so as to accord with the varying depth of water the Victoria draws from end to end. By this contrivance the huge vessel is raised nearly 6 feet higher forward than she otherwise would be, and is consequently raised clear of the projecting steps of the masonry of the dock, which would otherwise have interfered with the labours of the artificers when coppering her. The after-portion of the ship gradually running away fine, leaves ample space for the artificers to work at her. Some of the weights the Victoria has abaft are enormous—thus, her screw, which is of course right at her heel, weighs 16 tons, 14 cwt., independent of its frame. Each fan weighs 5 tons, 8 cwt. As soon as the ship is coppered, it is expected she will be placed in the second class steam reserve.

Victoria and Albert yacht, Captain the Hon. Joseph Denman, sailed from Portsmouth on Wednesday morning at daylight on her cruise, for the purpose of fully testing her steam superheating apparatus.

Virago, 6, Commander Dunn, remains in readiness at Pembroke to assist in navigating the Howe, 121, to Devonport.

Vixen. The British Minister at the court of Peru has been endeavouring to discover the murderers of the unfortunate Captain Lambert, but nothing of importance has transpired in relation thereto. The Peruvian papers endeavour to make it appear he committed suicide.

Vulcan was in Simon's Bay, according to the latest Cape mail.

Vulture, 6, paddle, Captain George Parker, paid off on Thursday in most creditable order alongside the Portsmouth Dock jetty, under the superintendence of Captain Harris of the Britannia, naval cadet training ship. A very wise precaution was taken to prevent the men from falling into the hands of the "crimps" and "sharks," by the Pigmy, 3, paddle, Master Commander William Johnson, being placed alongside the Vulture, to receive the men belonging to the Western ports, and to convey them immediately to their homes.

The Duke of Somerset held his fourth levee of the season at the Admiralty on Thursday afternoon. The following officers were present:—Admiral J. Ayscough, Rear-Admiral J. Stoddard, Rear-Admiral Scott, Deputy Inspector of Hospitals M'Cormack. Captains—D. Robertson, C. C. Forsyth, G. G. Giffard, Wm. Woadley, W. H. Haswell, R. J. Otway, G. A. Seymour, C. G. E. Patey, W. H. Kitchen, and T. F. Birch. Commanders—E. H. Howard, W. M. J. G. Pasco, J. Sanders, F. H. Smith, M. R. Pechell, W. C. Chapman, and F. H. Martin. Lieutenants—J. B. Scott, Wm. Symon, and Wm. Scrymgeour.

The following screw steam-vessels are now building at Woolwich and Deptford dockyards, and several are forward for launching:—Anson, 91; Repulse, 91; Bristol, 51; Newcastle, 51; Wolverine, 21; Zebra, 17; Rosario, 11; Rapid, 11; Dart, 5; Lee, 5; Mullet, 5; Speedwell, 3.

Digitized by Google

Admiralty orders have also been received to lay down the keels of the following vessels, as the slips become vacant :—Caledonia, 91 ; Dartmouth, 36 ; Blonde, 36 ; Alligator, 21 ; Ontario, 21 ; Columbine, 11, and two screw-gun vessels. In addition to this fleet the following screw sloops of four guns and 200 horse-power engines are now building for the Government by private firms at Blackwall and Millwall :—Eclipse, Lily, Serpent, Racehorse, Snipe, Sparrow, and Star.

The following naval cadets have been appointed as follows: (dated April 2)—F. W. Jenkins, J. R. Napier, G. Stopford, H. G. Gillam, S. A. Johnson, J. J. A. Campbell, F. G. E. M'Clintock, R. H. E. Welby, G. H. Verner, P. H. Gage, M. C. D. Osborn, G. C. Young, and H. S. T. Chowne, to the Marlborough ; Gerard R. Bromley, W. E. Heathcote, Edward C. St. John, and Alexander R. Boddam, to the Nile ; George A. Grey, Frederick G. M. Powell, John H. Hodgson, Frederick G. Dundas, and John N. Mercer, to the Euryalus ; Keppel Garnier, Robert F. Castle, E. Y. P. Smith, John King, and Edward G. F. Law, to the Forte ; Charles A. Nicolson, John G. Masters, Arthur Hutchinson, and L. L. L. Bevan, to the Royal Albert ; James D. Meyrick, to the Edgar ; Charles E. Napier, W. F. Snowden, and R. B. Evans, to the Donegal ; M. H. Smith and Charles G. Hunt, to the Trafalgar ; Thomas E. Sulivan, Robert W. Foster, Francis R. B. Kemp, Fitz-Patrick W. Praed, and Edmund J. Calcraft, to the Ariadne ; Richard F. Meade and Arthur H. Boldero, to the Queen ; W. H. Roberts and David Brown, to the Conqueror ; James Brown, and R. R. Jaffray, to the Centurion ; W. H. G. Nowell, and Oswald B. Niven, to the Diadem ; Arthur W. Brabazon and Horace J. M. Pugh, to the Sanspereil ; S. J. Weld, James L. Smith, and Hamilton P. Smith, to the Mersey.

About 80 artificers and others were discharged on Saturday from Devenport dockyard.

A return has just been published relating to the expenses incurred in building and fitting Her Majesty's ships during the financial year 1858-9. A total expenditure in that year of 2,163,675*l.* is accounted for in the following way :—Ships and vessels building, 475,560*l.* ; ships commenced as sailing ships, and converted to screws while building, 89,800*l.* ; ships launched as sailing ships and subsequently converted into screws, 114,490*l.* ; fitting out and refitting for, also repairs and maintenance of steam-ships and vessels in, commission, 523,317*l.* ; fitting, refitting, repairs, and maintenance of ships and vessels in the steam ordinary, 342,254*l.* ; repairing, fitting, and refitting for, and maintaining sailing ships and vessels in, commission, 5,478*l.* ; repairing and maintaining sailing ships in ordinary, 4,399*l.* ; fitting and maintaining hulks, &c., 12,135*l.* ; maintenance of all yard craft, boats, &c., 13,577*l.* ; incidental expenses of buoys, capstans, &c., 248,001*l.* ; machinery for steam-vessels, 250,996*l.* ; stores sent home from foreign stations, 37,997*l.* ; stores purchased at home, 56,469*l.*

Seventeen of the crew of the hired transport Havering, stranded at Plymouth, were brought before the Stonehouse magistrates on Tuesday, on a charge of insubordination and refusal to do duty, and were sentenced to two months' imprisonment at Exeter.

An order was received at Devonport, on Saturday, by the Admiral Commanding-in-chief, to have all vessels belonging to the Channel fleet at once under orders for sea. It is assumed to unite with the remainder of the fleet to proceed to the Mediterranean, probably to rendezvous at Naples.

Captain W. Houston Stewart, flag-captain to the commander-in-chief at Devonport, will, it is said, go to the Mediterranean as captain of the flag-ship of Vice-Admiral Martin.

ROYAL NAVAL SCHOOL, NEW CROSS.—A project for the completion of the swimming-bath in this valuable institution is progressing. About the sum of 500*l.* is required to complete the design ; and there are between 200 and 300 sons of naval and marine officers receiving their education there, a large number of whom embrace the professions of their fathers. Amongst those who have liberally subscribed towards the completion of the swimming-bath are the following :—Her Most Gracious Majesty the Queen, and H.R.H. the Prince Consort, the Marquis Townshend, the Earl Manvers, the Rev. Lord de Saumarez, Admirals Sir Graham Hamond, Sir George Seymour, Sir Henry Prescott, Sir Thomas Herbert, H. Meynell, the Hon. A. Duncombe, and the Committee of Lloyd's patriotic fund.

ARRIVAL OF THE CHANNEL FLEET.

The Second Division of the Channel Fleet, comprising the Edgar, 91, screw, Captain James E. Katon, bearing the flag of Rear-Admiral of the Blue, John E. Erskine ; the Queen, 86, screw, Captain C. F. Hillyar ; the Algiers, 91, screw, Captain G. W. D. O'Callaghan ; the Mars, 80, screw, Captain J. N. Strange ; and the Mersey, 40, screw, Captain H. Caldwell, C.B., steamed into Spithead from the Channel on Wednesday morning by the eastern entrance in the order named. The Edgar having anchored, each succeeding ship steamed to the westward of the flag-ship, and, rounding to, proceeded to their respective positions. The Queen took up the eastern berth of the line, a-head of the Edgar. To the westward of the Edgar the Algiers anchored, and the Mars took up the western berth. The four liners are thus moored in a line from south-east to north-west. The Mersey frigate brought up in deeper water on the outside of the line. Soon after the ships came in sight the customary salutes were exchanged between the Edgar, flag-ship of Rear-Admiral Erskine, and the Victory, flag-ship of the Commander-in-Chief, Vice-Admiral Bruce. The Sprightly and Pigmy steam-tenders were despatched from the harbour to Spithead on the fleet's arrival. The crews of the Channel Fleet anchored at Spithead had leave granted them ashore in parts of watches on Thursday evening until 7 a.m. next day. The whole of the vessels have suffered more or less, both in their hulls and machinery from the effects of the late gales during their passage to and from Lisbon. Of the five ships at Spithead, the Edgar has proved the most efficient of the whole, as well as much the easiest craft in a seaway. Next to her ranks the Mersey, the Mars taking next place, with the Algiers, and the Queen last. The two last-named vessels rolled very heavily ; the Queen, indeed, to such an extent as to unship the shot from their racks on the main deck, and send them flying about, injuring 15 of her crew before they were stowed down in her after-hold. She has a heavy sick-list besides. Her funnel casing is torn, waste steam-pipe carried away, and her machinery requires a thorough overhaul —the effects of her rolling and working. She made a good deal of water, as may be supposed, during the worst part of the last gale. The Algiers also made water during the gale, and her stern is supposed to be defective. The Mersey's steam-pipe is defective, from its great length exposed to the working of the ship ; but, most important of all, her condensers are cracked. They will all require considerable repairs before they can again proceed to sea. All the officers of the squadron agree in awarding the superiority on every point at sea—speed under canvas, and easy motion in heavy seas especially—to ships of the Edgar and Donegal class, over those of the Algiers and Queen.

The other division of the Channel Fleet, consisting of the screw steam-ships Royal Albert, 121, Captain Henry J. Lacon, bearing the flag of Admiral Sir Charles Fremantle, K.C.B. ; the Donegal, 101, Captain Henry Broadhead ; the Aboukir, 90, Captain Charles F. Schomberg ; and the screw steam-frigate Melpomene, 51, Captain Charles J. F. Ewart, hove in sight at Plymouth about six o'clock on Tuesday morning, with the wind from the westward, a smart breeze. They came in from sea under their three topsails, and on reaching the west end of the breakwater took in all canvas, and proceeded under steam to the anchorage ground, the flag-ship taking her position well to the westward. At eight o'clock the flag of Port Admiral Sir Barrington Reynolds, K.C.B., was honoured by a salute, which was acknowledged by the Impregnable, 104, Captain Stewart, in Hamoaze. The fleet left Lisbon on March 23, in company with the screw-steamships Edgar, 91, Captain James E. Kator ; Algiers, 91, Captain George W. D. O'Callaghan ; Queen, 86, Captain Charles F. Hillyar ; Mars, 80, Captain James N. Strange ; and the screw steam-frigate Mersey, 40, Captain Henry Caldwell, C.B. The Edgar carried away her maintopsail-yard on Sunday morning, when crossing the Bay of Biscay. The Edgar and Mersey have lost a man each overboard. On Monday night, off the Lizard, the Edgar, Algiers, Queen, Mars, and Mersey parted company, and proceeded up Channel for Portsmouth. Very fine weather was experienced at first, but within the last four days strong gales from west-north-west have prevailed, with extraordinary heavy seas. All the ships are reported leaky ; the Royal Albert will require a thorough caulking.

MOVEMENTS AT MALTA.

A letter from Malta, 31st March, says—The paddle-wheel steam-frigate Terrible, Captain F. H. H. Glasse, C.B., left our port on Sunday for England, having on board 135 invalids of the Royal Navy.

H.M. paddle-wheel steamer Firefly, Commander F. Skead, arrived on the 28th inst., from Woolwich and Gibraltar.

Captain R. H. Graham, of the Rifle Brigade, has been appointed aide-de-camp to his Excellency Sir T. Gaspard Le Marchant, vice Captain F. R. Burnside, 21st Fusiliers.

There is a rumour afloat that Admiral Fanshawe's fleet will soon leave Malta for Corfu, where the gallant admiral is expected to be decorated with the noble order of St. Michael and St. George. After which ceremony he will proceed to Naples, and show his magnificent ships to King Bombicella and his very happy subjects.

GIBRALTAR, March 28.—The following ships and vessels of war constitute the squadron now stationed here :—Hannibal (flag), Renown, James Watt, Agamemnon, Doris, Scylla, Mohawk, Lapwing (arrived last night), Quail, and Redpole. The Scourge is still at Tangiers. The foreign ships present are the Iroquois (American), and Tisiphone (French). The Spanish fleet is at Algesiras, and likely to remain there. A court-martial was held on Friday last on board the flag-ship, for the trial of James Browne, A.B., for desertion from the Agamemnon. The court consisted of Admiral Mundy (president), Captains Forbes, Codd, Heathcote, Lambert, and Connolly. The prisoner, who was on a former occasion convicted of a similar offence, pleaded "guilty." The prosecutor (Captain Hope) was then examined, and a statement read from the prisoner urging in mitigation of punishment that he had been already a prisoner three months, and great part of that time had been in irons. The sentence was that of imprisonment for eighteen months in one of Her Majesty's jails in England, the imprisonment being deemed to begin from the date of the passing of this sentence.

The Peninsular and Oriental Company's steamer Ripon has arrived from Malta, and proceeds to Southampton. The only news from the fleet is the death of the secretary of Admiral Codrington, T. A. Telfer, Esq., whose many good qualities and general amiability had endeared him to all who knew him. The injury to the Orion, it is feared, will necessitate her being sent home. It is reported that the Terrible will shortly leave Malta for England, carrying invalids, &c. The war question between Spain and Morocco is pretty much in *statu quo ;* every day circulates a new report in Gibraltar ; and at times two or three varying reports succeed, and in turn destroy each its predecessor. It is no unusual thing to hear in the morning that an engagement has taken place, in which the Spaniards were victors ; this is, in the course of the day, followed by a confirmation, so far as the engagement having taken place is concerned, but assigning the victory to the Moors ; whilst in the evening a third account annihilates both the antecedent rumours by declaring that no such engagement as that described, has at all taken place. Those best capable of giving an opinion on the Peace question here speak confidently of its being a settled question, and represent the Spaniards as more anxious for its ratification than the Moors are. The large sum of money which it is stated the Moorish Government will pay over into the Spanish Treasury, is looked upon as being by no means a bird in the hand nor yet in the bush, nor anything more or less than a creation of the Spanish brain published for the purpose of covering their anxiety to conclude peace.

Mr. John Locke has given notice in the House of Commons that he will call attention to the claims of the Land Transport Corps who were enlisted during the Crimean war, and would ask the Secretary for War whether it was the intention of Government to satisfy those claims,

THE MILITIA.

ABERDEENSHIRE.—The Royal Aberdeenshire Highlanders will assemble on the 4th of June next for 27 days' training and exercise under Lieutenant-Colonel-Commandant Henry Knight Erskine, at Aberdeen.

HAMPSHIRE.—The Hampshire Militia Infantry have received the order to assemble for training and exercise for 27 days—from the 30th of April to the 26th of May.

HEREFORDSHIRE. — The Herefordshire Militia will be called up for the accustomed period of thirty days' training at the end of this month. The full complement of the regiment is near 600 ; and although there have been many enlistments into the line, the number on the muster roll is not much below the full effective strength. A supply of Enfield rifles has recently been received at the barracks for the use of the men.

KILDARE.—His Grace the Duke of Leinster, Lieutenant of the county, has made the following appointments in the Kildare Rifles, viz. :—Robert Higginson Borrowes, Esq., to be Major, vice Borrowes, resigned ; the Honourable Valentine Lawless to be Captain, vice Bruce, displaced.

KILKENNY.—We have to record the death of Henry Wemys, Esq., J.P., Danesfort, late Lieut.-Colonel Commanding the Kilkenny Fusilier Regiment of Militia.

WILTSHIRE.—Captain Reed of the Wiltshire Militia, at present stationed on the heights of Dover, met with an accident on Thursday last. It appears that the gallant captain was out with the East Kent Fox-Hounds on that day, and, when near Saltwood, he was thrown from his horse, sustaining a bad fracture of the left leg. The accident having occurred near Stone Farm, occupied by P. S. Court, Esq., that gentleman immediately had a mattress placed in his dog-cart, and had him conveyed to the Folkestone station in time for the 3·45 express to Dover, to which place he was conveyed before his leg was set.

MONMOUTHSHIRE.—The Royal Monmouthshire Militia has been ordered to assemble at Monmouth, on Monday, April 30, for twenty- seven days' training.

CAMBRIDGESHIRE.—The Cambridge Regiment of Militia will assemble at Ely, on Monday, the 30th inst., for twenty-seven days' training.

MILITIA GAZETTE.

WAR OFFICE, PALL MALL, APRIL 3.

2nd West Regiment of Yorkshire Yeomanry Cavalry—Edward Brook, Gent., to be Cornet, vice Jonas Foster, promoted ; Feb. 3.

2nd Royal Surrey Regiment of Militia—Charles Howard Chaplin, Gent., to be Quartermaster ; Feb. 14.

East York Regiment of Militia Artillery—Joseph Alfred Sykes, Esq., to be Major ; March 22.

1st Somerset Regiment of Militia — George James William Prowse, Gent., to be Ensign, vice Carew, promoted ; March 28.

Cambridgeshire Militia—The following officers have resigned their commissions :—Lieutenant Sir Charles Nightingale, Bart., Ensign Charles Vipan, Ensign Litchfield Moseley, Assistant-Surgeon John Lever.

West Essex Militia—Edmund Buckley, Gent., late Lieutenant in the 15th King's Hussars, to be Lieutenant ; March 8.

6th Regiment of Royal Lancashire Militia—Anthony Beaufort Brabazon, Esq., M.D., to be Assistant-Surgeon, vice Craig, resigned ; March 20.

West Suffolk Militia—Henry Fernside Speed, Gent., to be Lieutenant ; March 28.

WAR OFFICE, PALL MALL, APRIL 6.

1st or Royal East Middlesex Regiment of Militia—Lieutenant William Plummer to be Captain, vice Prince, promoted ; March 10.

Forfar and Kincardine Militia Artillery—Albert Webster, Esq., to be Second Lieutenant, vice Cameron, resigned ; March 14.

2d Regiment of the Duke of Lancaster's Own Militia—Andrew McCaul, Gent., to be Assistant-Surgeon, vice Edward Russell, resigned ; March 26.

Artillery Regiment of Royal Lancashire Militia—Second Lieutenant John Francis Henry Harrison to be First Lieutenant, vice Widenham Francis Foebery, promoted ; April 2.

King's Own Light Infantry Regiment of Militia—Captain Cadwallader Edwards to be Major, vice Adams, who retires ; March 24.

Memorandum.—Lieutenant A. W. Bailey, of the Fermanagh Militia, having received a first-class certificate at the School of Musketry at Hythe, has been appointed by the General Commanding-in-Chief, with the concurrence of the Setretary for War, to be Instructor of Musketry to the regiment ; March 26.

The name of Captain E. D. Nares, presented to Her Majesty, at the levée on the 28th of March, on appointment as Adjutant of the Royal Carnarvon Rifles, was printed by mistake in our list of presentations as Captain E. D. Naas.

A series of experiments were carried out at Woolwich on Thursday, in the presence of Mr. Scott Russell and numerous scientific men, for the purpose of testing the efficiency of Barrow's patent improved traction steam-engine and carriages for the conveyante of guns or heavy machinery upon common roads. One of the engines, manufactured at the works of Messrs. Gardiner and Mackintosh, New Cross, was attached to four waggons, which were loaded with boilers weighing 35 tons, and the result of the experiments proved that the inventor has succeeded in obviating many of the difficulties heretofore existing with regard to the practical utility and the profitable working of locomotive power as a means of traversing ordinary turnpike roads. The consumption of fuel is 1 cwt. per hour, and a speed of six miles per hour was readily attained.

Since the 1st of January this year, twenty of the London division of the corps of Commissionaires have obtained permanent situations, and, in consequence, twelve of the posts established last year are now vacant. This last circumstance will account for the inconvenience many persons have lately experienced from not finding men where they have been accustomed to see them.

VOLUNTEERS.

METROPOLITAN.

Customs Volunteers.—On Tuesday, at 8 a.m., nearly one hundred members of the 26th Middlesex (Her Majesty's Customs) Rifle Volunteers formed a "guard of honour," under the command of Captain Ogilvie, the senior officer present, near the Spur Gate of the Tower, on the departure of the Coldstream Guards for Windsor. This compliment was paid by Her Majesty's Customs Corps as a grateful recognition of the assistance and encouragement received from the adjutant and other officers of the Coldstream Guards.

London Scottish Volunteer Rifles.—On Saturday evening this corps mustered strong at Westminster, in consequence of intimation having been previously given that the oath of allegiance was to be administered by the commanding-officer, Lieut.-Colonel Lord Elcho, M.P. The steps and upper end of the hall were occupied by a crowd of spectators, including a number of ladies. The regiment was drawn up in open column, and the oath was administered to each company in succession; after which they formed three sides of a square, when Lord Elcho (standing on the steps with Captain Arbuckle, the adjutant, at his side) addressed them at length.

St. Pancras and North Middlesex.—The most important phase in connection with this popular rifle corps has just taken place in the appointment of its council, and in the reception of its first instalment of 200 stand of arms. With regard to the first point a special general meeting of some 300 or 400 honorary and effective members assembled at head-quarters, St. Pancras Vestry Hall, on Monday evening, when, in accordance with the rules, 12 honorary and 12 effectives were elected as the council, the commissioned officers being *ex officio* members. W. H. Bodkin, Esq., Deputy-Lieutenant of Middlesex, having been called to the chair, the following gentlemen were elected as honorary members of the council, viz., Thomas Eld Baker, Esq., J.P., 51, Burton Crescent; Captain Wilkinson, Fitzroy Park, Highgate; J. Worrell, Esq., 28, Hunter Street; T. Ross, Esq., St. Jame's Place, Hampstead Road; G. Bassett, Esq., Southampton Villa, Regent's Park; F. Slous, Esq., 42, Gloucester Road, Regent's Park; H. S. Goode, Esq., 43, Howland Street; Capt. Ridgway, 34, Fitzroy Square; W. Curtis, Esq., Oval Road, Camden Town; J. Austin, Esq., 28, Gloucester Road, Regent's Park; Mr. W. Brook and Mr. Ivory. Effective members: Messrs. Fendon, C. Green, G. Stoneham, Dr. Hayne, Mr. Dand, Mr. Adams, Mr. Butler, Mr. Donovan, Mr. Garnett, Mr. Chambers, and Mr. F. F. Fisher. Ex-officio members: Captain Thomas Ross, Captain Cameron, Captain F. Collard, Lieutenant Stevens, Lieutenant M'Swiney, Lieutenant Griffiths, Ensign E. W. Lennoyer, Ensign Huskisson, Ensign Macklin, and Dr. G. C. Mott, surgeon of the bigade. The first drill under arms took place on Wednesday evening at Albany Street Barracks, and the precision with which the effectives performed and learnt the manœuvres was most praiseworthy. A concert in aid of the band fund of the brigade took place on Tuesday evening in St. Pancras Vestry Hall, which was crowded with a fashionable auditory.

Tower Hamlets.—A public meeting of the inhabitants of the Tower Hamlets was held on Wednesday night in the Albion Hall, Dalston, for the purpose of forming a rifle corps for that district; A. S. Ayrton, Esq., M.P., in the chair. Mr. Charles proposed the first resolution—"That as the nation considered it desirable that a volunteer rifle corps should be established, this meeting hails with satisfaction the success of the 1st Tower Hamlets Rifle Volunteers." The motion was put and carried unanimously. Captain Sharwood detailed the progress which had been made in getting a cheap uniform for the men, and one was proposed for adoption, which would only cost 25*s*. On this no less a number than 750 put down their names. The uniform was submitted to the Lord-Lieutenant, who refused to sanction it, and said that they must adopt the uniform dress approved by the War Office, which would cost them 5*l*. He said that they might have the clothes made of an inferior cloth, but that they must have the colour prescribed by the War Office, and also the belts, which would cost them about 4*l*. 6*s*. They considered it was an act of interference on the part of the Lord-Lieutenant to nominate the officers of the regiment, but if that was insisted on they would not submit to it. He concluded by moving, "That this meeting, having had a full explanation of the requirements and regulations of the 1st Tower Hamlets Rifle Volunteers, considers it worthy of the support of the working classes, and pledges itself to use every exertion to promote the same." The motion was put and carried unanimously. The resolution in furtherance of the project was also adopted unanimously.

Queen's Westminster Rifles.—The entire corps will assemble and proceed to Westminster Abbey for Divine Service, on Sunday, the 15th inst. The place of assembly will be Palace Yard.

BERKSHIRE.

The Windsor and Eton Rifle Corps.—Yesterday a silver tankard was presented to Sergeant-Major Gubbins, of the Grenadier Guards, by the officers and men of the Windsor and Eton Rifle Corps, in recognition of his zealous services in promoting their drill and discipline.

DEVONSHIRE.

Exeter.—On Wednesday, Sir E. S. Prideaux, the lieut.-colonel-commandant of this corps, inspected the first and second companies in the Castle Yard. The gallant colonel expressed his gratification at the manner in which the members went through their drill, and in allusion to the recent division in the corps, he said he had determined to withdraw the privilege of nominating their officers, inasmuch as it had led to discord, and, would, if continued, be disadvantageous to the corps. He urged them to do away with all petty jealousies, and unite in endeavouring to make the Exeter corps the most effective in the Service. In the evening Sir Edmund inspected the third and fourth companies in the market, and expressed his gratification at the progress they made in their drill. Hearing that the band was practising in Mr. Balmer's ware-room, he requested their attendance, and on hearing the proficiency they had made in so short a time expressed his pleasure and astonishment. The question of going to church on a Sunday was mooted on parade, and Sir Edmund's attention was called to a letter by a member on the subject, when he at once expressed his approval of their so doing, and an early Sunday has been appointed for their first appearance at Holy Trinity church.

HAMPSHIRE.

Portsmouth Volunteer Artillery Corps.—A meeting of the members of the above corps was held at the Athenæum, on Monday, April 2, Captain J. Hodgkinson, R.N., in the Chair. The rules of the corps were prepared and confirmed by the meeting. Major Hall, Barrack-Master, was proposed as Captain-Commandant of the corps, and elected unanimously, as also were Captain Hooper, late Royal Artillery, as First Lieutenant, E. Galt, Esq., as Second Lieutenant, and Mr. C. M. Houghton, as Honorary Secretary.

KENT.

Chatham.—The unhappy differences which have so long existed between Captain Stevens commanding, and the Volunteers of the 9th Kent (Chatham) Company, owing to the alleged extraordinary conduct of the commanding officer towards the gentlemen of the corps, have, it is hoped, been brought to a termination, the Lord-Lieutenant of the county having appointed G. R. Brock, Esq., to be Captain, and thus taken the command from Captain Stevens. The company, which numbers about 70 Volunteers, complains bitterly of the treatment they have received from Captain Stevens, whose arbitrary and, as it is alleged, overbearing conduct was perfectly unsuited to a Volunteer company. Indeed, so acutely did the members feel the conduct of that officer, that they passed a vote of censure on their commanding officer, and called upon the Lord-Lieutenant to accept his resignation. This extraordinary proceeding on the part of the Volunteers was met by Captain Stevens' dismissing the whole of the Volunteers, excepting 15, from the muster roll of the company, under the 27th section of the Volunteer Act. An appeal was then made by the discharged Volunteers to the Lord-Lieutenant, and the whole matter has been placed in the hands of the War-office, to decide as to the legality or illegality of the proceedings on the part of Captain Stevens. Since Captain Brock, however, has been appointed to the command, the gentlemen discharged have all been allowed to attend drills, and are still considered as belonging to the corps, the general opinion being that even should Captain Stevens's right to dismiss be allowed to be legal, they will be immediately reinstated by order of the War-office. Mr. C. Isaacs has been named for Lieutenant; Mr. Gates for Paymaster; and Mr. G. H. Windeyer for Quartermaster of the company.

LANARKSHIRE.

Glasgow.—Her Majesty has been graciously pleased to accept the dutiful tender of service lately made by the Old Guards of Glasgow. They are to be enrolled as the 78th—a distinguished number, certainly, since the 78th was commanded by the glorious Havelock, and defended the city of Lucknow—a circumstance which may make the Old Guards of Glasgow somewhat proud of the number they have acquired.

STAFFORDSHIRE.

North Staffordshire Battalion.—The commanding officers of the companies of Rifle Volunteers formed in the Potteries, Newcastle, Kidsgrove, and Leek, met Lord Hatherton, Lord-Lieutenant of the county, by invitation, at the Railway Hotel, Stoke-upon-Trent, on Tuesday. His lordship informed the officers assembled that it was his intention to proceed with the organisation of the above-named companies into a battalion, in pursuance of regulations issued at the War Office. The battalion would be entitled to a lieutenant-colonel, a major, and an adjutant, and the latter officer would be appointed and paid by Government. The announcement was received with unqualified satisfaction, and there is no doubt that it will be carried into effect without any delay. It is generally expected that Major Buller, who served in the Crimea, will receive the appointment of lieut.-colonel. It is probable that the head-quarters of the battalion will be at Stoke, as the most central town in the district. The progress made by the eight companies who are to constitute the battalion is considered very satisfactory, and it is expected that some of the more advanced will soon commence ball practice.

Tipton 11th Staffordshire Rifle Corps.—This company, with supernumeries, now numbers 106, and the attendance of the Volunteers at daily drill is most exemplary, and the way in which they practice with the rifle would not disgrace any regiment of the Line. It is well known that, as regards the efficiency of the men, much depends upon the assiduity of the officers, commissioned and non-commissioned, and in this company all seem to vie with each other to promote the patriotic movement; and when all are united in a good cause the best results must follow.

SURREY.

19th Surrey Rifles.—On Thursday evening a public meeting was held at the Swan, at Stockwell, for the purpose of promoting the interests of this corps. The band of the corps was in attendance, and enlivened the proceedings by playing several airs in true military style. Several gentlemen, including Mr. Roupell and Mr. Williams, the Members for Lambeth, addressed the meeting, and at the close, the hon. sec. announced subscriptions to the amount of 400*l*.

It appears that the Rifle Volunteer "who shot the dog" on Wandsworth Common, respecting which occurrence a question was put by Lord Ashley in the House of Commons some days since, is Mr. John Kerrison, of Manor Street, Clapham. A summons has been granted against him, and Messrs. E. Sykes, R. Bartrum, and H. J. Jones, also Volunteers, who were with him at the time and decamped, are summoned as witnesses.

VOLUNTEER GAZETTE.

WAR OFFICE, PALL-MALL, April 3.

Artillery Company of London—Sergeant Joseph Eglise to be Ensign.

Wiltshire Volunteer Rifle Corps—Job Lockyer Seale, Esq., M.D., to be Honorary Assistant-Surgeon to the 2nd Company; March 28.

Wiltshire Volunteer Rifle Corps—11th Company—Wm. Frederick Gooch, Esq., to be Captain; John Simpson Fraser, Gent., to be Lieutenant; William Batt, Gent., to Ensign; March 31.

2nd Cornwall Artillery Volunteers—Captain Charles Wilson Riley has received permission to retire from the command. First Lieutenant Edward Campbell has received permission to resign his Commission. Second Lieutenant Joseph Grigg to be Captain, vice Riley, resigned; Robert Thomas, Esq., to be First Lieutenant, vice Campbell, resigned; James Bishop, Esq., to be Second Lieutenant, vice Grigg, promoted; April 2.

8th Cornwall Artillery Volunteers—William Husband, Esq., to be Captain; John Pool, Gent., to be First Lieutenant; Nicholas John West, Gent., to be Second Lieutenant; April 2.

9th Cornwall Artillery Volunteers—Samuel Sampson, to be Lieutenant; April 1.

3rd Cornwall Rifle Volunteers—Henry Arthur "Sleeman," Esq., late Lieutenant in the 16th Lancers, to be Ensign, and not Henry "Sterman," as previously Gazetted; Oct. 21, 1859.

6th Cornwall Rifle Volunteers—Captain Edward Baring Gould has received permission to retire from the Command.

11th Cornwall Rifle Volunteers—Captain Humphry Willyams has received permission to retire from the Command.

16h Cornwall Rifle Volunteers—Edward Brydges Willyams, Esq., to be Captain; George Browne Collins, Gent., to be Lieutenant; Edward Whitford, Gent., to be Ensign; April 2.

9th North Riding of Yorkshire Rifle Volunteer Corps—John Hepburn Handyside, Gent., to be Honorary Assistant-Surgeon; March 22.

2nd North Riding of Yorkshire Artillery Volunteer Company—Thomas Peirson, Esq., to be First Lieutenant; Edward William Chapman, Esq., to be Second Lieutenant; April 3.

East York Artillery Volunteers—3rd Company—William Henry Moss, Esq., to be Captain; William Henry Huffam, Esq., to be First Lieutenant; Edward Welsh, Esq., to be Second Lieutenant; March 28.

East York Rifle Volunteers—5th Company—The Rev. Henry Frederick Barnes, M.A., to be Honorary Chaplain; John Allison, Esq., to be Honorary Assistant-Surgeon; Feb. 28.

3rd Company—John Hartley, Esq., to be Honorary Assistant-Surgeon; March 28.

Yeovil or 16th Somerset Company of Rifle Volunteer Corps—Thomas Messiter, Esq., to be Captain; Robert Donne, Gent., to be Lieutenant; Henry Shorland Watts, Gent., to be Ensign; April 4.

6th Durham Rifle Volunteers—John Williamson, Esq., to be Captain; Charles William Anderson, Gent., to be Lieutenant; Cuthbert Young, Gent., to be Ensign; Richard Bary Ridley, Gent., to be Honorary Assistant Surgeon; March 20.

Memorandum.—1st Durham Artillery Volunteers—The name of the Gentleman appointed a First Lieutenant in this Corps is Charles Strathmore Moon, and not Charles Strathmore Moore, as previously stated. Also the name of the Gentleman appointed Second Lieutenant in this Corps is Thomas Crawhall Alcock, and not Thomas Crowhall Alcock, as previously stated. Also the name of the Gentleman appointed Assistant-Surgeon in this Corps is George Welford and not George Wilford, as previously stated.

Kent Artillery Volunteers Battalion—10th Corps—Second Lieutenant Henry Morris to be First Lieutenant, vice Ellis, resigned; Joseph Ward, Gent., to be Second Lieutenant, vice Morris, promoted; April 2.

Kent Rifle Volunteers—22d Company—Robert Chapman, Gent., to be Lieutenant; Major Kirkby Robinson, Gent., to be Honorary Assistant-Surgeon; the Rev. George Bryant, M.A., to be Honorary Chaplain; March 30.

34th Company—The Christian names of Captain Montgomerie (Commission dated 23rd March) should have been Hugh Edmonstone instead of Hugh Edmonton; and the name of Lieutenant Balken (Commission dated 23rd March) should have been Batten instead of Balken.

Kent Rifle Volunteers Battalion—26th Corps—Henry Fane Travers, Gent., to be Captain; Alfred Keen, Gent., to be Lieutenant; Charles Martin, Gent., to be Ensign; March 31.

1st Lanarkshire Artillery Volunteers (Glasgow)—James Stewart, Esq., M.D., to be Assistant-Surgeon; First Lieutenant William Brand Field to be Captain of the 8th Company, vice William Houldsworth, promoted; Second Lieutenant James Gilchrist, jun., to be First Lieutenant in the 8th Company, vice Field, promoted; John Scott, Gent., to be Second Lieutenant in the 8th Company, vice Gilchrist, promoted; April 2.

4th Lanarkshire Rifle Volunteers (Glasgow 1st Northern Battalion)—Gustavus Hamilton O'Donnoghue, Gent., to be Ensign, vice Charles Grant, resigned; April 3.

56th Lanarkshire Rifle Volunteers (Bothwell)—Bruce Goff, Esq., M.D., to be Honorary Assistant-Surgeon; April 4.

77th Lanarkshire Rifle Volunteers (Glasgow)—William Thomson, Esq., to be Captain; William Neilson, Gent., to be Lieutenant; William Couper, Gent., to be Ensign; Alexander Robertson, M.D., to be Honorary Assistant-Surgeon; April 2.

8th Cumberland Rifle Volunteers—Thomas Drane, Gent., to be Lieutenant; James Hartley, Gent., to be Ensign; March 26.

1st Berwickshire Artillery Volunteers—John Ramsay, L'Amy, Esq., to be Captain; James Bowhill, Esq., to be First Lieutenant; James Gibson, Esq., to be Second Lieutenant.

11th West Riding of Yorkshire Rifle Volunteers (Leeds)—Captain William James Armitage to be Captain Commandant; Lieutenant Abraham Horsfall to be Captain; Ensign Thomas John Kinnear to be Lieutenant, vice Horsfall, promoted; John Wilkinson, jun., Gent., to be Lieutenant; D'Arcy S. Blackburn, Gent., to be Ensign, vice Kinnear, promoted; Edward Markland, Gent., to be Ensign; Feb. 24. Captain Commandant William James Armitage, to be Major; Lieutenant Thomas John Kinnear, to be Captain; Lieutenant John Wilkinson, to be Captain; Ensign D'Arcy Stanfield Blackburn to be Lieutenant, vice Kinnear, promoted; Ensign Edward Markland to be Lieutenant, vice Wilkinson, promoted; James Kitson, jun., Gent., to be Lieutenant; John Piper, jun., Gent., to be Lieutenant; John William Atkinson, Gent., to be Lieutenant (supernumerary); Robert John Hudson, Gent., to be Ensign, vice Blackburn, promoted; William Lyndon Smith, Gent., to be Ensign, vice Markland, promoted; Andrew Fairbairn, Gent., to be Ensign; Henry Appleton, Gent., to be Ensign; The Rev. James Atlay, D.D., Vicar of Leeds, to be Chaplain; March 3.

The Volunteer uniforms grow in favour. The Duke of Manchester appeared in one at the Levée. It attracted great attention, and seemed universally approved of. It was of a corps of Mounted Rifles, and was like the revival of the Light Horse Volunteers' uniform of George III.'s reign—a scarlet tunic of fair proportions, and not at all suggestive, as is the case sometimes in the regular service, of the wearer being in his little brother's coat; the collar and cuffs slightly ornamented with silver lace; a white leather cartouche belt, very elegantly ornamented with silver, as was also the sword belt to match; and tight fitting white kerseymere pantaloons, with Hessian boots, edged with silver lace and silver tassels. These were the leading characteristics of this most effective and tasteful military costume. The Duke, who is a good figure, never looked to greater advantage.

VOLUNTEER DRILL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I extract the following from a report of the speech of the Commander-in-Chief at the Volunteer Dinner:—

"I have a great idea that to make a good soldier a man must know his drill. If you do not know your drill, shooting in my opinion is nearly thrown away. (Hear.) I have heard a great deal of talk about loose drill; but depend on it you must first drill steadily. Drill steady first, and then you may afterwards become loose, *degagé* riflemen."

I also extract the following from the circular of Major Nelson, Assistant-Inspector of Volunteers for Scotland:

"With respect to drill, I am of opinion that the complicated manœuvres performed by the regiments of the line are inapplicable to volunteer corps; and *I would recommend officers commanding not to lose valuable time by permitting such to be taught, at least for the present.* I would desire to have Volunteers taught as rapidly as possible the 'skirmishing drill,' and as soon as they have learned the principles of extended order upon the parade, it would be desirable, where practicable, to take them over broken ground, to teach them the value of cover and the manner in which bodies of skirmishers occupy positions however small and trifling; how to advance under fire; files working independently, taking advantage of any cover between them and the enemy."

"Who shall decide when doctors disagree?"

As an old officer of 33 years' service, for the greater part of which I was an adjutant, I fearlessly affirm that the Commander-in-Chief is perfectly right, and that the officer who has been appointed Assistant-Inspector of Volunteers for Scotland evinces a lamentable ignorance of that which constitutes the true education of a soldier who is to be relied on.

The skirmishers in a battle are pushed forward to *feel* the enemy, and to develop his intentions—that done, their work as skirmishers is over. It is the main body of the Army which is to make the final struggle—its artillery, its condensed infantry and cavalry. The skirmishers, therefore, after forcing the enemy to unfold his plan of attack, must then conform to the movements of the main body, and the instant it takes up its final position the front must be cleared, and the skirmishers must become a portion of the condensed line, and be prepared to act in its closer formations.

I am astonished that an officer of experience, such as I presume Major Nelson must be, could venture on the assertion that efficient light troops can be made without previous efficiency in what the Duke of Cambridge calls "steady drill." I have heard these empirical doctrines announced over and over again by those who know nothing of the matter, and who have wished to persuade the Volunteers that they may become efficient by very little practice and study; but I am sure that those who really know what a thorough soldier is will agree with me, that to be an efficient skirmisher is the perfection of an infantry soldier, and can never be attained save by his being first made completely effective in close formation.—I am, sir, your most obedient servant,

HORACE FENWICK,
Late Major Unattached and Adjutant, 86th Regiment.

THE STOCK.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your Correspondent, "A Modern Rifleman," expresses himself as "amazed and astonished" that every one (as he believes) of the Rifle Volunteer Corps has adopted the stock which is worn by the Army.

Will he allow me to suggest to him, that perhaps the Volunteers may have discovered, that all the abuse of the above-named article of dress is, after all, nothing more nor less than unmitigated "bosh," prompted by the love of finding fault with everything military, both past and present, which continues to guide the public, and which began in its most rampant form about the era of the Crimean war.

Now, sir, I wore this same much-abused stock by choice for many years; many entire regiments did so; and I could name one of the most distinguished Light Infantry corps among the number, in which there were only two who did not wear it, but they did substitute something for it; and what think, you sir, this substitute was? Well, I don't think you are likely to guess; so I will tell you—a dark-coloured buffalo-horn!

The fact is, that provided the stock be in depth proportioned to the length of the wearer's neck, it is all that can be desired. It absorbs no perspiration, and therefore avoids the filth which a softer material would accumulate round the neck; it keeps the collar of the coat in its place and comparatively clean, and from the absence of the necessity that it should fit tight round the throat, it is cooler than anything that could be substituted for it.

I do not expect that these facts and opinions will have much weight with the "Modern Rifleman," though they are the result of experience, because I have the honour to subscribe myself

ONE OF THE OLD ARMY.

FRENCH AT ETON.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The "Parent" who has written to you about Eton will be interested in hearing that the extra master who teaches French at Eton has an assistant, a Frenchman, just appointed to meet the increased demand arising from the introduction of French as an optional subject into the school examinations. Hitherto, perhaps, not above one in seven of the boys has learnt French at Eton; but a great many more will henceforth be induced by the wish to gain extra marks in the regular school examinations to keep up and increase such knowledge of the language as they may have acquired at home. The Prince Consort's prize is tried for by some scores of boys, of whom some of the best have learnt the language at home, and have kept it up without going to the French master at Eton; and the last examiner for the prize said that he had found no better proficients in the language anywhere than at Eton.

The present arrangements are clearly transitional; and, to eager reformers, must appear unsatisfactory. But it is not so easy as it may seem to make the study of French part of the universal compulsory school business.

It has not been found easy to do so with mathematics. The difficulty is increased in the case of a modern language, because the division of labour which most people would think necessary for the effectual teaching of dead and of living languages would involve the employment of foreigners, who would hardly hit it off with Eton boys in masses.

The "Parent" would perhaps propose to have nothing but small classes; but experience shows that boys exert themselves more, and work more cheerfully, in moderately large classes.

It is not so self-evident, as your correspondent seems to think, that a man cannot teach forty boys.

Without entering into the details of that question, one may reasonably ask here how he accounts for the prosperity of Eton? With all its shortcomings, of which the working residents are not unconscious, it must have some educational merit, besides fashion. The very fashion must have some sort of foundation.

There may not perhaps be very much personal teaching or direct communication of knowledge by man to boy; but there is a very complete system of honest examinations, and a truly admirable method of correcting exercises. An Eton boy does, as a matter of fact, become very intelligent and teachable, and has very great facility in getting up for a particular purpose any subject required by military or academical examiners.—I am, sir, your obedient servant,

WM. JOHNSON, Assist. Master at Eton.

The *Mofussilite* has the following letter from Lord Clyde's camp:—"There is no mistake about the order regulating the passing of officers for staff appointments. It will be carried out to the very letter. Several applications have already been refused on the ground of the applicants not having passed. The order is applicable to *every* appointment. A.D.C.'s are not to be exempted. Lord Clyde says he does not care how far north of the Tweed a man may come, he will not allow him to be on the Staff until he is duly qualified; and every one seems to understand that the Chief is in earnest. Captain Charles Mansfield (a brother of Sir William) has been appointed Military Secretary a Bombay

THE MILITARY SALUTE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The political importance of the Volunteer Movement has been so fully admitted on all sides that an apology is scarcely necessary for bringing to the notice of the Commander-in-Chief, through the medium of your paper, a circumstance which now tends to lower the Volunteer force in the estimation of the public,—I mean the non-recognition of the rank of the officers by the usual salute on the part of the soldiers they may meet in the street. This salute is as a general rule withheld, although, even in the absence of distinctive marks on the collars, an officer may be easily known by the steel scabbard to his sword; and the want of respect shown by the soldiers is noticed by passers-by, who remark, "They are only Volunteers."

Personally of course this is a matter of no moment to most of the Volunteer officers, as their social rank is usually superior to their military rank, and they care little whether they are saluted or not; but, as representing a force of which the country ought to be proud, and which is showing such a laudable zeal for the public welfare, they feel that any slight cast upon them reflects upon the whole mass of Volunteers.

In the present aspect of affairs too much encouragement cannot be given to those who are willing to serve the country without fee or reward, and anything likely to bring them into disrepute cannot be too strongly deprecated.

The Commander-in-Chief, as the Colonel of a Volunteer corps, will no doubt feel sufficiently interested to issue orders for the neglect complained of to be replaced by due respect, if His Highness's attention is drawn to the subject, and I therefore beg you will do me the favour to insert this letter.

I enclose my card, but I request to be allowed to subscribe myself A VOLUNTEER.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s*. 6*d*. per quarter, or 26*s*. per annum, payable in advance; and the postage—uniformly 1*d*. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

AGENTS FOR INDIA.

R. C. LEPAGE & CO., CALCUTTA.—Subscription, 20 Rupees per annum, including Postage, payable in advance.

SUBSCRIPTION LISTS CLOSE IN APRIL.

ART-UNION OF IRELAND, One Guinea each Share. All the funds, less working expenses, are divided into money prizes from ONE HUNDRED POUNDS downwards, to be expended by prizeholders in Works of Art, selected by themselves or their nominees from the public Exhibitions in Ireland.—GEORGE F. MULVANY, R.H.A., Secretary, 113, Grafton Street, Dublin.

Reports and prospectuses may be had from Mr. JOSEPH GREEN, 14, Charles Street, Middlesex Hospital, W.; and Messrs. ROBERSON & Co., 99, Long Acre, W.C.; by whom also subscriptions will be received.

LAST NIGHTS OF SALLY SKEGGS.

MR. AND MRS. GERMAN REED, EVERY EVENING (except Saturday) at Eight o'clock; THURSDAY and SATURDAY AFTERNOONS at Three o'clock, in their POPULAR ILLUSTRATIONS, "OUR HOME CIRCUIT," and "SEASIDE STUDIES," introducing a variety of amusing and interesting SKETCHES FROM REAL LIFE, with characteristic Songs, at THE ROYAL GALLERY OF ILLUSTRATION, 14, REGENT STREET, W. Admission, 1*s*., 2*s*.; stalls, 3*s*.; secured at the Gallery, and at CRAMER, BEALE, & Co.'s, 201, Regent Street, W.

"EASTWARD HO!" and "HOME AGAIN!" are at the ATHENÆUM, BRISTOL.

MAYALL's PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and *aristocratic* than those of any other photographer."—*Athenæum*.

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

DOUDNEY & SONS' RIFLE SUITS.—1ST SURREY, 4*l*. 2*s*.; SOUTH MIDDLESEX, 4*l*. 10*s*.; RIFLE BRIGADE, 4*l*.—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s*. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more *sonorous*, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS SUPPLIED WITH EVERY REQUISITE.

	£	s	d
Bass Drums, 32 inches	4	4	0
Tenor Drums, 20 inches, transparent heads	2	7	0
Brass Side Drums, 14 inches	1	8	0
Regulation Drums, brazed shell, as supplied to the Army	2	2	0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2	5	0
Oak (polished) Side Drum, 14 inches	1	5	0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0	8	6
D or E flat ditto	0	6	6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1	1	0
No. 2, Light Infantry Model	1	8	0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentlemen's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l*. 4*s*. Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l*. 12*s*. Mappins' Travelling Dressing Bag for Ladies, 4*l*. 4*s*. The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 5*s*. 6*d*., 10*s*. 6*d*., and 21*s*. at UNWIN & ALBERT'S, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, APRIL 7, 1860.

We revert to the debate last week on Colonel Sykes's motion, because it afforded a very clear view of the chaos into which the Indian mutiny has plunged the minds of men, as well as the conflicting nature of the systems which have grown up on very feeble stems, like the huge creepers of Ceylon, which envelop and finally destroy the trees on which they depend. We see there a mass of undigested opinions which the Government is afraid to assimilate. The report of the commission is not considered equal in value to the views of the dissentient minority. The Minister who at one time was prepared to accept a local European army as a necessity, now stands aghast at the contemplation of such a force, because the Europeans acted with heat where the Indian authorities behaved with great want of judgment, if not with gross impolicy, leavened by injustice. It is now understood that there is to be an amalgamation, pure and simple, of the whole of the armies of India with the army of Great Britain and Ireland. It may be affirmed that all the members of the Cabinet do not agree in considering such a proposal as the most desirable means of solving the great difficulties before us. But if an amalgamation can be proposed without injustice to large classes of officers and danger to the State, we shall accept it joyfully, and promise that the great majority of Indian officers will do the same. The question is: Can any amalgamation be proposed to which enormous objections, so grave and great as to be fatal to it, shall not be brought forward?—and that question must be answered by Sir Charles Wood and his colleagues after the Easter recess.

For our own part, we own that it is a serious argument against a Royal European army without a native force connected with it, that the nature of our tenure of India is ostentatiously exposed to the world and to the many millions we govern. The silk is removed from the mailed gauntlet. The considerations connected with the influence exercised by localising a force, so that officers look forward to pass their whole career in the country, instead of straining every nerve to get away from it, and always trying to return home, to effect exchanges, are of minor consequence. Even the questions of transport and economy, reliefs and recruiting, of health and effective service, are not so serious in our mind as our position in the eyes of envious Europe when we indicate England, Ireland, and Scotland, as the sole sources from which our army in India is to be supplied, and when we place ourselves before the fierce races who still swarm in Hindostan, and say, "You shall no longer draw a sword or carry a firelock in your own territory. We are your masters, and yet you shall not serve us." We have already expressed our opinion that it will be found difficult and dangerous—if not impossible in event of an amalgamation—to dispense with the assistance of a small native army of infantry and irregular cavalry; a force which, call them what we may, must be something better than mere lattials or burkundauze. Occasions will unfortunately arise from time to time in which the services of well-armed troops will be demanded against the wild populations which lie around us on all sides, and the restless budmashes of the decaying Mahomedan districts, who will certainly plot mischief whenever they see themselves freed from the immediate presence and action of a British force. To us there always seemed considerable excellence in the elaborate plan sent home to Government by General Mansfield, the essence of which was, that weak second battalions of natives should be attached to the European regiments, officered from the latter, and doing duty with them in cantonments or out-stations, so that each body of natives should be always under the control of a larger body of the British regiment. It is evident that plan is not likely to be adopted, and that the wishes of many Indian officers, who desire to be placed directly under the Crown, and to be assimilated with those of the Royal Army, will be gratified as far as Government can forward them.

Colonel Sykes, as an old and distinguished Indian officer, could do no less than eulogise the army in which he served, and point to its great names to deter the Government from laying their hands on a system for which it would be difficult to procure a substitute in an Imperial army; but he went a little too far when he asked the House to believe that all our failures in India had been caused by the ignorance of Royal officers, and hinted that all our successes were achieved by Indian generals. The arguments for the maintenance of a local army were set forth clearly and strongly by Mr. Buxton. Do what we may, lay telegraph wires, construct Great Easterns, cover the dry land with railways, we are still divided from India by half the world. We cannot annihilate time and space. We cannot keep up a British force of 80,000 men in India without enormous expense, and in war time without prodigious risk. The objection to a local army, founded on the miserable bungling of the Indian Government, sanctioned, we fear, by the Home authorities, which led to the discontent and discharge of upwards of 10,000 Englishmen, is scarcely worth notice; and yet we are told it has altered the views of Indian statesmen respecting the propriety of having a local—in preference to an Imperial—army. The Indian Government was solemnly warned by Lord Clyde, by Sir W. Mansfield, and others, of the danger they were running, of the impolicy, if not the injustice, of their acts. These old soldiers knew the feelings of soldiers in such matters, and as far back as December, 1858, the English public were made acquainted with the coming trouble, and were told from India what were the opinions of their military chiefs. But General Birch and the Calcutta *doctrinaires*—one of whom has been well described as a permanent justification of mutiny—triumphed. The native army ruined itself. The Indian Government finished the work by ruining the European army. On that point Sir De Lacy Evans and Sir J. Elphinstone spoke in the debate in a manner which will do much good in India, and restrain the arrogant and overbearing bureaucratism which is apt to obtain excessive dimensions in Anglo-Hindostanee official life. Sir Charles Wood announced one grand fact as to the organisation question—"The Government have not finally made up their minds on this important subject." But he went on to say, that when they had done so, it would be necessary for him to bring the subject formally before the House, which would be the proper occasion for discussing the plan. From the view of the European discharge question taken by the Indian Minister, we are led to apprehend that he is subject to tetanic electrical influences from Calcutta, and we would entreat of him to "cut the wire" of that particular battery. Lord Palmerston, at the close of the debate, went off into "constitutionalism," and rather tripped up the heels of his Indian Minister by stating that the right course for the Government to pursue was to settle the organisation of the Indian Army their own way, and then to come down and tell the House all about it; and the latter could afterwards approve, disapprove, or even punish them by a vote of censure. But where is the Indian Army to be all this time? Time presses. The Indian officers indeed are silent, if not contented, and the Government cannot be accused of indecent haste in dealing with them. Perhaps they think it is well to follow the adage "*Quieta non movere*." Lord Palmerston at all events has made up his mind in favour of an Imperial Army. Can he not quicken the action of his colleagues? His lordship must have seen that the temper of the House was best expressed in the placid appeals of some honourable members for a speedy decision.

No subject has been agitated of late which possesses deeper military interest than that of the new rifled cannon, and the competition between the systems of the great rivals now in the field—Armstrong and Whitworth.

The discussion on the data has been nearly exhausted; but all the opinions expressed have been more or less tinged by a partisan feeling in favour of one or other of the competitors, and by views on the subject somewhat confined.

It is therefore quite refreshing to find a new disputant entering into the field with new views. We refer to an article in the *Journal des Débats* of 21st March, the author of which manages the subject with the hand of an artist; and yet we cannot quite go with him in all his reasonings.

He begins with a somewhat lengthened dissertation on the requirements of artillery, and the rules by which they are to be measured, the correctness of all of which we are not fully prepared to admit; and he sums them up by the conclusion that these requirements are met in a greater degree by Armstrong than by Whitworth. Now, while we disclaim any desire to appear as the advocate of one or the other on the eve of trial

Digitized by Google

and investigation, we consider that this conclusion is hardly supported by the succeeding descriptions. One paragraph gives a decided preference to Whitworth's apparatus for breech loading—certainly a very important item—but that advantage is stated to be counterbalanced by serious defects.

The first is an inferiority in initial velocity, which it is confessed Armstrong also sacrifices in some degree, but in what way is not easily divined. We are not aware of the practical disadvantage that, even if it were so, would arise from any slight inferiority in this respect; but the fact is we believe otherwise, and Whitworth claims for his gun a greater initial velocity.

Then the writer undervalues the superior ranges which Whitworth's guns are reputed to have attained, on the plea that a range of five and a-half miles—being beyond the reach of ordinary vision—is of little use for any practical purpose; but he forgets that, however inapplicable to any ordinary object such ranges may be in their direct use, they are valuable as indications of other properties, the advantage of which no one will deny, such as precision of aim, and lower angles of elevation for the shorter and more useful distances.

He then questions the strength of the piece to withstand the effect of very heavy continued firing, on account of the rapidity of the twist, and the extent of surface exposed to friction,—the latter statement being contrary to the known principles of friction,—but at all events this objection is only one of *doubt*, and has yet to be proved.

If Whitworth's gun be heavier than the other, it is an inferiority to the amount of the difference, whatever that may be; but we demur to an exaggerated account of it by assuming the necessity of the complicated classification which the writer would introduce of mixing up diameter of bore with weight of shot. The weight of a solid shot to which the gun is adapted, or from which it can obtain the best effects, may well continue to give its regular designation to the piece. Let the advantages or disadvantages of the length of the projectile be treated distinctly, for or against the system; and among them the doctrine that the best shells are those which are most compact in form. We are not aware of any objection to increased length being given to solid shot; on the contrary, length, with proportionately smaller diameters, would both produce increased effect in shot and shells, and possess greater power of penetration; and with regard to that of the exploded shells, it is one of Whitworth's peculiar claims, that he can vary the length of his projectile at pleasure, and thus add to their explosive power.

After the positive judgment passed at the commencement of the article in favour of Armstrong, and the weakness of the objections which are urged to Whitworth, we are surprised to find at the end a string of most formidable criticisms on the former, to which the other is stated not to be liable. These are the objections, which, if well founded, would we think be fatal to the system:

1. That it is of such delicate construction that it was necessary to send with the equipment to China a certain number of select mechanics, well versed in its manufacture, to keep it in order.
2. That the vast number of minute grooves in its bore, which must always be kept clear and perfect, must be an element of deterioration and embarrassment.
3. Great doubts are expressed whether the pieces are strong enough to withstand extreme trials, founded on the notoriety that some have been damaged or actually burst in firing.
4. Effects produced on the carriages by the violent concussions of the recoil.
5. The desire expressed by Armstrong to obtain a slower igniting, that is, virtually, a less powerful powder, which is considered an avowal of want of strength in the piece.

These objections will, however, all be disputed by Sir William Armstrong. It would appear to us that the writer has never seen the guns in question, or their practice, but has formed his judgment on the printed descriptions and accounts. He considers the French rifled gun superior to both, and looks forward with confidence to the comparison that may be shortly made in the China service, where the French gun will meet Armstrong's, which is pronounced, perhaps, on that account, to be the best of ours; but if it be the same as the gun used by them last year in Italy, of which we know the principle, we are by no means inclined to admit its pre-eminence.

We have received a letter from a correspondent, respecting the tenure of Staff Appointments by Regimental Field Officers on full pay, to which we briefly alluded in our last number. He says:—

In this week's Number of the *Army and Navy Gazette*, you very justly animadvert on the disregard shown to the Regulations by the Horse Guards in the appointment of two mounted officers (majors) of the Scots Fusilier Guards to the Staff. In addition to these, I wish to draw your attention to two other cases also in the much-favoured Household Troops: Colonel F. Seymour, the Commanding-Officer of the 2nd Battalion Scots Fusilier Guards, and the Honourable D. C. F. de Ros, Regimental-Major of the 1st Life Guards; both hold situations at Court, which necessarily must take them away from the duties of their corps, to which they are supposed to devote all their time; yet they cannot certainly be in two places at the same time, and therefore their duties must be thrown upon others.

Surely, if the regulations are to have any weight, they ought to be obeyed in high places, instead of being thus set at nought. If men wish to be courtiers, so let it be; but they have no right to attempt being soldiers as well, and should be compelled either to be one or the other—both they cannot be, without committing a breach of the Regulations and of propriety as well. Both have been about the Palace for years, while their regimental promotion was going on.

While on this subject, I will mention some other instances in which the said Regulations are violated.

In India it appears by the last Army List, that no less than seven Regimental Field-Officers are employed on the Staff, five of them being Lieut.-Colonels of their regiments, namely, Haines, 8th; Talbot, 43rd; Denison, 52nd; Somerset, 72nd; and Bates, 98th; Majors Mackenzie, 92nd, and Ross, 93rd Regiments. This system, in direct violation of the rules of the Service, has been pursued in that country for many years; and, as one among many examples, there is Colonel Congreve, of the 29th, who has been entirely absent from his regiment for many years.

We entirely concur in these observations, and only regret that we have to add to the list given by our correspondent another case, not exactly similar to those he mentions, but one in some respects more outrageous. Very nearly at the top of the list of colonels stands the name of another Seymour—Colonel Francis Hugh George Seymour—who, in the usual course of events, will shortly be a Major-General. Colonel Seymour held the rank of Field-Officer, (Captain, and Lieut.-Colonel in the Guards) for two years only, and therefore, under ordinary circumstances, would be ineligible for the position of an effective General, to attain which a service of six years as Regimental Field-Officer is a necessary preliminary. The Royal Commission, to which the question of Army promotion was referred in 1858, expressly reported against making any change in this wholesome rule, and gave sound and conclusive reasons for so doing, but in the Royal Warrant which followed their report; and which in the main followed their recommendations, a proviso was inserted, among other things, making eight years' service as equerry to the Sovereign a qualifying position for becoming an effective Major-General on the establishment. Colonel Francis Hugh George Seymour is an equerry to Her Majesty, and is thus at this moment actually qualifying for high substantive military rank by his attendance at Court. It is a worse case than any mentioned by our correspondent; for most of the officers he speaks of are at all events doing military duties in some capacity, and are soldiers in reality as well as in name. But Colonel Francis Hugh George Seymour is gaining promotion by filling an office which is as far removed from the profession of arms as that of a Lady of the Bedchamber.

As regards the Regimental Field-Officers to whom our correspondent alludes, the case is directly at variance with the regulations. Clearly either their regiments must suffer inconvenience from the want of a sufficient number of Field-Officers, or the other corps of the Service must possess a superfluity which ought to be abolished.

It was stated by the Surveyor of the Navy, in a report of the Committee appointed by the Treasury to inquire into the Navy Estimates, that at the end of fifteen years, on an average, the hull of each ship in the Navy requires a complete and extensive repair; and further, that the duration of a ship of war cannot be estimated at more than thirty years. The Surveyor took for his guidance the average of the ten years from 1849 to 1859, when thirty-five ships of the line and forty-six frigates were removed from the effective list of the Navy. We much fear that none of our "converted" ships, nor indeed any of our finest specimens of naval architecture, will stand the wear and tear for the periods assigned to them by the Naval Surveyor; and it is supposed, when he made the above statements, he alluded to the duration of sailing-ships only: for we have had a few warnings lately as to the future fate of our Victorias, Howes, Duncans, and Diadems, by the introduction of steam into ships of war. We have found that, instead of requiring a complete repair once in fifteen years only, that as many months are sometimes sufficient to send a ship into dock.

The rapid manner in which the Navy has been reconstructed, in some degree accounts for this premature decay, in consequence of the unseasoned timber, which has been so extensively used, and which from the limited supply in hand could not well have been avoided. But in addition to the use of indifferent *matériel* we must reckon upon our steam-ships of war becoming rotten sooner than our sailing-ships did, in consequence of the heat produced by the volcanic fires we put into them. Shipwrights know to a plank where to "prick" for rotten wood in a steamship. With unerring precision they try her just in the "wake of the boilers," where the alternations of heat and cold are the greatest, and which are sufficient to destroy the best seasoned timber. It is in these places that steam-ships require repairs oftenest.

There is, however, another destructive power that disables a steam-ship of war in a very marked manner, and that is the "shake of the screw." Long continued screw-propulsion at full speed soon tells a tale. We have had indications in the Princess Royal, 91, now under repair at Portsmouth, of the destructive effects of the vibratory motion of the screw. She has been almost rebuilt abaft, after having passed through one commission only. It is said also, in confirmation of this, that the whole of the Channel Fleet is leaky, and that the Royal Albert, the flag-ship, will require a thorough caulking. When we remember how recently this ship was built and commissioned, these reports are by no means satisfactory. Judging therefore from the experience to be derived from the few years the "screw" has been in the Navy, we must expect to find defects in the "deal-wood" of all our ships, which is subject to the cross-strain it receives in passing through a body of water in a state of perturbation.

Of course other Naval powers will have the same destructive elements to contend with as ourselves. Indeed we happen to know that the vibration in some French lines-of-battle greatly exceeds that of our best ships. The Emperor, however, aims at speed—he knows its importance as well as we do. But to obtain this very desirable quality in screw-ships of war, he must be prepared to do as we do, and that is to anticipate a very serious increase in his navy estimates under the head of "repairs."

A statement was lately made to the effect that it was the intention of the Government, not only to stop the disembodiment of the Militia regiments now serving, but in addition to embody the whole of the remaining Militia regiments. As the statement has been copied by some of our daily contemporaries, it may perhaps be well that we should notice it for the purpose of saying that it does not possess the least foundation. Most of the regiments will assemble for their annual training in the course of the spring, but none will be embodied; and as the regiments of the Line return from India, the Militia corps now doing garrison duty will be disembodied.

We learn that Lord Clyde, who accompanies Lord Canning in his progress, was to visit the protected Hill States and return to Simla about the 6th of this month. It is more than probable that the gallant general will not long defer his resignation of the chief command in India, and that his return to England will take place early in the autumn. In hoping that the highest grade of military rank will be conferred on Lord Clyde on his return, we believe we express a hope very likely to be gratified.

The appointment of Major-General Forster as Military Secretary to His Royal Highness the General Commanding-in-Chief is officially settled; but, as we have already stated, Sir Charles Yorke will continue to discharge the duties for some little time.

Consternation has been expressed in some quarters and unmixed satisfaction in others, at the earnestness with which Lord Clyde is carrying out the order regulating the passing of officers for Staff appointments in India. The Commander-in-Chief is thoroughly in earnest upon the subject. No officer is to be placed on the Staff unless he be duly qualified; and the appointment of a young officer upon the personal staff of a general in India has been promptly annulled by Lord Clyde, because the nominee had failed to prove himself up to the mark.

Sir William Mansfield arrived at Bombay on the 10th of March, from Kurrachee, on privilege leave. In all probability he would take up his appointment, as Commander-in-Chief of the Presidency, on the embarkation for England of Sir Henry Somerset, which was fixed for the 27th of March.

Lieutenant-General Sir J. H. Grant, K.C.B., left Calcutta on the 26th February to take command of Her Majesty's forces in China.

Captain F. D. Maclean, 13th Light Dragoons, who had been extra Aide-de-Camp to Lord Seaton, is appointed in the same capacity to the Staff of General Sir George Browne, G.C.B., commanding the troops in Ireland.

Captain R. H. Graham, of the 4th Battalion Rifle Brigade, has been appointed Aide-de-Camp to Major-General Sir Gaspard Le Marchant, Governor of Malta, in the room of Captain Burnside, 21st Fusiliers.

Brevet-Major F. D. Middleton, 29th Regiment, has been appointed Aide-de-Camp to Major-General C. Franklyn, C.B., at Gibraltar.

Captain Earle, 17th Regiment, has been appointed Aide-de-Camp to Major-General Sir William Fenwick Williams, Bart., commanding the troops in British North America.

Captain C. P. Cobbe, 2nd Battalion, 13th Light Infantry, has been appointed Commandant at Fort Elizabeth.

Captain G. Dean Pitt, 80th Regiment, is acting as Deputy-Adjutant-General to the forces in New South Wales.

NATIONAL DEFENCE.*

If in the multitude of counsellors there is wisdom, we are in little danger of remaining in ignorance of the subject of national defence; and it is hardly possible to peruse a moiety of the articles, pamphlets, and *brochures* which have appeared on the same without arriving at a clearer and more definite notion of our shortcomings and requirements in this respect, and of the sacrifices of men, time, and money which we should be prepared to make if we would secure our shores from foreign aggression, and our homes from the hostile tread of the invader.

Unhappily, however, the wisdom not being equally distributed amonst our counsellors, their observations vary considerably in value, and the difficulty which most people find is in sifting, at once, the wheat from the chaff, and distinguishing between the good, bad, and indifferent, which lie strewn in profusion before them.

Most of these pamphlets (for it is to this form of publication that our remarks more particularly apply) are well qualified to impose on the reader; the sign-board which they hang out in the form of a title-page is generally so baited as to promise agreeable fare within, and on the threshold we are met by the host smiling and bowing, cap in hand, and endeavouring to ingratiate himself in our favour by the judicious use of some trite saying, which we are little inclined to deny, relative to the political position of England, —her need, "at this critical time," of men or measures equal to the emergency; the numerical inferiority of our Army, and the like; administering, in fact, a glass of intellectual sherry and bitters, in order that we may sit down with more zest to the dinner which he invites us to discuss: and if, with our appetites thus whetted, and our palates proportionally deadened, we take our seats at the table, it is, possibly, not until we come to pay the bill, in the shape of time expended, that we discover how meagre the fare has been, and what a very poor money's worth we have had.

For many of these hostelries are but sorry, wayside "publics," run up hurriedly to supply the increased demand, stocked with but indifferent viands, and where we should not advise the reader to sojourn if he can avoid it, but rather to pass on to one of those plainer though more solid edifices which he may still find here and there, their cellars stocked with good wine instead of *vin ordinaire*, and where tough meat is not served up disguised in a cheap but piquant sauce; nor where, as in some others, really good fare is spoiled by the inexperience of the cook.

A very little practice will enable the intelligent reader readily to distinguish between the observations which are, and those which are not worthy of perusal; and, with a view to exemplifying our meaning more clearly, we have selected three pamphlets which we may roughly class under the denominations good, indifferent, and bad. It will perhaps be instructive to observe the different effects which a perusal of these pamphlets produces.

The first (1), "On the Necessity of a more Effectual System of National Defence," was written in 1808 by the late Earl of Selkirk, and has lately been republished by Sir John Wedderburn, from the high estimate which (he tells us in a notice at the commencement) he formed of its merits, and from its striking applicability to the present juncture, though of course, as he further observes, various considerations would require to be kept in view in adapting the system herein proposed to the present state of things.

We do not wish to discuss here, nor would our space permit of our doing so, the merits of the scheme which the Earl of Selkirk proposes, and which we may briefly and best describe, in his own words, as consisting in the establishment of a "Local Militia, in which every young man, between the ages of eighteen and twenty-five, throughout Great Britain should be enrolled and completely trained to military discipline" (p. 8); nor is it our intention to follow him into the details which he here with considerable ability and perspicuity lays before us. We desire to examine rather the manner than the matter of the book, though, in truth, both are calculated to afford us equal satisfaction. We have here, then, a plan proposed (whether practicable or not, at least worthy of consideration) by a clear-headed, sensible man, who devotes some eighty pages to its discussion, confines himself to that plan and its details, and when he has laid it before us with the various arguments in its favour, and a few tables in an appendix, containing statistical facts bearing on the same, makes his bow and retires. He does not avail himself of the opportunity to enumerate his own private grievances, nor to express his opinions on half-a-dozen other irrelevant topics of the day; his object is to urge "the necessity of a more effectual system of national defence;" he does so to the best of his ability; proposes such a system as he thinks best suited to the requirements of the case, says his say, and—*finis*; so that, when we lay down the pamphlet, however much, or however little we may have learned, we, at least, experience no sensation of having been taken in, and we feel we have been having half an hour's not unprofitable conversation with a very pleasant, sensible companion, whose suggestions we shall do well to weigh attentively before we dismiss them entirely from our recollections.

Our next companion is Sir Duncan MacDougall, who, in a little red pamphlet, entitled, "National Defence, and Volunteer Corps" (2), makes some remarks on the former, and suggests a system of instruction for the latter, which, in common courtesy, we listen to with attention, though we are disappointed to find thirty-three pages out of the sixty taken up with simple file and battalion movements; not but that these movements are very good of their kind, but because we consider that until some authorised drill-book for Volunteers is published they should abide strictly by the "Field Exercise and Evolutions of Infantry," otherwise the drill-sergeants will have but a weary time of it, if every Volunteer insists on being drilled after a peculiar fashion recommended by General This, or only instructed in particular movements because Colonel That says that no others are necessary. But we readily pardon Sir Duncan MacDougall for taking this opportunity of recommending a few of his pet movements and formations; his great experience with irregular—as opposed to regular—troops is, at least, a fair excuse for his doing so, and the twenty-seven pages which go before fully atone for the thirty-three somewhat unnecessary ones which follow after.

Sir Duncan MacDougall's advice to Volunteers sprinkled about the pamphlet should be perused and digested; it is the sound practical advice of a man who has had much to do with raw levies, and knows the faults to which they are prone, at the same time as he appreciates their value.

In noticing the third of these *brochures* our task is not so pleasant a one; we have here an instance of a dinner composed of wholesome enough food spoiled by the careless way in which it is placed on the table,—soup, fish, and second course being mixed up together in a manner altogether unpalatable.

Has the author of "The War Reserve" (3), we wonder, passed any considerable portion of his service in India, and had his liver enlarged, or his spleen affected, and his temper proportionally so? or is it merely an old gentleman treating himself to some forty or fifty pages of anonymous grumbling, but harmless withal? As it is, we can only conclude, with any certainty, that these pages have been written by rather a testy though, doubtless, gallant old general, who has taken a very gloomy view of affairs; and one which we hope, for the sake of his peace of mind, he has considerably modified since these observations were penned—some months back.

The very laudable object of this pamphlet, as far as we can make out from the title-page, and from a stray passage here and there, is to urge the necessity of establishing a war reserve; and after toiling through twenty-four pages of comparatively irrelevant matter (except a slight allusion to the subject at page 11), we at last come upon the following passage: "The war reserve might be created by bounty, on the plan of Mr. Walpole's repealed or amended bill, to be attached to every regiment in the Service, and liable to be called out and incorporated, say to the extent of 600 men to each. These men to be officered from the half-pay, and to be, in fact, what the French term *cadres*,—in fact, our depôt battalions officered economically from the half-pay list" (p. 24). Now, at last, think we, our author is about to favour us with his suggestions regarding the organisation of such a force as he proposes; but no, with this hazy outline of a plan he quits the subject, and having climbed up the hill we find when we reach the top that we are enveloped in clouds and mist, and must accompany him down the other side, rather out of temper, and very little wiser than when we commenced the ascent. It will be seen, therefore, that the title of this pamphlet is somewhat inappropriate,—a fact which may possibly be owing to the difficulty the author must have found in selecting any other more suitable from the variety of subjects on which he touches, a very labyrinth of military grievances and abuses, up and down which he rushes confusedly, becoming more entangled at every step, until—after incoherently giving vent to his feelings in such a passage as the following, "This substantive brevet rank, though not allowing a major-general to attain the rank of lieutenant-general under five years' service, is another evil; *it savours of the grocer!*" (p. 21)—he at last takes refuge in a Latin quotation in despair, leaving his reader with a vague and unpleasant notion that England is in a bad way altogether, and that unless somebody does something very decided, she will be unable to hold her own much longer against the powerful combination of hostile nations now formed against her, though what this "something" is the General Officer does not explain very clearly, he leads us to suppose that it is somehow connected with the establishment of ballot for the militia; the abolition of purchase ("the greatest curse, expense, and bane of the British army," p. 34); the alteration of the system of officers' messing; the revision of the half-pay list; the re-christening of the military secretary with the title of "*Chef d'Etat-Major*;" and the organisation of the "War Reserve," as above described.

Had the General-Officer confined himself to discussing any one of these subjects separately, his experience might have given a practical value to his observations; as it is, they produce only the confused and unsatisfactory results which we have described; and we hardly know whether to conclude therefrom that he regards favourably our military administration or not; for, after abusing it in many of its leading particulars, he surprised us, at page 32, by stating it as his opinion, that "*The British Army, in its detail, is the most perfect in Europe, and exceeds that of all continental nations in an immeasurable degree!*"

One of his arguments respecting the purchase system strikes us as so extremely original (far more so than conclusive), that we cannot refrain from quoting it: "The system is immoral and antiscriptural. 'Thy money perish with thee, because thou hast thought that the gift of God may be purchased with money.' Now, it is distinctly laid down, that power belongeth unto and emanates from God; 'The powers that be are ordained of God;' but he distinctly curses money as a means—it is buying power" (p. 28). Two pages further on we are glad to find him taking a more practical, though more worldly view of the matter, and descending into some £ *s. d.* particulars relative to the vested interests of the purchase system, more satisfactory, perhaps, to those officers who have paid their hundreds for a commission, though, at the same time, considerably more expensive to the nation at large, than that of allowing their money to perish with them.

Lest it should be considered that we have formed an erroneous and unjust estimate of the value of the General Officer's observations, we will append a few of his remarks anent volunteering, written, as indeed was the whole pamphlet several months back, but which may be not the less satisfactory as proving that our author's foresight is not infallible, and that, possibly, the gloomy view which he takes of England's future is not the correct one after all: "What has become of the great spirit of volunteering, of which we have heard so much? Has it expended itself in the columns of the newspapers? We do not know of the inauguration of a single Volunteer corps. Where are the companies of 100 men to be raised by aspirants to the command of companies in regiments of the Line? Where are the 1000 men which were to be the creative cause of so many colonelcies? Where are the 500 men that were to be raised at Sheffield in a month? For anything the public can learn, their whereabouts may be stated in the expressive sporting phrase, 'nowhere!' It is no use disguising the matter; volunteering, in the sense in which it has been put forward of late, is a failure" (p. 8). We hope these three instances which we have adduced will suffice to show how differently the subject of national defence may be treated according to the ability and judgment of the writer; while we trust that our observations will succeed in their object of warning the reader against devoting himself and his time *unreservedly* to a perusal of the numerous pamphlets treating of the same, and will be of some use in assisting him to select such works as have a solid and practical end in view, and avoiding those wherein crotchety authors avail themselves of the interest excited by an important subject to inveigle readers into a profitless discussion of irrelevant topics or still more worthless theories.

* (1.) *On the Necessity of a more Effectual System of National Defence, and the means of establishing the Permanent Security of the Kingdom.* By the late Earl of Selkirk. Republished by Sir John Wedderburn, Bart., E.I.C.'s Civil Service, Retired List. (London: Hatchard & Co.)
(2.) *Remarks on National Defence, and on the Instruction of Volunteer Corps and other Defensive Bodies.* By Sir Duncan MacDougall. (London: Clowes & Son.)
(3.) *The War Reserve.* By a General Officer. (London: Hardwicke.)

INDIAN WARFARE.*

Anyone who is acquainted with Indian warfare, or who has read any of the numerous works which have appeared on the late operations in that country, cannot fail to be aware of the disadvantage under which our troops have continually laboured in being opposed to an enemy, the strong point of whose fighting tactics, as Sir Henry Havelock here observes, is evasion; and in being utterly unable to compete with them in mobility and celerity of movement.

As a remedy for this, Sir Henry Havelock suggests the organisation of a mounted corps of riflemen, and, in support of his theory, not only quotes the opinion of so experienced an Indian officer as Sir James Outram, but instances the success which he himself obtained, under very unfavourable circumstances, with a small party of soldiers organised somewhat on the principle which he here advocates.

His suggestions are worthy of an attentive perusal by any one interested in the subject, not only from the fact that they emanate from so distinguished and experienced an officer as the son of General Havelock, but because their intrinsic value is considerable, embracing, as they do, the leading principles which must, sooner or later, regulate the organisation of a force necessary for the complete and ultimate success of all hostile operations in India.

Three of the Sepoys of the 28th Native Infantry, who took a leading part in the Shajehanpore massacre, have been sentenced to be hanged at Lucknow. They were clearly proved to have been the murderers of Mr. Ricketts, the collector, as he tried to escape from the church; and of Dr. Bowling while escaping with his family in his carriage. From the evidence it appears that Dr. Balfour and Mr. Lemaistre were killed inside the church, the Rev. Mr. McCallum, and Messrs. Ricketts and Smith outside. One of the scoundrels had enlisted in the loyal Lucknow Regiment under a false name. When the spies made their appearance to search for him, he was found hid under some bales of clothing.

OCCASIONAL THOUGHTS ON MILITARY SUBJECTS.

No. 2.—ARMY EDUCATION.

All will be ready to admit that the present age is pre-eminently the age of inventions. Who can doubt it that considers that gas now illumines our streets and houses; that steam now impels our ships and the locomotives on our railways; that electricity combined with magnetism now conveys the expression of our thoughts, with the rapidity of lightning, over land and under the waters of the sea, from one quarter of the globe to another; that the chemical action of the rays of light has, in photography, been made to catch the image of every object brought within its influence, and to pourtray it with an accuracy and minuteness of detail which no mortal eye or hand could hope to rival, nor is that all, for it has been taught to perform the part of an engraver; that mechanical genius has not only triumphed over the difficulties, and either rivalled or excelled by machine the delicacy of the most skilled manipulation in almost every ordinary manufacture or handicraft, including the work of the sempstress, of the ploughman, the thrasher, and the reaper; but, aided by the teaching of science, has spanned the widest rivers with suspension and with tubular bridges, has launched upon the ocean a mighty ship which may in magnitude be classed with Noah's ark, and has bestowed upon our projectiles of war a power and an accuracy of flight which in former and not very distant times would have been deemed visionary dreams of fancy not realities accomplished? These remarkable examples of man's ingenuity which are here cited as proofs of the propriety of the appellation bestowed upon the age, are strong indications of one of those periodical awakenings of the intellectual faculties of mankind which are probably as intimately connected with the psychical as the earthquake and the volcanic eruption are with the physical laws which regulate the universe.

Witness, for example, the universal thirst, the craving for knowledge now manifested throughout society; in the whole body of which, but more particularly in its middle section, it is now felt to be an element necessary for existence, not a mere ornamental luxury. The more fortunate members of society no longer consider that education should be monopolised by the rich; but wisely and generously aid by their pecuniary resources, and even by their personal efforts and example as occasional lecturers, in bestowing upon their poorer brethren that inestimable benefit which they themselves have, without a struggle, inherited as a birthright.

Many antiquated prejudices and groundless apprehensions have already passed away; and it is now acknowledged by most thinking men that to raise the mental standard of one class is not to lower that of another; what it really does is, to dispel apathy, and it awakens the higher classes from inaction. Not content with exhibiting themselves as objects of admiration to an ignorant multitude, they are now prepared to apply the natural advantages they possess towards the maintenance of their relative intellectual superiority, under the noble conviction that to govern efficiently an educated people, they must themselves be educated.

The educational movement has not been confined to civilians of all degrees; it has equally and even more systematically extended itself to the Army. An admirable training school for army schoolmasters was established at Chelsea, and brought into its present state of efficiency: first, under the supervision, as Inspector-General of Army Schools, of the Rev. Canon Gleigg, Chaplain-General; and then for a short time under that of Colonel Lefroy, R.A., who succeeded Mr. Gleigg as Inspector-General. This latter office has been now abolished, and the whole superintendence of Army schools transferred to the Council of Military Education; deeply ought every member of that body to feel the responsibility they have undertaken. Not merely has the system of Army schools, including the normal and model schools of Chelsea, to be maintained unimpaired as it came to the hands of the council, but it should be their effort to enlarge and strengthen the basis on which it rests; to adapt its teachings to the varied tastes and intellects of soldiers, who, like other men, have not all been built, to use the shipwright's language, on the same lines; to reconcile the principle of discipline which is essential to the schoolmaster as a soldier with the freedom of intellect, which is as essential to him as a teacher; in short, to preserve harmony of action in the whole machine. It cannot be doubted that no one could be safely introduced as an integral member of its body into the Army without being subjected to the same controlling authority as all other members are: on this account a soldier, generally a non-commissioned officer, although discharged on being admitted to the normal or training-school, is re-enlisted on completing his course of instruction, and being advanced to the position of a trained schoolmaster; and, in like manner, a civilian student at the Normal school becomes by enlistment on leaving it at once a soldier and a schoolmaster. The wisdom of this arrangement is manifest, and yet, in practice, it has its difficulties. Placed on a footing, in a military point of view, only with non-commissioned officers, the schoolmaster sometimes fancies that he is mentally prepared and fitted to move in a still higher sphere. This feeling results from a pride of intellect, and that intellect is like the vigorous stock grafted on a crab-stock, which requires only judicious pruning to become a healthful plant.

The case resulting from the circumstances is simply this: the schoolmaster, head-proud, thinks himself somewhat above his nominal rank, becomes exacting, perhaps self-important, and addresses or demeans himself towards his officer as if he thought himself only a very little inferior to him; the officer, if a man of intelligence and judgment—many of whom there are in the Army—will calmly and skilfully check the exuberant growth of the schoolmaster, and prune, not kill the plant; but, should he be possessed of overweening rank-pride, he will think it a duty to crush the head-pride of the schoolmaster, and, by his harsh and arbitrary demeanour will provoke resistance, and thus, by unskilful treatment, destroy the plant which required only to be pruned.

Time was, but happily no longer is, when an officer thought it no degradation to himself, or to the soldier he addressed, to savour his language with a good share of oaths, little reflecting what angry feelings he was exciting in the soldier's mind, and what cruel self-denial he was requiring in the soldier, though he had neglected to impose it upon himself. The progress of education amongst the soldiery of the British Army is calculated to bring about two great results; first, it will prepare the way for the admission to the ranks of the more respectable members of the working-classes, as they will no longer have any ground for imagining that soldiers, as a body, are either ignorant or brutal; and secondly, it will prepare the soldier to become an officer. Some have said, that it was very well to quote the practice of France in favour of the promotion of a large number of soldiers from the ranks to the grade of officers; but at the same time that it should be remembered that the conscription drew into its net many young men of decent families and of good education, whereas by voluntary enlistment an army obtained as recruits little else than the idle, the ignorant, and the worthless. This harsh expression of an exaggerated view of the subject has doubtless done much harm, and is only partially founded in fact, as it is by no means true that every wild youth is incorrigibly idle or every thoughtless lad who enters the Army is necessarily worthless. Look at the raw recruit at his first drill, and at the same man after he has been six months in the Service, and it will be evident that though he had in his early age been neglected and perhaps exposed to many bad influences, he had yet in him the makings of a good soldier and of a respectable man.

Education is completing the good work, and soon the parents of many a respectable young man, being now no longer deterred by the apprehension of his being exposed to the degrading punishment of the lash, will not be ashamed of his enlisting, but will point him out with pride as their own hero, as one of the defenders of his Queen and country; nay, further, as one who, though now a private soldier is, from his character and education, destined to be one day an officer. The schoolmaster is the immediate instrument for carrying into effect this noble and patriotic design, and as such he should be scrupulously guarded from any harsh or discourteous treatment; expressions, which, to some officers would appear mild and harmless, even under the improved relations between officer and soldier, when addressed to an ordinary soldier, such as "You are an impudent fellow," "You are a troublesome fellow," "Get along with you," are totally inappropriate in the communications between officers and schoolmasters. The schoolmaster, as a missionary of education, ought to be considered and treated as a man of education—a gentleman, in fact, though not in name or rank; as such he should be listened to with patience, rebuked with moderation, and answered with courtesy.

The ameliorating effect to be expected from the school system may be correctly estimated by any one who will visit the Normal and Model Schools at Chelsea, and observe the judicious manner in which the men under training are instructed not only as learners but as teachers. Many leave the establishment fully prepared to act, not only as an ordinary school teacher, but as a singing master; and who is there who does not recognise the humanising tendency of music? The soldier who has been taught to relish the sounds and words of pure and noble music and poetry, will turn with disgust from the ribald song of the pothouse. Many again go forth prepared to lecture on several branches of natural and experimental science, at once instructing and amusing the soldier in the long winter evenings. The War Department supplies to the schools slides and magic lanthorns, for illustration of such lectures; and it is most gratifying to find that many officers, including the rev. chaplains, take part with the schoolmaster in the task of lecturing. It is well known that the liberal-minded Commanding Officer of the Aldershot Division, Lieut.-General Knollys, has greatly encouraged this work of love, and it is said that no less than thirty lectures were delivered, by officers under his command, during the last winter. Surely this is one of the most powerful means of establishing a bond of brotherly union between the officer and soldier. Several schoolmasters might be named in the British Army, who, without failing in one iota of the requirements of discipline, have exhibited talents which fit them for much higher positions; some of these were originally soldiers, and what stronger proof could be afforded of the possibility of finding men in the ranks fully qualified to become officers, even had former experience not already proved it.

Much more could be said on this subject; but the preceding will, it is hoped, be sufficient to awaken an interest amongst all officers in the success of the Army School system; whilst it is to be hoped that the Council of Military Education will be impressed by it with a deep sense of the responsibility they have assumed to themselves in undertaking its superintendence. As moderators or arbitrators, they should remember that they act for both parties—the officers on the one hand, the schoolmasters on the other; and, whilst maintaining the authority of the officer, they should guard the privileges, uphold the position, and be tender of the feelings of the schoolmaster. J. E. P.

(To be continued.)

SPECTACLES FOR SHORT-SIGHTED SOLDIERS.—We read in an Indian paper, "A novel experiment, recommended by the Commander-in-Chief, has just been sanctioned by Government. Three infantry recruits lately arrived from England were at the usual medical examination found to be short-sighted, and in their present state useless as soldiers. The use of proper glasses, however, it was added, would make them instantly effective. The Director-General observed that if the Commander-in-Chief did not object to the incongruity of a soldier in the ranks wearing spectacles, there could be no other objection to their being supplied to such men as might require them. A large number of officers assist their sight in this way, and it is a well known fact that many sportsmen wear glasses, some of whom are first-rate shots, and who could not see to shoot without them. Government have accordingly authorised the supply of suitable glasses to the men referred to, as an experimental measure, to be reported upon hereafter."

A correspondent, writing to us from Aden on the 21st of February says: "The real destination of the French corvette *La Cordelière* has just oozed out. On her arrival here *she was going to Bourbon* [?] but now she awaits a steamer, (which of course will come from France *à l'improviste*,) to tow her up the Red Sea. *Crescit eundo.* The plot thickens."—[The corvette has since sailed for the coast of Muscat. The French seem very active along the north-east coast of Africa.]

THE ARMY ESTIMATES

NOT SATISFACTORY, WITH REFERENCE TO OUR INTERNAL DEFENCE, IN THE PRESENT STATE OF EUROPE.

A great mistake, which might lead to disastrous consequences, is made by those who place too much dependence on Volunteers and other irregular bodies, as well as by those who think that the regular Army, without the aid of the former, would suffice for the protection of our country against invasion.

If any Government were so insane as to trust to either of these forces alone, an invading army might be enabled (before extermination, which would, without doubt, be ultimately its fate) to inflict an extent of cruel suffering, destruction of property, and humiliation on Great Britain, from which it could not recover during the life of the youngest man living at the period of the occurrence of so frightful and disgraceful a calamity; whilst, on the other hand, with our glorious Army, a regular Militia, a well-organised body of Volunteers, and a *local or sedentary* Militia (in which every able-bodied man, without exception, if not belonging to one of the three above-mentioned forces, should be enrolled), we might bid defiance to the whole world in arms against us, so far as our internal defence is concerned, even if we lost the command of the sea. But it is indispensable for our *financial existence* that we should maintain a Navy sufficient to cope with all the other navies of the world; for, should our mercantile fleet be shut up in port, what would become of our colonies, our commerce, and our customs revenue? How could our manufactures obtain a market? And, under such circumstances, from what source could an income-tax or almost any other tax be collected? Then again, what would become of our enormous manufacturing population, and what would result from their being thrown out of employment?

It is appalling to think of the consequences that would surely ensue.

Any additional taxation, however great, imposed to prevent so awful a contingency, should be considered by reflecting men to be the payment of a wise and necessary premium of insurance for the protection of their properties and liberties.

Persons possessing proper feeling appropriate towards life insurance as much of their incomes as they can afford, as a provision for their families. Is it not as much the interest and duty of all to insure their properties against an invader, as to ensure their lives, or to protect themselves against loss from fire by the insurance of their houses, &c.

When I stated in my "Remarks on National Defence," that we should always have at least 100,000 regular troops for home defence, I of course meant that that number of bayonets, sabres, and artillerymen should be invariably fit for duty in the field, and that the country should not be deceived by imagining that such a force existed, while a large portion of it was in figures only.

Besides the 100,000 regular troops, I expected that 30,000 Militia, the amount of the establishment of that force, now or lately embodied, were to be kept up, which would give us 130,000 well disciplined men as a nucleous of iron (indispensable in the opinion of all experienced soldiers with whom I have spoken) for our irregulars to rally round as most useful and invaluable auxiliaries in the event of invasion.

But now, it appears, we are to have no embodied Militia. To this there may be no objection provided they are to be replaced by troops of the Line, and that the regular Militia are constantly kept up to their full establishment *by ballot*, and ready to be called out at any moment in cases of emergency.

The number of rank and file in the Army estimates (207,723) appears large, but, after deducting the force in India (70,412), the Colonial Corps (4700), the West India regiments (3000), the Army Hospital Corps (604), the commissariat (284), and 34,000 garrisoning Gibraltar, Malta, the Ionian Islands, and the colonies, there are only 93,045 bayonets, sabres, and artillery men left (including our East Indian Depôts) for home service and to provide relief for 114,410 rank and file serving in India and in our garrisons abroad, exclusive of colonial and West India corps.

It should be well remembered that the Duke of Wellington in his letter to Sir John Burgoyne of 9th January, 1847, stated he considered a force vastly superior to the 130,000 well disciplined troops above mentioned was necessary for the defence of the British Islands.

That great authority, after estimating the garrisons of the Channel Islands ("besides the artillery of each well organised and disciplined"), Plymouth, Cork, Portsmouth, Dover, Sheerness, and Chatham, at 65,000, goes on to say—"I suppose that one-half of the regular force of the country would be stationed in Ireland, such half would give the garrisons of Cork; the remainder would be supplied from the half of the whole forces at home stationed in Great Britain.

"The measure which I have earnestly entreated different administrations to decide on, is to raise, embody, organise, and discipline the Militia of the same numbers for each of the three United Kingdoms as during the war. This would give us a mass of organised forces of 150,000 men."

The above shows that a force of 150,000 well disciplined embodied Militia, besides the regular Army, was considered necessary by the Duke of Wellington for the home defence in 1847; while, by the Army Estimates of 1860-61, only 93,045 rank and file are provided for that all-important and vital object—the protection of *the heart of the empire.*

With reference to the antecedents of the present ruler of France, do we not now require a force as great as when the Duke of Wellington wrote in 1847?

In February, 1858, when I again urged Lord Palmerston to call into existence the volunteer and other irregular defensive bodies, suggested and warmly advocated by me in my memorandum of 1852, I expressed myself to his lordship as follows:—

"It should be borne in mind that success frequently makes men mad. From the success that has hitherto so wonderfully attended the Emperor of the French, he may imagine himself to be the destined avenger of the humilities that resulted to France from our victory at Waterloo; and should he think he possessed the power, it is not contrary to reason to suppose that he might be as likely to direct a *coup de main* against England as he did a *coup d'état* against the constitutions and liberties of his country."

Digitized by Google

When I express my firm conviction that 93,045 rank and file of regularly disciplined troops are totally inadequate for the protection of the country against insult, and having contributions levied on it, particularly when the great extent of coast liable to attack is considered, I cannot, I trust, be accused of undervaluing the great importance to be attached to the services of our patriotic Volunteers, as I consider that force to be the child of my old age, having ever since 1852 warmly urged its formation on every successive administration, and, after a parturition of nearly eight years, it was at last brought into existence by the War Department Circular of 12th May, 1859, stating the conditions on which the services of Volunteers corps would be accepted.

The circular was issued fourteen days after I addressed a letter to the War Minister, dated 28th April, 1859, to show the high value I placed on our Volunteers:

I cannot conclude without giving expression to the deep regret I felt on learning that the Yeomanry were not to be called out for exercise during the present year; as that force, if well instructed to act as Mounted Riflemen, would be a most highly valuable auxiliary to the regular Army, if employed in the field against an invader.

Should the tragedy alluded to in the Duke of Wellington's letter to Sir John Burgoyne, or anything approaching to so great a calamity, ever take place in consequence of the non-adoption of proper precautionary measures, how awful a responsibility would be incurred by any Government that had so culpably neglected its duties.

D. MacDougall.

ALLOWANCES TO OFFICERS.

The Under Secretary of State for War, Sir Benjamin Hawes, has recently issued a circular memorandum, promulgating the new rates of personal allowance for officers and other members of the War-Office, and in the civil establishments at out stations, not within the provisions of the travelling warrant, dated December, 23, 1857, of which the following is a copy:—

"The Secretary of State for War has decided that, in lieu of the rates of personal allowance at present fixed for the respective ranks of officers and clerks belonging to the department when ordered from their homes on public duty, one uniform rate applicable to all classes (except as hereafter provided for the clerks, and appointments of lower grade at out-stations) shall be substituted, and as this allowance should be no more than sufficient to provide for the actual and necessary excess of expense of living away from the usual place of residence, he has approved of the rate being fixed at 16*s.* a day, from the 1st of April, 1860.

"A further allowance of 4*s.* a day will be admitted if the officer is accompanied by a servant, and his rank entitles him to take one, or if the duty upon which he is employed obliges him to travel with one.

"Half the daily allowance is to be charged for the days of leaving and returning home, unless the duty is completed in two days, when an allowance for one day and a half will be granted.

"When the duty is completed in the same day an allowance of 8*s.* is to be charged if the officer travel a distance of not less than 15 miles from his home; if the distance be less than 15 miles 4*s.* only will be allowed.

"It is to be distinctly understood that this regulation is intended to apply to all persons holding appointments, both at the head quarters of the War Office and at the out-stations, hitherto in receipt of a higher rate of personal allowance than 16*s.* a day.

"The uniform rate thus fixed is also to be considered applicable to all officers, whether civil or military, travelling upon the *continent of Europe* or in the United States of America, hitherto allowed special rates for personal expenses exceeding 16*s.* a day.

"The rate of 15*s.* a day heretofore allowed to clerks and others holding appointments in the manufacturing and other civil establishments at the out-stations, having been considered in reference to the rate of 10*s.* a day granted to the clerks of equal or approximate grades serving under the several military storekeepers, whose travelling allowance is fixed by the Royal warrant of the 23rd of December, 1857, No. 204, it has been determined to remove the distinction which exists between these classes respectively, and the rate to be charged therefore in the travelling accounts preferred by all of these classes for service performed subsequent to the 1st of April, 1860, will be limited to 10*s.* a day, with half and quarter of such rate under the conditions provided for in that warrant."

PAYMASTERS.

We have received a copious correspondence in reference to paymasters, the Warrant, and their position, and we condense some of it in the following remarks by one of the best of the writers on the subject as an *exposé* of the case.

The Royal Warrant lately issued, conferring some additional advantages upon paymasters in the Army, has not given entire satisfaction. The omission of two conditions appears to form the grounds upon which the paymasters feel aggrieved, viz., 1st., that, whilst serving, they are excluded from the rank of lieut.-colonel, which the surgeons receive after 20 years' service; secondly, that too long a period (viz., 25 years as paymaster) is exacted before the highest rate of half-pay can be obtained. Of the first we have to observe that we think a paymaster's labours and heavy responsibilities *give* him a claim for as much consideration in respect of rank as the surgeon. Formerly, no officer could be appointed to a paymastership who was under the rank of captain; but, latterly, the regulation has extended to first lieutenants. We think that more consideration ought to be given towards those officers who have served in the combatant ranks, than towards the civilians who have done nothing. One fact will generally be acknowledged, that to secure a military man for any appointment in a regiment is an object; then why is it that officers turn their backs upon paymasterships now-a-days? Simply, because great responsibility and forfeiture of all future promotion deter them from entering upon such a career. It is of importance to Government that paymasterships should be confined to military officers, for many good reasons; one of which is, that when a vacancy occurs, it is necessary for some person, on the spot, to take up the duties. On foreign service, and in time of war, this is essential, so that a regiment may be unfettered by committees, which are productive of much inconvenience. The late Warrant may be said to give greater benefits to a civilian than a military man. For instance, Licutenant A. appointed paymaster after 10 years' service, must serve 10 years more for honorary rank of major; J. S., Esq., paymaster, obtains the rank in 15 years, being 5 years under the combatant. An officer appointed paymaster from lieutenant or captain might be *seconded* in his regiment, and retain his position, but not allowed to give up the paymastership without at least a year's notice, so that ample time may be given to provide a successor. These circumstances would act as inducements for officers to enter upon paymasterships, and save the public the cost of passages to India and other distant stations; and it is much more desirable to secure the services of persons accustomed to military routine than those who are strangers to it. If combatant officers are wanted as paymasters, they must get promotion.

With regard to the second point, it seems unfair towards old paymasters formerly appointed, that they should have to serve for so long an aggregate period before having an unqualified right to retire. Twenty-five years is entirely too much to exact of a man who may have served ten in other ranks. Why might not this be cut down to twenty without harm to the public purse?

RECRUITING FOR THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Adverting to your observations on the present system of recruiting for the Army, and which you have divided into three classes, I beg most respectfully to point out that there are at least six distinct systems of raising recruits for the different Services of Her Majesty. 1st. The district staffs, 2nd, regimental parties from 6 or 8 different resiments stationed in one town or locality at the same time; 3rd, the pensioner force; 4th, the recruiting parties for Her Majesty's East India forces; 5th, the Militia Staffs; 6th, bringers, or, more properly termed, pot-house agents, who usurp the legitimate calling of those employed on the recruiting service. Is it just, or *doing* justice to those so employed, that men unconnected with the Service should be permitted to meddle therein, to the detriment of those who have adopted it as their profession?

Referring to your remarks respecting the difficulty of effecting a Militia man's release, the system here in those cases are, if he passes the medical examination, his release is forthwith given to the party engaging him, if at a distance from head-quarters; an application for a Militia man's release from an officer employed on the recruiting service meets with the same facility, instead of difficulties being thrown in the way, every encouragement is given for the men to transfer their services to the regular Army.

I would here observe that some better encouragement should be given to the permanent staff of Militia regiments than at present; an increase of pay is absolutely necessary, their present rate being for a sergeant-major 1*s.* 10*d.*; quartermaster-sergeant 1*s.* 8*d.*, sergeants 1*s.* 6*d.* per diem, with an allowance of 4*d.* per diem for lodging, fuel, and light. They receive less pay than a barrack labourer, who receives 14*s.* per week. I ask, should this continue? The suppression of the pernicious system of bringers, who are a clog-wheel to the recruiting system, is absolutely necessary.

Trusting that you will give publicity to the foregoing remarks, or such portion of them as you may deem worthy of a place in the columns of your esteemed journal, I am, &c.

A. X. A.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I was very glad to see your remarks on "Recruiting" in Number XI. of your valuable paper, and can bear testimony to their justness.

During the last two years I have frequently had occasion to observe the very prejudicial effect the Militia exercise on the recruiting for the Army. Adjutants and staff-sergeants of Militia have, to my own knowledge, thrown obstacles in the way of men anxious to enter the Line; and how well they succeed in their endeavours is shown by the comparatively small number of men obtained. And, as you observe, most of these swear at the time of enlistment they do not belong to the Militia.

I have had some experience in recruiting, and have found the enrolled Pensioners most useful in getting men, and observe that of the recruits raised by them hardly one deserts. There can be but one reason for this; and it is well explained in the concluding paragraph of your remarks.

I am, &c., Claymore.

PURCHASE IN THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I would draw your attention to the *London Gazette* of the 16th instant, where the Colonel of the 79th Regiment was allowed to retire on half-pay, and an unattached Lieutenant-Colonel brought in to sell,—thus giving the promotion through the regiment *by purchase*. As, however, the senior officer of each rank was able to purchase, and no officer was passed over, it was not a case of peculiar hardship; though, officers who had to pay so much (and, doubtless, considerable sums above regulation) for their promotion, feel it a hard case, especially in these critical times, when they cannot fairly calculate on getting back their money; and it would certainly have been no great stretch of liberality to have given the promotion in the regiment without purchase. It would have been considered a great boon by an old major to be allowed to purchase *for regulation*, and would besides have proved that the authorities are sincere in their desire to check the abuses of a system they cannot get rid of.

When pushed in the House of Commons, the Secretary for War very often expresses the anxiety of the Government to do all in their power for old and meritorious officers who, by their inability to purchase, are kept back in a profession to which they have entirely devoted themselves; but when vacancies like those made by Colonels Douglas, 79th Regiment, and Horsford, Rifle Brigade, are carefully reserved for moneyed men, the poor man, unable to purchase, cannot but consider all such protestations as merely intended to throw dust in the eyes of the public.—I am, sir, yours obediently,

An Observer.

THE PAYMASTERS OF THE NAVY AND THEIR WARRANT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I trust that the paymasters of the Navy will find that the columns of your lately-published, but already widely-circulated paper are open to the publication of their grievances, and that your able advocacy will not be wanting in their behalf, more especially as this question not only involves the individual interests of a large body of valuable public servants, but the general good of that service to which they belong, and in which they discharge most important duties.

Changes innumerable have been of late years made in the duties, pay, and emoluments of these officers.

By Circular dated July 3, 1852, the recommendation of a committee of flag officers who were appointed to inquire into the then existing mode of remunerating the paymasters and pursers of the Navy, was partially carried into effect, and the pay of these officers, at that time ranging from 300*l.* to 1300*l.* per annum was reduced in a very summary manner to a fixed salary averaging from 191*l.* to 500*l.* according to the rate of ship served in, with some trifling increase to the half-pay.

The paymasters were not altogether averse to these changes, many having strong objections to the system under which they had hitherto been paid, but much dissatisfaction was very naturally felt at the inadequate remuneration granted under the circular in question, bearing no comparison to that they had hitherto enjoyed, and moreover from the pay being made dependent on the class of ship served in.

This state of matters was in some measure remedied by Circular 185, of the 3rd of March, 1855. When these officers were classified, their pay averaging from 249*l.* in the fourth, to 600*l.* in the first class, their half pay, however, remained fixed, from 5*s.* to 10*s.* 6*d.* per diem. Still there was much to complain of in this mode of classification; for without regard in any way to servitude or other necessary qualification, the paymasters were indiscriminately classed as they stood on the Navy List, viz., 30 first, 60-second, 80-third, and 130-fourth class. By this many officers, much to their own as well as others' astonishment, found themselves at once in the first or second class, having had little or no sea service, and in many cases with far less than some of their brother officers in the third and fourth classes. Their case was under consideration by Sir John Pakington, and the preliminary steps taken to place them on the footing they are entitled to hold, when, to their extreme disappointment, the present Board assumed office, and Sir John Pakington's plan, based on the requirements of the Service and the recommendation of Sir Richard Bromley (like many other most useful and necessary measures proposed by him), was consigned to the waste-paper basket, to give place to the niggardly and most unsatisfactory Warrant, which has, after some twelvemonths' weighty consideration and delay, made its appearance.

We now find by this Warrant that the classes are to remain unaltered; the list is to continue burthened with men who from sickness or other causes cannot or will not serve, thus preventing the advancement of the hard-working and efficient; while from the small number in the higher classes paymasters of the second are doing duty in first class ships, and third class where second class paymasters should be employed, without any additional remuneration for the additional work and responsibility while so acting.

The scheme of half-pay now fixed is just 1*s.* 6*d.* a-day less than the maximum granted to masters and engineers; while no comparison can be made with that granted to medical men, whose half-pay ranges from 6*s.* to 1*l.* 17*s.* 6*d.* per day. Moreover, while introducing this liberal scheme of half-pay, their lordships fearing they had done too much, deprived their paymasters of the trifling retiring allowance of 2*s.*, which was the only inducement held out to the inefficient to leave the active service list open to their younger and more capable brother officers.

As to rank, the paymasters have none beyond that of the junior lieutenant of a day's standing; and in that elevated position they remain until worn out in the Service, when they are told to go. Those who have entered may become paymasters-in-chief, with the rank of commander; but as this is limited to ten, and as such rank is a very doubtful advantage to men on the brink of the grave, very few care for the distinction.

The paymaster's class is the only one in the Service without a representative in active employ having rank superior to that of lieutenant; and when we find that the present Board of Admiralty have thought proper to cancel Her Majesty's Order in Council of 13th May, 1859, giving certain comparative naval rank to chaplains, the paymasters cannot feel any great astonishment that their claims in this respect have been ignored, and they should be surprised that a similar proceeding has not been attempted with the surgeons, did they not know full well, that those officers can at all times bring a pressure to bear on our naval legislators that no other class can command.

When it is remembered that the enormous annual votes for wages to officers and seamen pass through the hands of the naval paymasters, that the value of stores in their charge amounts even to more than the hard cash and bills they are responsible for, all losses of which have to be made good by those officers, it will be a matter of astonishment to the public, that a body of public servants to whom so much is entrusted, should be treated in such an unfair and impolitic manner.

Fearing to trespass farther at the present time on your valuable space. I am, &c., Fairplay.

CAVALRY CORNETCIES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Notwithstanding the urgent representations of the Secretary for War, the Lords of the Treasury decline to administer a remedy adequate for the emergency; the result, therefore, will be certain failure. In a short time larger concessions, which at this moment would be a welcome boon, will be irresistibly demanded. The advocates of our system, whilst admitting it to be indefensible in theory, alleged that in practice it worked well.

But it has now broken down; and, if not speedily replaced on a sound basis, it will become the ridicule of every military authority in Europe. Eventually, the efficacy of the Service will be enhanced by the substitution of men who intend to

Digitized by Google

make the Cavalry a profession in lieu of a few opulent idlers. But, to induce such men to enter, the charges for the "regimental band," "forage," and "farriery," which in every other service in Europe are gratuitous, must be entirely abolished. They may not be onerous, but they are unjust and vexatious.

The excessive charges for outfit, and the expensive style of living—remnants of a vicious standard—are matters over which the higher authorities are bound to exercise a vigilant and peremptory supervision; and, unless they do, and without loss of time, take cognisance of them, there will ere long be hardly a subaltern left in the British Cavalry, and specimens of that extinct race must be sought for among the saurians of a past age.—I remain, sir, your obedient servant,

PEREGRINUS.

CAVALRY SERGEANTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As your valuable and ably conducted journal is now recognised as the leading United Service organ, and the powerful advocacy of your pen being devoted to the interests of all classes in the Service, I beg to call your attention to an important and ill-requited class, that is, cavalry sergeants. It is universally admitted that the sergeants of the Army are the "mainspring of the military machine," and they are not inaptly termed so, from the important nature of their duties. Some few years since, when the "good conduct pay" was claimed for the sergeants, the full benefits of that Warrant was not conceded, only twopence per diem being added to the daily pay. Comparatively speaking the corporal is better paid, not having so much to pay for his messing or clothing. If an increase of pay cannot be obtained, surely it would not be unreasonable to have an addition to their pay after serving a term of years as sergeant—say three or five years.

It may be said that a sergeant is in a state of transition to a higher rank; but the supply is greater than the demand for troop-sergeant-majors, &c., and the commissioned ranks have become in those "piping times of peace" a *terra incognita* to aspirant and intelligent non-commissioned officers.

Trusting, sir, that you will advocate an improvement in our condition. I am, &c., ONE OF THEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your recent observations upon Cavalry Commissions you very properly suggest that the difference to be paid by a Cavalry officer for his next step in advance ought to be the difference between what he has paid and the whole price of that rank in the Infantry. But should not the suggestion rather be that an officer of Cavalry, a lieutenant for instance, should be required, in case of purchasing the rank of captain, to pay that difference without reference to any previous payment. A friend of mine, now on service in India, lately obtained his lieutenancy without purchase, in consequence of a death vacancy. Surely this good fortune is not to be impaired by requiring him to pay more than others for his next step.—Yours obediently,

CHAS. BROWN.

INCOME TAX.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—An official circular has been issued to all paymasters by a Mr. D. Robinson for the Commissioners of Income-tax, requesting them to investigate and discover if any non-commissioned officer or other in his regiment has any income or emolument *in addition to his pay* that may subject him to income-tax, and, *if so, to deduct* the amount from the sum he pays him.

Now, sir, I beg to ask you is a paymaster (who merely pays the men through the captains of their troops) bound by this order of the Commissioners to act as income-tax collector and to pry and investigate into the private affairs of non-commissioned officers and others, no communication having been received from the Secretary of State for War?

I have the honour to remain, your obedient servant,

A PAYMASTER.

STAFF APPOINTMENTS.

We have received the following communication from a correspondent, in reference to an article on Staff Appointments, in our last number:—

"The writer of this article is in error in stating that the system of permanent Staff Appointments ever ruled in our army.

"It is true that the chiefs of Depôts at the Horse Guards were excepted from the general rule of change after a period of service. It is true, too, that the proper period of five years' staff appointment was from time to time increased at the discretion of the military chief, who could best judge the necessity or advisability of such departure from rule, and was responsible for it; and so I hope to see the changes worked hereafter. But I altogether deny that subordinate officers at the Horse Guards, or elsewhere, 'have accepted appointments under a system which taught them to consider that they were permanently settled;' and, whilst I fully concur in the proposition that meritorious service merits a generous consideration, I conceive that the consideration should be guided in truth by the nature of past services. Apply that principle to the changes which are in course of taking place, and say whether every officer who is advanced has earned such favour by his past career as a soldier? or, whether the continuance in office and advancement of some amongst them, does not exclude others more worthy, if Regimental or Field Service is to be a test."

We think our Correspondent misapprehends our argument. In speaking of those officers to whom we thought some exceptional consideration ought to be shown in practically carrying out the scheme for the first time, we only meant to speak of senior officers who had gone on half-pay, or given up some other position, in the belief (whether arising from direct rule or by usage does not much matter) that, once on the Staff, they would be on the Staff for life.

The Indian military authorities have notified that the officers of the quartermaster-general's department are not eligible for the performance of any staff duties, in addition to their own, either of officers absent on privilege leave, or on sick certificate, for even the shortest period.

GRATUITIES TO SOLDIERS.

A correspondent, in whose views we do not altogether agree, though we concede the justice of some of his observations, objects greatly to the practice of officers giving money to men of companies on particular occasions. In considering the question it is not sufficient, he thinks, to look at it simply as regards the men, or the captains of companies, but it must always be remembered that in an army any irregularity, any corruption, any evil, is increased not a hundred fold, but a hundred thousand fold. Sixpence given to one man in a company on a particular occasion, entails sixpence to every other man in the company on a similar occasion, then, in time, to every man in the regiment, and so on to every man in the army; then the gift becomes a demand—if not complied with, discontent, insubordination, and mutiny ensue. One captain of a company, having given his sergeant sixpence a-day for what is called "paying the company," led to the universal custom throughout the army of a colour-sergeant receiving sixpence a-day for this duty, although it is distinctly stated in the Army Regulations that a platoon sergeant is to be promoted to colour-sergeant, and consequently to the extra pay of the rank, for the purpose of paying the company. One captain, having given his sergeant ninepence a-day beyond his pay, led to a demand for a similar sum by other sergeants; and we have known instances of a colour-sergeant stating to his captain that he could not pay the company for less than ninepence beyond his pay. Such a system is subversive of good order and military discipline, and requires a firm and entire abolition. On one occasion the men of a company not having received what *they* considered sufficient money for their Christmas dinner, amused themselves by fixing the bones of their meat on the walls of their barrack-room, and, on the officer of the company making his appearance, he was received with shouts of a by no means encouraging description. A moment's consideration must show the evil and danger of the smallest amount of corruption in any large body of disciplined men.

THE ARMSTRONG GUNS AND THE ROYAL MARINE ARTILLERY.

Since the introduction of the Paixhan gun into the Navy, and the extended application of steam as a motive power, the tactics of our Service, and of every maritime nation, has been radically changed. Gunnery then became an element of equal importance to seamanship, and the Royal Marine Artillery of this country became one of the finest corps in the world. From 1804, when this distinguished body of men was first formed, until the present day, the good gunnery order, which has gradually developed itself in our ships-of-war, is mainly owing to this corps. Their course of training, which is nearly the same for both officers and men, comprehends infantry drill and musketry, field-battery movements, the service of heavy ordnance, as well as howitzers and sea and land mortars; also the exercise of field-guns and rockets, naval gun exercise, and mounting and dismounting all kinds of artillery, knotting, splicing, and fitting breaches to guns, &c., as well as heating and firing red-hot shot, the preparation and management of tubes and fuses, the manufacture of rockets, portfires, stars, and blue lights; and, lastly, the use and effect of every sort of projectile, as well as the disparting and sighting of ordnance.

From such an extensive course of drill and study of pyrotechny as above, the men of the Royal Marine Artillery become the most skilled warriors under the crown. They are the men in whose hands arms of precision are first entrusted. And now that Armstrong's and Whitworth's guns are about to supersede the old 32 and 68-pounders, it is to the trained gunners of this celebrated corps, and to the seamen gunners of the Excellent and Cambridge gunnery ships that we must look for their introduction into the two Services.

This is now being done. Two of Armstrong's guns, 12-pounders, are now daily used by the Royal Marine Artillery stationed at Fort Cumberland, near Portsmouth. To the stalwart fellows of this corps, this new weapon is a mere toy; they handle it and turn it about with singular ease and rapidity. The celerity with which they bring it to bear upon distant objects is quite surprising. To show with what facility this gun can be used, it was stated that an officer, assisted only by a sergeant, fired it five times in two minutes at a target 3000 yards distant and hit every time.

It is, however, mentioned in dispraise of these guns, that they foul very much, and the gunners soon become as dirty as sweeps from the quantity of matter left in the weapon, and which has to be thoroughly cleansed out with sponges and buckets of water after each discharge. This is a serious defect, and although partially relieved by the lubricating wad lately invented by Mr. Armstrong, yet the defect still continues, but to a less extent. An "Armstrong," however, still continues to be a dirty gun, and will not be much patronised by our Volunteer Corps; for, unless their uniforms are of some very dark colour, their dress will be an expensive item.

The following is a list of the successful candidates for clerkships, in the War Office, in the order of their precedence at a competitive examination just held:—R. H. Granville, H. E. Platt, T. Briant, D. F. F. Richardson, C. Morton, S. C. Rochat, J. Young, C. L. Sutherland, E. B. Falwasser, D. Piggott, A. A'Beckett, and T. P. Hincks. The number of competitors was 50, and not 40.

We scarcely know whether our readers will be more pained or relieved to hear that Miss Emily Wheeler, the daughter of General Wheeler of Cawnpore is still alive. Captain Harvey, Superintendent of the department for the abolition of Thuggee, has had communication with the unfortunate young lady, who, we understand, is so utterly broken in spirit that she entreats her friends not to seek to bring her back again, but to leave her to her wretched fate.

We recently alluded to the dreadful mortality of soldiers' children sent out in troop-ships with their mothers to India. By the present mail we hear that another ship, the Emma Colvin, which arrived at Kurrachee, Feb. 26, from London, with the families, numbering about 500 women and children of the troops in the Punjab, lost, on the passage out, no less than 30 chidlren.

MILITIA SURGEONS.

In reference to the petition or requisition which this useful class of officers are about to press upon the Government, we copy a letter addressed to an Irish cotemporary, who adopted our views in reference to a statement in the Surgeons' Circular.

TO THE EDITOR OF THE DAILY EXPRESS.

SIR,—In this day's number of the *Daily Express*, you, in alluding to the requisition about to be presented to the Secretary of State for War, on behalf of the militia surgeons, state, that the assertion therein contained, viz.—"In the regular service a period of five years' service would entitle the medical officer to permanent half-pay,"—is an exaggeration, as it is only in case of wounds, &c., it is granted.

But, sir, this is not quite correct. It is not meant to assert that half-pay can be *claimed* should any officer *please* to retire, but when a reduction takes place in the standing army, the medical officers would be placed on permanent, or, at least, temporary, half-pay, till their services were again required.

Now, this reduction is exactly similar to the disembodying of the Militia. Why then treat us worse than our Line brethren under similar circumstances? In common justice give us half-pay (till again called on for active service); and even then our position will be worse than theirs. They can do what they like, go where they like in this country, whereas we must reside at our "head-quarters," no matter where they may be. This also is an essential difference between the position of the "combatant" and senior medical officer of a Militia regiment.

Trusting you will insert the above correction, I have the honour to be sir, &c.,

ONE OF THE (SO-CALLED) "EXAGGERATORS."

ATTENDANCE OF OFFICERS AT LECTURES.—Head-Quarters Camp Khunna, Jan. 26.—The General Order, dated Oct. 23 1857, directing the daily attendance of officers, when practicable, at Hindostanee lectures, and calling for periodical reports of progress, is cancelled. The Commander-in-Chief believes that the officers of Her Majesty's Service are fully aware of the value of a proficiency in the native language; and it has been gratifying to him to observe that more than thirty officers have passed at recent examinations. The Commander-in-Chief has further to publish for general information that His Royal Highness the General Commanding in Chief has notified his concurrence with the recent announcement of the Government of India, that a knowledge of the native language, as certified by examination, will be considered an indispensable qualification for responsible employment in this country, whether on the personal staff of general officers, the general staff of the Army, or in other appointments.

Owing to "grave irregularities" at some of the examinations of officers held by local committees in India last November, by which the papers of nineteen candidates were vitiated, Lord Clyde has published the following Order:—"When the candidate has completed his task, he shall be required to *write* and sign, in the presence of the Committee, a declaration, upon honour, to the effect that he has neither *given* nor obtained any aid or assistance whatever, and that previously to undergoing his examination, he was unaware what exercise would be submitted to him, what part of the Text Books he would be called upon to read, or what questions would be asked him." This will effectually prevent deception. A false declaration "upon honour," would expose men to a court-martial. This is a case in which, as in small smuggling, men have no conscience.

The model for the intended statue of Sir Henry Havelock in Trafalgar Square has been completed by Mr. Behnes, the sculptor, and has been exhibited in his studio. The figure stands about 12 feet high, and is calm, erect, simple, and composed. The statue is expected to be placed on its site, the eastern side of Trafalgar Square, in the month of August.

The bulk of them edical officers of the expeditionary army having sailed from England in the hospital ships Mauritius and Melbourne, could not arrive at Hongkong before April. The general commanding, Sir Hope Grant, and Brigadier-General Sir R. Napier, were expected to arrive at Hongkong early in March. The troops at present at the station were healthy.

A correspondent has directed attention to the injustice done to the officers who accepted the retirement of October, 1846. The captains on the 14*s.* 6*d.* list were promoted to be retired rear-admirals with 25*s.* a-day. There were 54 then on the rear-admiral's list, which was to be reduced as, death vacancies occurred on the 25*s.* list to 25 in number, and filled up by seniority of the admirals in receipt of 20*s.* a-day. In 1851 the Reserved Retired List of Rear-Admirals came out, and all the captains on that list receive 25*s.* a-day, though many of them were not home till after the close of the war in 1814; whereas all the retired vice-admirals have been from 50 to 60 years in the Service. Sir John Pakington last year promoted the rear-admirals on the first retirement to be vice-admirals, and it is stated he would have eventually placed them on the 28*s.* list.

The *Newcastle Chronicle* says that an Armstrong gun, with a guaranteed range of nine miles, has been sent from the Ordnance Works, near Newcastle. The destination of this terrific piece of ordnance is reported to be Shoeburyness, where it will be subjected to the tests necessary to prove the capabilities of the piece.

The aggregate number of infantry, cavalry, and artillery for whom accommodation is provided for in barracks constructed each for more than 500 men is 70,103, viz.:—Infantry, 58,931; cavalry, 5,685; artillery, 5,487. The aggregate number for whom accommodation is provided in camp is 31,075.

Captain Francis Gee has been appointed a Military Knight of Windsor.

By direction of the Admiralty, William Kell, shipwright, at the Woolwich Dockyard, has been superannuated on a pension of 42*l.* 4*s.* 2*d.* per annum.

The reception of Father Lacordaire as a member of the French Academy will take place in May. M. Guizot will reply to the address of the new academician.

MILITARY PUNISHMENTS AND MILITARY DISCIPLINE.

(*Continued from page* 127.)

In the communications previously placed before our readers we have treated of the punishments imposed upon military offenders in general. We shall now proceed to bring before them those of exceptional character, inflicted specially, either under the sentence of a court-martial, or for insubordinate conduct whilst in gaol.

In the first category we have three, viz., solitary confinement, corporal punishment, and marking with the letter D. Under the latter we have two, viz., black hole and bread and water.

With reference to the first of these, viz., solitary confinement, we may, *in limine*, say that the period to which any individual can be subjected to this punishment in the year is eighty-four days, and this in detached periods of not more than seven days together in each month; an interval of three weeks elapsing between each solitary confinement in all cases where the imprisonment exceeds three months' duration. Where the sentences are shorter, then the solitary punishment may be extended to fourteen days at a time; but in no instance must there be an interval of remission less than to the same extent, thereby preventing the possibility of any injurious effect being produced upon the mind. The cases in which solitary confinement is most commonly inflicted are those of men either ruptured, having a tendency to it, or some other physical disqualification which prevents their being sentenced to hard labour; but it is very questionable whether much good might not result from the more common adoption of a mixed sentence of hard labour and solitary confinement. This would afford to the chaplains of each religious persuasion fair opportunities of trial as to their power of making lasting impressions, for it is only when the man is in solitude that they have any real chance of working upon the individual. At the present time the average of pensioners sentenced to mixed punishments of hard labour and solitary confinement does not exceed 13 per cent.—indeed, sometimes it is barely more than 4. It is true that there are some idle, lazy fellows who would rather sit in a half-dozing state, lounging away their time in a cell, than be laboriously employed with their fellows; but these we believe to be the exception. Here, however, we would digress for a moment to offer a hint to the presidents of courts-martial. At present it is not uncommon in the sentencing of a prisoner for a comparatively short period, for his committal to be worded thus—"the first and last fourteen days to be solitary." Now, the practical working of this is to reduce the severity of the sentence most materially, for during the first fourteen days the man, under ordinary circumstances, must be in the third class, and consequently be employed at the heaviest shot drill; but, by the wording of the sentence, he is exempted from it, and he sits quietly in his cell, congratulating himself upon the unintentional favour conferred upon him by the court. In all cases the infliction of the sentence should be left to the discretion of the governor of the prison, who can impose it in the manner he thinks best calculated for the public good. Being aware that the infliction of solitary confinement is opposed by many persons, under an impression that it has a prejudicial effect upon the mind, we have taken the trouble of carefully ascertaining the truth or falsity of this idea; and we are happy to be enabled to inform our readers, as the result of our investigation, that in no single instance in any of the military prisons has the mind or body of a soldier been injuriously affected by it. Under these circumstances, we would submit to the commanding officers of regiments, and through them to those forming the courts-martial, whether mixed sentences of hard labour and solitary confinement combined might not be, in many cases, advantageously substituted for that of hard labour alone; and its effect noted for future guidance. We ourselves are inclined to think that if once generally introduced, it would not be departed from.

We have next to speak of corporal punishment. Now, whatever may be the public feeling in general upon this head, we have no hesitation whatever in saying that it should not be entirely abolished, but be retained for employment upon special occasions. We would never subject what is termed in regimental parlance "a good man" to it. We would keep it specially for the low, skulking vagabond, that steals from a comrade, or pawns his military medal, for the fellow who makes enlistment a trade, and who goes from regiment to regiment obtaining a fresh bounty from each, and for the incorrigible blackguard who resists all other modes of corrections. There are now many men upon whom all other forms of punishment have no sort of effect whatever, who are totally devoid of all good feeling, who laugh at all that is said to them by the commanding officers of their regiment, or by the chaplain and governor whilst in gaol, who stick their tongues in their cheeks as soon as the backs of either of those officers are turned, and who defy all authority set over them,—men who will sit dozing day after day in a dark cell upon bread and water, perfectly indifferent, knowing that this form of punishment can only be temporarily maintained, and that as soon as the prescribed period is up they will resume their position amongst their fellow prisoners, triumphing at having in their own opinions gained their end.*

Now, we have had some experience of soldiers, or we should not write thus authoritatively. We have no hesitation in saying that this is the very class of men upon whom *whippings, not a single whipping*, has a really beneficial effect. An advocate for the abolition of corporal punishment who might attend the first flogging of one of these fellows, would, in all probability, go forth confirmed in his opinion as to the inutility of this form of correction. Let him see this man in seventy-two hours, when recovered from the effects of his first punishment, and ready to receive a second infliction. Let him then note the manner in which the bullying, braggadocio tone of talking will change upon his being threatened with a repetition of the flogging. He will see him sneak off to his work without another word, and give no further trouble; he will witness this not in one case, or two, but in every instance.

The ideas entertained by the British public upon the subject of flogging in the Army are most exaggerated; and we believe that nothing would be more calculated to correct the erroneous notions now existing, than the exhibition of a military cat-o'-nine-tails. We know that in the Hounslow case, when the instrument in question was produced, not one civilian present would believe that it was THE instrument employed. They had conjured up in their own imaginations all sorts of notions as to the formidable character of a cat, and when they saw an article but little larger than that with which a boy could whip a top, they seemed disappointed in the extreme, and some even went so far as to insinuate that it was not the one employed, and that the authorities had substituted the one produced in order to deceive. With reference to corporal punishment then, we think the steps lately taken by the Commander-in-Chief are most judicious, viz., the exempting of the good soldier from the liability to this punishment, but retaining it for the otherwise incorrigible thief; and if the public welfare is really desired, its infliction upon this class of candidates will not be discountenanced in future.

(*To be continued.*)

* The sooner such men are weeded from the service the better.—ED.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BEYTS—March 31, at 27, Duncan Terrace, Islington, the wife of John N. C. Beyts, Esq., H.M.'s Indian Navy, of a son.

COLES—March 30, at Ventnor, Isle of Wight, the wife of Captain Cowper Phipps Coles, R.N., of a son.

DUNDAS—March 31, at Marine Villas, Sandgate, the wife of Major Dundas, of a son.

FURNELL—April 1, at No. 7, Woodstock Road, Poplar, the wife of Captain James Furnell, of a daughter.

KING—April 4, at Ednam House, near Cheltenham, the wife of Captain Augustus H. King, Royal Horse Artillery, of a son.

LAWRENCE—April 1, at Larchfield, near Farnham, the wife of Major-General Lawrence, of a son.

LEAHY—April 3, at Simmons Court, near Dublin, the wife of Major, Leahy, R.E., of a son.

MOLESWORTH—March 30, at Gillingham, Kent, the wife of the Rev. Thos. Molesworth, Chaplain to the Forces, of twin sons.

PHELIPS—March 31, at 5, Claremont Place, Dover, the wife of Captain Henry Phelips, Royal Artillery, of a son.

SOMERVILLE—March 30, at Malmaison, Castle Townsend, county of Cork, the wife of Lieut.-Colonel Somerville, of a son and heir.

SPALDING—Jan. 29, at New Westminster, British Columbia, the wife of Captain Spalding, J.P., of a son.

SWINTON—April 3, at No. 6, Atholl Crescent, Edinburgh, the wife of Lieutenant R. Hepburne Swinton, R.N., of a son.

MARRIAGES.

TARVER—MILLER—March 31, at Upton Old Church, by the Rev. Joseph Tarver, M.A., of Newport Pagnell, Bucks, assisted by the Rev. John Adam Cree, M.A., of the parish of Upton, Henry Tarver, Esq., of Eton College, to Henrietta, youngest child of William Miller, Esq., late of the Royal Artillery.

DEATHS.

ABERCROMBIE—April 3, at 25, Kensington Square, John Abercrombie, Esq., late Surgeon 19th Light Dragoons, aged 82, one of the few survivors of the Duke of Wellington's Indian Campaigns of 1803-4.

CADE—March 24, in London, Major William John Cade, aged 52, late of the 13th Regiment Bengal Native Infantry.

FARRER—April 3, at No. 24, Chapel Street, Belgrave Square, Mary, daughter of the late Colonel the Hon. David Leslie Anstruther, and widow of F. S. G. Farrer, Esq., of Brayfield House, Bucks.

FITZPATRICK—March 7, at Bath, William John Whannell, eldest son of John Fitzpatrick, M.D., Madras Army.

GOMPERTZ—Feb. 3, at Huryhur, William Underwood-Eastment Gompertz, H.E.I.C.S., Lieutenant 16th Regiment, M.N.I., eldest son of the late Captain Gompertz, of the same service and the same Presidency.

HANWELL—March 14, at her father's residence, Stuttgart, Würtemberg, Julia Frances Jane, second daughter of Major-General Hanwell, aged 23.

HOLLIS—March 30, at Cheltenham, Major-General John J. Hollis, on the retired full-pay of the 25th Regiment, aged 76.

IRWIN—March 31, at Cheltenham, Colonel Frederick Chidley Irwin, K.H., formerly of the 83rd Regiment, and many years Commandant in Western Australia, after long and severe illness.

LAW—March 29, Major-General William Henry Law, aged 74.

LEE—April 4, at his official residence, Greenwich, aged 71, Charles Lee, Esq., Clerk of the Works at the Royal Hospital during a period of twenty-eight years, greatly respected for his integrity and kindness of heart, and most sincerely regretted.

MURE—April 1, at No. 1, Kensingtsn Park Gardens, Colonel William Mure, of Caldwell, Ayrshire, N.B., aged 61.

NARRIEN—March 30, at No. 16, Clarendon Road, Kensington, Professor Narrien, F.R.S., aged 77, late of he Royal Military College, Sandhurst.

SOADY—March 31, at Edrington House, Berwickshire, Major Thomas Eales Soady, late Bengal Army, aged 72, respected and beloved by all who knew him.

TELFER—March 21, at Malta, Thomas Alexander Telfer, Esq., R.N., Secretary to Rear-Admiral Codrington, C.B., son of Deputy-Commissary-General Telfer, aged 34.

TURNER—April 4, at Manor Street, Clapham, after a short illness, Mary Elizabeth, eldest daughter of the late Captain I. R. Turner, 54th Regiment, aged 19.

WEEKS—March 28, at Abbotts, near Honiton, aged 84, Sophia, relict of the late Richard Weeks, Esq., formerly Captain of the Horse Grenadier Guards, and of Green Park Place, Bath.

WYATT—March 28, at Lympstone, near Exeter, Harriet F., widow o the late Colonel Wyatt, aged 77.

THE BRITISH ARMY.—"A Lecture on our Army, Past, Present, Historical, Episodical, and Anecdotal," was delivered on Wednesday evening, in the theatre of the London Mechanics' Institute, by Mr. Thomas Carter. The Right Hon. the Lord Mayor took the chair, but from unavoidable circumstances did not arrive until after the lecture had commenced. The theatre was well filled in every part, and among the audience was a large number of Volunteer riflemen, to whom, indeed, the subject was of more particular interest. The lecturer commenced by giving a sketch of the rise and progress of the British Army, during which he introduced many of the famous military men of the time of William III. and Queen Anne, and took occasion to allude to the abolition of the "cat" in the Army, which was received with loud applause. After detailing the heroic deeds of females, he came at last to those of Florence Nightingale, and the simple mention of her name elicited an enthusiastic burst of applause.* Passing on with his subject, Mr. Carter spoke of the rewards and decorations that were given to soldiers in the Army, and pointed out the reforms that were taking place in the regulations governing that body. He referred to the decorations given for bravery, but in particular to the order of the Victoria Cross, and pointed out how much the value of that honour had been enhanced by Her Majesty distributing with her own hands that glorious symbol to the gallant men who had merited it. The lecture, which was illustrated with drawings of costumes and pictures of battles, was well received throughout, and, on the motion of the chairman, a cordial vote of thanks was given to the lecturer.

* We regret to say the health of this lady does not improve. If prayers could restore her, assuredly she would be well.

Advertisements.

PERSONS PROCEEDING TO INDIA, or any of the British Colonies, can effect assurances on favourable terms with the COLONIAL LIFE ASSURANCE COMPANY.

Loans given to Civil or Military Officers proceeding to India on Her Majesty's service.

Agents at Calcutta, Madras, and Bombay, and in all the British Colonies, where premiums can be paid and claims settled.

The COLONIAL was established in 1846, and its present income is upwards of 100,000*l.* per annum.

Subscribed capital, 1,000,000*l.* sterling.

Divisions of profits have taken place on two occasions—in 1854 and 1859.

A Policy for 1000*l.*, opened in 1847, has been increased by the application of the Bonus to 1235*l.*

Constituted by Act of Parliament.

SAMUEL R. FERGUSSON, Resident Secretary.

MAPPIN BROTHERS, 67 & 68, King William St., City; Manufactory, Queen's Cutlery Works, Sheffield.

Table Cutlery, Razors, Pocket Cutlery, and Scissors, of their own Manufacture, in Stock for Exportation, at Sheffield Prices.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission, Author of "Adulterations Detected." "The Urine in Health and Disease," &c.
Wimpole Street, 20th January, 1860.

MONEY.—A Gentleman is desirous of INVESTING a FEW THOUSAND POUNDS in the PURCHASE of, or ADVANCING (in sums of 150*l.* and upwards) upon REVERSIONARY PROPERTY (freehold or funded), or will Lend it, for long or short periods, upon the personal security of responsible parties, heirs to entailed estates, &c.—Address, in the first instance by letter, to M. A., care of Messrs. HALTON, Tailors, 4, Princes Street, Hanover Square, W.

A BOON TO NERVOUS SUFFERERS.

THE NEW MEDICAL GUIDE for gratuitous circulation. A NERVOUS SUFFERER having been effectually cured of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, by following the instructions given in the MEDICAL GUIDE, he considers it his duty, in gratitude to the author, and for the benefit of others, to publish the means used. He will, therefore, send post free, on receipt of a directed envelope, and two stamps, a copy of the book, containing every information required

"Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind."—*British Critic.*

Address, JAMES WALLACE, Esq., Wilford House, Burton Crescent, Tavistock Square, London. W.C.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

TEETH REPLACED, DECAYED TEETH RESTORED.—Mr. A. ESKELL, Surgeon Dentist, supplies patented Incorrodible Teeth without extracting Teeth or stumps, on his never-failing and painless principle of Self-adhesion; rendering detection impossible. Articulation and mastication guaranteed. Decayed Teeth rendered insensible to pain, and stopped with his Osteoplastic Enamel—of the same colour as the Teeth, permanently useful, and lasting unchanged for years, (a most important discovery in Dental Science!) Loose Teeth fastened, &c. Hours, Ten to Six. Consultation free. Charges strictly moderate. 314, Regent Street (opposite the Polytechnic), W., and Bennett's Hill, Birmingham.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"NEW GUN.—Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times.*

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

REVOLVERS, GUNS, & RIFLES OF THE FINEST LONDON MANUFACTURE.

ROBERT ADAMS (Gunmaker to H. R. H. the Prince Consort), 76, King William Street, London, E.C., supplies, wholesale and retail, his PATENT REVOLVER, as exclusively adopted by H. M.'s War Department and the Indian Army; together with Military and Sporting Guns, Rifles, Breech-Loaders, Ammunition, and Appurtenances of every description.—Price Lists by post on application.

TO MEMBERS OF VOLUNTEER RIFLE CORPS, CLUBS, &c.

WATERPROOF ENFIELD CARTRIDGES (Government Gauge).

This Cartridge is manufactured by T. H. ANTHONY (late Anthony & Harris), of Birmingham; it is made of their Patent Waterproof Paper, and its great advantages over Government and ordinary Cartridge are as follows:—

They may be placed or stored in outhouses, barns, cellars, &c., no matter how damp the place is, and the powder will keep perfectly dry for years; thus doing away with the unpleasant feeling in most families of having cartridges stored in the house.

They are also more economical; for unless the ordinary cartridge is stored in a very dry place *they soon* become useless, powder being so susceptible to the least amount of damp.

The Waterproof Cartridge is stronger by 20 per cent.; thus they never break, and will stand double the wear and tear. They may be steeped in water for hours, and the powder will remain dry as when put in. A rifleman, skirmishing, may have occasion to cross a ford or river, up to his waist or neck, his cartouche box filled with water; with the ordinary cartridge his shooting would be over for that day, but with the Waterproof Cartridge he has the satisfaction of knowing that his powder is perfectly dry and not one will miss fire.

The Rifle is also less liable to foul, and will require less cleaning.

And lastly, the price is but a trifle higher than the regular cartridge.

Sold in boxes of not less than 500, made up in packages, price 70*s.* per 1000, box included. Blank Cartridges, 45*s.* A liberal allowance to corps ordering 5000 and upwards.

All orders completed in rotation, and must be accompanied by post-office order made payable to THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

WOOD'S RIFLE TARGETS.—IRON TARGETS for Volunteer Corps, or Private Practice Grounds, the Government pattern, delivered free at any railway station in the kingdom at RICHARDS & Co., the appointed Agents, 117 & 118, Bishopsgate Street Within, E.C. Drawings, &c., per post.

CHRONOMETERS, WATCHES, CLOCKS, &c.

E. WHITE, for several years principal assistant at Messrs. Dent's, of Cockspur Street, having taken the above premises (formerly occupied by Messrs. Green & Ward), respectfully solicits an inspection of his Stock, comprising a choice selection of CHRONOMETERS, WATCHES, CLOCKS, &c., all of which have been recently manufactured on the most improved principles, by workmen of the first talent.

20, Cockspur Street, Pall Mall, London, S.W.

GOLD WATCHES, CHAINS, AND JEWELLERY, best quality, at moderate prices, at HASELDINE'S (Successor to Young), 3, Coventry Street, Haymarket, W. Diamonds, Pearls, and Plate purchased or exchanged.

BENNETT'S WATCHES, 65 & 64, Cheapside, E.C., in gold and silver, in great variety, of every construction and price, from 3 to 60 guineas. Every watch skilfully examined, and its correct performance guaranteed. Free and safe per post.

Money Orders to JOHN BENNETT, Watch Manufactory, 65 and 64, Cheapside, E.C.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

THE VOLUNTEER'S PATENT CLIP, the INDISPENSABLE, for suspending gloves or any other requisite instantaneously and safely. Send eighteen stamps to the Patentee, and by return of post one of these useful articles will be sent. Every rifleman in the country should have one.

CASTLE & Co., Patentees, 17, Colchester Street, Savage Gardens, E.C., and 3, London Road, Croydon, S.

RIFLE REGULATION GLOVE.—W. TENT begs to inform those Gentlemen who have joined the different Corps, that he has had made for them expressly the BLACK BUCK REGULATION GLOVE that is being worn by the 7th Surrey and other Corps. To be had only of W. TENT, Shirt Maker, &c., 4, Birchin Lane, Cornhill, E.C. N.B. The Dress of the 7th Surrey to be seen on application.

RIFLE CORPS.—The MATERIALS recommended by Government may be seen at Messrs. NICOLL'S, Army Depot, Regent Street, London, W. As every suit of uniform will be made from measures taken by skilled foremen, gentlemen are requested to call there in preference to making appointments to be waited on at their own homes. Cash payments being required, the best articles are produced for very moderate prices.—H. J. & D. NICOLL, 114, 116, 118, 120, 142, 144, Regent Street, W.; 22, Cornhill, E.C.; and 10, St. Ann's Square, Manchester.

SERVANTS' LIVERIES.—The best, at moderate prices, furnished, for cash payments, by H. J. & D. NICOLL, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, E.C., London; and No. 10, St. Ann's Square, Manchester.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,

JAMES COULSON & Co.,

Beg to intimate that their only London Depôt is at No. 46, PALL MALL, S.W.,

A few doors West of the Army and Navy Club.

CONDY'S PATENT FLUID, OR NATURAL DISINFECTANT,

Not only deodorises but disinfects perfectly, and DESTROYS FOR EVER the cause of infection. Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease, and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

Patronised and reported upon by the Board of Health and all the most eminent medical men of the day most satisfactorily.

Sold in Quart Bottles, 4*s.*; Pints, 2*s.*; Half-pints, 1*s.*; and in bulk, 10*s.* per Gallon. Sold by all first-class Chemists.

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious Vinegar, ensure purity, and effect a saving of 50 per cent. See Report of Dr. Letheby, City Officer of Health; Dr. Hassall, of *The Lancet* Commission, and others. Sold by the Trade, in bottles, labelled and capsuled. Wholesale

63, King William Street, London Bridge, E.C.

Sample for Six Quarts, to any Railway, for 3*s.* 6*d.*, P. O. O. or Stamps.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

SAUCES.—Connoisseurs have pronounced LEA & PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.

Sold by CROSSE & BLACKWELL, London, and all respectable Oilmen and Grocers.

Sole Manufacturers—LEA & PERRINS, Worcester.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND

Are at all times to be obtained of

PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.

Black or Green Tea, 2*s.* 8*d.*, 2*s.* 10*d.*, 3*s.*, 3*s.* 4*d.*, to 4*s.*

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

THE KOH-I-NOOR (OR MOUNTAIN OF LIGHT) CANDLE.—The name of KOH-I-NOOR has been appropriately given to a new and BEAUTIFULLY TRANSLUCENT CANDLE, manufactured only at the WEST OF ENGLAND SOAP AND CANDLE WORKS, AT PLYMOUTH. They are preferable in appearance to Wax or Spermaceti; are equal in brilliancy of light and durability in burning; and are supplied at *one-third less cost* than Wax and Spermaceti. West of England Soap and Candle Works, Plymouth.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,

AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.

Sold by all Chandlers, Grocers, &c., &c.

WOTHERSPOON & Co., Glasgow and London.

GAY & SONS' DRESSING-CASES are the best and most reasonable.

113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, April 7, 1860.

IT is recorded of the late Lord Melbourne that he manifested an intense dislike to the ambiguous but common expression "Doing something," and that he characterised it as a "certain means of doing something wrong, accompanied with a fearful waste of public money."

"To do something" is the ambition of the day. It pervades private as well as public life; and were the pockets of individuals as well lined as those of the Chancellor of the Exchequer, none of us would be safe from the insidious whisperings of those able and oily gentlemen who go about the world improving opportunities and suggesting means for the supply of the imaginary wants into which they have previously frightened the public.

That which Lord Melbourne hated with such horror has come to pass under the benign influence of Royal Commissions recommended by Parliament. It is difficult to say whether these Commissions should be encouraged or condemned. Public opinion compels their appointment, but rarely keeps up a sufficient interest in their working to make the production of a report desirable. They form convenient shelter, behind which careless administrators hope to shield themselves if the verdict be favourable, whilst if adverse, they trust to the lapse of time to avert the indignation that gave rise to inquiry; and if startling and novel, it is voted to be an intense bore, and shelved accordingly.

We have seen several of these tribunals sitting lately, and it may not be uninstructive at this moment to refer to the generally unimportant character of their results; whilst it is not less worthy of attention to remark, that the recommendations which have inculcated economy and denounced waste, have been received with far less favour than those which demanded increased expenditure.

The Navy rejoices in a plurality of these Commissions. They sit upon anything and everything; but their eggs are nearly always addled. One incubation took place upon an embryo project for Manning the Fleet and saving us from invasion; but the chickens never escaped from the shell, for Jack had such a strong impression that his ruthless parents would devour him before he was fledged, that he declined to be liberated in order that he might afterwards be eaten.

Another sat upon the state of the Steam Reserve in the Royal Navy; but it told some disagreeable truths with regard to the engines of the Retribution; and other facts leaked out, well known to the initiated, but concealed from the outsiders.

This was too dangerous a precedent. So the report was just emasculated, and then burked.

A third took its ground upon what was facetiously called "Dockyard Economy;" but hereupon there was evidently no *locus standi;* and as soon as the disagreeable document that announced this conclusion had been laid before the authorities, it was consigned to that limbo that awaits all meddling interference with privileged departments.

A fourth is still at work upon Light-buoys and Beacons, of which only one certain result can be foretold,—and that is a battle-royal between the Commissioners and the Trinity House. Number five was a *coup de maître;* it referred the whole subject of Harbours of Refuge in the United Kingdom to a Commission which had not the fear of the House of Commons before their eyes. And they have modestly proposed the expenditure of a few millions, in order to construct artificial harbours for ships that could not use them, except under circumstances that made it more dangerous to attempt an entrance than to keep at sea.

But all these sink into insignificance when placed in juxtaposition with the crowning glory of the report that is now before the military and naval authorities, waiting the approval of Government before being submitted to Parliament. It asks for no less a sum than ten millions for the sole purpose of making and establishing such Defensive Works as may be necessary to protect our arsenals and dockyards from invasion. What a round sum of money, and how easily and pleasantly disbursed, especially if the "decemvirs" who recommend it are to be intrusted with the application of the funds! How grateful ought we all to be that they have limited their demands to so trifling an amount, and are willing to insure us against all risk for so moderate a premium! Surely the days of Vauban and Carnot are returned; and, if a few unbelievers are heard to institute odious analogies between the proposed defences and the great wall of China, it is sufficient for their refutation to observe that antiquities are highly honoured in this country; and that whilst we are proud to imitate the great works of ancient nations, we consider ourselves to be far beyond the trifling practical details of staking and blocking the entrance to a river, as recently adopted by a set of bunglers at the mouth of the Peiho.

There is, however, one stake upon which the Commissioners will certainly impale themselves, and that is a disregard for public opinion, as expressed through the pocket interest. The one pervading idea that seems to attach itself to all Royal Commissions appears to be, "how to spend most money;" "rem quocunque modo" might be their motto; and the experience of the last two years has led to the belief that the more is asked, the more liberally will it be voted. But there is a limit, and even an end, to all things. No more screws of the income-tax will be endured; and those worthy gentlemen who count our capabilities as well as our means by the mere faculty of reckoning in millions, may find that these proposals will end in a manner somewhat similar to that of the filtration of the Serpentine, and with similar humiliation. We cannot afford to be plundered by empirics who advertise their quack medicines at our expense, and then make us pay for the stamp that surrounds the poisonous contents of the pill-box. Let them be advised that there is an old proverb of "not driving a willing horse to death." Re-action invariably follows too much action; and they may some day find a hard-headed set of legislators going in for economy more than would be agreeable to the short-sighted assailants of the public purse, who will then discover to their cost that it is sometimes better to do nothing than to be always working for a visionary something.

It is true that Colonel Sykes failed to obtain from the Secretary of State for India the papers recording the opinions of the local authorities or of the home council on the question of maintaining a permanent local army of Europeans, in addition to the regiments under the immediate authority of the Commander-in-Chief in England. Those papers will have to be eventually produced, and Sir Charles Wood will have to explain the grounds on which he altered his opinion on that subject. He led the House to believe that the change was founded on the conduct of the European troops of the Company's Army on a late occasion. There may be differences of opinion on the rights of the men to receive the same bounty on their transfer from one Service to the other, as has been usual in the case of soldiers of the Royal Army when transferred to the service of the Company, or even when changed from one regiment to another of the Royal Army. The Attorney-General,—an incompetent authority on a military question, and probably unacquainted with the established practice of the Service,—was referred to, and gave his judgment against the soldiers, who, therefore, after some regrettable exhibitions of irritation and indiscretion, were offerred their discharge and a free passage back to England. Of the whole number, less than one-half claimed their discharge. It is upon that transaction then that the Secretary of State for India withdrew his recorded opinion and declared that a local army composed of Europeans under his own immediate authority, and the Council and the Governor-General of India, should not be allowed to exist. These men thought they had been unjustly dealt with; and referring to the language used by the Prime Minister of England on the debate of the transfer of the Company's servants to the Crown, they required their discharge or a bounty on entering the new Service. They were accordingly dismissed and paid off in India, and were thus legally relieved from military subordination. They were peremptorily refused any characters, as is usual on all such occasions, and were put on board ship like so many convicts, under one or two officers, according to the branch of the Service to which they had belonged, without any non-commissioned officers. Their sea-kit was supplied to them on shore, instead of after they embarked, and no measures were taken to prevent their selling them. In one instance, nearly a thousand men were crammed into an emigrant ship only adapted to receive four hundred, with unwholesome food that caused the death of many; and between two and three hundred were landed at Liverpool on litters, when they were conveyed to the hospital, where several have since died. They submitted to the discipline to which they had been accustomed, to ensure which they undertook on their own authority to elect non-commissioned officers, to whom they could not promise remuneration, by which means order was as effectually preserved as if the men were still in the Service, and, in some few instances, the soldiers were subjected to punishments. It might be supposed that the passengers on board the Tasmania would have become impatient and unruly under the calamitous circumstances in which they were placed, and would have required that the vessel might be put into some of the English ports they passed on their voyage, where they might have wholesome food supplied. Nothing of the kind occurred; the force of discipline was strongly implanted in their minds. They patiently submitted to their fate; and their commanding officer bore testimony, on their arrival in England, of their exemplary conduct during the voyage.

All honour, then, to that system of the late East India Company's Army which afforded such abundant proofs of discipline under the most trying circumstances.

The spirit which precluded these men from receiving from their officers testimonials of their previous conduct, in order to preclude their re-enlisting in England, has been disappointed, inasmuch as they have been entertained in great numbers, and will prove a valuable acquisition to the Army at home.

We do not pretend to uphold the soldiers of the late Company as superior to those in Her Majesty's Service; but we venture to say they have on most occasions, whether in peace or in war, shown themselves equal to any troops of the Crown.

The last Order in Council has effected an alteration in the rank of inspectors afloat, which it is necessary to bring to notice. Masters of the fleet, who ranked with lieutenants only, and wore the uniform of commanders, now rank with commanders; and, therefore, inspectors who rank with masters of the fleet rank with commanders. Deputy-inspectors of machinery, and harbour-masters, have the absolute rank of commanders with seniority as such. Masters of the fleet and secretaries to admirals have *temporary* rank as commanders; so that a master of the fleet, after a war, takes his rank and seniority as a master only when appointed to a ship as master; and a secretary after the flag is hauled down takes his rank and seniority as paymaster simply, both officers then ranking with lieutenant; but inspectors rank *permanently* with a master (there is no master of the fleet now), who ranks with commander: thererefore, inspectors permanently rank with commanders.

THE ARMY.

2nd Dragoon Guards. Captain Calvert is attached to the depôt at Canterbury.

5th Dragoon Guards. Colonel M'Mahon of this regiment is now Sir Thomas Westropp M'Mahon, having succeeded to the baronetcy.

6th Dragoon Guards. Brevet-Major C. P. Rosser has succeeded Captain Dickson in command of the depôt at Maidstone.

7th Dragoon Guards. Captain Withington has been appointed to command the depôt at Canterbury. Cornet Redman has arrived in England in the troop-ship South, from Kurrachee, in charge of detachments. Capt. Blinkhorn has leave to Bombay, from February 5 to April 14.

2nd Dragoons. Detachments of the Scots Greys have been engaged attending the Clare election this week.

3rd Light Dragoons. Colonel Unett, C.B., it is understood, is about to retire from the service. Lieutenant Lowe, late aide-de-camp to Lord Cardigan, also retires. The following promotions by purchase will thus take place: the Hon. Major Monckton becomes Lieut.-Colonel; Captain Williams, Major; Lieutenant Unett, Captain; and Cornets Barrett and Willes, Lieutenants.

14th Light Dragoons. A correspondent writes:—"Eleven men of the 14th Light Dragoons arrived at Newbridge from Chatham last week. They had all preceded the regiment (from India), being at the time sick, but now all are fit for duty. Every one of these men have claimed their discharge, being so disgusted at being quartered on such a place as Newbridge, and the difficulty and expense to them of furloughs to see their relations in England. Surely this will open the eyes of the authorities to the impolicy, to say nothing of injustice, of sending an English regiment on return from foreign service in India to Ireland. These are all good men, and fit to serve six or eight years longer. We fear that if the head-quarters are sent to Ireland, all the men that can will follow the example of these eleven and leave the Service, which is a heavy loss to themselves as well as the State." [Although we think every possible consideration should be shown to regiments returning from India, it does not accord with our notions of duty and discipline that the soldiers should decide on their own stations at home.]

Royal Artillery. The following officers of Royal Artillery have been raised to increased pay:—Lieut.-Colonel Edward Price, C.B., of the Horse Brigade, to lieutenant-colonel's pay, vice Wood; Colonel C. L. d'Aguilar, C.B., of the Horse Brigade, and Lieut.-Colonel Brandling, C.B., of the 2nd Brigade, to major's pay.

The following changes have been announced in general regimental orders:—Colonel d'Aguilar, from Dover to the Horse Brigade at Ipswich; Lieut.-Colonel Brandling, C.B., from Norwich to the 2nd Brigade at Dover; Captain W. B. Saunders has removed from Plymouth to Norwich; Captain Addington is to remove from Calcutta to Plymouth; Lieutenant G. A. Crawford, of the 6th Brigade, has been appointed to the Gentleman Cadet Company, vice Hanwell promoted; Second Captain Betty is posted to the 8th Brigade, vice Gore; and Second Captain Holdsworth to the 14th Brigade, vice A. C. Johnson. The under-mentioned officers are raised to increased pay:—Lieutenant H. F. Phillpotts, 4th Brigade, vice Still; Lieutenant H. M. Burgess, 3rd Brigade, vice Hanwell; Lieutenant D. H. Jago, 8th Brigade, vice Betty; and Lieutenant A. W. Montgomerie, 2nd Brigade, vice Holdsworth. The following removal of officers is announced:—Captain Hill, from Dublin to Gibraltar; Captain Campbell, from Madras to Plymouth; Second Captain Gore, from Aldershot to Dublin; Second Captain A. C. Johnson, from Bengal to Madras; Second Captain Still, from Dover to Gibraltar; Second Captain Betty, from Malta to Aldershot; Second Captain Holdsworth, from Woolwich. Lieut.-Colonel J. M. Adaye, C.B., has been transferred from the 11th Brigade to the 13th; and Lieut.-Colonel C. W. Younghusband, from the latter to the former. The following exchanges have been sanctioned:—Between Second Captain and Brevet-Major H. L. Talbot, of the 8th Brigade, and Second Captain C. L. Tredcroft, of the 3rd Brigade; and also between Second Captain J. D. G. Higgon, of the 13th Brigade, and Second Captain A. L. Kaye, of the 8th Brigade. The Rev. M. R. Scott and the Rev. W. M. Wright have been removed from the Royal Artillery to the Chaplain Department of the Army, the former chaplain of the 2nd class, and the latter as chaplain of the 3rd class. The following transfers have been ordered:—Lieutenant W. M. Glasgow, from No. 6 battery, 3rd Brigade, and Lieutenant G. R. Salmon, from No. 3 battery, 10th Brigade, to No. 8 battery, 11th Brigade, and are to proceed to India on the 20th inst.; Lieutenant W. Newman, from No. 8 battery, 11th Brigade, to No. 6 battery, 3rd Brigade, and Lieutenant B. F. Schreiber, from No. 8 battery, 11th Brigade, to No. 5 battery, 10th Brigade.

No. 7 battery of the 2nd Brigade Royal Artillery, consisting of Major Clifford, in command, Lieutenants Wardle, Smithett, and Laughlan, 127 non-commissioned officers and men, 14 women and 19 children, arrived at Portsmouth on Thursday by train from Dover. On the troops alighting from the train at the Landport terminus they were marched, headed by the brass band of the Artillery stationed in the garrison to the dockyard, and embarked on board Her Majesty's paddle-steamer Firebrand, Commander J. M. Bruce, lying alongside the Sheer jetty. At 4·30 p.m., the Firebrand sailed for Jersey, where Major Clifford's battery relieves No. 8 battery of the 10th brigade, under the command of Major M'Crea, the latter returning to Portsmouth in the same vessel. Reliefs of artillery will afterwards proceed in the Firebrand from Portsmouth to Plymouth and Guernsey.

Coldstream Guards. Colonel the Earl of Westmoreland is about to retire from the Service, by which Lord Dangan and Lieutenant Thursby obtain promotion.

Scots Fusilier Guards. Lieutenant White has been defeated at the Clare Election by a very large majority.

1st Royals. Lieutenant J. H. Maxwell has arrived home from Bombay in the Windsor Castle troop-ship.

5th Fusiliers. Lieut.-Colonel Milman is on leave to England for 18 months.

8th Regiment. A detachment of 120 non-commissioned officers and men has proceeded to Tilbury to do duty at that fort, under the command of Major G. E. Baynes, 8th Foot, and Ensign H. P. Dawson, 75th regiment.

13th Light Infantry. Captain M. Browne is acting as station staff-officer at Gorruckpore.

14th Regiment. The Indiana steam-transport, with a wing of the 14th Foot on board, for St. Lucia and Trinidad, left Gibraltar on the 30th, at 6 a.m.

17th Regiment. We are sorry to record the death of Captain Richard Edmund Williams of this regiment, which occurred on board the Nova Scotian steamer on the 26th ult. on his way home from Canada. Captain Williams entered the Service in 1850, and served at the siege of Sebastopol from December, 1854 to June, 1855. He was severely wounded in the trenches, and had lost his right eye. By his death Lieutenant F. C. S. Dyer and Ensign Elgin obtain promotion without purchase.—Captain Travers, is ordered out to Canada, from Limerick, to take charge of a draft of 2 lieutenants and 150 men of the 1st battalion.

24th Regiment. Captain John Johnstone has arrived in England in the troop-ship South, from Kurrachee, in charge of detachments.

27th Regiment. Captain Patton has obtained 18 months leave to England.

31st Regiment. Orders have been received for three officers, two non-commissioned officers, and 100 rank and file of the 31st depôt, to be held in readiness to proceed to China, to join the service companies of that regiment. The captain who will proceed in charge of the detachment has not been named. The two subalterns ordered to embark are Ensign I. Parsons and Ensign G. M. Lambert.

42nd Highlanders. Captain Macpherson is ordered home in charge of invalids.

48th Regiment. Captain Knight has been appointed to act as Deputy Assistant-Quartermaster-General at Allahabad.

Royal Marines. A medical board was held on Tuesday on Lieut.-Colonel Hocker, who has just returned from China, invalided for dysentery. He is recommended for two months' leave, for the benefit of his health.

56th Regiment, which was to have gone to China, is ordered back to Ahmednuggur and Poona.

60th Rifles. We have to record the death of Lieutenant J. W. King, of the 1st Battalion, which occurred at Calcutta on the 1st of March. He entered the Service in July, 1856. Ensign Treeve obtains the step. Leutenant C. C. Willoughby, of the 3rd Battalion, was tried by court-martial at Jackatalla on the 23rd of January for striking Assistant-Surgeon Sam of the same battalion in a billiard-room. He was found guilty, but the court sentenced him only to be severely reprimanded, "in consideration of the deep contrition expressed by the prisoner for the offence committed by him in an unguarded moment." In this view the Commander-in-Chief concurred, and Lieutenant Willoughby was released from arrest.

68th Light Infantry. Lieutenant Cox has leave to England on medical certificate.

69th. Major Hankey is about to exchange with Major Heatly, 83rd.

75th Regiment. Captain Pym, lately doing duty with the 16th Punjab Infantry, is directed to rejoin the 75th.

77th Regiment. Lieut.-Colonel T. J. Deverell has leave to Mussoorie to the 31st of October on medical certificate.

83rd. Major Heatly is about to exchange with Major Hankey, 69th.

88th Regiment. The three companies at Allyghur are ordered to join head-quarters at Delhi as soon as the court-martial at the former place has terminated. These companies were to be quartered in the fort, and the remainder in their quarters, near the Cashmere Gate.

89th Regiment. Lieut.-Colonel Boyle has arrived home from India on 18 months leave.

91st Regiment. Lieutenant R. P. Jones has arrived home from Bombay in the Windsor Castle troop-ship.

97th Regiment. Ensign Thompson has been provisionally promoted to be Lieutenant, vice Parker, who retires.

Rifle Brigade. Captain Earle, of the 2nd Battalion, is appointed Deputy Judge-Advocate-General to the Rohilcund field force.

Cape-Mounted Rifles. On Wednesday upwards of 140 of the Cape-Mounted Rifles left Canterbury for Gravesend, to embark for the Cape. Their behaviour on leaving was very soldierly, and they went on board the transport quite happy with the prospect of many years in their new and healthy destination.

10th Depôt Battalion. On Monday the whole of the men composing the 10th Depôt Battalion, stationed at Colchester, and numbering nearly 2000 rank and file, under the command of Colonel Street, C.B., had a grand field-day upon the extensive parade ground at Middlewick. The men, who are chiefly young recruits, and have joined their respective depôts within the last twelve months, passed through their exercises in a satisfactory manner.

Dr. J. R. Taylor, C.B., Inspector-General of Hospitals, and principal medical officer at Fort Pitt, has been selected by the Government to be the chief medical officer of the sanatorium and invalid establishment which is to be formed at the Cape of Good Hope for the wounded and disabled troops from China. It is to be feared that some portion of the sick will be sent to the Cape before any arrangements have been made for their reception. The Government is, however, doing its best to prevent any *contretemps*; and in the hands of Dr. Taylor the establishment will be all that great skill, large talent, and immense experience can make it.

The following circular memorandum was issued on Saturday last, addressed to the recruiting districts and Army at home and abroad: "Horse Guards, March 31. His Royal Highness the General Commanding-in-Chief, with the concurrence of the Secretary of State for War, directs that the bounty for recruits, both of the Royal Artillery and the Line, be reduced to 2*l*. and a free kit, which is to be appropriated in the following manner, until further notice—viz., to the recruit, on being attested, in cash, 2*s*. 6*d*.; on final approval by the inspecting field-officer, in cash, 7*s*. 6*d*.; on joining his corps, in cash, without deductions, 1*l*. 10*s*.; amount of bounty and a free kit of necessaries, 2*l*. By Command, W. F. Forster, Deputy Adjutant-General."

The following circular memorandum, addressed to the army at home and abroad, has been issued: "Horse Guards, S.W., April 9.—Much inconvenience having been caused by the service of invalids and other soldiers arriving from abroad for discharge having been inserted in their parchment certificates in ink, instead of in pencil, thus involving the necessity of an erasure (which is most objectionable), or of having the whole of the discharge documents reprepared, or of the issue of a fresh certificate differing as to place, dates, and signatures from the proceedings of the regimental board, with which it ought to agree in every respect, the attention of general and other officers commanding on foreign stations, and officers commanding regiments is specially directed to paragraph 7, pages 179 and 180, of the Queen's Regulations and Orders for the Army (1859), in which the long-standing rule and practice of the Service which have been departed from are repeated.—By command, W. F. Forster, Deputy-Adjutant-General."

The examination of candidates for direct commissions by the Council of Military Education commenced on Wednesday, before Major-General Rumley, the vice-president, and other members of the council. There were above 100 candidates.

Major-General D. A. Cameron, C.B., arrived at Edinburgh last week, and has succeeded Major-General Viscount Melville in command of the Forces in Scotland.

Brevet Lieut.-Colonel James Connolly, Adjutant-General of the Forces in Canada, will embark for that colony on the 18th instant.

We learn by telegraph that Sir J. Hope Grant, Commander-in-Chief of the British expedition to China, left Singapore on the 7th of March, *en route* to Hongkong.

Another large party of sick and wounded troops arrived at Fort Pitt General Hospital on Tuesday evening from the presidency of Bombay, having disembarked at Gravesend from the chartered East India troop-ship Windsor Castle, which sailed from Bombay on the 3rd of January last. The number of troops who embarked at Bombay was 207. During the passage 9 soldiers, 2 sailors, and 1 passenger, died on board. The following officers arrived with the troops:—Lieutenant Ogilvy, Madras Artillery; Lieutenant Maxwell, 1st Royals; and Lieutenant Jones, 91st Regiment. After the troops had been inspected, 16 men were ordered into hospital, and the remainder sent to the invalid establishmnet. Most of the troops sent home have served their full period, and are awaiting their discharge.

The troop-ship South, 1075 tons, Captain Robertson, arrived in the Thames on Thursday, having on board 330 non-commissioned officers and privates from the following regiments:—7th Dragoon Guards, 7th Royal Fusiliers, 24th, 46th, 51st, 52nd, 64th, 70th, 79th, 81st, 87th, and 98th. Also 9 women, and 16 children, and 127 discharged men belonging to the East India Company. The ship sailed from Kurrachee on Dec. 23. During the voyage from India there were only three deaths on board. The officers on board are Captain Drummond, 5th European Light Cavalry, (who is in charge of the troops); Captain John Johnstone, 24th; Cornet Clavering Redman, 7th Dragoon Guards; Lieutenants Sitwell and Shephard, 5th European Light Cavalry; Lieutenant Boswell, 69th Bengal Native Infantry, and Staff-Surgeon Dr. Macdonald.

Upwards of 300 skilled artificers and workmen were on Tuesday added to the establishment of the Royal gun factories in Woolwich Arsenal. They were selected from an assembled crowd of more than double that number, and, although a greater number was required, those only were engaged who were furnished with unexceptionable testimonials for science and persevering application and industry. A second selection took place next morning, the total number intended to be added to the already vast establishment for the purpose of accomplishing the works stipulated for the ensuing year, being upwards of 2000 men. Mr. Anderson, resident superintendent of the establishment, has taken possession of the official quarters of the late superintendent, Colonel Eardley Wilmot, and Mr. Frazer, manager of the factories, has been granted the late official residence of Mr. Anderson, in the Royal Arsenal.

An order was on Thursday received at the Royal Arsenal Woolwich, directing relays of workmen to be employed at the Armstrong gun factories by night as well as day. Seven hundred men were accordingly set on last night, and the same number will be employed upon night work until further notice.

Canterbury Depôt.—His Royal Highness the Duke of Cambridge, attended by Major-General Sir Richard Airey, K. C. B., Quartermaster-General, Deputy Adjutant-General Bingham, R. A., Colonel Douglas, C. B., Deputy Adjutant-General of Cavalry, and Lieut.-Colonel the Hon. J. Charteris, paid a visit of inspection to Canterbury on Wednesday. His Royal Highness proceeded at once to the barracks, where he closely examined the hospitals, prisons, and quarters of the men. In the evening His Royal Highness dined at the cavalry mess. On Thursday, at 8 a.m., the whole garrison paraded in the Cavalry Square, and received the Commander-in-Chief with a royal salute. Lieut.-General Love, Inspector-General of Infantry, and Major-General Lawrenson, Inspector-General of Cavalry, were also in attendance. The troops marched past in slow and quick time, and the 4th Depôt Battalion went through the manual and platoon exercise, and were well tested in battalion drill. The steadiness and accuracy of the men throughout the inspection were very marked, and called forth the strongest approbation of the Commander-in-Chief. At 10 o'clock His Royal Highness breakfasted at the cavalry mess, and left immediately after for Walmer, Dover, and Shorncliffe. Major-General Lawrenson remained in Canterbury, and inspected further the Cavalry Depôts. The troops of this garrison may now be called made soldiers, as the generality of them are in their second year of service, and it is said that the Duke of Cambridge considers their advancement and good conduct as the result of an admirable system of training and management.

Sir James Scarlett has given orders for the erection, at his own private cost, of a handsome drinking fountain, near a celebrated spring on Southsea Common — the exercising ground of the troops of the garrison, and the favourite summer promenade of the civilians—as a testimonial of his feelings and good wishes towards the inhabitants generally, engendered during the period of his command at Portsmouth.

SHORNCLIFFE.

The camp at Shorncliffe, unlike its great rival Aldershot, does not receive much of the attention of the powers that be, though its capabilities for the requirements of a camp are of the most advantageous nature, it being an easy distance from London, close on the sea-shore, the salubrity of the air undeniable, with good water, and in close proximity to a railway. Nothing, therefore, is wanting in either a sanitary or military point of view. Having made an inspection by the kindness of the purveyor of the general hospital, the following brief description of that establishment may be acceptable. The hospital is situate on the slope of the hill facing the sea at the west end of Sandgate, near the head of the Royal Military Canal; it consists of five parallel ranges, rising one above another, a portion of each range being devoted exclusively to one or the other of the regiments on the camp. The ground surrounding the hospital is laid out in terraced walks and grass plots, interspersed with beds for flowers, and is profusely planted with shrubs and evergreens, the whole surrounded by a dry ditch, with proper approaches thereto; it is well drained, the situation being admirably adapted for drainage, is sheltered from the cold north and east winds by the high ground at the rear, and has all the advantages of the refreshing sea breezes from the south and west; but all these outward appliances without correspondent internal arrangements would be of no avail. However, from a minute inspection of the interior, it can be said nothing is wanting to ensure efficient attention to the comfort of the soldier when laid on a bed of sickness. The permanent staff of the hospital consists of the following: Dr. J. Fraser, C.B., Deputy Inspector-General of Hospitals, Purveyor Harrington, 1 sergeant-major, 3 sergeants, 2 issuers, 11 orderlies of the A. H. C.; in addition to which are 20 volunteers from the 29th and 47th Regiments, who are being trained as hospital attendants. The kitchen is spacious and fitted up in a superior manner; on one side are a series of boilers heated by steam, capable of cooking 2000 boiled rations, whilst on the other side is a patent range with ovens and boilers, the ovens being sufficient to prepare 300 roast rations, the whole being supplied with steam from a permanent engine, which also supplies the ablution and bath-rooms with hot water. The wards are spacious and airy, all opening from enclosed corridors in which are situated the fireplaces, and which form capital ambulatories in wet weather. The old coast-guard station near the hospital is at present being converted into an hospital for lying-in women and children of married soldiers. Altogether the establishment reflects great credit on the authorities for the admirable and liberal manner in which the hospital is fitted up, as also being most efficiently conducted.

ARMY GAZETTE.

WAR OFFICE, PALL MALL, APRIL 10.

4th Regiment of Dragoon Guards—Ensign Arthur Ashton, from the 7th Foot, to be Cornet, vice Bridges, promoted.

6th Dragoons—Ensign William Ward Bennitt, from the 2nd Foot, to be Cornet, vice Garnett, promoted; Hew Stevenson, Gent., to be Cornet, by purchase, vice Hardy, promoted.

13th Light Dragoons—John Arthur Carthew, Gent., to be Cornet, by purchase, vice James White, who has retired.

1st Regiment of Foot—Ernest Alexander Morant, Gent., to be Ensign, by purchase, vice Rooke, promoted.

6th Foot—Thomas Armstrong Gough, Gent., to be Ensign, without purchase, vice Poulden, who resigns.

7th Foot—Captain William Langmead Lewes, from the 98th Foot, to be Captain, vice Payn, who exchanges.

11th Foot—Alexander Henry Vaughan, Gent., to be Ensign, without purchase, vice Gilbert, who resigns.

14th Foot—Lieutenant James Franklin, from the 45th Foot, to be Lieutenant, vice Atkinson, who exchanges.

20th Foot—Serg.-Major James Whybrow to be Ensign, without purchase, vice Bolger, promoted.

22nd Foot—Lieut. Stephen Winthrop to be Captain, by purchase, vice Hickman, who retires.

25th Foot—Ensign Samuel Roden Handy, from the 90th Foot, to be Lieut., without purchase, vice Lock, whose appointment from the 82nd Foot has been cancelled; James Pender, Gent., to be Ensign, by purchase.

45th Foot—Lieut. Francis Forbes Atkinson from the 14th Foot, to be Lieut., vice Franklin, who exchanges.

61st Foot—Francis John Wakeman Pigott Long, Gent., to be Ensign, by purchase, vice Hamilton, promoted.

87th Foot—Ensign Anderson James Ashmore, from the 73rd Foot, to be Ensign, vice Anderson, appointed Paymaster.

98th Foot—Captain Thomas George Dupré Payn, from the 7th Foot, to be Captain, vice Lewes, who exchanges.

1st West India Regiment—Major Augustus William Murray to be Lieut.-Colonel, without purchase, vice Brevet-Colonel Henry Dunn O'Halloran, who retires upon full pay, under the 37th clause of the Royal Warrant of October 14, 1858; Brevet-Lieut.-Colonel James Travers from the 3rd West India Regiment, to be Major, without purchase, vice Murray.

3rd West India Regiment—Lieutenant Parr William Kingsmill to be Captain, without purchase, vice Travers promoted to the 1st West India Regiment; Ensign Duncan Forbes Murray, to be Lieutenant, without purchase, vice Kingsmill.

UNATTACHED.

Lieutenant William Henry Urquhart, from the 75th Foot, to be Captain, without purchase.

We learn by the Indian papers just received, that—"The indignation of the whole Anglo-Indian public had been excited by the frightful mortality which had occurred on board the various vessels which had arrived at Madras and Bombay with the wives and children of soldiers. Of the five ships—Accrington, Euxine, Statesman, Dudbrook, and Monica—which have entered port with soldiers' families on board, upwards of 270 children, embracing all below two years of age, have perished."

Some news has come from Calcutta, six days after the departure of the mail, to the effect that outrages by the ryots of Lower Bengal have taken place, and that the lieutenant-governor has issued a notification which, it is hoped, will be effective.

VISIT OF THE DUKE OF CAMBRIDGE TO CHATHAM.

On Tuesday, His Royal Highness the Duke of Cambridge, Commander-in-Chief, accompanied by Major-General Sir Richard Airey, K.C.B., Quartermaster-General, and an aide-de-camp, went down to Chatham for the purpose of reviewing the troops at that garrison. His Royal Highness reached the Chatham station at 12 o'clock, and was received by Major-General Eyre, Commandant of the garrison, Colonel H. Sandham, Director of the Royal Engineer Establishment; Colonel M. Williams, R.E.; Lieut.-Colonel E. Stanton, C.B., R.E., Assistant-Adjutant-General; and other officers; and was shortly afterwards joined by General Sir John F. Burgoyne, G.C.B., Inspector-General of Fortifications, who had previously arrived at Chatham. The Duke immediately proceeded to the lines, where the whole force of the garrison was drawn up, the troops being in heavy marching order. On arriving within the garrison a Royal salute of 21 guns was fired from the Cornwallis Battery by a party of Marine gunners. The garrison at Chatham being now very strong, the troops on the ground made a very imposing array. They consisted of the 1st battalion of infantry, under the command of Colonel H. Jervis, including the depôts of the 7th Royal Fusiliers, 24th, 35th, 43rd, (Light Infantry), 53rd, 77th, and the St. Helena Regiments; the 2nd battalion, to which is attached the depôt companies of the 20th, 23rd (Royal Welsh Fusiliers), 31st, 52nd (Light Infantry), and 73rd Regiments; the third battalion, under the command of Lieut.-Colonel C. E. Fairtlough, which includes the 8th, 19th, 75th, 81st, 91st, and 94th depôts; the corps of the Royal and Indian Engineers, under the command of Colonel A. P. Ross; and the battalion of Royal Marine Light Infantry, commanded by Lieut.-Colonel T. C. Moore, the whole numbering nearly 200 officers and about 5000 men of all ranks, exclusive of the Engineer detachments and the recruits who were drawn up in their barrack squares. The whole of the men were in heavy marching order, and each man was furnished with ten rounds of blank cartridge. His Royal Highness arrived on the ground at half-past 12, when the troops, who had been formed in contiguous quarter-distance columns, received him with a general salute, the bands playing the National Anthem. His Royal Highness then passed along the front and rear of the columns, and made an inspection of the men, all of whom have just been furnished with their new uniforms. Forming in open columns of companies, and marching past in slow and quick time, the manœuvres incidental to a field-day commenced. During the time the troops were marching past His Royal Highness frequently expressed himself in terms of praise at the excellent manner in which this part of the day's proceedings was performed, the battalions of infantry, although composed for the most part of very young soldiers, marching past in a manner that was not to be surpassed by any other corps in the Service. At the conclusion of this movement His Royal Highness sent for Colonel Jervis, and complimented him on the excellent manner in which the marching past had been effected. The troops, under the command of General Eyre, then proceeded to execute a variety of other manœuvres, and, notwithstanding that some of them were of a rather complicated character, they went through them with remarkable steadiness and correctness, proving the careful training which has been bestowed on them. One of the most interesting movements of the day was that in which the entire force was formed into two lines, facing the east, to resist the supposed advance of an enemy, skirmishers being thrown out to repel the approach of the enemy. At the close His Royal Highness had the troops formed into close column, when the field officers were called to the front, and His Royal Highness, addressing General Eyre and the commanding officers, expressed his delight and satisfaction at the appearance and proficiency of the troops of that garrison. The various evolutions had been performed in an exceedingly creditable and satisfactory manner, and the discipline and appearance of the men generally reflected the highest credit on all the officers in command. At the close of the address of His Royal Highness the troops returned to their quarters, which they reached about 3 o'clock. His Royal Highness, accompanied by General Sir J. F. Burgoyne, Major-General Sir R. Airey, Major-General Eyre, and a numerous party of officers, then proceeded to the extreme end of the Lines, Fort Pitt, and other points, for the purpose of inspecting the fortifications and works of defence connected with the neighbourhood of the garrison.

His Royal Highness and Sir John Burgoyne were engaged until a somewhat late hour on Tuesday evening inspecting the fortifications and other works of defence in the neighbourhood of the garrison. For this purpose His Royal Highness made a complete circuit of the district, visiting all the points of eminence, commencing with that portion of the lines which borders on the Canterbury Road, inspecting in succession the various barracks, where all the recruits were drawn up to receive him, and extending his examination of the fortifications as far as Fort Pitt, the dockyard, St. Mary's Creek, and the new works of defence which are to be erected on St. Mary's Island for the protection of the dockyard towards its sea-side. At the termination of this portion of the inspection, His Royal Highness, together with the principal officers of the garrison and his staff, proceeded to inspect the district between the Thames and Medway, in order to ascertain the advantages it offers for the erection of works of defence to protect the two rivers; it is in this neighbourhood that the Government has purchased a site for the new rifle range for the troops of this garrison. After spending some time in the inspection of the locality, His Royal Highness and suite returned to the garrison to Government House, the residence of Major-General Eyre, where a distinguished party of officers had been invited to dine with the Duke, who was the guest of General Eyre for the night. On Wednesday morning, at nine o'clock, His Royal Highness, accompanied by General Burgoyne, General Eyre, Captain G. Goldsmith, C.B., and other officers, embarked from the Queen's Stairs at the dockyard on board Her Majesty's steamer Wildfire, Master-Commander Brockman, under a salute of 21 guns from the battery. A guard of honour of the Royal Marine Light Infantry, under the command of Captain A. H. Nepean, with the divisional band and colours, was drawn up to receive His Royal Highness, who proceeded to inspect the steam floating battery Trusty, 14, which the Duke spent some time in examining. At the termination of the inspection His Royal Highness re-embarked on board the Wildfire, and proceeded to Sheerness to inspect the defences at that part of the coast, at the conclusion of which he left for Canterbury and Maidstone.

THE MILITARY SALUTE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I think your correspondent "Volunteer" will find on inquiry that an order was issued some weeks since for all officers of Volunteers to receive the same compliment when on duty as officers of Militia. During a period of some three weeks that I had to pass many sentries as soldiers, my arm had to work like a pump-handle returning these compliments, and I sincerely trust that the Volunteers are as prompt in saluting the officers of Her Majesty's forces when they meet them. I cannot say they trouble themselves much with saluting their own officers, unless they are personally known to them. Your correspondent says an officer is easily known by his steel scabbard. Happy am I that our officers have adopted a bronze one, as I am nearly sick of the sight of steel scabbards and cavalry pouches swaggering about the streets. It is like an epidemic of cornets, only that rank has been scarce in Her Majesty's Service of late. But if steel scabbards are to command a salute, I do hope His Royal Highness the Commander-in-Chief, or the Secretary for War, or whoever our patron saint may be, will cancel the privilege of the sword to any but commissioned officers. In the days when a Volunteer with a regiment of the Line on actual service wore a sword, gold lace in lieu of tape, and had a seat at mess, it was a different matter; he was a cadet seeking a commission at the first forlorn hope.

I remain, your obedient servant,
A RIFLE VOLUNTEER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your last number "A Volunteer" complains that soldiers in the streets do not salute Volunteer officers, and adds that the latter are always to be distinguished by the steel scabbards to their swords. I beg to inform your correspondent that the Victoria Rifles are all dressed like officers, and wear swords and steel scabbards; for what purpose, except to pass as officers, it is difficult to say. The "distinctive marks on the collar" it is impossible to distinguish on a rifleman even at a few feet distance. It is to be regretted that Government did not, in the first instance, select one uniform for the Force, which would have obviated the inconveniences that are likely to arise from the extraordinary diversities of dress that are daily exhibited.—I am, sir, &c.
A SOLDIER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the Volunteer force, where all are from the same social class, nothing can be more invidious, or have a greater tendency to injure its popularity, than a marked distinction between officer and private. The royal reception was a sufficient recognition of the officers. It would seem more advisable to lessen in every way that difference which is the necessity of the regular Army. A letter appeared in your journal of April 7th, claiming a salute from soldiers. These quasi-officers surely do not expect a salute from their own men. If not, why from the regulars? They are not military officers, nor entitled to military privileges. J. S. P.

HER MAJESTY'S BENGAL EUROPEAN LIGHT CAVALRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have no doubt that it will surprise many of your readers, when they are told that there are five regiments of European cavalry on the Bengal establishment of Her Majesty's Indian Army, which have been raised two years, and for the officers of which no dress uniform has as yet been prescribed.

The inconvenience of this is much felt by the officers of these regiments now in England, who most of them are desirous to be presented to Her Most Gracious Majesty.

Had the Indian Army not been governed by civilians, surely this would not have been the case.—Yours obediently,
ONE INTERESTED.

RECRUITING.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your paper of the 7th inst. there appears a letter from A. X. A. relative to recruiting. I am inclined to put his statements down to ignorance, instead of wilful falsehood, for, to say that the Militia adjutant encourages enlistment, except by their own staff-sergeants, is downright false. I am on the recruiting service, and can speak from experience. A. X. A. wants more pay for the Militia staff. Pray, what is their work? Is it not chiefly idleness, except a fine day's fishing? The Pensioners, I believe, have got very many more recruits than the Militia, and their daily pay is "nil." By the adjutants of Militia refusing to grant releases very many of their men have sworn they were not Militia men, and thereby the crime of perjury is on the increase with them. If an enrolled Pensioner is considered successful on the recruiting service, this is his strongest recommendation for the Militia staff, and the staff-officer is obliged to hand him over to the Militia; in return for this, jealous opposition is now shown towards the Pensioners, by withholding the releases. This is not confined to head-quarters, where the Militia staff are, but to every station. Where there is no recruiting party from the Militia, all must go to head-quarters of Militia, or they won't get their release. Such unjust opposition has caused the recruiting in Ireland to be at present at a standstill; but it is to be hoped that the new rules and regulations for recruiting will put it out of the power of any Militia adjutants or their colonels to allow their jealousies thus to injure the public service. MILES.

Her Majesty has spent some days at the Royal Pavilion, Aldershot, this week, driving about the Camp inspecting the hospitals and the quarters of officers and men. On Wednesday evening Her Majesty entertained the principal Staff Officers and the Commanding Officers of Regiments at dinner.

THE NAVY.

ADMIRALTY—APRIL 7.

PROMOTIONS AND APPOINTMENTS.—Lieutenants J. P. J. Parry, to the Cambridge; C. G. S. Stanley, to the Trafalgar.

Chief Engineer J. W. Husbands, to the Wellington, for charge of the machinery of the Royal William.

First-Class Assistant-Engineer R. Harris, to the Adventure.

Paymasters G. Barnes, additional to the Wellesley; C. W. Sturgess, to the Cornwallis.

Assistant-Paymasters F. M. Wright, to the Wrangler; W. E. Chown, to the Implacable.

APRIL 9.—First-Class Assistant-Engineer W. Smiley, to the Wrangler; Second-Class Assistant-Engineers N. Farrant, to the Wrangler; J. Osborne, to the Mersey. Acting Third-Class Assistant-Engineer A. F. M'Intyre, to the Wrangler.

APRIL 10.—Commander C. Stirling to the Wasp, commissioned.

Mate F. S. D. Broughton to the Hero.

Masters S. J. W. Moriarty to the Donegal; A. M. P. Mackay to the Wellington, for the St. George.

Assistant-Paymaster H. W. Molesworth to the Castor.

APRIL 11. — Lieutenant A. W. Gillett to the Wasp; Master W. Thomas, to the Wasp; Second-Class Assistant-Engineer T. Hurard to the Wasp; Third-Class Assistant-Engineer M. B. Kelley to the Wasp; Acting Third-Class Assistant-Engineers T. Hatton to the Fisgard, for service in the Bustler; D. Wishart to the Wasp; R. W. Drummond to the Asia, as supernumerary.

Surgeons W. M. Ogilvie to the Wasp; J. J. Martin to the Impregnable.

Acting Assistant-Surgeon W. L. Powell to the Megæra; Master's Assistant S. G. Tattersall to the Aboukir; Assistant-Clerk J. W. Featherston to the Euryalus.

Paymaster J. H. Jackson to the Wasp.

Midshipman L. N. Moncrieff to the Mars.

APRIL 12.—Paymaster J. Retallick, to the Meander. Assistant-Paymaster D. L. Rhind, to the Meander; W. Marriott, to the Impregnable, additional.

Acorn was at Amoy at the end of February.

Actæon, surveying vessel, Commander J. Ward, left Shanghaie in February last under sealed orders.

Adventurer was at Hong Kong when the last mail left.

Agamemnon was at Gibraltar on the 31st ult.

Alacrity was at Corfu on the 3rd inst.

Albatross, 12, attached to the reserve in ordinary at Chatham, is ordered to be taken into dock and broken up.

Algerine, screw gun-boat, Lieut.-Commander W. Arthur, proceeded to the northward from Shanghaie on the 16th February last.

Algiers, 91, screw, Captain G. W. D. O'Callaghan. This ship went into Portsmouth harbour on Thursday last, to repair defects in her stern. With the exception of this ship and the Mersey, the fleet at Spithead is free from defects. Trifling repairs may be required for some of the ships, but there is no reason why the remainder should not go to sea to-morrow if required. Various reports are in circulation respecting the disabled condition of this portion of the Channel fleet. Most people know that ships on foreign stations manage to knock about for the three years they are commissioned without wanting repairs, but somehow, the moment the Channel fleet anchors in the neighbourhood of a dockyard, some of the ships are sure to be found defective, and to require docking.

Amphion. Her Majesty's screw-frigate Amphion, Captain Cochrane, arrived at Gibraltar, at 11 a.m on the 30th ult., from Cork, and saluted the Admiral with 11 guns, which was returned by the flag-ship Hannibal. The Amphion left again on the afternoon of the 31st to join Admiral Fanshawe's squadron at Malta.

Antelope was undocked at Woolwich on Tuesday.

Arethusa will go into the fitting-dock at Chatham to be cut in half, lengthened, and converted into a 51-gun screw-frigate, with machinery of 500 horse-power.

Assistance was in Canton River on the 28th of February.

Assurance has arrived at Malta from Corfu.

Banterer was at Hong Kong on the 28th of February.

Bittern was at Hong Kong on the 28th of February.

Boxer left Malta on the 31st ult. for Messina.

Bustard was at Shanghaie by the latest accounts.

Cambrian was at Hong Kong at the end of February.

Camilla was at Shanghaie on February 28.

Caradoc was at Malta on the 7th inst.

Chesapeake was at Hong Kong by the last China Mail.

Clown was in Canton River on Feb. 28.

Conqueror, 101, Captain Sotheby, C.B., was taken out of No. 3 dock at Keyham Steamyard on Tuesday, and moored in the basin.

Constance, 50, is to be lengthened and converted into a screw-vessel.

Coromandel was in Canton River on Feb. 28.

Cossack was at Carthagena when the last mail left.

Cressy was at Malta on the 7th inst.

Cruiser was at Shanghaie at the end of February.

Dee, Master-Commander T. Pullen, returned to Woolwich on Tuesday from Portsmouth, and commenced shipping machinery for the Prince Frederick William.

Devastation, steam-vessel, recently paid off at Woolwich, has been docked to be got ready for service.

Donegal, 101, screw, Captain H. Broadhead, was paid wages at Devonport on Saturday, and part of the crew were granted leave.

Doris was at Gibraltar on the 31st ult.

Dove left Shanghaie February 16th, for the North, under sealed orders.

Dover, iron steam-vessel, for many years in the service of the colonial department on the River Gambia, having received new boilers, and undergone the most extensive repairs, has proceeded down the river under the charge of an officer from the factory department, for the purpose of testing her engines and machinery. She is to be forwarded to Africa forthwith, where she will be manned by Kroomen, and resume her former service.

Drake was at Hong Kong on the 28th of February.

Duke of Wellington, 131, screw, in the first-class steam reserve in Portsmouth Harbour, it is rumoured, will be the flag-ship of Sir C. Fremantle, in place of the Royal Albert, which requires repairs.

Edgar, 91, screw, Rear-Admiral J. E. Erskine, Captain J. E. Katon. A very serious disturbance, or rather mutiny, took place on board this ship on Monday and Tuesday last, at Spithead. As usual, the cause of the discontent which manifested itself on Monday, and then broke out into actual violence on Tuesday, was the subject of leave. There are various statements; but as the matter will no doubt end in a court-martial, we refrain from giving publicity to them. The main facts are plain enough, and the Marines appear the chief mutineers. This is a novelty in its way; for, as a rule, these men generally stand by their officers. As many as fifteen are said to be in custody. Our correspondent observes, "While upon this subject, let us hope that none of the cant about the degradation of corporal punishment will prevent these men from being chastised. We fear that public sympathy has much to answer for in fostering a mutinous and discontented spirit on board our ships of war. So much indignation has been expressed on several occasions, when some idle vagabond who never did a day's willing work in his life has been flogged, that an officer is really afraid to punish the disorderly skulking fellows under his command. As a class, no men are less inclined to punish than officers in the Navy, and at present they are placed in a most unfortunate position. If they flog they are branded by the Press; and if they do not, their ships' crews take advantage of them, and upon the slightest occasion show unmistakeable evidence of mutiny. There has been so many instances of this disgraceful want of sound discipline lately in the Navy, that new or amended regulations are required to check it. Either the "cat" must be used when necessary, or else some other measure adopted. Half the insubordination shown on board a French ship of war as that recently at Portsmouth, and now at Spithead, and the mutineers would either have been shot or sent to the galleys for life. And if our Service is to maintain its high character, the good men must be protected and the bad ones punished, which we are sorry to say is not the case at present; the sooner this is altered the better."

Elfin, Royal yacht tender, Master Commander Alfred Balliston, has been placed in No. 8 dock, at Portsmouth, to clean copper and repair defects.

Emerald, 51, Captain Arthur Cumming, bearing the flag of Rear-Admiral Sir Alexander Milne, K.C.B. (successor to Admiral Stewart), which left Plymouth Feb. 16, arrived at Bermuda on March 6, one of the quickest passages on record. She used canvas only until within 500 miles of the island; the exact time occupied was 19 days 6 hours. The Admiral left Bermuda on March 19 for Barbadoes. The Emerald was at Antigua at the departure of the West India mail.

Espoir, at Devonport, took a trial trip and returned to the Hamoaze on Thursday week.

Exmouth was at Zante on the 3rd inst.

Firebrand, 6, paddle, Commander James M. Bruce, is to be employed on the Channel Island service, in the exchange of troops as reliefs. Four officers and about 120 non-commissioned officers and men (Royal Artillery) arrived at Portsmouth on Thursday afternoon, and embarked alongside the Dockyard jetty for Jersey, and sailed at five p.m. About 400 Royal Artillery will be moved between the different ports and islands.

Firm was at Foochow at the end of February.

Forester was at Hong Kong on the 28th of February.

Forte, 51, Captain E. W. Turnour, flag-ship of Rear-Admiral the Hon. Sir Henry Keppel, K.C.B., arrived at Portsmouth on Thursday afternoon, and saluted the flag of the Commander-in-Chief.

Furious was at Shanghaie at the end of February.

Galatea, 26, steam-frigate, has been towed from Chatham by the African and Adder steamers, and placed in the second division of the steam reserve at Sheerness.

Gladiator was at Jamaica on the 24th of March.

Gorgon was at Greytown at the last advices.

Hannibal was at Gibraltar on March 31.

Haughty was at Hong Kong on the 28th of February.

Hesper was at Hong Kong on the 28th of February.

Hero, 91, screw two-decker, Captain George H. Seymour, fitting at Devonport for the reception of His Royal Highness the Prince of Wales and suite, is expected to be ready by the 5th of May.

Highflyer was in Canton River on Feb. 28.

Hind, tender to the screw steam-ship Russell, 60, at Falmouth, arrived at Plymouth on Monday. Captain Wodehouse is on board, and is making an official inspection of his district.

Hornet, 17, screw, has nearly completed coppering in No. 1 dock, at Portsmouth.

Howe, 121, just completed at Pembroke, arrived in Plymouth Sound on Friday week, in charge of Commander Paul, Second Master-Attendant of Devonport Dockyard, and in tow of the paddlewheel steam-sloop Virago, 6, Commander M. B. Dunn. The steam-tender Confiance was sent out from Devonport in the afternoon to render assistance if necessary. On Saturday morning the Howe was towed into Hamoaze by the Confiance and Zephyr, and placed alongside the dockyard to be dismantled; sails were unbent the same day. The Howe is 15 feet longer and one foot broader than the Duke of Wellington.

Hydra, 6, Commander Richard V. Hamilton, from St. Thomas's, arrived at Bermuda on March 9, and left on the 21st for Antigua.

Imperieuse was at Shanghaie by the latest accounts.

Implacable, training ship, at Devonport, is ordered to be commissioned with a complement of 40 men.

Indus. On Sunday morning the Indus, 78, Captain W. K. Hall, bearing the flag of Sir Houston Stewart, K.C.B., late in command of the North America and West India station, arrived in Plymouth Sound. She left Bermuda March 21st, and brings a few naval and military invalids, including Mr. Yule, Paymaster, and Mr. Kent, Chief Engineer, of the Hydra. Lady Stewart, whose health is much improved, has returned in the Indus with the Admiral; and his Secretary, Paymaster Arthur Jones, is also on board. Dr. Beith, R.N., late staff-surgeon at the Royal Naval Hospital, Ireland Island, Bermuda, has come home passenger, having exchanged with Dr. Domville. The Indus was commissioned in November, 1856. She has discharged her powder, and has been towed up the Hamoaze, and placed alongside the Devonport Dockyard. Her pay-books have been sent to the Admiralty. The invalids were trans-shipped to the Confiance on Sunday, and landed in the afternoon. Vice-Admiral Sir Houston Stewart, K.C.B., struck his flag at sunset on Tuesday.

Inflexible was at Foochow by the last advices from China.

Insolent was at Hong Kong on the 28th of February.

James Watt, was at Gibraltar on the 31st ult.

Janus was at Shanghaie on February 28.

Kestrel was at Swatow at the end of February.

Landrail on Tuesday went into No. 1 dock at Woolwich to be coppered and prepared for service.

Lapwing was at Gibraltar on the 31st ult.

London was at Corfu on the 3rd inst.

Leven was at Hong Kong on the 28th of February.

Magicienne was at Hong Kong at the departure of the mail just arrived.

Marlborough was at Malta on the 7th inst.

Medina was at Malta on the 7th inst.

Megæra, troop-ship, Commander Henderson, fitting at Portsmouth for foreign service, has crossed her topsail yards fitted with the Cunningham patent, and is otherwise fast progressing in her outfit.

Mersey, 40, screw, Captain Caldwell. The machinery of this ship has been officially inspected and found to be defective, particularly with respect to her cylinders, which are said to be cracked. The Mersey was commissioned on the 4th of March, 1859, or a little more than a year ago.

Neptune was at Malta on the 7th inst.

Nile, 90, screw, Captain E. K. Barnard, steamed out of harbour at Devonport into the Sound on Friday week. On Saturday she took a short trial trip and returned, and on Monday went out for another trial trip.

Nimrod was with the squadron at Hong Kong at the end of February.

Octavia, 50, sailing-frigate, in No. 9 dock, at Portsmouth, will be cut, lengthened, and converted to a 51 screw, to be sister vessel to the Sutlej.

Opossum was at Hong Kong on the 28th of February.

Orion, 91, will in all probability return home, as her damages can hardly be repaired at Malta.

Phœbe, 50, was taken out of the north dock at Devonport on Tuesday, and moored to the jetty. The vessel has been lengthened 60 feet, and the alteration appears to have been very successful.

Pigmy, steam-tender, Master-Commander W. Johnstone, arrived on Friday at Devonport from Portsmouth, with men paid off from the Vulture. She returned again the following day.

Pioneer was at Hong Kong, February 28.

Pluto, Lieutenant-Commander C. H. Simpson, has arrived from the West Coast of Africa, where she has been highly successful on the slave preventive service, and is ordered to Woolwich to be paid off.

Prince Regent, 90. About 50 hands are employed upon this ship. The alterations and repairs of this vessel exceed the cost of a new one. She was launched as a three-decker, then raised to a 90-gun sailing-ship, and now she is in the same dock in which she was cut down, being converted into a screw. The whole of her cant timbers are removed, and she will be lengthened at this part 22 feet.

Quail was at Gibraltar on the 31st ult.

Queen, 86, screw, Captain Charles F. Hillyar, will repair her trifling defects at Spithead. She could be ready for any foreign service within ten days.

Racer was at Kingston, Jamaica, on the 24th of March.

Ranger. The Lords of the Admiralty visited Woolwich yesterday for the purpose of inspecting the Ranger screw steam-vessel, which is now ready for the pennant. The Ranger is the first completed vessel of a new class, which, it is considered, will prove most efficient, and a large number are now building for the Government at various private yards. Her armament consists of one iron 68-pounder pivot-gun and four 24-pounder brass howitzers.

Redwing, tender to the gunnery-ship Cambridge, in Hamoaze, has had defects made good, and was taken outside Plymouth Breakwater to prove her machinery on Thursday.

Renown was at Gibraltar on the 31st ult.

Rodney, 91, line-of-battle screw-steamer, in the fourth

Roebuck was at Shanghaie when the last mail left.

undock at Chatham, is completed, and is ordered to be undocked and sent to Sheerness to join the second division of the steam reserve at that port.

Royal Albert, 121, Rear-Admiral Sir C. H. Freemantle, K.C.B., Captain Lacon The defects of this ship occasioned by the late gales are not of a serious description.

Sampson, 6, steam-vessel, Captain G. S. Hand, left Shanghaie in February last, under sealed orders.

Scylla was left at Gibraltar by the Terrible on the 31st of March.

Skipjack was at Barbadoes, at the departure of the last West India mail.

Siren. Lieutenant Graves was tried by court-martial at Portsmouth, on Saturday and Monday. A report of the proceedings will be found in another part of our impression. She was paid off at Portsmouth on Wednesday.

Slaney was in Conton River on Feb. 28.

Starling was at Hong Kong on the 28th of February.

Staunch was in Canton River on Feb. 28.

St. Jean D'Acre was at Malta on the 7th inst.

Styx was at Barbadoes, at the departure of the last mail.

Supply has gone into basin at Woolwich to commence discharging returned stores from Malta.

Tartarus was at Malta on the 7th inst.

Terrible, 21, Captain Frederick H. C. Glasse, C.B., from Malta March 25th, and Gibraltar March 31st, arrived in Plymouth Sound late on Friday week. She brings 130 invalids from the hospital at Malta and from the fleet in the Mediterranean; they are in charge of Dr. George Willes, R.N. Lieutenant Thompson, Dr. Wilson, Mr. Wilson, naval cadet, Mr. Elliot, Assistant-Engineer, and Mr. Robert, Assistant-Engineer, are among the number of the sick.

Trusty, 14, floating-battery, will be taken into No. 1 dock at Chatham, just vacated by the screw-frigate Galatea, 26, to be thoroughly overhauled and put in a complete state of repair, in order that some further experiments may be carried out upon her at Shoeburyness with the Armstrong and Whitworth guns, under the direction of the president and officers composing the ordnance select committee. An examination of the Trusty has been made since the last experiments with her, the result of which has been to ascer-

Digitized by Google

tain that her hull in many places is very seriously injured, and several of her massive wrought-iron plates, with which she is covered, torn to pieces by the elongated shots fired at her. Additional plates will be put in the room of those injured, and the necessary repairs effected with all dispatch, when the battery will be towed down to Shoeburyness to be in readiness for the further experiments to be made upon her, which are looked forward to with great interest.

Victor Emmanuel was at Malta on the 7th inst.

Victoria and Albert yacht was passed, on the 7th inst., about 40 miles S.E. of Cape St. Vincent.

Virago, 6, paddle, Commander M. Dunn, arrived at Devonport on Friday week with the Howe, 121, screw, recently launched at Pembroke, in tow.

Vivid, Admiralty steam-vessel, Master-Commanding Allen, arrived in Woolwich Harbour on Wednesday evening from Ostend, to which port she conveyed His Royal Highness the Prince of Wales from Dover. His Royal Highness, on arriving at Ostend, proceeded on a visit to the relatives of the Prince Consort, and will, it is stated, subsequently proceed to Berlin.

Vulture, 6, paddle, recently paid off at Portsmouth, has been removed from alongside the dockyard to a berth up the harbour.

Wasp, 13, screw-sloop, at Sheerness, is ordered to be commissioned immediately, with a complement of 165 officers and men. Commander Charles Stirling, who has been appointed to her command, served as lieutenant of the Queen, 116, in the Black Sea fleet, from March, 1853, until re-appointed in July, 1855, flag-lieutenant to the Winchester, 50, flag-ship of Rear-Admiral Sir James Stirling, in the East Indies, where he remained until promoted to commander, June 16, 1856.

Watchful was in Canton River on Feb. 28.

Wildfire, steamer, tender to the Monarch, 84, arrived at Chatham on Wednesday, having returned from Sheerness, where it had conveyed His Royal Highness the Duke of Cambridge.

Woodcock was at Amoy at the departure of last mail.

Wrangler, 4, screw gun-vessel, of 160-horse power, at Sheerness, is to be commissioned immediately with a complement of 65 officers and men. Commander Anthony Hiley Hoskins, who has been appointed to her command, obtained his commission as lieutenant in March, 1849, and after serving three years in the Castor, 36, at the Cape of Good Hope, was appointed to the Philomel, 8, on the west coast of Africa station in September, 1853; and was re-appointed in March, 1855, to the Britomart, 8, on the same station. He was appointed to the command of the Slaney, steam gunboat, in April, 1857, and served in China until promoted to commander, Feb. 26, 1858.

The first division of the steam reserve at Portsmouth was on Tuesday inspected by Captain George T. Gordon, of her Majesty's ship Asia, and commanding the steam reserve at that port. The whole of the vessels comprised in the first division were reported in good order.

The portion of the Channel Fleet anchored at Spithead, under the command of Rear-Admiral John E. Erskine, and consisting of the Edgar, the Algiers, the Queen, the Mars, and the Mersey, has been inspected by the officials of the Steam and Shipwright Departments, and their report of defects of the different ships, and the repairs recommended to be carried out, has been forwarded to the Admiralty. The whole of the five vessels, as we before stated, are in need of repairs to both hull and machinery. The Mersey's required repairs in the last-named department are likely to prove of a very extensive character, and necessarily involve a large outlay before she can be again pronounced fit for foreign service. The Queen's repairs have been taken in hand by the Steam Factory Department. The Algiers, it is expected, will proceed to Keyham, where she will be placed in dock to repair the defects in her stern, &c. The Duke of Wellington may be pronounced fit for 18 months, or perhaps two years' service, if worked carefully and no accident occurring; but at the end of that time she would require new boilers and very extensive repairs to both hull and engines. As she is not in a sufficiently healthy condition of hull, boilers, and engines to be sent on a foreign station for a three years' cruise, it is very probable that the rumour concerning her may be verified, and that she may carry Admiral Fremantle's flag in the Channel Fleet.

On Wednesday morning upwards of 2000 applicants for employment again thronged the entrance to the Royal gun factories in Woolwich Arsenal, it having been announced that an additional number of artificers and labourers would be taken on in the department. An attempt was made to organise the immense body into sectional columns or divisions of about 100 each, but the unruly desire which they exhibited to be foremost for examination rendered the attempt abortive; 250 or 300 were, therefore hastily selected and ordered for medical attestation, and the remainder were dismissed. As soon as the whole of the machinery now in course of erection is in working condition, the establishment will be again increased to the full number intended to be added.

Mr. John Farrell, Third-Class Clerk in the Royal Laboratory Department, has been promoted to the Second-Class in the Royal Gun Factories.

The master-attendant, Mr. Tonkin, and assistant-master attendant, both of Portsmouth Dockyard, and as Queen's harbour-masters, have received their commissions appointing them as permanent commanders to any one of Her Majesty's ships of war. This is a step in which we can offer our hearty congratulations, and we could but wish that the masters afloat had a "lift" worthy their long, arduous, and faithful services. They are, without exception, the hardest worked and most neglected class of officers in Her Majesty's service. We hope to see the day, and that right soon, when some of the recommendations for improving their condition may be attended to and carried into effect.

The following vessels have been chartered by the Hon. Council for India for the conveyance of war and other stores to India and China:—The Seringapatam, 871 tons, and the Clive, 424 tons, for Madras; the Maria Hay, 924 tons, for Bengal; the Asiatic, 855 tons, for Bombay; and the Clara, 708 tons, for Hongkong. The whole of the above vessels are ordered to sail from Gravesend.

MOVEMENTS IN THE MEDITERRANEAN.

GIBRALTAR, 6TH APRIL.—No changes of importance have taken place in the distribution of the Gibraltar squadron since last dates. The Amphion touched here, *en route* to Malta, on the 30th ult. The Terrible arrived from Malta on the 31st, and left the next day for England, carrying 140 invalids from the Mediterranean fleet generally. On board the James Watt, a block falling from aloft caused compound fracture of the leg to a seaman who was engaged on the deck at the time of its fall. The Peninsular and Oriental steam-ship Indus has just arrived, and brings no other news from the fleet than that the Cæsar is ordered to sea, the destination being, it is supposed, Naples. This will in all probability be succeeded by the departure of the Orion for England; and it is doubtful whether her damages could be made good at Malta. The health of the squadron here is good; but the weather begins to exhibit signs of our having, in all probability, a hot summer.

The Spanish war is over at last; and the conditions of peace published. The engagement of the 23rd ultimo was undoubtedly a severe one, and resulted in heavy losses on both sides. The total number of Spaniards rendered *hors de combat* was 1500; of 400 men representing one regiment 250 were killed or wounded. Of the Moorish loss it is by no means easy to arrive at any accurate estimate, owing to their well-known habit of carrying off their dead; that some 50 bodies were found proves however to the satisfaction of those acquainted with the custom on like occasions, that a very considerable number must have been killed or wounded in all. A foreign officer, lately arrived from the seat of the war, ascribes the heavy losses of the Spaniards in great measure to the nature of the ground—passes, defiles, and woods—where artillery could be of no use, even had the Spaniards been well supplied in that respect; whilst in the hand-to-hand combats of men meeting among the trees, the long daggers of the Moors did fearful execution. Of the bravery of the Spanish soldiers he speaks in the highest terms. It is the general opinion that both Spaniards and Moors have had enough of it; and although the tone of the Spanish papers, and the announcement of 20,000,000 dollars, the indemnity to be paid by the Moors, are calculated to impress strangers with the notion that the Spaniards have had unalloyed successes, such, however, is far from being the opinion of those who happen to be behind the scenes. The European officers, amateurs, and others, who have lately been staying at the seat of war, are betaking them home to their respective countries, now that hostilities are ended. Lieutenants Aukarcrona and Bergenstrahle of the Swedish Guards arrived at Gibraltar on the 2nd inst., and proceeded homeward *vid* Madrid. The former was wounded in the battle of the 23rd, and has been recommended to the notice of the Queen of Spain for the cross of San Fernando by Marshall O'Donnell.

A letter published in the same journal, and stated to be from one of Spain's most gallant generals, and bearing date 1st inst., corroborates the version of the fight of the 23rd, which represents such victories as costly in " . . . . The battle of the 23rd was, indeed, very hotly contested. The Moors defended themselves with desperate fury, but were forced to yield before our well-trained and disciplined troops. The losses on our side bear testimony to the resistance of the enemy—120 chiefs and officers, and upwards of 1020 men were put *hors de combat;* more than half of whom (57 officers and 556 men), belonged to the eight battalions under the command of General Prim. . . . . The result of this last defeat of the Moors has been peace. And be it welcome. The honour of Spain, our dear country, is secured without humbling the vanquished. It is not humbling them to require just compensation for the expenses of the war."

MALTA, 7TH APRIL.—The fleet in Malta are now all refitted and ready for sea, the men have had their cruise on shore, and appear happy and contented. Admiral Codrington has become President of the Sailors' Institute.

Mr. T. A. Roe, late Assistant-Surgeon of H.M.S. Scourge, is appointed to Malta Naval Hospital.

H.M.S. Boxer arrived yesterday from the Ionian Islands, and Captain O'Hara in his yacht, and leaves to-morrow for Gibraltar.

The Hon. Colonel Percy, V.C., of the Guards, has arrived from his tour in Syria.

The buildings for the troops sent to St. George's Bay for minié practice, are to be commenced next week. This will not only add very considerably to the comfort of the men, but will be a great saving, tents being very expensive.

Major-General Hay, late in command of the troops in the Mauritius, is still staying at Malta for his health.

Lieutenant-Colonel Owen, C.B., of the 3rd Light Bombay Cavalry, was landed here from the Peninsular and Oriental Company's steamer, last Sunday, and died next day. He was buried with the usual honours.

Graham Island is again to be surveyed, and it is expected that the Assurance will be sent on that duty.

The fleet stationed at the Ionian Islands are at the southern islands with the Lord High Commissioner.

The following gentlemen passed their examination at the Royal Naval College, Portsmouth, and have received certificates:—Mates for Lieutenants: G.R. Hope, E. S. Mangan, Samuel Long, Richard Evans, Alexander Tupman, James E. N. Graham, E. L. Green. For Assistant-Clerks: G. A. Mitchell, Robert Dinwiddie.

The naval cadetship which was placed at the disposal of the Council of the Royal Naval School, New Cross, by Lord Clarence Paget, has been awarded, after a preliminary competitive examination, to Mr. John Orlebar, son of Commander John Orlebar, R.N., in the surveying service, at St. John's, New Brunswick.

In Colonel William Mure, of Caldwell, the accomplished historian of the "Literature of Ancient Greece," the nation has lost one of its deepest and ablest scholars. He married, in 1825, Laura, second daughter of William Markham, Esq., of Becca Hall, Yorkshire, and grand-daughter of the late Dr. Markham, Archbishop of York, by whom he leaves issue, Lieut.-Colonel Mure, of the Scots Fusilier Guards.

A military disturbance took place at Greenwich the other evening, in which some men of the Artillery, Marines, Military Train, and Militia were mixed up.

THE MILITIA.

KERRY.—The Kerry Militia marched from the Curragh Camp on the 10th inst., *en route* to Tralee.

KILKENNY.—Colour-Sergeant Kennedy, of the Kilkenny Fusiliers, has been appointed, by the Commander-in-Chief, provost-sergeant of the garrison of Kilkenny, vice Broderack, appointed barrack-sergeant at Aldershot.

MONAGHAN.—The usual notices have been served, signed by Captain and Adjutant Crofton, announcing that the Monaghan Regiment will assemble at the Cavalry Barracks, Monaghan, on Tuesday, the 1st of May, for twenty-seven days' training. At the expiration of that time the bounty for the current year will be paid.

NORTH MAYO.—The Staff of the North Mayo Regiment has been moved from Ballina to Castlebar, and is now quartered at the barracks there.

NOTTINGHAM.—The South Notts Regiment of Yeomanry Cavalry will assemble on the 7th May next for five days' exercise, without Government pay.

WATERFORD.—Waterford Militia Artillery, stationed in the Portsmouth garrison district, are ordered to be held in readiness to embark for Waterford, for the purpose of being disembodied between the 23rd and 30th inst. This regiment musters under 300 rank and file.

WILTSHIRE.—Royal Wiltshire Militia, consisting of about 32 officers and 585 men, are under orders to proceed from Dover to Devizes, for the purpose of being also disembodied between the 23rd and 30th inst.

Thirty-one Irish Militia regiments will be called out for training on the 1st and 22nd of next month.

We understand that a court of inquiry in connection with the 2nd West York Light Infantry (Militia) has been sitting during the present week.

MILITIA GAZETTE.

WAR OFFICE, PALL-MALL, APRIL 10.

Northumberland Artillery Regiment of Militia—Edward Julian Bigg Wither, Gent., to be Second Lieutenant.

South Herts Yeomanry Cavalry—Richard Archibald Farquharson, Lieutenant, 24th Regiment of Foot, to be Adjutant.

WAR OFFICE, PALL-MALL, APRIL 13.

Southern Regiment of Nottinghamshire Yeomanry Cavalry—Cornet John Wright to be Lieutenant, vice Lowe, resigned; John Chaworth Musters, Esq., to be Cornet, vice Francis Bradshaw the younger, promoted; Thomas Bromley, Esq., to be Cornet, vice Wright, promoted; April 5.

Sherwood Rangers Yeomanry Cavalry—Cornet William Knight Hamilton Ramsay White to be Lieutenant, vice Baring, resigned; Alfred Brodhurst, Gent., to be Cornet, vice White, promoted; April 5.

3rd Regiment of Royal Surrey Militia—Lieutenant Lamorock Flower to be Captain, vice Manning, resigned; April 9.

West Essex Yeomanry Cavalry—Cornet William Scott to be Lieutenant, vice Palmer, promoted; Frederick Edenborough, Gent., to be Cornet, vice Scott, promoted; Samuel Augustus Baker, Gent., to be Veterinary Surgeon; April 3.

90th or Stirlingshire, &c., Highland Borderers Light Infantry Regiment of British Militia—Her Majesty has been pleased to accept the resignation of the Commission of Lieutenant David Murray Anderson, on account of bad health.

Royal North Lincoln Militia—Ensign Lionel Wentworth Atkinson to be Lieutenant; April 4.

YEOMANRY CAVALRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I beg to call the attention of the public through your valuable publication to the absurdity and injustice of the Government in refusing the usual allowance to the different Cavalry Corps throughout the country, when they are at the same time ostensibly rendering every support possible to the Volunteer movement; for I contend that the Yeomanry Cavalry deserve every support for the public spirit they have evinced in devoting considerable time, and at great expense, in perfecting themselves so as to be ready at any time if called upon in defence of their country; and furthermore it is a volunteer movement on the part of the country gentlemen and their tenant farmers that has been in existence long before the present Rifle Volunteer regiments were thought of. Not that I wish to detract from their usefulness, but I contend that it is unjust that the Yeomanry Cavalry should be sacrificed for their exclusive benefit; and to prove the public spirit that exists, I will give you the following facts in reference to one of the regiments, viz, the Lancashire Hussars. The former strength of this regiment, under the late Sir J. Gerard, was 1 major-commandant, 3 captains, 3 lieutenants, 3 cornets, 1 surgeon, and 3 troops of 50 men each. Last year, at the instance and great expense of Sir R. Gerard, Lord Skelmondale and others, the then Government authorised an addition to the strength of the regiment, which now stands as follows:—1 lieut.-colonel-commandant, 1 major, 4 captains, 4 lieutenants, 4 cornets, 1 surgeon, and 4 troops of 55 men each. The members of the corps have also devoted considerable time and expense in perfecting themselves at drill, and the desire to be well mounted, so as to give satisfaction to their officers. You may therefore judge their surprise and indignation at being so unceremoniously treated after taking such pains and incurring so great an expense, and that too by the direct encouragement of the authorities. Notwithstanding this I am glad to say that the officers have at their own cost decided that the regiment shall assemble for their usual annual drill at Southport in the second week in May. Such spirited conduct on the part of the gentlemen of Lancashire I think deserves publicity; and if you think this communication worthy of a place in your columns, you will much oblige a

LANCASHIRE HUSSAR.

The Hon. Frederick Pelham visited the Portsmouth Dockyard on Wednesday, also Sir James D. Elphinstone, member for Portsmouth, and Commodore Sunderwuld, of the Prussian frigate Arcona, who, accompanied by the Chevalier Vandenberg, paid official respects to the authorities.

VOLUNTEERS.

METROPOLITAN.

Civil Service Rifle Volunteers.—The Civil Service Battalion will assemble at Head-Quarters, Somerset House, this day, at ten minutes past two o'clock, and will proceed to Wimbledon by special train from the Waterloo Station, to be exercised in battalion drill by Captain Ennis, the adjutant-elect.

The Inns of Court Volunteer Corps.—On Thursday morning the Middle Temple Company of the Inns of Court Volunteer Rifle Corps assembled in full uniform in Middle Temple Hall, and having been mustered on the terrace in the Inner Temple Gardens, and inspected by the officers of the company, they formed in full marching order, and proceeded through the Temple, Essex Street, the Strand, over Waterloo Bridge, to the South Western Station, and thence to their grounds at Richmond, for the purpose of a day's rifle practice. A large number of the members of the Inn were present, and accompanied them.

Queen's (Westminster) Rifle Volunteers. — The entire regiment will march out for the first time on Saturday the 14th instant, headed by their new band. The present strength of the corps exceeds 1400 effectives. First bugle at Westminster Hall at 3·45. On Sunday, the 15th, the regiment will assemble at Old Palace Yard at 2 o'clock, to proceed to divine service at the Abbey.

The Artists' Rifle Corps, enrolled as 38th Middlesex, consists of artists, musicians, literary men, actors, amateurs, and others interested in art—Viscount Bury, commandant, formerly in the Scots Fusilier Guards, himself an artist (a member of the Junior Etching Club). The numbers are rapidly increasing, and the members are enough for two companies. The Government have granted the use of Burlington Gardens for drill, and Woolwich for practice. Officers for 1st Company are Lord Bury, Captain; H. W. Phillips, Lieutenant; J. E. Millais, A.R.A., Ensign. The following have already joined:—Millais, Hunt, Phillips, Watts, Talfourd, Leech, Zuard, Monro, Hullah, T. Harper, A. Wigan, D. Fisher, Dickenson, Blagrove, Nicholson, Cooper, Cockerell, Gale, Salvin, Thomas O'Neil, C. Haag, Lewis, Richmond, Earl, Sterling, Leighton, Cayley, Severn, Eades, Haythar, Perugini, Martineau, Prinsep, Campbell, Woolner, Williams, Watkins, &c.

The Hon. Artillery Company.—An "assault of arms" took place at the head-quarters of the Hon. Artillery Company on Wednesday evening, which was attended by a great number of spectators, including members of most of the Volunteer corps of the metropolis. The fencing, single stick play, and boxing of the officers and men of the artillery corps, was exceedingly good; but the feat of the evening was performed by Major Robinson, who with great ease divided a suspended leg of mutton by a sabret cut, an operation which he thrice repeated. The major, the sergeant-major, and the privates of the corps, also elicited great applause by their expertness in cutting through bars of lead, the Indian club exercise, &c.; and the professionals present expressed no small surprise at the proficiency they have attained.

DURHAM.

Stockton-on-Tees.—On Thursday evening, the 5th inst., this corps mustered and marched to the cricket field, where they were put through their evolutions before hundreds of spectators. On Sunday morning, the whole of the corps partook of breakfast at the Vane Arms Hotel, the repast being generously provided by the officers of the corps. After breakfast they proceeded to the Holy Trinity Church, accompanied by the Mayor and Corporation.

KENT.

Chatham.—We have received a communication from Captain Stevens respecting his resignation of the office of Ensign in this corps, and inclosing a copy of correspondence between him and Lord Sydney on the subject. He says:—"The only comment I venture to offer is, that had a court of inquiry been convened, every step I took in this complicated question would have been properly explained and justified. Near two months back I requested to be relieved from the difficulty of my position; and but that I was supported by those who should have had the formation of a company in this extraordinary town, which parliamentary aspirants even hesitate to approach, I should have retired at the moment when I first defended the Lord-Lieutenant's prerogative in not sanctioning any discussion that questioned his lordship's right of rejecting the nomination of Mr. Budden as captain; and because I would not sign or countenance a memorial in that gentleman's behalf, the whole fury of his party was brought into play against my authority; deputations were received most improperly by the clerk of the lieutenancy, encouraging thereby an insubordinate spirit; a portion even of these misguided Volunteers admitting to me that they were induced to dispute my authority owing to such receptions, and that they would have retracted the vote of censure but for these undue influences. I am sorry to occupy so much space in your journal; and with the hope that you will permit this vindication to appear, I conclude with the observation, that the legality of my proceedings is not questioned even by the highest authority." In reply to a letter from Lord Sydney, calling upon Captain Stevens for his resignation, the latter says:—"I take this opportunity of observing that in defending your lordship's prerogative my only reward has been neglect and evasion, utter defiance of rule and authority, and the animosity of a factious party, whose turbulence has become in this affair, as in all others, a provincial proverb. Conscious that I have done my duty strictly in accordance with the War-Office regulations and the Act of Parliament relating to Volunteers, I suffer no reproach, have no regret, and sacrificed, as I feel I am, for an expediency, I am consoled by the reflection that your lordship's injustice is not my crime. It is evident to everyone, as to my own convictions, that I gained no rank as Ensign-Commandant of the Chatham Rifles, and equally so that in its surrender I lose no honour; and as I am silently denied a court of inquiry, in self-vindication, combined with the coercion of a threat of removal, I have no other honourable alternative but to resign the honour the Chatham Volunteers conferred, unsought, upon a disinterested stranger." A considerable amount of satisfaction has been felt by the Volunteers belonging to the 9th Company, at the appointment of Mr. G. R. Brock, as captain of the company, and there is now no doubt that the differences which have so long existed, and which it was feared would lead to the breaking-up of the corps, are at an end. The vacancies in the lieutenancy and ensigncy of the company will, it is expected, be filled up by the nomination of Mr. C. Isaacs and Mr. J. Grover. The drills, which had been suspended by Captain Stevens, have been again commenced, an order having been received that Her Majesty had directed that the names of the 48 Volunteers dismissed by Captain Stevens should be re-inserted on the muster-roll, no opinion being given as to the illegality of Captain Stevens's procedure.

Frittenden, Weald of Kent.—A meeting was held in the National School, on Monday evening, the object of which was to complete the list of effective members, and to establish a company in connection with Staplehurst. After the rules of the corps had been read over, and the pattern of uniform exhibited, the list was made up.

Sandown.—The rifle corps under the command of Captain H. Farnell is making very satisfactory progress. The men are drilled twice a weeek in the manual and platoon exercise by Sergeant M'Cormick, of the Tipperary Artillery. It is mainly through the exertions of Captain Farnell that a company has been raised at Sandown; and as a band for the corps is already under formation, the place will be rendered more attractive for the seaside visitors.

East Kent Rifle Volunteers.—The East Kent Rifle Volunteers escorted the Mayor and Corporation of Canterbury to the Cathedral on Sunday last.

The Folkestone Artillery Volunteers.—No. 3, Company, on Good Friday, marched to Dover on a friendly visit to the Dover Cinque Ports Artillery Company; the day being fine attracted a large number of persons to view the novel spectacle. The same Company assembled on Monday last, and had a Commemoration Dinner at the King's Arms Inn, Folkestone; about 73 sat down under the presidency of Captain Kennicott, R.N., Captain of the Company, Lieutenants Tyssen and Scholey being also present. After the removal of the cloth, the usual loyal toasts were given, and cordially responded to.

The Volunteer Rifle Corps at Folkestone assembled at the Sessions Hall, High Street, on Wednesday evening last, and about 46 took the oath of allegiance. The uniform selected is a dark rifle-green, similar to that of the London Volunteer Rifle Brigade.

LANARKSHIRE.

Glasgow South-Western (14th).—Mr. James Anderson, late drill-sergeant to this company, having, in the faithful exercise of his duties as such, contracted a severe cold, from the effects of which he has been confined to his house for upwards of two months, was waited upon by a deputation from the corps, who presented him with a purse containing upwards of 20 sovereigns, as a mark of their high esteem, and sympathy with him in his sickness. This company have now got their rifles, and are rapidly filling up their numbers towards the maximum strength.

LANCASHIRE.

It is proposed to have a field day of all the Volunteer corps in the northern division of the county, on Whit-Tuesday. In the northern division there are already established—in Preston three companies, in Blackburn two of artillery and four of rifles, in Kirkham one artillery; and rifles in the following places—in Lancaster, two; Ulverston, one; Accrington, one; Rossendale, one; Burnley, two; Lytham, one; Longton, one; Leyland, one; Chorley, two; Clitheroe, one; Dalton, one; Cartmel, one; comprising a total force of something like 250 artillery, and at least 1400 or 1500 rifles.

MIDDLESEX.

South Middlesex.—On Monday, at three o'clock, the 2nd or South Middlesex Volunteers, under the command of Lord Ranelagh, paraded at the head-quarters, Walham Green, whence they marched to Putney Heath, where they halted for a few moments. They then proceeded to Wimbledon Common, where they went through sundry battalion and light infantry movements, after which they continued the march to Roehampton, and then returned to Walham Green, where they arrived at nine o'clock, after a march of at least sixteen miles. The regiment was accompanied by its own band, under the direction of Mr. Challoner.

OXFORDSHIRE.

Oxford University.—An order has come from the War-Office prohibiting practice with blank or ball cartridge until the corps shall have been inspected.

SOMERSETSHIRE.

Bath.—There was a demonstration at Bath on Monday, on occasion of the swearing in of the members of two additional companies of artisan Rifle Volunteers. There were previously two well organised and full companies of Rifle Volunteers in the city, who have merited warm encomiums from the inspecting officers of the district; but a feeling in favour of the movement having sprung up amongst the artisans, an appeal was made by his worship the Mayor (Dr. Thomas Barrett) to the richer citizens for subscriptions, which was readily and liberally responded to, one gentleman (Mr. R. Cook, ex-mayor) having consented to clothe and equip 60 riflemen at his own cost, and others having given liberal donations of money. Two companies of artisans (numbering upwards of 150) having been organised, it was determined that the administration of the oath of allegiance should take the form of a public ceremonial. Several thousand people accordingly assembled from the city and surrounding districts. A large number of Bristol Artillery and Rifles, the Company of Keansham Rifles, and several members of the Cambridge and other corps took part in the proceedings. The several companies of Rifle Volunteers assembled in Queen Square, and marched to the Royal Victoria Park, where the necessary arrangements had been made. A square having been formed, the two new artisan companies were put through some manœuvres, after which the Mayor administered the oath at the drum-head. Speeches in approval of the volunteer movement were also made by the Mayor, Mr. Way, M.P. (Mr. Tite, M.P., was prevented attending through illness), the Rev. J. M. Dixon, Captain Haviland, &c. The proceedings terminated with three cheers for the Queen. The Volunteers afterwards marched through the principal streets of the city, which were thronged with spectators, and in the afternoon the Mayor entertained the officers and a select party of friends at an elegant déjeuner, given at his private residence in St. James's Square.

STAFFORDSHIRE.

Burslem.—On Sunday morning the members of the Burslem Rifle Volunteer Corps made their first appearance at church. The whole of the members mustered in the Town Hall, and after going through a few preliminary movements, headed by the band, proceeded to the parish church, accompanied by the whole of the honorary members with one or two exceptions, including R. H. Heywood, Esq., high sheriff of the county; J. Edwards, Esq., George Baker, Esq., the Messrs. May, &c. The corps were met at the gates by the rector (Dr. Armstong) and the curate, who accompanied them to the edifice, which was already crowded. The rector preached an excellent sermon suited for the occasion, and a collection was afterwards made on behalf of the church choir, amounting to 18*l*. After the service the Volunteers returned in due order to the Town Hall, where they were dismissed.

Burton-on-Trent.—Easter Monday was a "field day" with the Burton Volunteers. The two companies of which the town boasts assembled, and were met by a number of the members of other corps, also by members of the Militia and Yeomanry. Preceded by the band of the Lichfield Yeomanry, they marched from the place of drill through the town to the large room of Messrs. Bass and Co.'s cooperage. The room was very elegantly decorated with laurels, flags, banners, mottoes, pictures, trophies, ribbons, and streamers, and a gallery was erected, in which the ladies mustered in goodly numbers and gay apparel. The tables, also, were laden, as they should be, with good substantial fare, which was partaken of with right hearty English zest. The Messrs. Bass decorated and lighted up the room entirely at their own expense.

Hanley and Longton.—On Monday the Hanley and Longton Rifle Volunteer companies met in Trentham Park, for the purpose of battalion drill, the first occasion of the two companies meeting together for that purpose. The members of the Hanley Company mustered at the Shambles to the number of about 80, including the officers and band, and after going through a series of preliminary exercises, they marched with their rifles, headed by a band, through the town, and, *vid* Stoke and Hanford, to Trentham. The two companies went through several battalion movements, under the command of Captain Brown Westhead (of the Hanley corps), which, considering that the two had never acted together before, and that it was the first time the Hanley corps had performed any field exercise whatever, were satisfactorily effected.

Smethwick. — The members of this corps assembled several times lately for drill, at a place belonging to Mr. Thomas Astbury; but the situation being inconvenient to members of the company residing at the opposite side of the hamlet, Messrs. Chance and Co. provided a spacious room at their establishment. Captain Griffin, the government officer, inspected the ground selected for rifle practice, near the Cape Hill, last week, and pronounced it admirably adapted for the purpose.

Tipton.—Monday was a high day and a holiday with the members of the Tipton Volunteer Rifle Corps, as it was the day set apart for parading the parish, attending church, and partaking of the dinner liberally provided for them by the captain, W. Barrows, jun., Esq. About 10 o'clock in the morning, the commissioned and non-commissioned officers, with 94 men, all dressed in uniform, assembled in the spacious Masonic Hall of the Navigation Inn, and proceeded to St. Paul's church, where an eloquent sermon was preached by the Honorary Chaplain to the corps, the Rev. E. H. A. Gwynne (incumbent). After the service was concluded, the corps proceeded up Owen Street to the Bloomfield Works, and presented arms to Messrs. Barrows and Hall. They next visited the private residence of P. Williams, Esq. (deputy lieutenant), and presented arms. Mr. Williams entertained them at luncheon. Messrs. Kirby's brass band, from Birmingham, accompanied the corps. Having been out about six hours, they returned to the drill-ground, where Colonel Vernon inspected them in the ranks, and paid a very high compliment to them on their generally efficient state, stating that he was proud to see them muster in such force, carry themselves so well under arms, and exhibit such a soldier-like bearing. The officers and men then marched to the Navigation Inn, where a substantial dinner was provided by the host.

Wolverhampton.—On Wednesday the members of the 2nd company were gratified by the receipt of 100 new Enfield rifles, with slings, bayonets, and all the necessary apparatus for rifle practice. From the very creditable progress made by the company since its formation, and the apparently increasing zeal and attention of its members, they must soon attain such a degree of proficiency as will enable them to stand in fair competition with any of their comrades in the battalion. The 3rd company has now fairly come into existence, at least so far as regards the commencement of drill and the completion of the necessary number of members. The formal acceptance of their offer of service has not yet been received, but it is expected in a few days.

SURREY.

We have received the following letter:—

"Sir,—The press has lately directed the notice of the public to the fact of a person in the dress of a Rifle Volunteer having wantonly shot a dog on Wandsworth Common, and Lord Ashley recently mentioned it in the House of Commons. Its occurrence in the county of Surrey, and the anxiety naturally felt for the credit of the Battalion of the

Digitized by Google

7th Surrey Rifles by all of us—its officers and members—demand from me this simple statement, that no member of the 7th Surrey had act or part in the outrage.

'Non tali auxilio—Non defensoribus istis.'

"I am, sir, yours, &c., Marcus Beresford, Major-Commanding 7th Surrey Rifles."

1st Surrey.—At the Wandsworth Police Court on Tuesday, Mr. John Kerrison, of No. 25, Manor Street, Clapham, a volunteer in the 1st Surrey Rifles, appeared to answer to a summons charging him with an act of cruelty to a dog, under circumstances which have caused much attention. Mr. A. Jones, solicitor, the complainant, rose and stated that his worship would remember that his application was against the defendant for wounding a dog by shooting, when it was running about on Wandsworth Common with a lady and two children. There would be very little difficulty in the matter, as Mr. Kerrison had expressed his great sorrow for what had happened, and had assured him that it was quite a mistake. Under these circumstances he was ready to allow the case to drop, as the defendant was willing to make an apology and to pay all the expenses. It was most important that some stop should be put to rifle volunteers using their fire-arms in public thoroughfares, as the most dangerous results were likely to occur. The dog in question was shot through the hind-quarters, and was running about at the time close to Mr. Jones's niece. Mr. Ingham here inquired if the defendant was present? Mr. Kerrison, a young gentleman, then stood up in front of the table. Mr. Ingham then addressed him, and said he hoped that he saw what a dangerous practice it was. He had no doubt it was done thoughtlessly, but he ought to be more careful in future. The country were much obliged to the gentlemen for the zeal they had shown in forming themselves into rifle corps, but if they were not more cautious with their fire-arms the public would have less to fear from an invading enemy than from their friends. A gentleman, who appeared for the defendant, expressed his thanks to the complainant and his worship for the manner in which they had treated the case. He said that it was one of those unfortunate occurrences arising from the indiscretion of youth. The great fault rested with the officers in not having issued orders in the first instance against using the rifles except in ball practice or on parade. If an order had been issued to that effect, the accident would not have happened. He hoped it would be a caution to the Volunteers not to take out their rifles in that way. Mr. Ingham said in the open country there would not be any danger, but in the metropolitan parishes, where persons were constantly passing to and fro, it was very dangerous to use fire-arms. He had, however, no doubt it was done in a thoughtless moment, and he therefore would allow the summons to be dismissed.

The Reigate Rifles.—It having reached the ears of a few members of the 5th Surrey or Reigate Volunteer Rifle Corps late on Monday night, that His Royal Highness the Prince of Wales and suite would arrive at Redhill on Tuesday morning at 7·54, some active members of the corps were soon on foot, and at 6 a.m. the following morning the bugle sounded, and by 7 a.m. there were nearly a hundred members of the corps assembled, including the band, and they then marched to Redhill station. The royal train arrived exactly at 7·50 opposite the station, where the corps were drawn up in line, and, upon the arrival of the Prince, they presented arms, the band at the same time playing the National Anthem. After waiting a few minutes His Royal Highness expressed himself (to the Hon. Surgeon Sisson) much pleased with the orderly and soldier-like bearing of the men, and the train moved on amid loud cheers. The corps then marched gaily home, highly delighted with the opportunity they had enjoyed of saluting their future sovereign.

YORKSHIRE.

Bridlington.—On Tuesday last (Easter Tuesday), the corps of the 5th East York Rifle Volunteers assembled in the court-yard of their commander, Captain Prickett, at half-past ten in the morning, and, preceded by their band, marched thence to the parish church, where prayers were offered and an address delivered by the Rev. Chaplain Barnes, M.A., from the 60th Psalm, and former part of the 12th verse. The discourse was animated and highly appropriate. In the afternoon, the corps assembled at three o'clock, for field drill. The day being fine and a holiday, caused a considerable number of the townspeople and inhabitants of the neighbouring villages to attend, both at the church and in the field. The progress made by the men in military discipline was very marked, and their appearance and orderly conduct much admired. A concert took place in the evening.

Driffield.—Sir Tatton Sykes has generously offered a part of his estate near Crakehill for a rifle range for this corps. Captain Hudson, inspector of rifle ranges, has examined the ground and expressed his approval of it.

Hull.—On Friday week some members of the Hull Volunteer Artillery corps met to practice shooting at a target in the Citadel. John Kirke, Thomas Carr, and John Cameron, all in the employ of Messrs. Samuelson and Co., were shooting with the Enfield rifle, with ball, at a target about 150 yards distant, in company with Corporal Richardson of the Northumberland Militia, residing in the Citadel. Corporal Richardson was noticing where the balls struck the target, and when standing about 20 yards distant from it, a ball, shot by Kirke, hit the ground, rebounded, and struck Richardson on the right side of the chest. He fell, and was conveyed to the barracks suffering very great pain. Every attention was paid by the medical men in attendance, and the wounded man was accompanied by them in a cab to the infirmary, where he now lies in a very dangerous state. During the afternoon the ball was extracted, and with it also a portion of the man's jacket and brace.

Scarborough.—On Monday last the members of this corps had a grand field day, in full uniform. They marched through the town headed by their excellent band, and their soldier-like appearance elicited commendations from the spectators.

VOLUNTEER GAZETTE.

WAR OFFICE, PALL MALL, April 10.

1st Surrey Mounted Rifle Volunteers—Walter Meller, Esq., to be Captain; Frederick Doulton, Esq., to be Lieut.

18th Company of Surrey Rifle Volunteers—William Jacob Hollest, Esq., to be Lieutenant; George Trimmer, Esq., to be Ensign.

10th Surrey Rifle Volunteers—John Dixon, Esq., M.D., to be Assistant-Surgeon.

Carnarvonshire Volunteer Rifle Corps, 7th Company—James Edwards, Esq., M.D., to be Captain; Robert Farrant, Gent., to be Lieut.; Vernon Darbishire, Gent., to be Ensign.

2nd Brecknockshire Rifle Volunteers—Henry Harris Butterfield, Esq., to be Hon. Assistant-Surgeon.

3rd Company of Cinque Ports Artillery Volunteers—Charles Emmerson, Esq., M.D., to be Honorary Assistant-Surgeon.

5th Berwickshire Rifle Volunteers—William Fairholme, to be Lieutenant; Robert Romanes, to be Ensign.

Kent Artillery Volunteers—14th Company—William Andrews Hatton, Gent., to be First Lieutenant; Anthony Blanchard Pike, Gent., to be Second Lieutenant.

Kent Rifle Volunteers—22nd Company—Caleb Selby, Gent., to be Ensign. 31st Company—The addition of M.P. to the name of Captain Wykenham Martin, in last Tuesday's *Gazette*, was erroneous.

4th Company of Dorsetshire Rifle Volunteers—The Rev. John Barrow, Clerk, B.A., to be Hon. Chaplain; Edward Lacy, Gent., to be Hon. Assistant-Surgeon.

Wiltshire Volunteer Rifle Corps—7th Company—William Brown Pepler, Gent., to be Hon. Assistant-Surgeon; the Rev. Matthew Wilkinson, D.D., to be Hon. Chaplain.

East York Rifle Volunteers—Hull Battalion—Bethell Jacobs, Esq., to be Supernumerary Lieutenant. 1st Company—Arthur Octavus Arden, Esq., to be Hon. Assistant-Surgeon. 2nd Company—Thomas Walton, Esq., to be Hon. Assistant-Surgeon. 4th Company—John Fearne Holden, Esq., to be Honorary Assistant-Surgeon. 7th Company—Henry Gibson, Esq., to be Hon. Assistant-Surgeon.

MEMORANDUM.

The surname of Robert Blyth, jun., Esq., to be Lieutenant, as appeared in the *Gazette* on the 6th of March last, is spelt "Blyth," and not "Blythe," as stated in that *Gazette*.

1st Herefordshire or Hereford Company of Rifle Volunteers—Robert Feilden, Esq., late Lieut.-Colonel of Her Majesty's 44th Regiment, to be Captain; John Alexander Forbes Suter, Gent., to be Ensign.

Worcestershire Volunteer Rifle Corps, No. 13 Company—James Alaren Macnaught, Gent., to be Lieutenant; Thomas Lamb Smith, Gent., to be Ensign.

1st Company Caithness Artillery Volunteers—The Commission of James Ellison, M.D., to be Honorary Surgeon, should have been James Ellison, M.D., to be Honorary Assistant-Surgeon.

1st Caithness-shire Rifle Volunteers—Alexander Henderson, Esq., to be Captain; William Reid Tait, C.E., Gent., to be Lieutenant; James Brims, Gent., to be Ensign.

6th Hertfordshire Rifle Volunteers—John Archer Houblon, Gent., to be Captain; Thomas Hallam Hoblyn, Gent., to be Lieutenant; Frederick Woodham Nash, Gent., to be Ensign.

6th Lancashire Artillery Volunteers—First Lieutenant David Barbour McCulloch, to be Captain; Second Lieutenant Isham Henry Edward Gill, to be First Lieutenant, vice McCulloch, promoted.

The following appointment is substituted for that which appeared in the *Gazette* of the 3rd of April inst.:—

1st Lancashire Mounted Rifle Volunteers—Samuel Pope Callender, Gent., to be Ensign.

WAR OFFICE, PALL MALL, April 13.

2nd Company of Banffshire Artillery Volunteers (Banff)—William James Whyte, Gent., to be Captain; James Walker, Gent., to be First Lieutenant; James Sellar, Gent., to be Second Lieutenant; April 5.

3d Company of Banffshire Artillery Volunteers (Banff)—George Lewis William Forbes, Gent., to be Captain; John Allan, Gent., to be First Lieutenant; Nathaniel Grieve, Gent., to be Second Lieutenant; April 5.

Tower Hamlets Rifle Volunteers (No. 2)—James Scott Walker, Esq., to be Lieut.-Colonel; April 6. To be Captains—Joseph D'Aguila Samuda, Esq., Clifford Wigram, Esq., John Holt, Esq., Edward Hegley Byas, Esq., Wm. Waring Gwillim, Esq.; April 6. To be Lieutenants—Charles Hampden Wigram, Gent., Ashley Willmott Barrett, Gent., Joseph Lloyd, junior, Gent., Russell Gole, Gent., Charles William Laws, Gent.; April 6. To be Ensigns—Thomas Burt, Gent., George Pecke Meeson, Gent., Hugh Moody Robertson, Gent., Alfred Thomas Pitchford, Gent., William Charles Secretan, Edward Stillard; April 6. To be surgeon—Thomas Gray, M.D.; April 6. To be Assistant Surgeon—William Thomas Garrett Woodforde, M.D.; April 6.

15th Lancashire Artillery Volunteers—Philip Frederic Tinne, Esq., to be Captain Commandant; Richard Watt, Esq., to be Captain; Robert McConnell, Gent., to be First Lieutenant; John Mewburn, Gent., to be First Lieutenant; John Park Robinson, Gent., to be Second Lieutenant; April 2.

56th Lancashire Rifle Volunteers—Richard Husband, Esq., to be Captain; Joseph Beckton, Gent., to be Lieutenant; Charles Mercier, Gent., to be Ensign; March 30.

61st Lancashire Rifle Volunteers—Ensign Robert Hyde Barton to be Lieutenant; Clarence Brazil, Gent., to be Ensign; Richard Carver Coupe, Gent., to be Ensign; March 28.

7th Sussex Rifle Volunteers—Lieutenant Manaton Pipon to be Captain; Ensign Sir John Henry Pelly, Bart., to be Lieutenant; April 2.

1st Corps Berwick-upon-Tweed Artillery Volunteers—Alexander Kirkwood, M.D., to be Assistant-Surgeon; March 24.

1st Corps Berwick-upon-Tweed Rifle Volunteers—Robert Ramsey, jun., Esq., to be Captain; Henry Lindsay Christison, Gent., to be Lieutenant; Robert Thompson, Gent., to be Ensign; March 28.

1st Corps Northumberland Rifle Volunteers—Captain Edward Potter to be Major; April 7.

22nd Company of Cheshire Rifle Volunteers—Thomas Horatio Marshall, Esq., to be Captain; William Sutton Bradburne, Gent., to be Lieutenant; March 26.

23d Company of Cheshire Rifle Volunteers—John Bolton Littledale, Esq., to be Captain; March 28.

24th Company of Cheshire Rifle Volunteers—Charles Henry Hitchen, Fsq., to be Captain; Frederick William Jackson, Gent., to be Lieutenant; Thomas Forrester Linnell, Gent., to be Ensign; March 30.

25th Company of Cheshire Rifle Volunteers—Alfred Lyon, Esq., to be captain; Ashton Marler Gardiner, Gent., to be Lieutenant; Robert Kershaw Gardiner, Gent., to be Ensign; April 2.

26th Company of Cheshire Rifle Volunteers—Thomas William Tatton, Esq., to be Captain; George Peel, Gent., to be Lieutenant; Francis Hampson, Gent., to be Ensign; April 4.

27th Company of Cheshire Rifle Volunteers—Edward Hyde Greg, Esq., to be Captain; John Railton, Gent., to be Lieutenant; Edwin Chorley Hopps, Gent., to be Ensign; April 5.

Worcestershire Volunteer Rifle Corps—13th Company—Harry McLeod, Esq., Lieutenant in Her Majesty's Army, to be Captain; James Aldren Macnaught, Gent., to be Lieutenant; Thomas Lamb Smith, Gent., to be Ensign.

14th Company—John Parker, Esq., to be Captain.

15th Company—Robert Bourne, Esq., late Captain in Her Majesty's Army, to be Lieutenant; Charles Gardner, Gent., to be Ensign.

16th Company—Pynson Wilmot Bennitt, Esq., to be Captain.

1st Lanarkshire Rifle Volunteers (Glasgow)—William Coulburn, Gent., to be Supernumerary Lieutenant; April 6.

52nd Lanarkshire Rifle Volunteers (Hamilton)—The Rev. Thomas Struthers to be Honorary Chaplain; Walter Walker Lennox, Esq., to be Honorary Assistant-Surgeon; April 6.

80th Lanarkshire Rifle Volunteers (Glasgow)—Robert McGavin, jun., Esq., to be Captain; John Adam Skelly McGavin, Gent., to be Lieutenant; George Quigley, Gent., to be Ensign; April 6.

1st Norfolk Artillery Volunteers—John Lee Barber, Gent., to be Second Lieutenant; April 7.

City of Norwich Rifle Volunteer Corps—Edward Field, Esq., to be Captain; Thomas William Crosse, Esq., to be Surgeon; Charles Drake, Gent., to be Assistant-Surgeon; April 7.

4th Brecknockshire Rifle Volunteers—Captain Francis Thomas Brown, R.N., to be Lieutenant; April 7.

1st Warwickshire Rifle Volunteer Corps—George Perton, Gent., to be Captain; Frederick Herbert Neville, Gent., to be Lieutenant; David Malins, Gent., to be Ensign; April 7.

18th Essex Rifle Volunteers—Charles Paget Mingaye, Esq., late Assistant-Surgeon in Her Majesty's Royal Navy, to be Honorary Assistant-Surgeon; March 29.

Renfrewshire Rifle Volunteers—4th Company (Pollockshaws)—John Petrie, Gent., to be Ensign, vice M'Callum, resigned; April 6.

6th Company (Paisley)—Stewart Clark, Gent., to be Lieutenant, vice Brown, resigned; April 10.

19th Company (Nitshell)—Dugald Dove, Gent., to be Ensign; April 10.

22nd Company (Gourock)—Duncan Darroch, Esq., late Major in the Army, to be Captain; Duncan Darroch, younger, late Lieutenant in the Cambridge University Rifles, to be Lieutenant; John Munsie, Gent., formerly in the East India Company's Marine Service, to be Ensign; April 6.

23rd Company (Cathcart)—Robert Couper, Gent., to be Captain; Ensign Malcolm M'Callum, late of the 4th Company, to be Lieutenant; James Grahame, Gent., to be Ensign; April 6.

24th Company (Paisley)—Lieutenant Andrew Brown, late of the 6th Company, to be Captain; John Reid, Gent., to be Lieutenant; Thomas Graham, Gent., to be Ensign; April 10. The Christian name of Captain Neill, of the 1st Renfrewshire Rifle Volunteer Corps (1st Company), is Stewart, not Steward, as Gazetted on the 23rd March last.

Walcott or 18th Somerset Company of Volunteer Rifle Corps—Richard Sumner Fowler, Gent., to be Honorary Assistant Surgeon; April 9.

13th Cornwall Rifle Volunteers—William Roberts Crawford Potter, Esq., to be Captain; Richard James Edward Symons, Gent., to be Lieutenant; Richard Grose Pollard, Gent., to be Ensign; April 7.

17th Cornwall Rifle Volunteers—John Haye, Esq., to be Captain; William Michell Grylls, Gent., to be Lieutenant; James Hawker Dennis, Gent.; April 7.

11th Company Hampshire Rifle Volunteers—Thomas Wingate Henderson, Esq., to be Captain; April 7.

21st Company Staffordshire Rifle Volunteer Corps—Lieutenant Josiah Spode to be Captain, vice Lane, resigned; Ensign Robert Landor to be Lieutenant, vice Spode, promoted; James Gardner, Gent., to be Ensign, Vice Landor, promoted; April 4.

29th Company—Henry Bickerton Whitehouse, Esq., to be Captain; Edward John Gibbs, Gent., to be Lieutenant; April 9.

30th Company—Edward Phillips Stubbs, Gent., to be Lieutenant; James Prior, Gent., to be Ensign; March 30.

11th Lincolnshire Rifle Volunteers—The Rev. George Jeans to be Honorary Chaplain: March 26.

16th Lincolnshire Rifle Volunteers—The Rev. John Fairfax Francklin to be Honorary Chaplain; March 28.

2nd Lincolnshire Rifle Volunteers—The Rev. Albert Sidney Wilde to be Honorary Chaplain; April 3.

1st Corps Berks Rifle Volunteers—Sir Claudius Stephen Paul Hunter, Bart., to be Captain-Commandant; March 31.

4th Corps—Edward Morland, Gent., to be Ensign; April 5.

21st Aberdeenshire Rifle Volunteers—William Alexander to be Captain-Commandant; Thomas John Bremner to be Captain; Charles Noble to be Lieutenant; Thomas Arbuthnot, jun., to be Lieutenant; Alexander Walker to be Ensign; John Mackintosh to be Ensign; John Anderson to be Assistant-Surgeon; April 4.

8th Forfarshire Rifle Volunteers—Robert Thomas, Esq., to be Captain; David Waddel, Esq., to be Lieutenant; Alexander Black, Esq., to be Ensign; April 4.

3rd Company Ayrshire Artillery Volunteers (Largs)—James Caskie, M.D., to be Honorary Assistant-Surgeon; April 4.

Kent Rifle Volunteers, 26th Corps—In the *Gazette* of the

2d March last, the name of Captain Forrest was misspelt Forest. The intended correction of the name in the *Gazette* of the 9th March was erroneously made, as the correct name is Forrest, and not Forest.

VOLUNTEER GOSSIP IN LIVERPOOL. — *On dit* that the Volunteer movement has received somewhat of a check in Liverpool, it having been discovered that the practising ground granted by Major Blundell at Crosby cannot be rendered fit for use under a sum nearly approaching 20,000*l.* The corps, however, expect to get some suitable land further up the country from the Earl of Sefton—the lord lieutenant of the county. It is also said that the major of one of the corps, in which great dissatisfaction has of late prevailed, has called for a court-martial on some of his officers.

MORE STUPID RIFLE PRACTICE.—A correspondent sends us the following:—"On Good Friday, two or three members of the rifle corps, together with two or three of their friends, assembled in a field belonging to Dr. Dicken of Middleton. They were bent upon a little target practice with the rifle. The target was at a distance of about 200 yards from the standing point, and was excellently situated nearly at the foot of a hill or ridge of land, the slope of which is about 90 yards, and the rise about 20 yards. In a country place, for short range, this might be considered quite a model spot for target practice. The very first or second shot which was fired missed the target, and, at 1200 yards' distance, found a lodgment in the leg of a valuable horse, belonging to Messrs. Salis, Schwabe, & Co. This horse was ploughing or harrowing, and the man attending was, fortunately, one yard from the point where the deadly ball found its resting-place. We understand that the ball is still unextracted from the horse, and it is probable that the animal must be destroyed.—*Manchester Examiner.*

THE PRESS AND THE RIFLE VOLUNTEERS.—The following order has been issued by the commanding officer of the 6th Lancashire (1st Manchester) Rifle Volunteers:—"Headquarters, Manchester, 19th March, 1860. The Commanding Officer is desirous of impressing upon every member of the corps the impropriety of publicly giving expression to any opinion upon a matter of discipline connected with the corps, more especially by written communications to the public press. An anonymous letter has recently appeared in one of the papers from a member of a volunteer corps, reflecting upon the conduct of his commanding officer in the case of an order recently given relative to a parade. It will be self-evident that there can be but one commanding officer in a regiment, and if every individual is to give public expression to his feelings upon matters of discipline, the prosperity, peace, and efficiency of the corps will be seriously affected. The Commanding Officer is desirous of making the cause in which we are engaged as agreeable as is compatible with the welfare of the corps, and he is ready at all times to grant a patient hearing to any complaint brought to his notice in the regular way through the captain of the company; but it is also his bounden duty to point out to the regiment the strict letter of the law upon all subjects, and to express his determination not to shrink from the responsibilities consequent upon the position in which it has pleased Her Majesty to place him. He cannot refrain from expressing his regret that any member should endeavour to sow the seeds of discord in this corps by means of anonymous communications. After this expression of his sentiments, and the publication of this order, any member of the regiment writing to the press on matters of discipline will be considered as having deliberately disobeyed orders, and be dealt with accordingly. The Commanding Officer looks to the officers and non-commissioned officers to assist him in carrying out the discipline of the regiment. By order, JOHN A. LATHBURY, Captain and Adjutant."

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s.* ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS SUPPLIED WITH EVERY REQUISITE.

Bass Drums, 32 inches	£4	4	0
Tenor Drums, 20 inches, transparent heads	2	7	0
Brass Side Drums, 14 inches	1	8	0
Regulation Drums, brazed shell, as supplied to the Army	2	2	0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2	5	0
Oak (polished) Side Drum, 14 inches	1	5	0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

LAST NIGHTS OF SALLY SKEGGS.

MR. AND MRS. GERMAN REED, EVERY EVENING (except Saturday) at Eight o'clock; THURSDAY and SATURDAY AFTERNOONS at Three o'clock, in their POPULAR ILLUSTRATIONS, "OUR HOME CIRCUIT," and "SEASIDE STUDIES," introducing a variety of amusing and interesting SKETCHES FROM REAL LIFE, with characteristic Songs, at THE ROYAL GALLERY OF ILLUSTRATION, 14, REGENT STREET, W. Admission, 1*s.*, 2*s.*; stalls, 3*s.*; secured at the Gallery, and at CRAMER, BEALE, & Co.'s, 201, Regent Street, W.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly. Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence.

The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MAYALL's PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum.*

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

NOTICES TO CORRESPONDENTS.

"AN IRISH MILITIA OFFICER," next week.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, APRIL 14, 1860.

We have some reason to believe that the Military authorities are at this moment seriously engaged in devising a plan effectually to abolish the practice of paying for Army commissions sums in addition to those prescribed by the regulations of the Service. One of the means taken to prevent the continuance of the custom will we believe be a declaration upon honour from each officer promoted that he has not directly or indirectly paid, or connived at the payment of any extra money for his step. This remedy has been tried before and did not succeed, nor should we be disposed to augur a very decided success for it should it be tried now. Meanwhile, Colonel James Lindsay, one of the best military authorities in the House of Commons, is about to make a move in an opposite direction; for he has given notice of a Bill which he proposes to introduce for the purpose of repealing the Act of the 49th Geo. III., which makes these payments illegal. We do not presume that an Act of Parliament will have much effect upon the practice one way or the other. The Act alluded to, which is now in existence, is as stringently and comprehensively worded, and the penalties it imposes are as severe as legislative ingenuity could devise; yet it is universally and openly violated with impunity. In order not to make the statute-book a mockery, therefore, it would be well (unless the practice be stopped) that an enactment so utterly futile should no longer remain an object of public derision. But we do hope that some practical step will be taken gradually to mitigate the great evils attendant on the present system—evils which form the great argument for the abolition of the purchase system, and which unquestionably have the effect of retarding the promotion of many deserving officers, and involving others in embarrassments, resulting in their premature abandonment of a profession to which they are attached, and of which they would probably be useful members. There would be to our minds no difficulty in reducing the evil to very small and immaterial dimensions, if not in altogether eradicating it, but for the consideration which is due to the interests of those officers who have paid large sums for their regimental steps with the connivance of the responsible heads of the Army. The act was illegal—the law pronounced it to be so distinctly; but the statute was as obsolete in practice as any one of these ancient legislative curiosities of an early Norman period, which are dug up from time to time by the industrious research of a statute-law commission. Commanders-in-Chief violated it. The great Duke himself, we doubt not, bought his two sons promotion as everybody else did, by large money inducements to those above them to retire; and the whole thing was and is a farce. No matter, therefore, how rigid moralists may assert the contrary, we maintain that the officers of the Army have invested their money with the knowledge and privity of the state, and that they at all events occupy such a position with respect to their investments that they ought to be protected from any sudden change calculated to lower unduly the value of their commissions. Undoubtedly these transactions were illegal, and those who purchased must have known that they were embarking money in a precarious speculation, liable to many variations, and in time of war sure to come down to the bare regulation price. Nevertheless, some respect ought to be paid them; and whatever steps be resolved on, they ought not to be of a character to throw all the loss upon the present holders of commissions.

In speaking thus we are principally referring to the comparatively moderate sums given in the infantry of the line. As to the cavalry, we cannot really see how the present officers are to escape very serious pecuniary loss in disposing of their commissions. A few of them have obtained their principal steps for regulation, and in many instances without purchase. These officers of course are secure to the extent of their investments; but those who remain, who have purchased each successive step in time of peace, in the ordinary course of regimental succession, and at the old prices, must we fear look the matter boldly in the face, and make up their minds to a loss. Let us look at the case as it has stood and will stand in the case of a company of infantry and a troop of cavalry respectively. The regulation price of the former, 1800*l.*, may be said to have been increased by extra money so as to vary from a little above regulation to 3000*l.* in two or three of the crack regiments, when there were crack regiments. At present, we should say it rarely exceeds 2400*l.* or 2500*l.*, and even without any interference on the part of the authorities we fully expect to see that price lowered from the fact that officers who have been entering the Service for some five years past have not the money nor the inclination to throw it away which their predecessors possessed. This reason will tell much more powerfully in the cavalry. The regulation price of a troop, 3225*l.*, was formerly made up by extra payments to between 6000*l.* and 7000*l.*, but since the more extensive employment of the cavalry upon Indian service, this price has come down to something between 5000*l.* and 5500*l.* We may take 5300*l.* as a fair average in regiments that have not lately returned from India, or which are understood to stand free from liability to foreign service. The Government have lowered this by 1425*l.*; and even if the old extra price were still given, it follows that the price of a troop would be a little under 4000*l.* We do not believe that officers giving this sum will ever receive it back again. Since the year 1855, officers have been put into the cavalry whose means will not allow of heavy investments. In 1857—more especially when seven cavalry regiments were ordered out to India—the augmentation vacancies were filled up without purchase, and in most instances by young men, who would not have purchased them, and whose means would not allow of large pecuniary outlay for promotion. Further than this, the Government have made the late most important change for the express purpose of bringing in officers of moderate incomes to officer the regiments which the wealthy no longer aspired to fill, and to break down gradually the expensive "tone" which caused the extravagant habits of living, as well as the absurd prices given for promotion. When this new classs of officers come to purchase their troops, the present holders or those who may have to sell to them will not find the old extra prices maintained. Even those who may have plenty of money will not pay at the present rates, because when their turn comes to sell they must know they cannot receive anything like the same prices. In six or seven years' time there will be really no probability of cavalry promotion costing much more than infantry promotion does at present; and 3000*l.* for a troop, and 900*l.* or 1000*l.* for a lieutenancy will be rarely exceeded even if the Commander-in-Chief should not step in to lower the market by some administrative measure of an extraordinary character. We trust that the present officers may escape with the least possible amount of damage, but in the cavalry regiments they must expect to find a very serious lowering in the extra, as well as in

Digitized by Google

the regulation prices paid for commissions. Any officer now giving the old prices for promotion simply immolates himself, and any one declining to do so is justified upon every ground of honour as well as good sense.

Future naval historians will have to chronicle the year 1852 as an epoch, if they contrast the rapid increase and reconstruction of the navies of the two great Western powers. Who could have anticipated the wonderful progress made in screw propulsion that the last eight years have exhibited? For all practical purposes it has superseded the use of sailing vessels, and introduced a new class of ships of immense size and power, involving an enormous additional expenditure. In 1852 England possessed afloat, building, and converting, 17 line-of-battle, 4 block-ships, 28 frigates, 60 corvettes and sloops, 24 gun-vessels, and 2 gun-boats. In 1860 this force has expanded to 59 line-of-battle, building and afloat, 34 frigates, 9 block-ships, 4 iron-cased ships, 116 corvettes and sloops, 27 smaller vessels, 192 gun-boats, 8 floating batteries, besides 18 transports, and 4 mortar ships. In 1852 France possessed afloat and building 6 line-of-battle, 21 frigates, 31 corvettes and sloops, and 64 gun-vessels, despatch boats, and small craft. In 1860 our faithful ally had augmented his navy to 37 line-of-battle, 47 frigates, 5 iron-cased ships, 19 corvettes, 68 gun-boats, 9 floating batteries, 31 transports, and 89 avisos. Thus in the last eight years England has increased her steam fleet from 135 to 532 steam ships of all denominations, while France has augmented her navy from 122 to 305 steam ships of all classes. It should be borne in mind that this large and rapid increase in both navies in lines-of-battle and frigates has been effected to a great extent by the conversion of sailing ships, although more in the French navy than in the British. This, to a certain extent, accounts for the rapid growth and re-construction of the navy of the Emperor, the process of conversion being more speedy and much less expensive than building. Thus the number of men required to convert a 3-decker into a 90-gun ship is about five-eighths of the number required to build a new 90-gun steam-ship. The chief difference in the cost of conversion arises from the saving of material. The cost of converting a line-of-battle ship is estimated at 25,000*l.* and the cost of building the same at 105,000*l.*; but the latter is by far the best and most durable vessel. It is clear, therefore, that if the sums voted for our Navy Estimates for labour and materials are greater than those expended in France, taking ship for ship, yet, as we have not relied so much upon "conversion" as our neighbours, our ships are, generally speaking, much stronger, having been laid down as "screws." Nevertheless the progress which France has made and is now making to form a powerful steam navy is a consideration which cannot be overlooked, and will determine for some time to come the amount of our naval expenditure.

We have received an immense number of letters relative to Staff Appointments, and the principles on which, as the writers conceive, they should be filled; some of them animated by hostile and personal feelings against individual occupants of those desirable positions; and others approving of, or strongly contesting the views we recently expressed in reference to nominations and successions to Staff employ, and changes in its *personnel*. Some of our correspondents object to human nature itself. They think that a man ought not to follow his likings or dislikings when there is nothing to prevent his doing so, and when, *cæteris paribus*, the liked or disliked are as eligible or ineligible, as the case may be, as others of whom they speak. For our own parts we expect that even General Officers will be men and act accordingly, unless they are constrained by positive military enactment and precedent or practice. Why should not Sir George Brown, for instance, select Lieut.-Colonel Whitmore to accompany him to Ireland, unless in doing it he did what was contrary to the rules of the Service? When one sees Sir George Brown pursuing any course of action he may be tolerably certain that officer is *dans son droit*. But if that be so, it is perfectly evident that no officer who has any interest or friends, or past service which was thrown him in the way of Generals, will enter the Staff College, and that those who have passed through that establishment will have done so for the most part *honoris causâ*, and will derive from the process no profit save that which man receives from the cultivation of his intellect. Social qualities are powerful levers to move a man up the hill crowned by the temple of Fortune. They will always prevail in the choice of favourites over dry merit and abstract professional knowledge. Now the question to be considered is, what have those officers who have qualified for the Staff a right to expect? Who can answer that question satisfactorily? It is undoubtedly very unreasonable to say to an officer who has held a Staff appointment for its full term that he shall not be again employed on the Staff, until every qualified officer has had a turn and exhausted the roll, for that would be in effect to say that no officer should ever serve on the Staff after one turn of duty. But it is scarcely less untenable to assert that an officer who has once been put on the Staff, has a sort of vested interest in that special service till the end of his military career.

We at one time seemed very nigh a happy solution of the difficulty which the French Army has experienced in the constitution of a Special Staff who have been tauntingly called "Les Immortels," and which we too found in the materiel of the officers of the Army when placed in positions for which they were not intended.

We are sorry to learn that a very disgraceful and very injurious system of touting prevails in connection with the examination of candidates for direct commissions in the Army, which now takes place periodically at Chelsea Hospital. Emissaries of a certain portion of the tailoring interest manage to scrape up an acquaintance with the candidates, insinuate themselves into their confidence, press small loans of money on their acceptance, and get their promise to employ Messrs. ——, or Messrs. ——, to furnish their outfit, undertaking that the items will be so charged that the amount of the loan will be slipped in in the shape of an addition to each item so as to make things pleasant with "the governor." The outfit is thus made to assume proportions of a character sorely to try the purse and patience of the governor; and in one instance that came to our knowledge, an ensign in a very unpretentious marching regiment in India had uniforms and furniture provided for his use during his brief stay at the depôt amounting to 400*l.* Some of these worthies even persuade the candidates that they can obtain copies of the examination papers for them beforehand, and this furnishes a ready means of introduction. The matter has been brought to the notice of His Royal Highness the Duke of Cambridge, who is determined to take prompt steps to check a practice so disgraceful.

By the deaths of General Sir Thomas M'Mahon and Major-General Orlando Felix, and the promotion of Lord Seaton to be Field-Marshal, the following promotions will take place:—Lieut.-Generals Sir Thomas Brotherton, K.C.B., Colonel of the King's Dragoon Guards, and Sir A. J. Dalrymple, to be Generals; Major-Generals Sir Lovell B. Lovell, Colonel of the 12th Lancers, and St. John A. Clerke, 75th Regiment, to be Lieut.-Generals; Colonel H. K. Bloomfield, commanding a brigade at Dublin, Colonel Lawrenson, Inspector-General of Cavalry, and Colonel Studholme Hodgson, to be Major-Generals; Lieut.-Colonel the Hon. James Macdonald, C.B., Aide-de-Camp to the Commander-in-Chief, Lieut.-Colonel R. J. Baumgarten, C.B., 27th Regiment, and Lieut.-Colonel Blane, Assistant-Adjutant-General at Dublin, to be Colonels; Major Warde, Staff Officer of Pensioners, Brevet-Major Gordon, 23rd Fusiliers, and Major Jackson, Staff-Captain at Chatham, to be Lieut.-Colonels in the Army.

We understand that Colonel the Earl of Longford, C.B., was offered the office of Deputy-Adjutant-General at Head-Quarters, shortly to be vacated by Major-General Forster, on his appointment as Military Secretary. We regret to say, however, that Lord Longford's health will not only prevent his acceptance of the offer, but will, we fear, deprive the Service for some time at least of one of our most valuable and accomplished officers.

Brigadier-General Brook Taylor assumes the command of his brigade at Aldershot to-day. As the Militia are on the eve of disembodiment, we believe it is not intended that any officer should be appointed to succeed him as Assistant-Adjutant-General of Militia at the Horse Guards.

We are sorry to learn that the state of health of Major-General Sir John Inglis, K.C.B., will compel him to resign his divisional command at Bangalore, and return home.

Colonel T. Pattle, King's Dragoon Guards, will command the Cavalry Brigade of the Chinese expedition, with the rank of Brigadier-General.

Lieut.-Colonel C. P. B. Walker, 2nd Dragoon Guards, is appointed to the Staff of the expedition to China, as Assistant-Quartermaster-General to the Cavalry Division.

Lieut.-Colonel H. A. Ouvry, C.B., late of the 9th Lancers, and now Assistant-Quartermaster-General at Shorncliffe, has been appointed to succeed Colonel Garvock as Assistant-Quartermaster-General in Ceylon.

Major Gamble, of the 4th Regiment, has been appointed Assistant-Quartermaster-General of the South-Eastern District, in succession to Lieut.-Colonel Ouvry. Major Gamble is the first officer who has passed the Staff College who has been appointed to an office of this rank.

Captain H. F. Brooke, 48th Regiment, has been appointed Aide-de-Camp to Sir Robert Napier, K.C.B., commanding a division of the Army proceeding to China.

Captain R. C. Glover, 43rd Light Infantry, has been appointed extra Aide-de-Camp to Sir Charles Trevelyan, Governor of Madras.

Deputy-Inspector-General A. Gordon, C.B., is under orders to proceed to the Mauritius, to relieve Dr. E. Clerihew, ordered home.

Deputy-Inspector R. J. O'Flaherty is ordered to Jamaica, vice R. Irwin, whose tour of foreign service at that station has expired.

His Royal Highness the General Commanding-in-Chief is expected at the Camp at Shorncliffe this morning (Saturday), for the purpose of inspecting the 47th Regiment, previous to that regiment leaving the Camp. The whole of the troops will be under arms.

By the mail from India just arrived we learn that General Mansfield went to Bombay to await final orders, and that "he did not decline to go to China, as reported, but simply pointed out certain inconveniences which his selection as second in command might occasion. If the Commander-in-Chief, or rather in this case the Cabinet, adhere to the original plan, he will join his command in excellent time."

The French Army has suffered the loss of another excellent officer. General Dieu (called in the Army "le bon Dieu") died on Sunday last at Paris, after months of suffering, from a wound received at Solferino. His last request was, that the funeral honours should be paid to his remains by the 74th Regiment of the Line, which he was leading when he was wounded. The circumstances under which he was struck down furnish an incidental proof of the value of high professional knowledge. General Dieu was an officer of the *état major*, who was promoted to the command of a brigade (general de brigade) just before Solferino. He was leading the 74th into action, when he perceived a field-battery firing very wildly close at hand. He at once dismounted from his horse, directed the guns himself, and got the battery into order, but, as he was getting into the saddle, he was hit by an Austrian bullet.

A slight change has been ordered in the cavalry undress uniform of officers. The peak of the forage cap is to be abolished, as in the Hussar regiments at present, and the Carbiniers, 13th Light Dragoons, 17th Lancers, and Military Train, which now wear a white cloth stripe down the overalls, are in future to wear a gold lace stripe instead.

THE STOCK.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I wish to reply briefly to the remarks of "One of the Old Army," in your *Gazette* of the 7th of April,—not to open the whole question respecting this article of costume, which I believe is sufficiently settled among all reasonable persons. But your correspondent confounds the stock as now worn—of moderate depth, of thin leather, and therefore comparatively pliable and yielding,—with the high, stiff, and unbending stock of olden date, that prevented a man from turning his head to the right, or left, or downwards; in short, just such an article as the "dark-coloured buffalo-horn substitute," he writes of, must have been. Even greatly improved as the modern stock is, you, sir, are well aware that whenever there is active work to be done, or that when there is any extra call upon breathing or circulation, from long marching, hot climate, or exertion of any kind, at the first opportunity, off it goes, to be tucked away over the shoulder and under the tunic, or in any other convenient place; and that its absence is usually connived at, if not sanctioned, by all officers on such occasions as I have just alluded to. Watch our recruits in any barrack-yard, and you will observe, the instant the allotted drill is over the stock is taken off almost instinctively, and the throat left bare; and hence, as these lads have been used to "wraps" of all kinds before enlistment, the great prevalence of sore throats and colds known to exist among our raw levies in the winter season. The fact is, nature, from reasons sufficiently obvious to the physiologist, has so contrived the throat of man that it should have the most wonderful freedom and diversity of movement, while the stock, more or less, according to its height and substance, opposes this ordinance; and, in proportion as it does so, must be injurious to the well-being and efficiency of the soldier. To my mind, there cannot be a more military looking, as there is certainly not a more healthy throat, than the brawny bare throat of the Zouave, unfettered by stock, or even coat-collar. An officer of Zouaves once told me that such things as sore throats, sore outside or in, were unknown in his company, or, he believed, in the regiment. Fondness for a fashion, and habit, will do much, but the Rifle Volunteers will find, in all probability, when something more than ordinary drill or parade work has to be done, the same advantage in parting with their stocks for a time, as all soldiers, old or young, are accustomed to do.—Yours, &c.,

F. R. C. S.

THE ARMSTRONG GUNS.—A letter dated "P.O. Ship, Precursor, Suez, March 20th," contains the following paragraph: "You will be sorry to hear that the whole of our limber and waggon body boxes proved on inspection to have been completely saturated with water in the hold of the Himalaya. The wet lay like thick dew on the shot and metal inside them; all the leather straps, &c., which were stowed in the boxes, were green and mouldy; and, worst of all, the whole of the powder was seriously damaged, if not entirely spoilt. I only hope that they will send out some more Armstrong powder (a perfectly distinct kind) to China, or we shall be done. If they had but taken out the cartouches, and stowed them in the Himalaya's magazine, as we wished them, all would have been right. The Madras was perfectly ready to take us on last Friday, the 16th, and was offered to the Consul-General by the P.O. agent for that purpose; but he refused her, and says we are to wait for the Imperatriz, which is somewhere down the Red Sea. However, even when she arrives here, she will have to be provisioned, and her deck planking replaced, which is all up for the convenience of laying the Red Sea telegraph, on which duty she has been employed."

ARMY EXAMINATION.*

Lord de Ros has a wholesome dread of a bookworm. The bare perusal of some of the examination papers for candidates for commissions produces a feeling of irritation, which apparently is only to be allayed by dashing off the pamphlet which we have before us, and giving to the public his opinions on the sytem of Army Examinations generally, together with critical remarks on such of the questions as he considers more outrageously difficult than the rest.

The satisfaction with which "plucked" candidates will peruse these remarks of a general officer on the ordeal to which they have succumbed, will go far towards alleviating the mortification caused by their failures; and especially the gentlemen who were "floored" by that question in chemistry which demands an explanation of the fact, "that the naked hand may be passed through a stream of molten iron without injury," will be gratified to find Lord de Ros expressing his opinion that this remarkable experiment "is more likely to be of use to a blacksmith than an officer" (p. 24).

We most of us agree with the Duke of Wellington when, looking upon the pleasant playing-fields of Eton, he observed, "It is here that our Waterloos are won." But it should be borne in mind that among the hundreds of manly, high-couraged English boys, whom the "great captain" saw before him, there were "sixth forms" as well as dunces, nor were the games less spirited we may be sure, nor the football matches less hotly contested, because of the book lore which the young Etonians were daily having drummed into them.

It must not, however, be supposed from these remarks that we are advocates for establishing too high an intellectual standard *at the expense* of physical capacity for a military career; far from it. We would, with Lord de Ros, have our officers English gentlemen in the most complete sense of the term, and we feel sure our soldiers would have them the same; but assuredly their efficiency as officers will not be diminished by their having received a superior education, or by that education having been made to some extent a special one. We may adduce, as an example, the Royal Artillery and Engineers, and fairly ask if the officers of these corps have shown less aptitude for their military duties because the examinations to which they have been subjected have habitually been of a more searching nature than those at Sandhurst, or for direct commissions in the Line?

It is, perhaps, not impossible that, as his lordship alleges, the executive examiners, in their zeal for the promotion of learning, and assisted by popular impressions, may have had it pretty well their own way in the Council of Education, and may have made that way a strait and thorny one for many of the candidates who every six months present themselves for examination; but we do not believe that, as Lord de Ros affirms, cases are constantly occurring in which "young men of active habits, good abilities, zeal for the profession, and exemplary conduct, who a few years ago would have been considered as eligible acquisitions to any regiment, are refused admission to the Army because they do not come up to a particular standard of education, fixed upon a special and narrow, instead of upon that liberal and wide foundation pointed out by common sense and experience" (pp. 13, 14).

Of course the great difficulty is to say where the line should be drawn. "A liberal education" is a common enough expression, but how many persons could be found to agree as to its exact meaning.

It was only a few days ago that "A Successful Candidate" assured us, in the columns of one of the daily papers, that the examinations are by no means so formidable as is generally supposed. Between "A Successful Candidate" and Lord de Ros who is to judge?

Those who are interested in the subject and will take the trouble to read this pamphlet, will at least have the advantage of being acquainted with one view of the question—whether a correct one or not it will be for them to decide.

TROOP-SHIPS AND THEIR REQUIREMENTS.†

These "Notes," as they are modestly termed, are very valuable. In the nine voyages which Assistant-Surgeon Kirwan tells us he has made with troops he has gathered a large amount of practical experience of their requirements on these occasions, and of the interior economy of life aboard a transport, which gives a weight to his suggestions that is not unfrequently wanting in works of this description; and in noticing his pamphlet we are anxious to comply with his request, expressed in his opening sentence, applying, as he desires, only such tests as concern the usefulness and practicability of his propositions, abstaining from all criticism on its literary merits.

That the whole of our present system of transporting troops needs attention and reform, few persons will be disposed to deny, after our recent painful experience in the case of the Great Tasmania; but Mr. Kirwan required no such terrible lesson to convince him of the defects of the system, "Voyage after voyage, and year after year," he tells us in his Preface, "the same subjects for regret have forced themselves on my notice; no endeavour to improve the state of matters has become apparent;" until at last, almost in despair, he takes up his pen, and points out the most important of those remedies and improvements which he considers necessary.

Our space will not admit of our examining in detail, nor even of our enumerating, the various suggestions which he offers, but we may safely say that there is scarcely one which would not conduce to the comfort and sanitary well-being of the soldier.

One of his propositions, however, we cannot refrain from alluding to more particularly; it is where, as it seems to us, Mr. Kirwan touches the root of the evil, and the coroner's verdict in the case of the melancholy catastrophe above alluded to goes far towards confirming Mr. Kirwan's opinion and our own. After enumerating all the different departments engaged in the transport service, and showing how, under the present complicated system, delays, vexations, and mishaps innumerable occur, he proceeds to urge the necessity of a *special* education for the proper performance of the duties required in the chartering and superintending the fitting-up of troop ships; and with this object he would establish "a new branch of the public service, having for its duties the superintending of all details connected with the embarking and disembarking of troops" (p. 58); the principal arguments in favour of such a department being—in addition to the simplicity and celerity in the despatch of business to which such an establishment would conduce—"that ships of a proper class would be taken up; that they would put to sea in good condition, *and well found in sea-stores and provisions*; and generally that all the conditions of a well-conducted charter-party would be fully carried out" (p. 59).

Into the details of this plan we need not follow Mr. Kirwan; but in its general outline we commend it, together with the author's many other valuable hints, to the consideration of the authorities, from a conviction that until some such system is adopted, or unless several of these suggestions are attended to, we shall not cease to hear of cases like that of the Great Tasmania, or whispers, from time to time, of others scarcely less disgraceful, although perhaps of minor importance.

ANNALS OF THE WARS.*

If every soldier who

"Shoulders his crutch, and shows how fields were won,"

told his tale as agreeably as does General Cust in these five little volumes, instead of being voted prosy by his friends, he might have the satisfaction of seeing his narrative attain its "third thousand," as we are told on the title-page this work has done; and deservedly so, for such an account of the great wars of the last century is a fit and useful ornament to the book-shelf of every officer.

If we were inclined to take exception to any of the gallant general's very sensible remarks in the Preface, it would be to that one in which he expresses so modest an opinion regarding the value of this result of his literary labours, characterising it as "an idler's book." To a certain extent it has, very judiciously, been made so, "by being divided into paragraphs with distinct headings, that they may be taken up like a newspaper, and laid down again as duty or caprice may require." But others than idlers may peruse it with advantage, and will do so, we are sure, with pleasure.

As a lucid summary of all the most important operations (naval as well as military) of the eighteenth century, relieved at the same time from the dryness of a *précis* by an agreeable seasoning of anecdote, and made more intelligible by a few maps, it will be eminently useful to those who wish to get a good general idea of the military history of that period, though, of course, the student must go elsewhere if he wishes to become intimate with the more detailed movements of any particular campaign.

In these Staff College days many an officer has felt the want of some such work as this, where he can obtain at a glance the requisite information, without having to wade through a quantity of extraneous, however interesting, matter.

That its value has not been unappreciated is proved by the number of copies that have been sold; we wish, however, to recommend it to the notice of such as are still unacquainted with it; they will obtain both amusement and instruction from its pages.

RIFLED CANNON.†

So entire a change has the introduction of rifled ordnance effected in the art of gunnery that, to a very great extent, the theory as well as the practice has felt its influence; and whereas hitherto the former has been constantly in advance of the latter, we question whether at the present moment the theory does not lag somewhat in rear of the practice. Considerations, such, for instance, as the effect of the air, which were thought of little moment in calculating the time of flight, and the path described by the spherical shot, become highly appreciable in the case of elongated and other projectiles discharged from rifled guns.

At the same time, however, that the introduction of elongated projectiles necessitates a reconsideration of the laws which govern their flight, the admirable precision attained by rifled cannon renders the achievement of this object, and the development of those laws comparatively an easy task, and, at least, we have the satisfaction of knowing that the calculations we make in our closet will not, as heretofore, be liable to be upset by the result of our practice in the field.

The object of this little pamphlet is to determine "*la loi des résistances qu'éprouve le projectile et des variations que subit sa vitesse;*" and we recommend it as likely to be of use to students of the science of gunnery, and as supplying some novel calculations and the solution of some important problems with which, in these days of Armstrongs and Whitworths, every artilleryman should be conversant.

THE SHRAPNEL SHELL.

We have received a communication complaining that in a notice which appeared in this Journal a short time back, on General Bormann's work, "The Shrapnel Shell in England and Belgium," injustice was done to General Shrapnel and the shell which bears his name.

Regarding the invention of this projectile, our correspondent "Vindex" remarks that "Toll's discovery was a description of case shot for short ranges, which never succeeded, although it produced the introduction of canister." Toll's discovery was nothing of the sort, neither a projectile, such as "Vindex" describes, nor of any other kind. But an old manuscript of 1573, in the Heidelberg University, "incontestably proves that the German artillerists of that epoch knew perfectly well the principle on which the present Shrapnel shell is founded;" such, at least, is the statement of General Bormann, which we quoted in our remarks without, however, commenting on the same, or inferring that the application of this principle, whether original or not, is not entirely due to General Shrapnel. To that officer, indeed, we are quite ready to concede all the merits of his important invention; for, assuming General Bormann's statement to be correct, that the principle of the Shrapnel shell was known to the German artillerists of the sixteenth century, it is probable that the "hail-shot" referred to was but a rude contrivance, while there is nothing to show that the merit of improving the projectile and suiting it to the requirements of modern warfare is not wholly due to the energy and talents of our countryman, General Shrapnel, whose successful labours for this object deserved, and still demand, a more substantial recognition at the hands of Government, than, from the letter of "Vindex," they appear to have received.

Our correspondent further alludes to the opinion we expressed regarding the value of the Shrapnel shell in actual warfare, affirming that, since the projectile was first invented, it has undergone so many changes *for the worse* that it is no longer the shell on which the Duke of Wellington, his generals, and others, pronounced so favourably; extracts from whose opinions "Vindex" encloses with his letter. Here we are compelled to differ from our correspondent. It is difficult to suppose, as, indeed, it is improbable that in a period of some fifty years, during which the science of gunnery has been steadily, though slowly, improving, the projectile esteemed and extolled, "Vindex" tells us, above all others, should have been the only one which has retrograded instead of advancing, nor do we believe that the "Diaphragm Shell" (as it is now termed) of 1860 is inferior to the Shrapnel of 1806.

The true explanation of the fact that the projectile is not now held in such *universal* repute as in the days of the Peninsular, we believe to be that, whereas it was then a new invention, destructive—as, to a certain extent, it always must be—in its physical, so it was correspondingly powerful in its moral effects; while the very value which was then set upon it would, perhaps, incline us to expect greater results from its action in the present day than, on calmer consideration, appears just or reasonable; indeed, it is generally felt by artillerymen that the results obtained from this shell fall so far short of those which might be achieved by a judicious development of the principle, that any disappointment which may have been expressed regarding the projectile has had reference rather to the particular shell in use than to spherical case shot, in the more general and extended acceptation of the term; and this opinion we expressed, though more briefly, in that passage, in our notice of General Bormann's work, where we observed that "*few artillerymen would be found to deny that, when perfected, the Shrapnel will prove the most destructive missile,* or that, even at present, in its comparatively rude state, it may frequently be employed with great success."

All honour, then, to General Shrapnel, who, applying to practice the principle (whether his own or that of the earlier German artillerists, it matters little), gave to our troops in the Peninsula the moral and physical advantages of a novel invention, and introduced into the British service a shell which ultimately, in an improved form (it may be under a new name), will probably become the most formidable projectile in the service. Whether to Sir William Armstrong, or to any other be reserved the triumph of developing the principle to its fullest extent, English artillerymen will never cease to regard with gratitude and pride the name of General Shrapnel.

COOKING FOR THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—There is no part of our military administration which has been more neglected than that which appertains to the preparation of the soldiers' daily food.

The effects of this told so fatally upon our troops in the Crimea that, in the early part of the year 1855, I turned my attention to the subject with the view of devising some better system of cooking for the Army; for, although the British soldier is better supplied than any other soldier in Europe, he is by no means the best fed—simply from defective cooking. I therefore submitted a new plan of cooking to the authorities; and, as the cooking arrangements then carried on at Aldershot were very defective, and much complained of, I was requested to erect an apparatus upon my principle for a thousand men at that station. This I accomplished; and, after it had been properly tested, it was approved, and ordered to be extended throughout that encampment in place of the iron cooking-stoves then in use, which were all removed.

From that period, which was in April, 1855, up to the present time, this system of cooking has continued in constant operation throughout the whole of that encampment, although it was very badly carried out; suffice it to say it was Aldershot work.

It has since been extended in a more complete form to Woolwich, Canterbury, Shorncliffe, the Curragh, and other stations, with good results, although I have cause to complain of alterations having been made injuriously to my system without my authority.

In addition to this system of barrack cooking, I have introduced a new system of field cooking, and also a mode of cooking for troops on the march; and a sufficiency of this field cooking apparatus has been shipped for 5000 men in China.

Patterns of the apparatus have been deposited in the Royal Arsenal at Woolwich, by order of the authorities; and, as directions have been given to travel two of these cooking waggons a distance of 500 miles, an opportunity will be afforded for judging of their utility.

All these cooking arrangements I have carried out entirely at my own risk and expense; and at one period I had constructed sufficient apparatus for 3000 men at my own cost, and, if my experiments had failed, I could have had no claim upon the Government for my disbursements, which, for the five years I had been occupied in carrying out this undertaking, amounted to 769*l.* 15*s.* 6*d.* up to January last, which sum has since been repaid to me.

By these arrangements the soldier is now enabled to cook his meals in any way agreeable to his taste, instead of being confined to his everyday "soup and bouilli;" and the cooking is carried on in a simple and efficient manner, with a large reduction in the consumption of fuel. The principle of the apparatus may also be made as applicable for the cooking of fifty men as it is for a thousand; but the present size is now limited to 500 men. The late Secretary of State for War was pleased to convey his approval of this apparatus to me, on the 8th of October, 1858, in the following terms:

"After full consideration of this apparatus, he considers it the one best suited to the military service of any that have been submitted to him, and he proposes to adopt it generally in barracks as circumstances may from time to time render it expedient.

"Secretary Major-General Peel desires at the same time to convey to you his thanks for the prolonged exertions which you have made for the benefit of the public service in this matter."

Encouraged by this approval, and having superintended the construction of sufficient cooking apparatus upon this principle for more than 60,000 men, I addressed the following letter to the present Secretary of State for War:

7, Hyde Park Street, Dec. 20, 1859.

Sir,—I have the honour to inform you that the "Cooking Battery," which I was requested to construct in the Royal Arsenal at Woolwich, and destined for the service of 5000 men in China, is now completed and fit for use.

I take this opportunity of stating that I have been engaged nearly five years in establishing and carrying out my system of cooking for the Army in barracks and in the field; during which period ample testimony has been furnished to prove its efficiency and value to the public service. The late Secretary of State for War was pleased to convey to me his approval, under date the 8th of October, 1858, in the following terms:—"After full consideration of this apparatus, he considers it the one best suited to the Military Service of any that have been submitted to him, and he proposes to adopt it generally in barracks as circumstances may, from time to time, render it expedient." Sufficient apparatus has already been erected upon my principle to meet the requirements of more than 60,000 men; and I venture to remark that the man who provides for the maintenance and support of an army is as fairly entitled to reward as he who designs weapons for its destruction.

The former has been accomplished with a large saving to the country, whilst the latter involves a large expenditure. I, therefore, respectfully beg to press for a settlement of my claim, based upon a principle advantageous to the public service, for it admits of remuneration without trenching upon the public expenditure. My proposal being that I should receive twelve months' saving upon two-thirds of our military force, or such sum as may be considered a fair equivalent. I, therefore, hope that my claim will receive your favourable consideration and approval.—I have the honour to be, sir, your very obedient servant,

JOHN GRANT, Captain late R.A.

To the Right Hon. Sidney Herbert, Secretary of State for War.

To the above I received the following reply:

War Office, 7th February, 1860.

Sir,—Adverting to your letter of the 20th December last on the subject of a "cooking battery" constructed by you at the Royal Arsenal, Woolwich, and also having reference to the cooking apparatus invented by you for use of the Army, I am directed by Mr. Secretary Herbert to inform you that the cooking waggons are still under experiment; and that as regards the latter question, no further application for compensation can be entertained.

I am, sir, your most obedient servant,

J. R. GODLEY.

Captain Grant, 7, Hyde Park Street, W.

This cannot be considered a very generous or a very courteous reply to my application after all that I have done for the Public Service; but, as I am told to consider it courteous under the signature it bears, I will not dwell upon the manner in which this unexpected communication has been made to me, nor will I comment upon the difficulties and obstacles which have been thrown in my way during the prosecution of this work. Amateurs seldom receive much favour from professionals in any line; and although I did not want assistance, I certainly could have done better without the encouraging support which has been given to other parties at the public expense, at the same time borrowing from my principle.

The defects of our system in military cooking requires no comment from me, for I have supplied what professionals failed in doing, and their system completely broke down at Aldershot.

There is no difficulty in obtaining plenty of good cooking apparatus, admirably adapted for large civil establishments upon any scale that may be desired, but such apparatus is totally unsuited to soldiers.

The British soldier, with all his good qualities, is rough and reckless in his habits, and careful of nothing but what he pays for, and not always that; therefore, whatever is destined for his use should be strong and simple in construction; and although this is combined in the present apparatus, I consider the work but half done, for the want of a good system of cooking being established throughout the Service.

We do not want Soyer cooks for teaching and lecturing soldiers on cookery at the public expense. We have had too much of that folly; for although the majority of soldier cooks are bad, there are quite enough good to teach the rest under intelligent non-commissioned officers. A school for cookery is quite as necessary as a school for musketry. A well constituted barrack board of experienced officers might arrange and settle these matters. The state of our barracks throughout the Service, and the control of about 700,000*l.* or 800,000*l.* a year, would afford ample employment for such a board, and the Service requires it. Barrack expenditure for the last five years has averaged about that sum, in addition to which 50,000*l.* figures in the present Army Estimates, under the head of "*Barrack and Hospital Commission.*" If such a board of practical and experienced officers was appointed to ventilate and conduct this important branch of the public service, the result would be far more satisfactory than all the sanitary attempts which have been made to improve and ventilate barrack-rooms.

The cooking for an army is a matter of more importance than has hitherto been attached to it in the British service; and, although an acknowledgment of the services which I have rendered in this way is denied to me, some good may arise by the lesson it affords for caution before persons risk their money in the public service; for, with all our wasteful expenditure of public money on the one hand, and parsimonious meanness and injustice on the other, there is no country in Europe where public services are so unjustly dealt with as in England. Unfortunately for the country, both merit and reward are too often made dependent upon the amount of interest or influence which a claimant may bring to bear upon his case. Social position and interest are allowed to exercise so much power that it rides over and swamps every claim, and its effects are most damaging to the best interests of the Service. The truth of this is notorious; and although the injustice of which I complain will not make me at all the less willing to contribute to the comfort and benefit of the soldier, I take leave to say that until a better principle is shown in dealing with public matters, the country must suffer from something more than faulty contractors or Weedon disclosures.

When I first undertook to improve the system of cooking in the Army, the mode then practised in the Service was not only faulty, but varied and costly. At St. George's Barracks, in London, it had amounted to fivepence per man a week; whereas, upon my system it has never exceeded one halfpenny, the consumption of fuel being 5¼ lbs. of coal per man a week. See the Barrack Master's official return from St. George's Barracks for December, 1858, and the printed report which was laid before Parliament the 8th June, 1858, headed "Captain Grant's Kitchens."

I have constructed an apparatus which is capable of cooking for any number of men up to 3000, with a consumption of only 5 lbs. of coal per man monthly; and the same apparatus is capable of baking 10,000 lbs. of bread daily, with the same facility and economy in fuel.

This apparatus has been fully tested; and any approved authority may see it in operation.—I am, &c.,

JOHN GRANT, Captain late R.A.

THE PAYMASTERS' WARRANT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Will you kindly permit me (in common no doubt with very many others) to place before you, for your able advocacy, another case in reference to the late Warrant for Paymasters, particularly as you have very justly remarked upon the injustice it imposes upon the old combatant officers, by placing the paymasters from civil life in a much better position, inasmuch that they obtain promotion by honorary rank sooner than paymasters who were officers before some of them were born. I instance myself, being a commissioned officer for 29 years upon full pay, out of which 18 months only as paymaster, and by the recent Warrant paymasters appointed from civil life with less than two years' service would be my senior, and obtain promotion before me to the honorary rank of captain. By the Warrant I must add 8½ years more to the 29, making 37½ years as a commissioned officer before I can aspire to the honorary rank of major, and 3½ before I obtain the honorary rank of captain.

There are instances in which surgeons have obtained their rank in 9 years, placing them at once as majors.

The Warrant might be simply improved (without incurring expense) by giving all paymasters in receipt of 15*s.* per diem, but with 15 years' full pay as commissioned officers, the honorary rank of major, which would in some measure place them in the wake of the medical department, although yet very much to leeward of them.

FACTS.

THE CHANNEL FLEET.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Though I am only a sailor, and perhaps ought not to murmur at what our betters think right and proper, yet sailors can think and have feelings, ay, and ideas of right and wrong too; and we cannot help thinking that something must be very wrong in a system which makes sailors, as a body, as bad as they are when they get on shore, and the best of us then too often get drunk and disgrace ourselves, while the rest do more—they disgrace their country when abroad, which is worse still. Now, sir, good sailors don't like the Navy; and if they are married men and have wives that care for them they keep them from entering it, because they know full well if they do it is all up with them and their children. It is too generally out of sight out of mind. Once on board a man-of-war, the Admiralty keep the poor fellows away from the port they were commissioned at as much as possible; it is there alone they can go on shore comfortably, and see their families occasionally, and feel themselves human beings with human sympathies. I tell you what, sir, it is this system of keeping us anywhere but where our homes and friends are that prevents good sailors from joining the Navy, and makes it a curse to all that are tempted in an evil moment to volunteer into it; for in many other respects it is very preferable to the merchant service, and in this, too, it might be so different, to the advantage of the Navy. It is all very well for the captain and those officers who can afford to pay for their families joining them wherever they are, and other people who do not know what our temptations are, never having been exposed to them, blaming us and calling us beasts and worse for our conduct, when, at long intervals, we get leave far away from our homes and friends; but I ask who is to blame, and what can be expected when, after long confinement on board ship under strict discipline, we are turned ashore in a strange place with our month's money just paid? None but the worst of the people will have anything to do with poor sailors, and these only fatten on our vices, which they live by pandering to. Now, how different would it be, sir, if our line-of-battle ships—the wooden walls of England—were kept where they are most wanted, at home, stationary, except for three or four months' cruising in the year, and the men allowed to go on shore every night after work and exercise is done, except the necessary ship-keepers. They would then have their homes and families to go to, and would have no temptation to go astray, but would become decent members of society, and sailors would flock from the merchant service to join the Navy. How well I remember the old Albion in 1845,—in those days ships of the Channel Squadron were kept more at their own ports than now,—she was a Plymouth ship, manned chiefly by respectable Plymouth sailors, very different from the riff-raff which now makes up the bulk of our crews. She was six months at anchor in the Sound or Hamoaze at one spell; her men went regularly on shore, watch and watch about; they scarcely ever broke their leave or got drunk, and were a happy and most efficient ship's company; they received every indulgence the Service could admit of. On Sundays I have seen the ship crowded with respectable women, wives and relatives of the men, a great majority were married, and happy-looking couples might have been met anywhere in the country on Sundays rambling about and enjoying themselves. Everything went well until after a summer cruise, while laying at Cork with the Rodney and Vanguard, we received orders one night to prepare for sea immediately; and next morning at ten we sailed, all except the captain in utter ignorance as to our destination; but directly after we left everybody on shore knew all about it—the ship went to Lisbon and on to the Mediterranean afterwards. What became of their deserted families? That I cannot answer; but I can assert that the men sadly degenerated in morals, broke their leave, indulged in drunkenness and vice when they got on shore, with all its sad train of evils. I hear precisely the same thing occurred with some of the ships of the Channel Squadron in April last, ordered on foreign service without notice; when the men got leave at Malta their conduct was most deplorable. Now, sir, is not our Navy,—I mean the great bulk of it,—designed for the defence of our own shores? Believe me, if all our line-of-battle ships, except, of course, flag-ships, were kept at home, and men could enter them with the understanding that they were to remain at the same port, except for the necessary cruising time for a few months in the year, during which they might go any distance necessary, men would volunteer in plenty; and from these, after a time, as sailors are restless beings, you would never want volunteers for three years foreign service when they were required. They would learn their drill perfectly; the Service would become popular, and would attract a more respectable class of men, whose families would be a nursery for future fleets: thus wages would be spent at home instead of in drunkenness and vice abroad. And, above all, the fleet would cost less, and be more efficient from being better manned, and always ready for any emergency.

Pray, sir, lend a helping hand to change the present useless and vexatious system of keeping a large fleet in the Mediterranean before they are really wanted, compelling the French to do the same, although they do not worry their sailors by keeping them always abroad. Steam-ships kept in a state of efficiency at home can soon be directed upon any point where required, without fear of orders being intercepted by an enemy, when the failure of our ships assembling on a given point, either for attack or to resist invasion, might be of the utmost consequence. Now a most ludicrous mystery is kept up as to the movements of our ships, keeping other countries in alarm, and disgusting everybody on board of them unnecessarily with the Service. Excuse this long yarn, and I am, sir, Yours,

AN OLD SAILOR.

Patrick Whelan and James Hallaway, soldiers who came home from India in the Great Tasmania, died at the Liverpool Workhouse, the former from dropsy and the latter from dysentery, induced by their sufferings on board this vessel. According to the calculations of the governor of the workhouse, there has been, including the men above mentioned, one death in every thirteen of the soldiers who embarked on board the ship.

NAVAL EXPENDITURE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I hope your excellent remarks on the system now in force in our naval yards with reference to building, &c., will meet that attention they so richly deserve. True is it that England should lead, and not follow, for she has certainly sufficient experience at sea to enable her to do so. As one example of the folly of following foreign countries, let us look at the Orlando, with her long "street of guns," and read the report of her trial trip outside the breakwater, and then examine the bill for her construction, and we shall perceive why the Navy Estimates have reached their present dimensions, and how likely they are to go on increasing year by year if so many thousands are annually wasted on useless vessels.

The derangement to which steam machinery is exposed, and the difficulty of conveying to distant stations so ponderous a material as coal, are considerations deserving great attention during a war, and induce the hope that the Government will not altogether abandon their old and tried right arm of defence—sailing-ships, which performed such good service in days gone by.

The supply of fuel will be difficult to arrange in a war with a powerful maritime nation. Convoys for merchant fleets will also be required, as well as reserves, should our steam-vessels meet with any disasters; and at present it is quite unknown how fit they are to maintain a blockade.

These are considerations which I hope will induce the Admiralty to select some of the best of our sailing-ships of the line and frigates, and keep them ready for any emergency.

LOOK-A-HEAD.

NAVAL SURGEONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—How absurd it is for masters, paymasters, or any other naval officers to hang on by the doctor's skirts in clamouring for like pay. Let them rise (and all honour to them) on their own merits; for they have nothing in common with medical officers, either afloat or ashore. They have all, more or less, been reared and educated from boyhood in the public service, and at the public cost, and besides counting boy's time comparatively in a great measure as service, have many different additional privileges (especially the purely executive branch), with whom to be equally favoured the years spent in the "dissecting-room" and hospitals should count for the doctors. The doctor, however, was a doctor, and lived a man's age before he ever heard of the "Admiralty Board;" and in or out of the Service, so long as he does his duty, is really independent of the frown or the smile. In fine, if medical men (service or otherwise) be true to their own interests now, before war shall break out, they need not much longer complain of their reasonable pretensions being "officially snubbed;" at least, as long as the Admiralty shall have no Naval Medical College, wherein to educate their own surgeons—an experiment, by the way, which the most zealous martinet would scarcely hazard with success. Advocate, sir, the speedy abolition of cliquery and favouritism in peace; establish, as in every other medical service advantageously, a competitive public entry system; limit this trying servitude to a full-pay "fifteen years" in the Navy, with a fair retirement, most men being pretty well worn out by climate, &c., in that time; treat medical officers as if they were mortal flesh and blood and had the same feelings and aspirations as the executive branch—and for every four you will soon have five effective sailors fit for duty in war.

NULLI SECUNDUS.

CAPTAINS R.N. RESERVED LIST.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Notice has been given by Sir J. Elphinstone, that when the vote for the naval half-pay is brought before the House, he will submit to its consideration the claims of the captains on the Reserved List for that increase of half-pay to which their commissions as captains in the Navy entitle them. The case of these officers has been amply discussed in the professional papers, and all parties appear to admit the justice of their claims; and it is rather curious that in the late debate on the Dover contract, a letter was read from a person high in office in which their services are recognised. This letter is dated August 27, 1851, a few days after twenty-five of these officers were promoted, and commences, "My dear Sir,—The First Lord is rather anxious to show that the officers promoted to captains from commanders lately by the new regulations are men of service, and, if you can, pray go on with an account of their lives. If you are at any loss for a sketch of any of them, ——— has orders to show you the records of each officer."

This is certainly a plain admission of the value attached to their services in 1851; and it is to be hoped that the Admiralty of 1860 will gracefully admit the justice of their claims, and thus cheer the few remaining years of many veterans, many of several fought in the wars of the French revolution as well as the Empire.

ONE WHO SERVED WITH NELSON.

ROYAL MARINE ARTILLERY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your last week's GAZETTE you kindly, and I think justly, passed some very high encomiums on the Royal Marine Artillery at Fort Cumberland, Portsmouth; and I wish to call your attention to the difference now existing in the pay of the sergeants of the Royal Marine Artillery and the sergeants of the Royal Artillery. On the formation of the corps in 1804 the pay was ordered to be the same as the Royal Artillery; and it is so in every grade except the sergeants. On the 1st January, 1846, the sergeants of the Royal Artillery received an increase of 2d. per day, and such increase has not been yet extended to the sergeants of the Royal Marine Artillery, which causes much dissatisfaction; and I trust by your kindly inserting this letter, it will meet the eye of the authorities, and remove the evil complained of. I am, sir, your most obedient servant,

A LATE COLOUR-SERGEANT, R.M.A.

COURT-MARTIAL ON LIEUTENANT GRAVES.

A court-martial assembled on board the Victory on Saturday morning to try Lieutenant G. S. Graves, of Her Majesty's sloop Siren, on the following charges:

1. That on or about the 18th day of June, 1859, at or about the hour of ten o'clock at night, Lieutenant Graves did behave with contempt on the quarter-deck of the Siren, and use reproachful language to Commander George Mackintosh Balfour, of that sloop, his superior officer.

2. That he did, on various occasions, excite certain officers of the said sloop to act in opposition and behave with contempt to Commander Balfour, particularly on two instances, saying to Mr. Frederick Furneaux Eversfield, paymaster, "I would not stand it, Eversfield, if I was you; I would write to the Commander-in-Chief about it, &c.," or words to that effect; also saying to Mr. Frederick Lewis, Lieutenant of the Siren, who had made a very proper explanation to Commander Balfour, "You have eaten dirt," or words to that effect.

3. That he did induce several seamen to desert from the Siren by saying. "Why don't you run," or words to that effect; also that he did on one occasion say to a seaman of the Siren, "Why the devil don't you run away?" or words to that effect; and that the said man in consequence deserted on the day following or thereabout.

4. That he did behave in a cruel and oppressive manner, and directly violated the Admiralty Circular, No. 131, by causing two petty officers to be lashed to spars or gratings on board the Siren during the absence of Commander Balfour.

5. That he did, in a letter dated on board the sloop Siren, at sea, on the 16th of July, 1859, and addressed to Rear-Admiral Sir Stephen Lushington, K.C.B., bring false and frivolous charges against Commander Balfour.

The court was composed of Rear-Admiral J. E. Erskine (president), Captains G. T. Gordon, G. D. O'Callaghan, R. Harris, R. S. Hewlett, C.B., C. F. Hillyer, W. Tarleton, C.B., T. Wilson, H. Caldwell, C.B., J. N. Strange, R. Coote, J. Caton, and J. E. Vansittart. Commander Balfour, of the Siren, prosecuted; the prisoner being assisted by Mr. T. Hoskins. The fifth charge was withdrawn in consequence of the principal witnesses being absent from England.

The prisoner then objected to the 2nd, 3rd, and 4th charges, on account of their being framed entirely at variance with the Queen's regulations, which required the charges to be substantially set forth. In those charges the date of the occurrences were not set forth, and he had been in consequence unable to prepare his defence. He respectfully submitted that those charges could not be legally entertained.

The court after a short deliberation decided against the objection, and the hearing of evidence in support of the four charges was then proceeded with. The evidence with regard to the first charge—that of behaving with contempt to the commander, was most frivolous in its character, and the charge was not substantiated. In reference to the second, Mr. Eversfield, the paymaster, denied that the prisoner had used the language imputed to him, viz., "I would not stand it, Eversfield, if I was you; I would write to the Commander-in-Chief about it;" and with regard to the language which it was stated the prisoner had used to Lieutenant Lewis, viz., "You have eaten dirt," he said in his defence that the observation was made privately in the ward-room, in a jocular manner, and he did not expect that it would be made the subject of inquiry by a court-martial. As to the third charge, he did not deny having used the words which it was alleged he had spoken to several seamen, viz., "Why don't you run?" but inasmuch as the date was not fixed, he could not recollect the circumstances under which he used them. As to the fourth charge, the petty officers to whom it was alleged he had behaved in a cruel and oppressive manner, by causing them to be lashed to spars or gratings, were habitual drunkards, violent when drunk, and he adopted that course in order to prevent them from sustaining injury, and not as a punishment. The court, having deliberated, was of opinion that the first and fifth charges (the latter that of bringing false and frivolous charges against the commander) had not been proved, and acquitted him of the same. The court was further of opinion that the second, third, and fourth charges were partly proved; but, taking into consideration the long confinement already undergone by the prisoner (who was in June last ordered to be placed under arrest on his removal from the sick list), and the imperfect manner in which the three last-mentioned charges had been brought before the court with respect to names and dates, the court only adjudged Lieutenant Graves to be severely reprimanded; and reprimanded him accordingly.

We hear that a court assembled on the South American station (whence the Siren has recently arrived), but, in consequence of Lieutenant Graves's objection to three of the members of the court, the trial was postponed until the ship's arrival in England.

RETIRING RANK.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—When an officer retires upon full pay he is allowed a step of honorary rank. It would be a great boon if the same were granted to an officer selling out. The latter is no burden to the country, and the honorary rank would not cost the state anything nor injure the interests of those who remain in the Service. It would greatly accelerate promotion, as many remain in the Army until they get their "next rank," and then sell. Many cannot afford to retire, as they would then forfeit their purchase money, and not be able to realise capital for their families. The greater number of young men that pass through the Army the better. In time of need they would be found useful, and it might be permitted them to have a step of rank when selling out, on condition that they should be ready to serve, either at home, or if living in the colonies, in a local force, in case of invasion. There would be no difficulty in obtaining officers for the army of reserve, which, however, as regards the men, has unhappily proved a failure.—I am, &c.,

CENTURIO BRITANNICUS.

THE DUKE OF CAMBRIDGE ON THE ARMY AND THE VOLUNTEERS.

His Royal Highness the General-Commanding-in-Chief dined with the Lord Mayor on Easter Monday, and, in returning thanks for the Army, made the following excellent practical observations:—"My Lord Mayor, ladies, and gentlemen, I rise to respond, on the part of the Army and on my own part, to the toast which has just been given from the chair. I have the greatest pleasure in doing so, for, though I am nominally at the head of the Army, I may be permitted to say, without any vain-glory, that, though we are not what is called a military nation, yet, when it comes to the push, we can produce an army which is, as it ever has been, unsurpassed in Europe. It has been the fashion with some people to decry the English Army; but the country has always done us the justice to admit that, when our soldiers were called upon to show what they could do in the field, they always came up to the expectations of their fellow-citizens. That is the state of the Army at the present time, and I hope it will continue always in a state of equal efficiency, so as to deserve compliments of so gratifying a description as those which have just been paid by the Lord Mayor. Believe me that such encouragements tend, in a great measure, to keep up in our soldiers that high spirit without which the Army cannot sustain its good reputation. Our soldiers when stationed in distant lands look back to their country to see how their deeds are estimated; in short, to learn "what they think of us at home." That public acknowledgment at home of services certainly produces a great and beneficial effect upon all ranks of the Army and Navy. I am now addressing a large and influential assembly, few of whom are personally connected with either Service; but all will agree, I am persuaded, with the Lord Mayor when he said that the hospitalities of which we partake on occasions like the present, and the riches by which they are maintained, owe much of their abundance to the Army and Navy, which give us that security which we enjoy from day to day and hour to hour. Under their protection our ships go to every part of the globe and to every sea, and without such protection neither the trade nor commerce of this great empire could thrive as they have done for so many years; but believe me when I say that the continuance of that security depends upon your keeping up the Army and Navy in a state of efficiency. You must not shut your eyes against that fact, nor must you relax your exertions to maintain those services, otherwise the security of this empire must to a certain extent be endangered. I am sure that no one in this room would wish to do anything to impair our great and glorious institutions. We are a great and important Power. We are, I hope and believe, at the head of the civilised world; and if we wish to retain that position, we must never allow our Army and Navy to fall into decay. No doubt it is expensive to keep up an army and navy; but improvements in warfare are taking place every day, and hence it is manifest that a much greater outlay is now necessary for those Services than in former years. This is a natural consequence of the march of intellect, which is so rapidly expanding in every part of the world. The new means of locomotion, by steam vessels and railways, which are fully appreciated by the merchants of this metropolis, tend greatly to alter our position relatively to the rest of the world. Formerly the fact of our being an island was the guarantee of our security; but, though I trust that security may be continued, still I must not disguise from you the fact that these modern means of locomotion call for renewed and greater vigour in all our defensive preparations. There can be nothing more lamentable or expensive than a constant succession of panics, whereas a judicious, wise, and ample expenditure will always be found the most economical in the end. Before I sit down I wish to express my sense of the admirable spirit which has been evinced in this country in the development of the Volunteer movement. I believe that movement, if well organised, can be made a most valuable adjunct to the regular Army, but much will depend upon the manner in which it is carried out. If the Volunteer movement is conducted as an auxiliary to the sister Services—the Army and Navy—nothing can be better; but if, on the other hand, it is relied upon to displace the regular standing forces of the country, the result will be most unfortunate. As however an auxiliary force, these Volunteer corps will be most valuable, and I hope the movement will be continuous."

SERVICE AT COURT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Colonel Biddulph, "the Master of the Household," served for some time in the 1st Life Guards, in which he attained the regimental rank of captain, and the brevet of major in the Army.

From thence he was promoted by purchase to a majority in the 7th Hussars, and in the very next *Gazette*, 31st of October, 1851, to a half-pay lieut.-colonelcy by purchase.

He thus in a few days jumped from captain to effective lieut.-colonel, not having done the duty of regimental major for a single day; so short was his time in that rank, that he never appeared in any Army List as a regimental major.

As he thus could in no way claim the effective position and pay of a general when it came to his turn, advantage was taken of that vicious clause in the Warrant, by which officers performing the services of equerries to the Sovereign for eight years, were qualified for the rank of generals all the same as those who had served in the field and elsewhere; and Colonel Biddulph was created an extra equerry, and he is now completing his time accordingly.

What opinion can the hard-working officers of the Army have of those who take such unfair advantages to push on their friends at the expense of those who are doing their duty in all parts of the world.

From what has transpired, there seems no doubt but that General Grey would have got the 46th Regiment, had it not been for your having drawn public notice to it in time; and it is said that a person very high at court stated General Grey was a very ill-used man in not getting the regiment, his opinion being, that being employed at the palace is the first of duties, and should be rewarded accordingly.*

Your most obedient servant, MILES.

* We have omitted some expressions in this letter which by no means assisted the argument, or illustrated the views of the writer.—ED.

MILITARY WORKS AND BUILDINGS.

The following important Circular has just been issued from the War Office, by order of the Secretary of State for War:—

"Mr. Secretary Herbert desires that the particular attention of all the engineer officers should be called to the necessity of exercising the strictest economy of the public funds in the design of works and buildings for military purposes.

"Cases have been recently brought before him where the provisions of the estimates submitted to the War Office have been so excessive that they must have been prepared by inexperienced subordinates, and forwarded by commanding engineers without consideration or study.

"All such designs are, it is true, submitted to an examination in the War Office, and a reduction is thereby often effected; but the effects of such revision are often arbitrary and unsatisfactory; unlike savings effected by officers who are thoroughly mastering the requirements they have to fulfil, and who meet them in the most skilful and economical manner.

"There is reason to fear that there are engineer officers who consider the duty of designing beneath their notice, and who are too ready to place in the hands of subordinates duties which engineer officers in most other services in Europe perform unassisted, and which are really among the highest functions of the architect or engineer, be he military or civil.

"It being considered that military works ought to be designed by military men, in order that military requirements may be fully attained, it is most illogical to place their duty in the hands of the civil branch of the department when there are military officers available.

"Mr. Herbert does not allude to the works of fortifications, which on account of their magnitude it has been necessary to make special arrangements to carry out, but to the fulfilment of the numerous current services for barrack-store and general purposes, amounting in the aggregate to a very large annual sum, which are executed from the designs made at the head-quarters of each engineer distinct.

"Mr. Herbert wishes that the designs for new works should, whenever it is practicable, be prepared by an engineer officer, whose name shall be attached to the design. When it is necessary to employ a civil member of the department, he also shall sign the plan, and have the full share of responsibility which attaches to the designer.

"The person employed should consider carefully what is the object to be attained and the means of attaining it; he should compute the number of persons, or quantity of traffic or stores for which he has to provide accommodation, and subordinate not only the dimensions of the different parts, but the degree of solidity, permanence, and finish given to them to the object in view. He should carefully consider the origin of the proposal, and whether he cannot avoid a new construction by the repair, restoration, or appropriation of some existing building. The Secretary of State for War will always be glad to consider such proposals if made with care and deliberation.

"A few instances may be quoted wherein, from no want of professional skill, but rather from want of preliminary thought and consideration, considerable unnecessary expense has been incurred or proposed.

"In a recent instance a bridge was recommended across the moat of an obsolete fort, when a causeway of earth would have answered every purpose. A drawbridge, of a size and strength equal to the traffic of the entrance of a fortress, has been constructed to an insignificant coast-battery.

"The bridge may have been faultless as a bridge, but the first thing to determine was whether it was indispensable, or whether it could not be replaced by some cheaper, but equally useful expedient. A jetty was required to ship ammunition from a magazine, the conditions being that 3220 barrels and cases should be put on board in six hours. Railways were in use at the magazine in question, and the trucks running upon them each carried 20 cases. There were, therefore, 161 truck-loads to be conveyed to the head of the jetty, and to return empty in six hours, or one truck-load every two minutes. To accomplish this it was proposed to construct a jetty to carry six double lines of rails, which would have given an average traffic of one truck every 12 minutes on each line. One double line of rails was found ample, and the work has been executed for one-seventh part of the original estimate.

"But when the proper plan and dimensions are arrived at, care and judgment are required in selecting the most suitable material, and applying it in the mode best calculated to attain solidity at as little cost as possible. It is often bad economy to build in too temporary a manner, but the converse is also true. It may be cheaper to build every ten years in wood than to sink a large sum in stone. The best materials should be provided where they are required; but it is quite proper to use inferior materials when they will answer the purpose as well.

"Mr. Herbert does not wish absolutely to proscribe ornament, but it should be used sparingly and with judgment, and never cause any sensible increase to the cost of the buildings. Heavy cut stone dressing, cornices, and plinths seldom make an addition to the appearance of a building at all commensurate with their cost.

"High finish or expensive fittings to the interior of any part of military buildings are still more to be avoided, and are out of place in a profession where simple and frugal habits should be encouraged among all ranks.

"Engineer officers should endeavour to make the case their own, and do for the public service what they would do for themselves had they to find the funds.

"Large as the public revenue of Her Majesty is, it is the bounden duty of every citizen, and, above all, of every officer in Her Majesty's pay, to make the revenue go as far as it can.

"Mr. Secretary Herbert feels confident that many officers of engineers do give him the assistance he requires, and all can if they will only make the attempt. Mr. Herbert sometimes hears as an excuse for costly work that 'it is necessary to do credit to the Service,' but he is not prepared to give credit to any officer for an injudicious application of the means placed at his disposal from the public purse.

"B. HAWES,"

MAJOR NELSON AND MAJOR FENWICK.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your columns for last Saturday a letter is written by (late) Major Fenwick, who makes an unprovoked attack on the Assistant-Inspector of Volunteers in Scotland, Major Nelson, on account of the advice he offered to some Volunteer corps in the North. Major Fenwick is at the time highly eulogistic of H.R.H. the Commander-in-Chief, at the expense of the Assistant-Inspector.

Now, as far as my humble opinion goes, the principles of Major Nelson's instructions, which were given some weeks before the Duke of Cambridge made the speech referred to, are in no way antagonistic to the rules suggested by His Royal Highness. At all events, the Major's advice is founded on the opinions of both Sir Charles and Sir William Napier, and other distinguished authorities.

On reference to Hart's Army List for the late Major's service, I find them to be *nil*, so far as practice is concerned—a matter for which he is in no way responsible, for doubtless he served Her Majesty faithfully in such parts of the globe as his regiment was ordered to; but he is not competent to give advice on matters, regarding which he cannot possibly know anything. Nothing, in my opinion, can be more absurd than a barrack-square adjutant offering advice on the practical part of his profession; for I maintain that he knows no more about it than a waggoner does of fox-hunting.

Major Nelson, as a light infantry officer, served in Scinde, Affghanistan, and Central India, under Sir William Nott, Sir Charles Napier, and Lord Gough, and therefore should be accepted as some authority. Major Nelson has no knowledge of this letter being written.—I am, &c.,

EXPERIENTIA DOCET.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Major Fenwick, in his letter to you, declares that His Royal Highness the Commander-in-Chief and Major Nelson differ in their advice to Volunteers, and expresses his astonishment that Major Nelson "could venture on the assertion that efficient light troops can be made without previous efficiency in what the Duke of Cambridge calls "steady drill."

Major Fenwick will be more astonished when he reads the Preface to the "Drill and Rifle Instruction for the Corps of Rifle Volunteers," published by Colonel Lysons, under authority of the Secretary of State for War, and, in all probability, with the sanction of the Commander-in-Chief. For there he will find the same advice as that given by Major Nelson, viz., to abstain from attempting "to acquire the more *complicated* system of drill detailed in the Field Exercise-book for Regular Troops." This advice is based on that given by the late Sir Charles Napier. The Commander-in-Chief did not advise Volunteers to learn *complicated* manœuvres, but to avoid *loose* drill. Major Nelson does not advise *loose drill*, he merely says avoid "complicated manœuvres." So says the Commander-in-Chief through Colonel Lysons. Light drill need not be *loose*, nor till the men are perfected in steady drill, *i.e.*, when every man knows his drill. A soldier in battalion is a mere machine, a skirmisher is always dependent on his own intelligence. "Company drill" will enable a company to act in battalion movements as far as the men are concerned, and when that is perfected, Volunteers should devote themselves to light drill, "steady drill." If it be essential to the efficiency of a skirmisher that he should be "first made completely effective in close formation," when are those Volunteers in scattered rural districts ever to be perfected in light drill? All their labours must be in vain, and England's confidence in her Volunteer force is foolishness.

Major Fenwick has somewhat hastily accused an officer of evincing "lamentable ignorance" in offering advice which he will see is supported by the highest authorities.

I am, sir, yours obediently,

RODNEY O'SHEA,

Captain 20th Regiment, late Adjutant 8th Depôt Battalion.

THE CONSTRUCTION OF OUR WAR-SHIPS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I trust that the first article in your paper on the 31st ult. will meet the attention it deserves. It refers to shipbuilding, and criticises the thoughtless and unmeaning way in which men-of-war are now being constructed. One reads constantly of this line-of-battle ship, and that frigate being launched, and of others being laid down immediately in the sheds they occupied; while it has long been clear to every capacity, except the official, which clings to old forms and hates change, that wooden ships are no longer adapted to the wonderful improvements which have lately been made in guns and projectiles. It is not without reason that the Emperor of the French is creating a number of iron-plated vessels, for they are absolutely proof against shell—the most destructive projectile at present supplied to our ships—and are even proof against the heaviest shot at the distance of half-a-mile. Should hollow shot, filled with molten iron, be fired with the deadly precision and penetration ensured by an Armstrong or Whitworth, against a wooden ship, it is positively horrible to reflect what the effect would be.

Iron-sided ships are a necessity. If 4½-inch plates cannot withstand increased penetration, greater thickness must be given. Then the next question is, how is a ship to carry this weight of armour? I believe that the best form to be given to iron-plated ships has yet to be devised. Valuable prizes are given for the best design for a Foreign Office. Public money could not be better spent than by throwing open to public competition, prizes for the best model of an encased ship. I have no ideas of my own, but have no doubt but that the free genius of the country, thus stimulated, would soon conceive the thing wanted. The Controller of the Navy should not be at the head of a department full of its own pet projects, but the chief of an independent staff, selected to choose the best of the many plans submitted to its judgment.—I am, &c.,

A GUNNERY LIEUTENANT.

Affairs in Japan are still in a very unsettled state. It is rumoured that the Chinese have withdrawn the guns from the Taku forts, to strengthen with them the Tien-tsin forts. The Court of Pekin is alarmed at the preparations of the allies.

MILITARY PUNISHMENTS AND MILITARY DISCIPLINE.

(*Continued from page* 234.)

The next punishment of special character to which we have to advert is that inflicted for desertion, viz., marking with the letter D. Now, here we would pause to speak of a matter which, trivial apparently to those acquainted with the truth, is yet of sufficient consequence to merit explanation. We allude to the use of the word "Branding" as employed in connection with the punishment of deserters. Need we say that no such sentence is ever inflicted as the correct meaning of this word denotes? Branding implies the employment of a hot iron, and carries with it an association of savagery—an amount of injury to the individual subjected to it of severe extent. "Tattooing" is the term that should be employed, for this expresses what the sentence really is, viz., the imprinting simply of a mark upon the skin, an act accompanied by so trivial an annoyance or inconvenience as to be voluntarily practised over a large extent of the surface of the body by sailors, and even boys at school. When a soldier deserts, he becomes liable to this sentence, viz., upon arrest, to be tattoed with the initial letter of his crime—the letter D, in addition to imprisonment; so that, should he again take it into his head to run, he may be readily detected. During the past few years a considerable change has, or rather a variety of changes have, taken place in reference to the infliction of this punishment, with a view to its being effectually carried out. Formerly it was effected by means of an instrument which pricked the skin with a number of points upon the touching of a spring, and into which punctures the colouring matter was rubbed by the finger. This instrument was so liable to failure in its employment, that it was laid aside, and the use of common needles resorted to instead. The minimum of size for the letter was regulated by the wording of the Mutiny Act, but there was no limit set to its extent; consequently, in many cases the D was made unnecessarily large. To obviate this it was proposed to employ a small piece of leather, out of which the letter had been punched by an instrument, of a regulation size, and through this opening to stencil as it were the mark, and thus secure uniformity. This plan is now generally adopted, and answers the purpose completely. Another point that demanded attention was the selection of one uniform spot for the imprinting of the letter D, for the Mutiny Act only requires it to be upon the left side of the body. It was consequently placed in all sorts of directions, upon the back, front, or side, at the discretion of the drum-major. To this a variety of objections existed. In the first place, the medical officer when examining a recruit never knew where to look for the mark indicative of desertion, and thus be enabled to judge of the man having been before in the army, and in the next it enabled the individual to destroy the the skin by an eschoristic, and thus get rid of the mark, and to account for the scar by saying that it resulted from a blister that suppurated, or was the cicatrix of a burn. Now the situation for the imprinting of the letter D is limited to one single spot, upon the side below the breast, so far in front as not to be by any possibility concealed by advancing the arm. It may, of course, be destroyed by the individual here, equally as elsewhere, but the appearance of the scar in this particular spot is just as complete evidence to the practised observer as if the letter itself existed still. As to the pigment employed for the purpose of imprinting the letter D upon the skin, it may not be amiss to remark that the wording of the Mutiny Act upon this point has not, hitherto, been sufficiently explicit. It says that it shall be made with SOME INK, or gunpowder. Now there is no ink or colouring matter which, for permanency, can be at all compared with Indian ink, and it (when procurable) should be invariably used. It has also this further advantage, that it never irritates or inflames the skin. To sum up, then, the three points necessary to be attended to in the carrying out of this punishment are the following: viz., to select in every instance the same spot for its infliction; to let the letter be of uniform size; and the pigment employed to be Indian ink.

With reference to the infliction of this sentence, we think it may not be amiss here to revert to the order of the Horse Guards issued some time ago, which gave such offence to the medical profession. This arose entirely from a clerical mistake, viz., the substitution of the word surgeon for that of drum-major in the writing out of the order for the printer. We are aware that at the time much angry feeling was excited against the authorities, and we believe that it has never yet been satisfactorily explained; we think it right, therefore, to show how and where the mistake occurred.

(*To be continued.*)

SHIPWRECK. — Lytham, Tuesday afternoon, during a violent gale of wind from the westward and heavy snow squall, the brigantine Nancy, of Teignmouth, Devon, was seen about three-quarters flood to part from her anchors, and, being helplessly disabled by loss of foretop-mast and other rigging, to drift amongst the breakers on the Horse Bank, near Lytham. Here she immediately sunk, her crew clinging to the rigging, seven grasping the stump of the foremast, and two the mainmast, from which a flag of distress was to be observed. Fortunately, everything was in perfect readiness at the life-boat house of the Royal National Life-Boat Institution. The trained crew of the life-boat were as calm and collected as if they were going on an ordinary excursion, instead of venturing on a most hazardous undertaking, with the sea rolling on them like mountains. After a hard pull of two hours, in the face of a violent gale, the wreck was at last reached. The crew of eight men and a lad were found perfectly benumbed and exhausted. Two of the lifeboat's crew had, at the peril of their lives, to ascend the rigging to fetch down the poor boy, who was quite helpless, if not senseless. During the past year this same valuable life-boat of the National Institution was instrumental in rescuing eighteen persons from three wrecks on the same dangerous bank.

Rear-Admiral Sir Baldwin Walker, Comptroller of the Navy, has visited the dockyards at Woolwich and Deptford during the past week for the purpose of inspecting the several new screw steam-vessels building and those under repair.

FRENCH NAVY.

The French have just constructed at Brest a curious sort of gun-boat, the Comète, which has arrived at Bordeaux; it is said to draw very little water, to have four large guns, engines of 120-horse power, and accommodation as a transport for 1000 soldiers.

"La Perdrix" is being fitted at Brest for the Newfoundland station.

The French *transports mixtes* for China are divided into squadrons. The Vice-Admiral Protet, with his flag on board the "Garonne," commands that squadron which has already passed the Cape.

The Duguay Trouin arrived at Rio, on the 6th of February, with orders for Admiral de Chabannes, commanding the French naval station at Brazil, to act with vigour against the Government of Montevideo.

The frigates "Sibylle" and "Isis" are on the point of sailing from Brest for New Caledonia and Tahiti.

"La Bayonnaise," which is intended to join the French squadron in the Pacific, has completed her armament at Cherbourg.

The corvette "Artemise," and brig "Agile," are fitting out at Cherbourg as cruisers on the fishing-stations.

The French Government has given orders that the railway to Brest shall be pushed forward with the very greatest rapidity. Paris will be thus placed in easy communication with that great naval and military port.

The new French liner "Massena," will be launched at Toulon on the 14th of this month (to-day).

It is stated that by the treaty with Morocco, Spain will acquire the territory between Castillejos and the magnificent oak woods of Renegat, as well as a fine port called Santa Cruz de Mar, or Aga-der Douma, and other important positions.

General Yusuf, commanding the division of Algiers, has resorted to the unusual course of writing a letter to O'Donnell, congratulating him on the success of his operations against the Moors.

Obituary.

DEATH OF GENERAL SIR THOMAS M'MAHON, BART., G.C.B.—The colonelcy of the 10th Regiment of Foot has become vacant by the demise of General Sir Thomas M'Mahon, who died on Tuesday last, at his town residence, at a ripe old age. The deceased general entered the Army 63 years back as ensign. He served with the expedition under General Sir Ralph Abercromby in 1800, destined for operations on the coast of Spain, at Cadiz, Ferrol, &c., and subsequently at the occupation of Malta. The gallant deceased served in the Peninsula during the campaigns of 1809, 1810, 1811, and part of 1812, including the operations on the frontiers of Portugal and Spain, contiguous to the rivers Coa and Agueda; at the lines of Torres Vedras, and at the subsequent advance therefrom on the retreat of the French army. He commanded a corps of Portuguese Infantry, which was posted on the left of the Allied army, during the battle of Fuentes d'Onor, protecting the fords of the Duos Cazas, and covering Almeida. In 1813 he proceeded to the East Indies in the capacity of adjutant-general of the King's forces, in which country he served 12 years. The deceased general, in 1834, was appointed lieutenant-governor of Portsmouth, and commanded the troops of the south-western district. On the expiration of his staff-appointment at Portsmouth he was selected to be commander-in-chief of the Bombay army, which command he held up to 1847. Since then he has not held any active command. The late general had received, in consideration of his military services all the grades of the Order of the Bath, and last year was made a Grand Cross of that military order of knighthood, and was appointed in September, 1847, colonel of the 10th Regiment of Foot. His commissions bore date as follows:—Ensign, Feb. 2, 1797; lieutenant, Oct. 24, 1799; captain, Oct. 8, 1803; major, Nov. 6, 1806; lieutenant-colonel, May 4, 1809; colonel, June 4, 1814; major-general, May 27, 1825; lieutenant-general, June 28, 1838; and general, June 20, 1854. The late gallant baronet was son of Mr. J. M'Mahon, comptroller of the port of Limerick, by his second wife, daughter of Mr. James Stackpoole, of Cork, and was born December 27, 1779, so that he had attained his 80th year. He married, August 27, 1803, Emily Anne, daughter of Mr. Michael R. Westropp. On the death of his half-brother in September, 1817, who had been private secretary and keeper of the privy purse to the Prince Regent, he succeeded to the baronetcy, which, by a special limitation in the patent of creation, devolved on his brother in default of issue male. By the lamented demise of the gallant and venerable officer, the baronetcy passes to his eldest son, Lieut.-Colonel Thomas W. M'Mahon, C.B., of the 5th Dragoon Guards. The present baronet has seen much active service, having served with the 9th Lancers in the Sutlej campaign of 1848; also in the East, in 1854, as Assistant-Quartermaster-General in the cavalry division, and eminently distinguished in the subsequent campaign of 1855, for which he was made Lieutenant-Colonel of the 5th Dragoon Guards.

We have to record the demise of Major-General Orlando Felix, a Waterloo officer, who died on the 5th instant at Geneva, from bronchitis. He served during the campaign of 1815, and was wounded at Quatre Bras. The deceased officer's commissions were dated as follow:—Ensign, August 14, 1810; lieutenant, Nov. 10, 1814; captain, May 20, 1824; major, Oct. 31, 1826; lieut.-colonel, June 18, 1841; colonel, Nov. 11, 1851; and major-general, Oct. 26, 1857.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ANDERSON—April 2, at Florence, at the house of C. Webb Smith, Esq., the wife of Major J. C. Anderson, Madras Engineers, of a daughter.
CLARKE—April 6, at 26, Hans Place, the wife of Captain Walrond Clarke, late 10th Royal Hussars, of a son.
EAGAR—April 7, at Minera Street, Chester Square, the wife of Captain Eagar, 40th Regiment, of a son.
FELLOWES—April 7, at 7, Atholl Crescent, Edinburgh, the wife of Captain W. A. Fellowes, R.N., of a daughter.
FREER—April 7, at the Militia Stores, Leamington, the wife of William N. Freer, Esq., Captain 2nd Warwickshire Militia, of a son.
HAMILTON—April 2, at Corfu, the wife of Major T. de Courcy Hamilton, V.C., Major of Brigade, of a daughter.
HARE—April 5, at Bournemouth, the lady of Major T. Hare, C.M.R., of a son.
HENDERSON—April 7, at Dawlish, the wife of Rear-Admiral Thomas son, of a daughter.
HIVES—April 7, at 10, Clifton Terrace, Winchester, the wife of Captain Thomas Walter Hives, of the Hampshire Militia Infantry, and late of the 40th Regiment, of a son.
HORNE—Jan. 19, at Fort England, Cape of Good Hope, the wife of Colonel Arthur Horne, 2nd Battalion of 13th Light Infantry, of a daughter.
LYSONS—April 8, at Morden Lodge, Surrey, the wife of Colonel Lysons, C.B., of a son.
MCKERRELL—March 5, at Port Louis, Mauritius, Mrs. Robert McKerrell, of a son.
PARK—April 7, at Stoke Damerell, Devonport, the wife of Thomas Park, Esq., Surgeon, Royal Artillery, of a son.
PHAYRE—March 5, at Woodlands, Mahableshwar, the wife of Colonel Phayre, Quartermaster-General, Bombay Army, of a daughter.
PRATT—April 2, at Stirling, the wife of Captain F. E. Pratt, R.E., of a son.
STUART—March 27, at Alderney, the wife of W. J. Stuart, Esq., Captain Royal Engineers, of a son.
TENNANT—April 9, at Needwood House, Staffordshire, the wife of Captain Tennant, R.N., of a daughter.
TREDENNICK—April 5, at 1, Prospect Terrace, Guildford, the wife of Captain John G. Tredennick, of a son.
WAKE—April 11, at 35, Priory Road, Kilburn, London, the wife of Captain J. D. Wake, of a daughter.
WISE—April 5, at Harwich, the wife of George H. Lake Wise, Esq., Prymaster of H.M.S. Pembroke, of a daughter.
WRIGHT—April 8, at St. George's Place, Canterbury, the lady of the Rev. H. P. Wright, Chaplain to the Forces, of a daughter.
YATES—April 10, at Plymouth, the wife of Lieut.-Colonel H. Peel Yates, Royal Artillery, of a son.

MARRIAGES.

ABBOTT—MARTIN—April 11, at St. Helen's Church, Abingdon, by the Rev. H. Crawley, Charles Thompson Abbott, Esq., M.A., Staff-Surgeon to Her Majesty's Forces, to Jeannie, daughter of John F. Martin, Esq., Abingdon, Berkshire.
BOND—MERRY—Dec. 22, at Kamptee, India, by the Rev. S. T. Pettigrew, brother-in-law of the bride, Captain H. A. Bond, H.M's 91st Regiment, to Mary Ann, daughter of Robert Merry, Esq., Norwich.
CONOLLY—WAINWRIGHT—April 10, at St. James's Church, Hyde Park, by the Rev. John T. Langford, M.A., the Rev. Marmaduke John Conolly, B.A., of Pinchbeck, Lincolnshire, to Eliza, eldest daughter of the late Major Henry Maxwell Wainwright, H.M.'s 47th Regiment.
COX—HARPER—Jan. 17, at Christchurch, New Zealand, Charles Percy Cox, Esq., son of the late Captain Cox, of the First Life Guards, and of Sandford Park, Oxfordshire, to Sarah Shephard Harper, fifth daughter of the Bishop of Christchurch.
FERGUSSON—DALLAS—At the Roman Catholic Cathedral, Bombay, by the Right Rev. Dr. Canoz, R. C. Bishop, Lieutenant Edward Francis Tierney Fergusson, H.M.'s Indian Navy, in charge of Government Observatory, to Cecilia Anne, eldest daughter of the late John Dallas, Esq.
HARDWICK—STORER—April 11, at Leamington, by the Rev. J. Craig, M.A., Major Frederick W. Hardwick, son of the late Francis Hardwick, Esq., formerly Captain 62nd Regiment, to Mary Lois, youngest daughter of the late Rev. Jonn Storer, M.A., rector of Hawkesworth, Notts.
LOWE—WAINWRIGHT—April 10, by the Rev. Henry V. Pickering, B.A., the Rev. Edward Jackson Lowe, M.A., of St. Bartholomew's District, Islington, to Mary, youngest daughter of the late Major Henry Maxwell Wainwright.
PEARSE—WILLIAMS—April 11, at the parish church of Penmon, Anglesey, by the Rev. Thomas Pearse, B.D., rector of Fittleton, Wilts, brother of the bridegroom, assisted by the Rev. P. C. Ellis, incumbent of Penmon and Llanfaes, Captain Pearse, Adjutant Royal Anglesey Regiment, son of the Rev. William Pearse, rector of Hanwell, Oxon, to Jane Elizabeth, daughter of the late Henry Williams, Esq., of Trearddur, Anglesey.
SCHOALES—FETHERSTON—April 10, at Trinity Church, Tunbridge Wells, by the Rev. M. Enraght, vicar of Lyminster, Sussex, George Schoales, Esq., son of the late John Schoales, Esq., Q.C., to Caroline Emma, younger daughter of the late Colonel Fetherston, H.E.I.C.S.
WESTMORLAND—THUILLIER—Feb. 25, at St. Paul's Cathedral, Calcutta, by the Rev. J. Richards, J. P. Westmorland, Lieutenant in H.M.'s Bengal Engineers, son of the late Isaac Westmorland, Esq., London, to Rose Julia, eldest daughter of Major H. E. L. Thuillier, H.M.'s Bengal Artillery, and Deputy-Surveyor-General of India.

DEATHS.

ANDERSON—April 3, at Rome, aged 18, Madeline, second daughter of the late Major William Anderson, C.B., Bengal Engineers.
ATKINSON—March 29, at Beacon Cottage, Pinhoe, near Exeter, J. J. Atkinson, retired surgeon, Bombay Army, aged 44 years and 10 months.
EGERTON—April 1, at Eaton Banks, Cheshire, Arabella Egerton, relict of the late Lieut.-General Richard Egerton.
ELLIOTT—March 13, on board the steam-ship Colombo, in the Red Sea, Frances Mary Isabella, aged 1 year and 5 days, daughter of J. B. B. Elliott, Esq., late Captain 43rd Light Infantry.
FELIX—April 5, at Geneva, Major-General Orlando Felix, of bronchitis.
FESTING—March 28, Major Thomas Bennott Penwarne Festing, late of the Bengal Army, aged 67.
GALBRAITH—April 4, at Frankfield Lodge, Douglas, county Cork, Ann Charlotte Dealey, the wife of B. B. Galbraith, Esq., of Old Derrig, Carlow, and second daughter of the late Lieut.-Colonel G. Fead, C.B., Grenadier Guards, aged 36.
HARINGTON—April 6, suddenly, at Picton Villa, Surbiton Hill, Colonel Thomas Lowth Harington, of the 5th Regiment Bengal Light Cavalry, second son of the late Henry Hawes Harington, formerly of Madras, aged 49.
HORNSBY—April 7, of scarlatina, at 5, Montpellier Parade, Monkstown, Dublin, aged 5 years, Rachel, youngest daughter of Eliza Hornsby and the late Lieut.-Colonel Hornsby, 2nd Madras E.L.I.
LAW—At Suez, while on her way home overland from India, to the inexpressible grief of her relatives and friends, Anna, the beloved wife of Colonel Law, Commanding H.M.'s 66th Regiment.
LING—Feb. 28, on board the steamer Nubia, from Calcutta, John Theodore Ling, Captain in the 2nd Regiment of Dragoon Guards.
LOWNDES—April 8, at "The Hollies," Tunbridge Wells, Ernest William John, only child of Captain James Lowndes, aged 3 months.
M'MAHON—April 10, at No. 10, Great Cumberland Street, Hyde Park, General Sir Thomas M'Mahon, Bart., G.C.B., Colonel 10th Regiment of Foot, aged 80.
MACPHAIL—April 10, at her residence, 74, Albert Street, Regent's, Park, Emma, widow of the late Colonel J. Macphail.
MASON—April 7, at Parkstone, Dorset, of erysipelas, Isabella Susana wife of Captain H. B. Mason, R.N.
MEADOWS—March 28, at Exmouth, Devon, Captain William Mradows, R.N., aged 71, deeply regretted by his family and friends.
MILLER—April 2, at Upton Lodge, Slough, after a long and protracted illness, Mary, the oldest surviving daughter of William Miller, Esq., formerly of the Royal Artillery.
PERRY—April 8, at Avondale House, Pittville, Cheltenham, after a long and painful illness, borne with great patience, Helen, the wife of F. Perry, Esq., and only daughter of the late Lieut.-Colonel Baron, of the Hon. E.I.C.S.
PHELIPS—April 4, at 5, Claremont Place, Dover, Annie, the beloved wife of Captain Henry Phelips, Royal Artillery, aged 29.
POTTS—April 11, at West Brompton, Gertrude Maria, eldest daughter of Colonel Charles Highmore Potts, late of the 19th Regiment, aged 19.
RICKETTS—April 8, at Tenterden, Maria Goodhew Ricketts, second daughter of the late Rear-Admiral William Ricketts, of Knockholt, Sevenoaks, Kent.
STEELE—April 5, at Plumstead Common, Christiana Sloane, daughter of Captain A. Steele, late Royal Artillery, aged 25.
SWINTON—April 7, at 14, Albert Square, Stepney, Mary, the beloved wife of Captain James Swinton, aged 64, deeply lamented by a large circle of friends.
TURNER—April 4, at Manor Street, Clapham, after a short illness, Mary Elizabeth, aged 18 years; and on April 7, Joseph Nash, aged 20 years, only surviving children of the late Captain J. R. Turner, 54th Regiment.
WILLARD—April 8, at Eastbourne, Harriet Alice, widow of Captain Leonard Willard, formerly of the 8th Hussars.
WILLIAMS—March 26, on board the steamer Nova Scotian, from Canada, Captain Richard Edmund Williams, 17th Regiment, aged 29.

Completion of the Nature-Printed Sea-Weeds, in 4 Vols. Royal 8vo., Price £2 2s. each.

On the 30th instant will be published, Vol. III., and early in May, Vol. IV., of the

NATURE-PRINTED BRITISH SEA-WEEDS.

NATURE-PRINTED BY HENRY BRADBURY.

A HISTORY ACCOMPANIED BY FIGURES AND DISSECTIONS OF THE ALGÆ OF THE BRITISH ISLES.

BY WILLIAM GROSART JOHNSTONE & ALEXANDER CROALL.

CONTENTS.

VOLS. I. & II.

RHODOSPERMEÆ.—RED SEA-WEEDS.
VOL. I.—SERIES I. DESMIOSPERMEÆ. 90 Species. 70 Plates.
VOL. II.—SERIES II. GONGYLOSPERMEÆ. 88 Species. 63 Plates.
With Dissections of all the Species.

VOL. III.

MELANOSPERMEÆ.—OLIVE SEA-WEEDS.
SERIES III. 95 Species. 52 Plates. With Dissections of all the Species.

VOL IV.

CHLOROSPERMEÆ.—GREEN SEA-WEEDS.
SERIES IV. 102 Species. 25 Plates. With Dissections of all the Species.
Synoptical Tables of the Orders, Genera, and Species. General View of the Structure and uses of the Sea-Weed Family. Sketch of their Classification and Distribution. Instructions for the Cultivation of the Algæ, their preservation in the Herbarium, and their preparation as objects for the Microscope.

MORNING CHRONICLE:—"In this work of 'British Sea-Weeds' is to be found all that could be wished for, and more than could be expected, in reference to the tribe in question. The specimens you gather from the beach, wash, and carefully display before admiring eyes, are not more fresh and perfect than are these illustrations now before us. Drawings, however highly finished in coloured plates, and however faithfully they represent what they are intended to place before you, are not to be compared with these prints. You touch them with your finger to ascertain whether they lie upon the surface of the paper or are a part of it."

ILLUSTRATED LONDON NEWS:—"This volume is well qualified to receive popular approval, but it has, beyond this, other recommendations. It is a first-class scientific book, and it is a first-class book as regards its execution. . . . . As a scientific book, the authors have well done their part too; for they have given us a clear, correct, and comprehensive scientific account of the plants they have treated on, adding such popular information as the subject admitted of; and they have given us, in addition, well-executed magnified dissections of the parts essential for scientific study."

ATHENÆUM:—"For this kind of work, *Nature-Printing* is exactly adapted. Every delicate and inimitable ramification is most attractively and accurately represented. The fifty-six plates in this volume can scarcely be surpassed, and have not, as far as we know, been equalled. . . . . We have found them pleasing, and still pleasing, during several inspections. The volume is handsomely got up, and will make a very attractive drawingroom-table book, at home or at the sea-side."

SATURDAY REVIEW:—"The process by which it is produced is that delightful one which has been a labour of love to Mr. Henry Bradbury in bringing to perfection, and which was first applied to the Ferns. To speak of the accuracy of the plates is of course a misnomer. They are of the nature of photographs; and the only possible drawback to the work is, that its extreme beauty will banish to the drawing-room table, as a mere example of pretty drawing, what, as a scientific manual, has not been equalled."

GARDENERS' CHRONICLE:—"While the lover of books will admire this volume for its singular beauty, lovers of natural history will feel that it is indispensable to the library of all who occupy themselves with the study of the vegetation of the mighty deep."

BRADBURY & EVANS, 11, Bouverie Street, Fleet Street, E.C.

WORKS ON GARDENING AND BOTANY.

HOW TO LAY OUT A GARDEN. Intended as a General Guide in Choosing, Forming, or Improving an Estate (from a Quarter of an Acre to a Hundred Acres in extent). By EDWARD KEMP. Price 12*s.*, illustrated with numerous Plans, Sections, and Sketches of Gardens and General Objects.

THE HANDBOOK OF GARDENING. By EDWARD KEMP. For the Use of Persons who possess a small Garden. The Eleventh Edition, enlarged and improved. Price 2*s.* in cloth.

THE VEGETABLE KINGDOM; or, The Structure, Classification and Uses of Plants. By DR. LINDLEY. Illustrated upon the Natural System. In One Volume, 8vo. cloth, price 36*s.*, with upwards of 500 Illustrations.

THE ELEMENTS OF BOTANY. Structural and Physiological. With a Glossary of Technical Terms. By DR. LINDLEY. In One Volume, 8vo. cloth, with numerous Illustrations, price 12*s.*

MEDICAL AND ŒCONOMICAL BOTANY. By DR. LINDLEY. With numerous Illustrations. A New Edition, in One Volume, 8vo. cloth, price 7*s.* 6*d.*

SCHOOL BOTANY; Or, The Rudiments of Botanical Science. By DR. LINDLEY. In One Volume, 8vo., half bound, with 400 Illustrations, price 5*s.* 6*d.*

DESCRIPTIVE BOTANY; Or, The Art of Describing Plants correctly in Scientific Language, for Self Instruction and the Use of Schools. By DR. LINDLEY. Price 1*s.*

PAXTON'S FLOWER GARDEN. Edited by SIR JOSEPH PAXTON and DR. LINDLEY. Complete in Three Volumes, price 33*s.* each, elegantly bound in cloth. This work appeared in Monthly parts, which are still on sale, price 2*s.* 6*d.* each.

PAXTON'S BOTANICAL DICTIONARY: comprising the Names, History, and Culture of all Plants known in Britain, together with a full explanation of Technical Terms. Crown 8vo., price 16*s.*, cloth extra.

THE LADIES' COMPANION TO THE FLOWER GARDEN. Being an Alphabetical Arrangement of all the Ornamental Plants grown in Gardens and Shrubberies. With full directions for their culture. By Mrs. LOUDON. The Sixth Edition, cloth gilt, price 7*s.*

PRACTICAL HINTS ON PLANTING ORNAMENTAL TREES. With particular reference to Coniferæ. In which all the hardy species are popularly described. By Messrs. STANDISH and NOBLE. Price 5*s.* in cloth.

BRADBURY & EVANS, 11, Bouverie Street, Fleet Street, E.C.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., viâ EGYPT. The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

SCREW STEAM YACHT FOR SALE.—About 200 tons (O.M.), 40 horse-power. Rig, a three-masted schooner. Has only been used about nine months in sea service, chiefly in a winter cruise in the Mediterranean, during which she proved an excellent sea boat. Has just been fitted with the superheating apparatus, reducing considerably her consumption of fuel, and increasing her speed. Consumption now, about 5 tons in 24 hours. Speed, under Steam only, 10 knots; with Steam and Sail, 11 to 12 knots. Commodiously arranged for a Family or Party, and elegantly decorated. Abundantly provided with Stores, including Cutlery, China, &c., &c., and is ready for a cruise, without requiring any outlay, except for provisions. For further particulars, enquire of Mr. THOMAS HILL, Southampton, where also the Yacht may be seen and inspected.

This day is published, price 6*s.* cloth.

LOCK'S City Heraldic Office, 2, Old Jewry, London, E.C., and in a few days you will receive a neat drawing of your Arms, &c., in Heraldic Colours, to be engraved on Seal, Ring, or Family Plate. On y parle Français, Italien, Allemand, et Hollandais. Wedding orders executed. Stamped envelopes and paper. Embossing presses and dies.

MONEY.—A Gentleman is desirous of INVESTING a FEW THOUSAND POUNDS in the PURCHASE of, or ADVANCING (in sums of 150*l.* and upwards) upon REVERSIONARY PROPERTY (freehold or funded), or will Lend it, for long or short periods, upon the personal security of responsible parties, heirs to entailed estates, &c.—Address, in the first instance by letter, to M. A., care of Messrs. HALTON, Tailors, 4, Princes Street, Hanover Square, W.

MONEY ADVANCED on BILLS, BONDS, or MORTGAGES, in a few hours. Gentlemen of property immediately and privately accommodated on their personal security. Address, or apply to, Mr. MORRIS, Solicitor, 58, Pall Mall, St. James's Palace, S.W.

WANTED, LEFT-OFF CLOTHES FOR AUSTRALIA.—MR. & MRS. JOHN ISAACS, 319 & 320, Strand, W.C. (opposite Somerset House), continue to give the highest price in cash for Ladies', Gentlemen's, and Children's Clothes, Regimentals, Underclothing, Boots, Books, Jewellery, and all Miscellaneous Property. Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission,
Author of "Adulterations Detected." "The Urine in Health and Disease," &c.
Wimpole Street, 20th January, 1860.

DINNEFORD'S PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION. As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS (and General Agents for the *Improved Horse Hair Gloves and Belts*), 172, NEW BOND STREET, LONDON, W., and Sold by all respectable Chemists throughout the Empire.

TEETH.—MR. ESKELL, SURGEON DENTIST, 314, Regent Street, W. (facing the Polytechnic), supplies his PATENTED INCORRODIBLE TEETH, which can be matched so closely in shape and colour to those left in the mouth, and are formed so exactly to nature, that the closest observer cannot detect the difference, and in all cases they restore perfect articulation and mastication. These teeth are fixed from one to a complete set upon Mr. Eskell's never-failing and painless principle of Self-adhesion, without extracting any teeth or stumps, or giving any pain whatever; and being incorrodible they possess the superior advantage of never changing colour nor decaying. Mr. Eskell's celebrated Osteoplastic Enamel, post free for thirty stamps, for Stopping Decayed Teeth, is a preparation which never changes colour nor affects the colour of the tooth, and is free from any injurious properties either as regards the teeth or general health. Its application is easily performed, and without giving the slightest pain. Deficiencies of palate effectually remedied. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation, free. Charges strictly moderate.—314, Regent Street, W. (opposite the Polytechnic), London.—Established 1847.

RAPID CURE OF COUGH AND DIFFICULTY OF BREATHING BY

DR. LOCOCK'S PULMONIC WAFERS.—From Th. Hargreaves, Esq., Park Hill.

"Sir,—My wife having been troubled with a cough and shortness of breathing, and being recommended to try a box of your Wafers, I did so, and soon found relief from them. Two boxes at 2*s.* 9*d.* each, and one 11*s.* box, completely restored her.

"To Mr. Evans, Chemist, Barrowford."

DR. LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs.

TO SINGERS AND PUBLIC SPEAKERS they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.* per box. Sold by all druggists.

A BOON TO NERVOUS SUFFERERS.

THE NEW MEDICAL GUIDE for gratuitous circulation. A NERVOUS SUFFERER having been effectually cured of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, by following the instructions given in the MEDICAL GUIDE, he considers it his duty, in gratitude to the author, and for the benefit of others, to publish the means used. He will, therefore, send post free, on receipt of a directed envelope, and two stamps, a copy of the book, containing every information required

"Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind."—*British Critic.*

Address, JAMES WALLACE, Esq., Wilford House, Burton Crescent, Tavistock Square, London. W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 to 8 Evening.

Digitized by Google

☞ *The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance, postage not included. Post-office orders to be made payable to* JOSEPH SMITH.

THE quantity of letters which have been addressed to us on the subject of the right of Volunteer officers in uniform to receive the regular military salute from privates and non-commissioned officers of the regular Forces and Militia, is a proof that the question excites a considerable amount of interest, and that the Volunteer officers at least attach importance to it. We regret the question has been raised at all, because there appears to be no means of solving the difficulty in the way of a satisfactory understanding between the Volunteers and the Army.

The Volunteer officer is in possession of Her Majesty's commission, and when the force to which he is attached is called out for service, he and his men are subject to martial law, and they become at once a military body. But his military character is at present a possible contingency rather than an actual fact. However, we think that a well-conducted soldier would in all probability salute a Volunteer officer in uniform if he met him in the street, and knew that he was an officer. If the Volunteers were brigaded with Regulars, of course their officers would be entitled to the same marks of respect as are paid to officers of the Army and Militia. But the Volunteers appear to desire something more, if we are to take the correspondence addressed to us as a fair exposition of the wishes of the body at large. They claim the salute as a matter of right, and some of them appear to think that H.R.H. the Duke of Cambridge has issued an order to the Army to give the salute to officers of Volunteers. We believe that is not the case. There would be difficulty in carrying out the order—we do not say in obeying it, for that must not be stated of any order from the Commander-in-Chief to theBritish Army. If the Volunteers desire to be considered as a military body before the time comes when the law regards them as such, they must enforce military discipline in their own body. If they desire that soldiers of the Army should salute Volunteer officers, they must be prepared to make the privates of their own body salute the officers of the regular Army. Will the privates in Volunteer corps consent to salute their own officers? If they do not, we can scarcely think the whole body of Volunteers will be so much offended in consequence of their officers not being treated to the salute by the Army, that they will dissolve, or refuse to give their services in time of need, as one of our correspondents suggests. Again, it will be necessary, in case that the order were issued, that the Volunteer officers should be known as such. The privates of some corps are more gorgeous or less sombre than the officers of others. A uniformity of officers' badges would be requisite, so that they might be known to the soldiery as officers. If it be irritating to Volunteer subalterns and captains to see privates of the Line pass them without saluting, how much more severe would be the trial of the Volunteer private's feelings if he saluted an officer of the Army who did not acknowledge the salute. Officers of the Army now and then omit to return the salutes of their own men? On the whole, we think the matter had better be left to the good feeling and moderation of both parties. Many difficult questions are connected with it, and an unwise agitation may renew the heartburnings, jealousies and annoyances which sprang up in 1804-5, and which led to serious misunderstandings between officers of Volunteer corps when called out for service and the inspecting field-officers of the Army who were appointed to superintend these corps.

At present the Volunteers may be content with the success of their movement, with the mark of the Sovereign's approbation, and with the position they have gained in the country. We would be well pleased if the salute were given to their officers; but, we trust they will appreciate the difficulties we have indicated in the way of claiming the salute as a universal right, to be at once enforced by the Horse Guards, as long as they are merely voluntary associations, which may be dissolved by a few days' notice from the members.

When any man appeals to the Press, and through it to public opinion, against a department or member of the Government, he must be prepared to expect war to the knife, and all the resistance which it may be possible to make to his demands for quarter or redress. Strong as they are in their bureaux, and powerful in their departments, there is a body stronger and more powerful than the office-holders of the day, and the breath of a motion in the House of Commons, which is supported by public opinion out of doors, and sustained by good names inside, causes the haughtiest concocter of "memos" to feel uneasy, and possibly to ease his mind by a demonstration against his private secretary. But it is very prejudicial to the public Service that those who are willing to spend their time, their talents, and their money for its advantage should be obliged to do battle with board and offices, and then be driven to the wearying and odious importunities which are too often necessary in order to secure a hearing before the great tribunal of the nation. There are some few individuals who hate all inventions, speculations, improvements, or alterations; but all "boards," "departments," and "offices," are unanimous in regarding such things with horror as the disturbers of their peace and impediments to the dispatch of business, which is real business only when it is routine. The improver or inventor is a creature whose approach causes every bristle of the official hedgehog to rise stiffly with fright and rage. Although we admit very readily the liberality and candour of Mr. Secretary Herbert in his management of affairs, there is reason to think that the War Office, being a department peculiarly liable to the assaults of speculators, has certain traditions respecting "the value of saying no," which are not at all likely to fall into desuetude. But it might have been expected that the War Office would have shown some consideration in the case of a gentleman who had done the State good service, and whose claims have been recognised by the best judges of the peculiar matter referred to them.

In the ARMY AND NAVY GAZETTE of last week, there appeared a statement and correspondence in reference to Captain Grant's cooking apparatus, which, we trust, excited the attention it deserved. Any one who had merely heard of Captain Grant through the papers, in the reports of his proceedings, would have imagined, we think, that he was some servant of Government, employed on a good salary to superintend the cooking of the Army, who had attained that position by inventing some remarkably efficient apparatus for the purpose. Captain Grant's own statement reveals a very different state of things.

It appears that this gentleman, who is a retired officer of the Royal Artillery, after the accounts of the Crimean miseries reached this country in 1855, at Lord Hardinge's request, devised a barrack or camp-cooking apparatus, which was introduced at Aldershot, where the system is still in use, and also a form of field cooking, which was so highly thought of that the authorities shipped apparatus to cook for 5000 men in the present expedition to China. Not only was the system good as far as culinary arrangements and cooking were concerned, but it effected an enormous economy in the saving of coal and fuel. For four years Captain Grant gave his time and the benefit of his experiments to the Government. For four years the soldier has had baked and stewed meats instead of the "boiled bully," which rose up against his stomach in its unwholesome sameness, before Captain Grant's kitchen came in use. He had revelled in dumplings, Irish stew, baked potatoes, capital soup, well-cooked vegetables, and is pleasantly astounded at the variety of courses to which he could treat himself by the aid of this excellent *cuisine*. The health of the troops improved, and the country saved the cost of nearly 300 tons of coals in the cooking of the food of every 1000 men in the year. Having obtained these results, and others which are set forth in his statement, Captain Grant conceived he had a fair claim to have a little line to himself in the enormous Estimates of the War Office. We think the country will be of opinion he was not unreasonable. According to the statement before us, Captain Grant, on December 20, 1859, addressed Mr. Secretary Herbert, demanding a settlement of his claim, based upon a principle advantageous to see public service, and proposing, in effect, that he should receive the amount of twelve months' saving on the cost of cooking for two-thirds of the military force, or such sum as might be considered its fair equivalent. In making that demand Captain Grant appealed to the testimony of Mr. Secretary Peel in the previous year, that his cooking apparatus was the best suited to military purposes of any that had been submitted to him, and that he proposed to adopt it in barracks as occasion occurred. But the plain fact was that the system had been so entirely approved of that cooking apparatus on his principle had been constructed for 60,000 men. The War Office took a long time to consider the matter; at least, we presume they did so, for it was not till seven weeks had elapsed that Mr. Godley addressed a very curious letter to Captain Grant; and on the 7th February, 1860, "adverting to your letter of Dec. 20th last," informed him that as to his cooking battery at Woolwich (of which an apparatus for 5000 men was actually shipped to China), he was directed by Mr. Secretary Herbert, to say the waggons were still under experiment; and that as regarded the latter question, no further application for compensation could be entertained. Not even a word of thanks, Mr. Godley! Not even a line by order of Mr. Secretary Herbert, in reference to the prolonged exertions for the benefit of the public service, which Mr. Secretary Peel had not disdained to acknowledge! The confusion in the grammatical construction of Mr. Godley's letter, is greater than his discourtesy. We defy anyone to say what is "the latter question" to which Mr. Godley refers—whether it be "cooking battery," "cooking waggons," or "experiment;" but we have no difficulty in arriving at the conclusion that the War Office gave a plump and plain refusal to entertain Captain Grant's claim for any compensation whatever for his great services, and that at the moment they were preparing the gigantic Estimates in which millions were lavished on every department of the military service of the country, they determined to act with a parsimony amounting to meanness in the case of a man who had enabled them by his savings to add hundreds of thousands of pounds to the public exchequer. In the interests of the public service itself, we deprecate such treatment, and we trust that the House of Commons will stand between one who has improved the condition of the British soldier more effectually than a thousand War-Office Circulars could do, and the department which, having largely availed itself of his aid, has behaved to him, if not with contumely, at least with something more irritating than indifference; and, if not with ill-faith, at least with something worse than illiberality.

Notwithstanding the reduction of the bounty which has recently taken place throughout the Service by order of the authorities at the Horse Guards, recruiting for the various regiments serving in India, is still proceeding very satisfactorily, and a large number of young men have arrived at Chatham garrison during the present month from the recruiting districts to join the depôts. The three battalions are now unusually strong, together numbering nearly 5000 men of all ranks; and it is calculated that 3000 well-trained troops will be ready to embark for India from that garrison during the present summer, should that number be required to augment the British regiments in India.

THE ARMY.

4th Dragoon Guards. We regret very much to hear that disaffection has manifested itself in this fine regiment, which has been hitherto as remarkable for its good conduct in time of peace as for its gallantry in the field. A Brighton journal says: "We understand that the discipline which has recently been pursued at the Cavalry Barracks, Brighton, towards some of the men of the 4th Royal Irish Dragoons, by order of their Colonel, Colonel Bentinck, has caused great dissatisfaction and discontent, that has resulted in a resentment of a very marked character. A few mornings since it was discovered that the manes and tails of two of the Colonel's valuable horses had been cut off, and his harnesses and saddle completely cut to pieces; the estimated damage being 200*l*. A reward has been offered for the discovery of the perpetrators of the act, and it is rumoured that an investigation will take place by authority in high quarters, to learn the cause of such an exhibition of vindictiveness. *On dit*:—The rumour is that the cropping is on the principle, crop the men crop the horses."

8th Hussars. Captain Puget has qualified as interpreter in Hindostanee. Captain Mussenden is attached to the depôt at Canterbury.

9th Lancers. The detachments, consisting of 5 officers, 125 men, and 111 men now at Taunton and Troubridge, are ordered to Dorchester.

10th Hussars. A squadron now at Woolwich is reported as likely to be quartered at Ipswich.

14th Light Dragoons. The case of James Hunt, formerly Sergeant-Major in the 14th Dragoons, who shot Cornet Browne of the same regiment at Kirkee, near Poona, for seducing his wife, has been tried in the Supreme Court of Bombay. According to the evidence given by Cornet Browne and two of his fellow-officers, Lieutenant Beamish and Cornet Amherst, on the 27th of January last Hunt rode up to the cornet's house, and, asking for a private interview, was taken by Browne into his bedroom. Of all that followed we have two versions, neither of which it is possible to corroborate, for the prisoner and the prosecutor alone know what happened. Browne's statement is, in brief, that Hunt told him he knew his guilt by finding one of his letters, and by his wife's confession, and called upon him to give up any letters from Mrs. Hunt he had in his possession. There was more conversation, in the course of which Hunt drew out a pistol, and said he had come over for the purpose of shooting his betrayer, and he did not know whether he should not do so yet. At last, on Browne owning that Lieutenant Beamish probably was aware of what had been going on, Hunt raised the pistol and shot him. Hunt's story varies from this, in asserting that Browne used taunting and insolent expressions, laughing at Hunt when he asked for the "satisfaction of a gentleman," and saying he "gloried" in having seduced Mrs. Hunt. Browne swore distinctly, on the trial, that he had not said a word during the interview to provoke the prisoner. The counsel for Mr. Hunt made rather a weak defence, arguing that it was possible the pistol went off by accident. The jury found the prisoner guilty of intent to do grievous bodily harm, and strongly recommended him to mercy on account of the extreme provocation he had received. The Chief Justice, Sir Mathew Sausse, premising that the lightness of the punishment he was about to award was due to his belief that the act of the prisoner in firing off the pistol had not been premeditated, sentenced him to be imprisoned for a year in the county jail, one week's confinement in each quarter to be solitary. There is great popular sympathy for Mr. Hunt, and a memorial has already been drawn up, praying for a remission of his sentence.

Royal Artillery. Colonel Francklyn, C.B., 4th Brigade, Field Artillery, with a draught of 250 rank and file, has left Woolwich, for Gosport, to commence the formation of the 15th Brigade, some time in contemplation. The B battery of Royal Artillery, at present quartered at Ipswich, under the command of Captain Paget, is about to leave that town for Woolwich. A portion of the Horse Brigade will, it is expected, occupy Brompton Barracks, about to be vacated by the Royal Engineer Train. The following force has left Portsmouth for Plymouth and the Channel Islands, on board the Firebrand, which sailed for Plymouth.—Major Adye, in command; Captains Vernon and Stocker; Lieutenants M'Laughlin, Cuming, Webber, Lewis, Goodenough, and Deshon; 11 sergeants, 11 corporals, 199 gunners, 4 trumpeters, 31 women, and 50 children.

On Thursday Nos. 1 and 7 batteries of the 10th Brigade Royal Artillery arrived at Portsmouth from the Channel Islands. The officers' names were:—Captains Childs and Hudson; Lieutenants King, Harman, Dickson, Wilmer, Bevan, and Percival; Surgeon Cumming, in medical charge; 13 sergeants; 6 trumpeters; 15 corporals; 232 privates; 30 women; 51 children. No. 8 Battery of the 14th Brigade, Royal Artillery, consisting of about 8 officers, 211 men, 42 followers, and 6 horses, left Calcutta for China on March 10, in the hired transport-ship Merchantman.

Royal Engineers. Lieutenants W. S. Maud, R.E., has proceeded from the head-quarters of the Royal Engineer establishment to Dover; and Lieutenant E. D. C. O'Brien to Plymouth, to be attached to the staff of the commanding Royal Engineer.

In consequence of the great pressure of business at the photographic department of the Royal Engineer establishment, Chatham, it has been found necessary to introduce several of the most intelligent young men, selected from the corps of Royal Engineers into the Photographic School, in order that they may acquire a knowledge of photography, and assist in making the numerous copies of models, buildings, and other objects which are required by the War Department.

We are informed that a great amount of dissatisfaction has been for some time felt among the non-commissioned officers of the Royal Engineers in consequence of the unsatisfactory manner in which the promotions take place in that corps. We have learnt that at the present time there are many vacancies in the rank of sergeant, caused by sergeants having been discharged, and although the vacancies have existed for about twelve months, no steps have yet been taken to fill them up. We feel certain that the fact of the complaints we have alluded to existing among the non-commissioned officers of this highly deserving corps will be the means of attention being directed to the subject with the view to their removal.

The 18th Company of Royal Engineers, now employed in the construction of coast batteries in the neighbourhood of Weymouth, having completed the defences at the entrance to the harbour, the officers and men have received orders to rejoin head-quarters at Chatham. The officers in charge of the company are Captain R. Hawthorn and Lieutenant R. N. Peters. Captain J. E. Cornes, R.E., and Lieut. J. Wilson, R.E., are ordered to join the Royal Engineer establishment on the 31st inst. Lieutenant A. B. Haig has been appointed to the Royal Engineer Train, in the room of Lieutenant W. S. Maud, who has proceeded to Dover. The proceedings of a district court-martial, which assembled at Chatham a few days since for the trial of Sapper John Hodgson, R.E., have been promulgated at head-quarters. The crimes for which the prisoner was tried were, for being absent without leave, for resisting the escort who had him in charge, for breaking out of the guard-room, and for striking Corporal Cubbert whilst in the execution of his duty. The Court found him guilty, and sentenced him to undergo 168 days' hard labour in Fort Clarence Military Prison.

Grenadier Guards. A company of the 1st battalion, with Colonel Prince Edward, Captain Bathurst, and Lieutenant Farmer, is detached to Aldershot; also a company of the 2nd battalion, under Lieut.-Colonel Sidney Burrard.

Coldstream Guards. Lieut.-Colonel Goodlake and Captain Heneage, of the 1st battalion, and Lieut.-Colonel the Hon. H. Byng, are detached to Aldershot, with a company from each battalion, for rifle practice. By the retirement of Lord Westmoreland, Captain and Adjutant Fremantle becomes Lieutenant-Colonel, and Lieutenant Burnand, Captain.

Scots Fusilier Guards. Lieut.-Colonel Gipps, Captain Trefusis, Captain Knox, and Lieutenant Thomas, are at Aldershot, with a company from each battalion.

32nd Light Infantry. This regiment is about to move from Dover to Aldershot early next month. "Their departure (says the Dover Chronicle) will be a source of great regret to the inhabitants of this town, the regiment having won golden opinions since their residence amongst us. A better commanding officer than Colonel Carmichael we have not had amongst us, and a better conducted regiment on the whole has not been quartered here."

Royal Marine Light Infantry. Captain Farrant, with Lieutenants Haseltine, Fuller, and Carlyon, and a detachment of the Royal Marine Light Infantry and Artillery, are ordered to embark from the Portsmouth Division for service on board the Edgar, relieving the detachment on board under the command of Captain C. Louis. Colonel E. Rea, in command of the Chatham division of Royal Marine Light Infantry, has received orders from the Admiralty to furnish two detachments of non-commissioned officers and marines for service on board the Wasp, 13, screw-steamer, Commander F. H. Stirling, and the Wrangler, 4, screw-steamer, both fitting at Sheerness.

53rd Regiment. We learn from the *Shrewsbury Journal* that it is in contemplation to erect a monument in Shrewsbury to the memory of the members of this corps who have fallen during the frightful outbreaks in India. It is commonly known as the Shropshire Regiment, from the fact of its having been raised in this county. A few years ago it numbered among its officers two Shropshire Hills—Colonel Frederic (now the commandant of our militia) being its colonel, and his younger brother Philip (now in Ireland) its major. The regiment is now on its return home from India, where it has been stationed for fourteen years. We are told that on its return it will furnish one of the most melancholy proofs on record of the dreadful effects of war and climate, only one man now surviving out of the whole number who originally formed the regiment when it left this country. The memorial to which we refer is to be erected at the cost of the officers, a large sum having been already raised for the purpose, but what form it will take, or where it will be placed, is not yet determined. The depôt at Chatham consists of over 400 men, and is in a very efficient condition.

56th Regiment. The head-quarters of H. M.'s 56th Regiment entered the Poona Camp on the 23rd of March, and took up the Barracks lately vacated by the 28th Regiment. We regret very much to learn that cholera made its appearance amongst the Regiment whilst on its march from Belgaum to Poona. There were eight cases occurred in the regiment between Belgaum and Kolapoor, four of which proved fatal; one was left behind with the detachment at Kolapoor, and the other three were brought on to Sattara, and are doing well. No cases had occurred since the 8th instant, but on the morning of the 15th the disease again showed itself at the Dewa Ghaut, eight miles from Poona, when nine more cases were admitted into hospital. Of these five proved fatal—one officer (Captain Ramsay) and four men having succumbed to the epidemic. The head-quarters of the 56th will be stationed at Poona; a wing at Ahmednuggur; and a detachment from that wing will be sent to garrison the fortress of Asseerghur.

57th Regiment. Major Logan, Captains Woodall and Wilmot, Lieutenants Bayntun and Parkinson, Ensign Emly, Assistant-Surgeon Griffin, and 178 rank and file have arrived at Bombay from Aden.

60th Rifles. The head-quarters, 1st Battalion, in all 12 officers and 432 rank and file, embarked on board the Aliquis at Calcutta on the 17th of March for England.

78th Highlanders. This gallant regiment is to be entertained next week by the citizens of Edinburgh, in recognition of their recent services in Persia and India. The *Scotsman* says:—The entertainment, promises to be a very grand spectacle. The Exchange is to be profusely decorated with Highland and Eastern trophies, and with flags, skins, deers' and leopards' heads, ancient and modern armour, &c.; and when brilliantly illuminated, and filled with the gallant soldiers in full Highland costume, and with many other guests or entertainers in uniform, regular and volunteer, naval and military, the scene will be extremely striking and splendid. The arrangements for the banquet are far advanced, and promise to be in every respect satisfactory.

86th Regiment. This regiment, under the command of Lieut.-Colonel Stuart, now stationed at Gosport, are ordered to Aldershot. The following are the names of the officers with the regiment:—Majors J. P. Meyers and H. W. P. Welman; Captains C. O. Creagh, J. Jerome, M. Lepper, G. H. Adams, R. E. Henry, R. F. Lewis, W. Knipe, B. A. Branfil, and J. R. D. Mackenzie; Lieutenants A. R. Ord, J. F. W. Mullen, J. Creah, J. W. Ery, J. D. Brockman, G. S. Jackson, D. Stewart (Adjutant), C. Keane, T. Yardley, J. J. Bowess, W. R. Gray, J. Wells, G. E. A. Hilliard, and W. Saunders; Ensigns R. J. Posnett, C. M. Jackson, F. G. Marshall, H. V. Cullinan, J. E. M. Sperrin, E. J. Harris, H. C. Boulcott, and J. F. Stephens; Paymaster C. F. Heatly; Quartermaster W. Lane; Surgeon J. Sawers, M.D.; Assistant-Surgeons T. S. Barry and E. C. Ryall.

4th Depôt Battalion, Canterbury, was inspected on Saturday by Lieut.-General Love, Inspector-General of Infantry. As His Royal Highness the Commander-in-Chief had so recently tested the battalion on parade, and expressed himself highly pleased with the accuracy of its movements and the steady bearing of the men, the attention of the Inspector-General was more particularly directed to the internal economy of the battalion, which was found by him in every way satisfactory. Lieut.-General Love in the evening dined at the Infantry mess. On Tuesday the Archbishop of Canterbury confirmed forty-three soldiers of the garrison.

The further progress of the new wings in course of erection at the Royal Military Academy, Woolwich, which has been temporarily suspended by order of the Royal Engineer department, by reason of the red brick facings having been opposed, has been ordered to take place on the original plan objected to.

A large number of shipwrights, caulkers, painters, &c., were on Saturday discharged from the Shipwright's Department in Woolwich dockyard, and about 600 artificers and labourers left the Royal Carriage and Laboratory Departments of the Arsenal.

A brigade field-day of the troops at Chatham took place on Wednesday morning, when Major-General Eyre had the entire force of the garrison on the Lines. In addition to the 1st, 2nd, and 3rd battalions of Infantry, the battalion of Royal Marines and the corps of Royal and Indian Engineers were present, the whole numbering upwards of 4000 men. These brigade field-days are announced to take place on each Wednesday during the summer season.

A grand amateur performance by the officers of the Chatham garrison took place, in the Royal Marine Theatre, on Friday night, on which occasion the building was crowded by the *élite* of the garrison and neighbourhood, the whole of the officers appearing in their full uniform. The pieces selected were *Delicate Ground*, *Our Wife*, and *Little Toddlekins*. The band of the Royal Marines, under the direction of Herr Kapply, occupied the orchestra. The performance was in aid of the Garrison Compassionate Institute, the funds of which will be very considerably augmented.

The troops comprising the entire garrison at Chatham have been granted two days' *holiday and release from* all drills and parades, by order of Major-General Eyre, in consideration of the exceedingly satisfactory manner in which they acquitted themselves last week on the occasion of the review of the garrison by His Royal Highness the Duke of Cambridge, who expressed himself in the highest degree satisfied at the result of his inspection, and the highly efficient state of the garrison.

Deputy Inspector-General T. D. Hume, M.D., has been appointed principal medical officer at Fort Pitt Hospital, in succession to Inspector-General J. R. Taylor, C.B., who proceeds to the Cape of Good Hope, to take charge of the Sanatorium for the troops from China. Dr. Hume is at present doing duty at Cork.

Deputy Inspector-General T. Longmore, who has been appointed professor of clinical and military surgery at Fort Pitt, has arrived at that establishment and commenced his duties. The other professors are Dr. E. A. Parkes, hygiene, and Dr. W. Aitkin, pathology. Surgeon-Major J. S. Prendergast, M.D., has proceeded from Fort Pitt to Portsmouth, where he is to be stationed for the purpose of inspecting the invalid and disabled troops arriving at that port from India and the colonies.

On Monday, the troops forming the Indian depôts stationed in Colchester camp had a grand field-day, in the presence of the new commandant of the garrison and General Wood, who is on a visit in the neighbourhood. The troops of the 9th Depôt Battalion, under the command of Colonel Dixon, C.B., comprised the depôts of the 1st, 6th, 54th, 56th, 66th, and 88th Regiments, that of the 10th Depôt Battalion under the command of Colonel Street, C.B., consisted of the 5th, 34th, 37th, 38th, 44th, and 97th Regiments, in all between 2000 and 3000 men, the greater portion effective soldiers, and ready for active service. There was a brilliant staff upon the field, including Colonel Blucher Wood (commandant), Colonel Street, C.B., Colonel Dixon, C.B., Major Heyton, Major West, Captain-Adjutant Munro, &c., &c. The men having assembled upon the ordinary parade-ground, were marched to the old barrack field, and passed through the ordinary evolutions of a brigade-day in the most satisfactory matter. The despatch of heavy drafts of men to Landguard Fort for rifle practice, has been resumed, and in the month of June a strong force will leave the camp for foreign service.

From the *Delhi Gazette* of Feb. 18:—"Cawnpore, Feb. 15. This morning Sir John and Lady Inglis left Cawnpore for Calcutta on their way to Bangalore. A guard of honour, consisting of one company of Her Majesty's 54th Regiment, with the regimental colour and band, attended at the railway station. All officers off duty were invited to attend yesterday by the brigadier, and Captain Courtenay's battery was sent to the railway station to fire a salute as the train started. The gathering of officers was large; and no one could fail to see how painful it was to Sir John Inglis to say good bye to them. Sad indeed did all feel at the departure of a general so universally respected and beloved, who always showed himself the friend of the soldier as well as of the officer. The Bengal Presidency loses in Sir John Inglis one of her best, if not her very best, divisional commanders. Nothing could exceed the interest Sir John Inglis took in all matters affecting the improvement of the soldiers' condition, and few men have a warmer or kinder heart. It is not out of place to mention that Lady Inglis, in her sphere,

Digitized by Google

was as praiseworthy and admirable as Sir John, as the soldiers' wives and children at Cawnpore could testify. They both leave with the best wishes of all here, and the deepest regret at their departure.

The *Delhi Gazette* of March 20th has the following:—"With reference to a paragraph that lately appeared in our paper, pointing out that Mr. Wilson's income tax would fall on European soldiers, we have the best authority for stating, from communications received from the Governor General's camp, that the Government of India have no intention of subjecting either privates or non-commissioned officers of the British Army to the operation of the income tax."

ROYAL GEOGRAPHICAL SOCIETY. — Evening Meeting, Monday the 23rd inst., at half-past 8 P.M. Papers to be read:—1. Expedition into the Interior of South Australia, by Sir R. G. Macdonnell, Governor; and Voyage up the Darling and Barwan Rivers, by W. R. Randall, Esq., communicated by the Colonial Office. 2. On Typical Mountain Ranges, by W. Spottiswoode, Esq., F.R.G.S.

SHORNCLIFFE CAMP.

On Saturday last His Royal Highness the Duke of Cambridge, the General Commanding-in-Chief, concluded a tour of inspection of this part of the south eastern district, by visiting Shorncliffe. The tour commenced on the Tuesday previous, when Chatham was visited, and subsequently, Maidstone, Canterbury, Walmer, Dover, finishing with Shorncliffe. His Royal Highness on Friday night slept at Dover, which place he left next morning by the 8 a.m. express, arriving at the Folkestone station at about 8·10, accompanied by the following general officers and staff:—Major-General Sir Richard Airey, K.C.B., Quartermaster-General; Major-General Eyre, Commandant of Chatham Garrison; Major-General Crauford, Commanding the 1st Brigade, South-Eastern District; Colonel Charteris, Aide-de-Camp to His Royal Highness; and Colonel Bingham. On his arrival at the Folkestone station His Royal Highness was received by Majors Gamble and Forster, who attended him to the camp, on reaching which a royal salute of 21 guns was fired by the 5th battery of the 4th brigade, from the saluting point immediately overlooking the military road leading from Sandgate to the camp; the salute was fired about 9 o'clock. His Royal Highness was met by Lieut.-General Mansel, the general in command of the south-eastern district, and had breakfast with that officer.

A little before 10 A.M. His Royal Highness left General Mansel's residence, and proceeded on to the camp, where he was received by the General, who had preceded him to the camp; and General Hay, Commandant of the Hythe School of Musketry, Major Gamble, Major Forster, Brigade-Majors Carlton and Barnard, and Captain Eteson; by the heads of departments, who were in attendance in uniform by order of the General commanding; and by the whole of the troops in the camp, comprising the following: a squadron of the 4th Dragoon Guards; four batteries of the Royal Artillery, consisting of twenty-four guns; a company of the Royal Engineers, H.M. 47th Regiment, under the command of Lieut.-Colonel Kelly, who commanded the infantry brigade, in consequence of the absence through illness of Brigadier Williams; the 2nd Royal Cheshire Regiment of Militia; the Stirlingshire Militia, or Highland Borderers; the Royal Antrim Artillery Militia, and the 4th Battalion of the Military Train; the whole of whom were drawn up in line, numbering about 123 officers, and 3000 men of all ranks, with 360 horses, 24 ambulance-waggons, and 24 store-carts.

Immediately on His Royal Highness arriving on the ground a royal salute was given, the bands of the different regiments playing the National Anthem; and, the colours being dropped, the whole of the men were in heavy marching order, each one furnished with ten rounds of blank ammunition, and, being clothed in the April issue of new clothing, had a most imposing appearance. The Duke, after the salute, and accompanied by his staff, rode slowly down the front of the line, returning by the rear, and minutely inspected the whole of the men; in passing along the line His Royal Highness frequently complimented General Mansel on the very soldierlike appearance the troops presented.

Immediately after the inspection the Duke proceeded to the saluting colour, and the troops in open columns of companies marched past in quick time, all the bands being united and stationed opposite to the saluting point, played different marches as each regiment marched past. The cavalry, in open columns of three; the Royal Artillery and Military Train then trotted past, and the infantry followed in close column of battalions. His Royal Highness, as the troops marched past, frequently called out "very good," "very good indeed," and was evidently much pleased with the manner in which this was carried out. The four batteries of artillery were then put through some very excellent movements, firing with remarkable celerity, after which the infantry were exercised, principally light infantry practice and skirmishing. After the conclusion of the field-day His Royal Highness called the commanding officers of regiments to the front, and expressed his approval and satisfaction to them and to the field officers for the very creditable manner in which the whole of the operations had been carried out, and at the appearance and general discipline of the troops. The troops were then dismissed, and His Royal Highness and staff next proceeded to the rear of the C range, and witnessed the Royal Antrim Artillery exercised in firing blank charges from 18-pounder field-battery guns; he also inspected some field works and batteries lately thrown up by the troops for practice, and expressed his approval of the same. His Royal Highness left the camp, under a salute of 21 guns, about half-past 1, and returned to town by the 2 p.m. express train from the Folkestone upper station.

During the review, an accident occurred, which at first alarmed every one who witnessed it. At the first discharge of the artillery, a pair of fine horses in a phaeton, the property of Capt. Robertson, of the 4th Dragoon Guards, in charge of a groom, started off along the front of the huts in the B range, and in spite of the exertions of the groom, who hung on to them with hazard to himself, they broke away, and knocked down a little boy, as also the wife of Paymaster and Captain Hunt, of the 2nd Royal Cheshire, who at first was thought to be seriously hurt, but fortunately no bones were fractured. The horses then continued their career, and proceeded at a rapid pace behind the back of the C, D, and E ranges of huts, leaping over two of the fences in front of the artillery barracks, and were ultimately stopped at the top of the military road to Sandgate, without having done any material injury to themselves or the phaeton.

On Monday, a general order was issued by order of His Royal Highness expressing the great satisfaction he had had in witnessing the efficient manner in which the whole of the troops had conducted themselves on the previous Saturday.

The 2nd Royal Cheshire are under orders to leave the camp on the 26th, on march to Dover to relieve the Wiltshire Militia, who leave Dover for disembodiment.

ARMY GAZETTE.

ADMIRALTY, APRIL 9.

Corps of Royal Marines—Gentleman Cadet Charles Surtees Chapman Webb, to be Second Lieutenant, vice O'Connor, placed on half-pay.

WAR OFFICE, PALL MALL, APRIL 10.

2d Regiment of Life Guards—Lieutenant Edward Stratton Fitzhardinge Berkeley, to be Captain, without purchase, vice Brevet-Major the Earl of Longford, deceased; March 28.

6th Dragoons—Captain Richard William Renshaw, from the 13th Light Dragoons, to be Captain, vice Clements, who exchanges; April 17.

9th Light Dragoons—Captain Henry Marshall, from the 17th Light Dragoons, to be Captain, vice Goldie, who exchanges; William Henry Lawrence, Gent., to be Cornet, by purchase, vice Bury, promoted; April 17.

10th Light Dragoons—Arthur Wyatt Edgell, Gent., to be Cornet, by purchase, vice Maunder, promoted; April 17.

13th Light Dragoons—Captain Henry Topham Clements, from the 6th Dragoons, to be Captain, vice Renshaw, who exchanges; April 17.

17th Light Dragoons—Captain James Goldie, from the 9th Light Dragoons, to be Captain, vice Marshall, who exchanges; Thomas Edmund Houghton, Gent., to be Cornet, by purchase, vice Scott, promoted; May 17.

18th Light Dragoons—Assistant-Surgeon Francis Collins, M.D., from the Staff, to be Assistant-Surgeon, vice Grant, who exchanges; April 17.

Military Train—Captain Daniel Antoine Baby, from the 28th Foot, to be Captain, vice Hutton, who exchanges; April 17.

Coldstream Regiment of Foot Guards—Lieutenant and Captain and Brevet-Major William Henry, Viscount Dangan, to be Captain and Lieut.-Colonel, by purchase, vice Cocks, who retires; Ensign and Lieutenant Richard Hasel Thursby, to be Lieutenant and Captain, by purchase, vice Viscount Dangan; Sir Edward Archibald Hamilton, Bart., to be Ensign and Lieutenant, by purchase, vice Thursby; April 17.

ROYAL ARTILLERY.—To be Colonels.

Brevet-Colonel Frederick Marow Eardley-Wilmot; April 1.
Brevet-Colonel James William Fitzmayer, C.B.; April 1.

To be Lieutenant-Colonels.

Brevet-Major Alfred Romaine Wragge, vice Eardley-Wilmot; April 1.
Brevet-Major Frederick William Haultain, vice Fitzmayer; April 1.
Brevet-Major Frederick John Travers; April 1.
Brevet-Lieutenant-Colonel Matthew Charles Dixon; April 1.
Brevet-Lieutenant-Colonel John Turner, C.B.; April 1.
Brevet-Major Edward Henry Fisher; April 1.

To be Captains.

Brevet-Lieutenant-Colonel Francis Cornwallis Maude, C.B., vice Wragge; April 1.
Second Captain Arthur William Twiss, vice Haultain; April 1.
Brevet-Major Reginald Curtis, vice Travers; April 1.
Second Captain Allan Sievwright, vice Dixon; April 1.
Second Captain Frederick Southcote Seale, vice Turner; April 1.
Second Captain John De Luttrell Saunderson, vice Fisher; April 1.
Brevet-Major Philip Dickson; April 1.
Second Captain Edward Jackson Bruce; April 1.
Brevet-Major William Powell Richards; April 1.
Brevet-Major John Edward Hope; April 1.
Brevet-Major Algernon Brendon; April 1.
Brevet-Major James De Havilland; April 1.
Second Captain George Allix Wilkinson; April 1.
Brevet-Major William Windham Augustus Lukin; April 1.
Brevet-Major Charles Edmund Walcott; April 1.
Brevet-Major Gronow Davis; April 1.
Brevet-Major Edgar Grantham Bredin; April 1.

To be Second Captains.

Lieutenant Maurice Henry Fitzmaurice, vice Maude; April 1.
Lieutenant Wilbraham Digby Milman, vice Twiss; April 1.
Lieutenant Henry Richmond Martin, vice Curtis; April 1.
Lieutenant William Alexander P. Wyllie, vice Sievwright; April 1.
Lieutenant Charles Gray Johnson, vice Seale; April 1.
Lieutenant Henry Cardew, vice Saunderson; April 1.
Lieutenant Horace Percival, vice Dickson; April 1.
Lieutenant Henry Thomas Arbuthnot, vice Bruce; April 1.
Lieutenant Robert Biddulph, vice Richards; April 1.
Lieutenant William Stirling, vice Hope; April 1.
Lieutenant Peter Edward Hill, vice Brendon; April 1.
Lieutenant Champagne L'Estrange, vice De Havilland; April 1.
Lieutenant Arthur Kennedy Rideout, vice Wilkinson; April 1.
Lieutenant William Henry Watson, vice Lukin; April 1.
Lieutenant Edward Chichester Bolton, vice Walcott; April 1.
Lieutenant Oliver Henry Atkins Nicolls, vice Davis; April 1.
Lieutenant James Barton, vice Bredin; April 1.
Lieutenant Charles James Hope Johnstone; April 1.
Lieutenant Benjamin Geale Humfrey; April 1.
Lieutenant Charles Watson Wilson; April 1.
Lieutenant Legh Delves Broughton; April 1.
Lieutenant George Albert Augustus Walker; April 1.
Lieutenant Francis Walter de Winton; April 1.
Lieutenant Augustus Henry Carr Hamilton; April 1.
Lieutenant Edmund Charles Cuthbert; April 1.
Lieutenant Pilkington Jackson; April 1.
Lieutenant Jervis Tucker; April 1.
Lieutenant Brymer Francis Schreiber; April 1.

COAST BRIGADE OF ARTILLERY.—To be Lieutenants.

Sergeant-Major Hugh Marshall; April 1.
Sergeant-Major John Taylor; April 1.
Sergeant-Major James Lumber McCallum; April 1.
Sergeant-Major William McKown; April 1.
Sergeant-Major George Montgomery; April 1.
Sergeant-Major William Robinson; April 1.
Sergeant-Major Joel Blades; April 1.
Sergeant John Ramsay; April 1.
Master-Gunner George Leeds; April 1.
Sergeant William Crawford; April 1.

To be Paymaster.

Major Charles South, from half-pay, Paymaster 20th Foot; April 1.

To be Quartermasters.

Sergeant-Major Henry Behenna; April 1.
Quartermaster-Sergeant David Hoge; April 1.

20th Foot—Andrew Halliday Hall, Gent., to be Ensign, by purchase, vice Humphrys, appointed to the 15th Light Dragoons; April 17.

25th Foot.—Ensign Ernest Henry Paul Vivian to be Lieutenant, by purchase, vice O'Malley, who retires; April 17. Lieutenant George Augustus Elliott to be Adjutant; April 1.

28th Foot—Captain Charles Frederick Hutton, from the Military Train, to be Captain, vice Baby, who exchanges; Lieutenant Charles George Mackenzie, to be Captain, by purchase, vice Brevet-Major Godley, who retires; Ensign and Adjutant Frederick Rance to have the rank of Lieutenant; Ensign Jerome O'Brien, to be Lieutenant, by purchase, vice Mackenzie; April 17.

30th Foot—Ollyett Woodhouse Brain, Gent., to be Ensign, by purchase, vice Glascott, promoted; April 17. Charles Henry Garnett, Gent., to be Ensign, by purchase, vice the Honourable L. W. H. Powys, promoted; April 18.

33rd Foot—Major and Brevet-Lieut.-Colonel Edward Westby Donovan, to be Lieut.-Colonel, without purchase, vice Brevet-Colonel John Douglas Johnstone, C.B., who retires upon full pay; Captain and Brevet-Major Thomas Wickham, to be Major, without purchase, vice Donovan; Lieutenant Arthur Edward Augustus Ellis, to be Captain, without purchase, vice Wickham; Ensign Murray Doveton Valentine Treasure Grant, to be Lieutenant, without purchase, vice Ellis; April 17.

52nd Foot—Quartermaster-Sergeant Henry Stokes to be Quartermaster, vice Knott, who retires upon half-pay; April 17.

57th Foot—Captain Charles John Clark, from the 100th Foot, to be Captain, vice Slade, who exchanges; April 17.

70th Foot—Harry Elderton Whidborne, Gent., to be Ensign, by purchase, vice Grierson, promoted; April 17.

81st Foot—William Augustus Claude Stuart-Menteth, Gent., to be Ensign, by purchase, vice Harle, appointed to the 13th Light Dragoons; April 17.

100th Foot—Captain Alfred Frederick Adolphus Slade, from the 57th Foot, to be Captain, vice Clark, who exchanges; April 17.

Rifle Brigade—Henry Arthur Lascelles, Gent., to be Ensign, by purchase, vice Fremantle, appointed to the 10th Light Dragoons; April 17.

STAFF.

Captain and Lieut.-Colonel Frederick Charles Arthur Stephenson, C.B., of the Scots Fusilier Guards, to be Deputy-Adjutant-General to Her Majesty's Forces serving in China; Jan. 1.

Major and Brevet-Lieut.-Colonel Kenneth Douglas Mackenzie, 92nd Foot, to be Deputy-Quartermaster-General to Her Majesty's Forces serving in China; Dec. 26.

CHAPLAIN'S DEPARTMENT.

The commission of the Rev. James Hamilton, Chaplain Fourth Class, to bear date 1st April, 1858, instead of 1st April, 1859, as stated in the *Gazette* of the latter date.

HOSPITAL STAFF.

Assistant-Surgeon Maximilian Grant, M.D., from the 18th Light Dragoons, to be Assistant-Surgeon, vice Collins, who exchanges; April 17.

BREVET.

Brevet-Colonel John Douglas Johnstone, C.B., retired full-pay, 33rd Foot, to be Major-General, the rank being honorary only; April 17.

Major Charles Gustavus Walsh, of the 14th Bengal Native Infantry, to be Lieut.-Colonel in the Army; July 20, 1858.

Major John Hennessy, of the 70th Bengal Native Infantry, to be Lieut.-Colonel in the Army; April 17.

Captain Joseph Cartmail, Paymaster on half-pay, 71st Foot, to have the honorary rank of Major; April 9.

Quartermaster William Knott, retired on half-pay, 52nd Foot, to have the honorary rank of Captain, under the Royal Warrant of 17th December, 1855; April 17.

The commission of Brevet-Lieut.-Colonel John Archibald Ballard, of the Bombay Engineers, as Brevet-Lieut.-Colonel to be antedated to the 7th Dec., 1858.

WAR OFFICE, PALL MALL, APRIL 20.

3rd Regiment of Dragoon Guards—Ensign George Francis Robertson, from the 91st Foot, to be Cornet, vice Van Cortlandt, promoted; April 20.

Military Train—The appointment of Captain Henry Miller, from half pay late Transport Corps, which appeared in the *Gazette* of the 20th December, 1859, to be antedated to the 4th November, 1859, such antedate to give no claim to back pay.

Coldstream Regiment of Foot Guards—Lieutenant and Captain Arthur James Fremantle to be Captain and Lieutenant-Colonel, by purchase, vice Brevet-Colonel F. W. H. the Earl of Westmoreland, C.B., who retires; Ensign and Lieutenant Norman Burnand to be Lieutenant and Captain, by purchase, vice Fremantle; Ensign George John FitzRoy Smyth, from the Rifle Brigade, to be Ensign and Lieutenant, by purchase, vice Burnand; Lieutenant and Captain William Frederick Ernest Seymour to be Adjutant, vice Fremantle, promoted; April 20.

7th Regiment of Foot—Ensign Arthur John Harrison to be Lieutenant, by purchase, vice Courtenay, who retires; April 20.

21st Foot—Ensign William Thorburn to be Lieutenant, by purchase, vice Donald, who retires; April 20.

31st Foot—Richard Horatio Townsend, Gent., to be Ensign, by purchase, vice Wood, promoted; April 20.

44th Foot—Lieutenant Elliott Arthur Raymond to be Captain, by purchase, vice Brevet Major Fletcher, who retires; Ensign Charles Elphinstone Rennie to be Lieutenant, by purchase, vice Raymond; Ensign Thomas Thompson Irvine, from the 97th Foot, to be Ensign, vice Rennie; April 20.

45th Foot—Captain Stephen Bilton Gordon, to be Major by purchase, vice Brevet Colonel Henry Anderson, who retires; Lieutenant Henry Safe Willoughby to be Captain by purchase, vice Gordon; Ensign William Kershaw to be Lieutenant, by purchase, vice Willoughby; April 20.

52nd Foot—Major William Harry, Earl of Errol, from half-pay Unattached, to be Major, vice Corbett, who exchanges; Captain James Johnes Bourchier, to be Major, by purchase, vice the Earl of Errol, who retires; Lieutenant George Cruden Fraser to be Captain, by purchase, vice Bourchier; Ensign Edmund Pakenham to be Lieutenant, by purchase, vice Fraser; William Barwell Browne Barwell, Gent., to be Ensign, by purchase, vice Pakenham, April 20.

60th Foot—Ensign Henry Richard Treeve, to be Lieutenant, without purchase, vice Carlisle, promoted; March 9. Clifford Fortescue Borrer, Gent., to be Ensign, by purchase, vice Treeve; April 20.

75th Foot—Ensign Henry O'Brien, to be Lieutenant, without purchase, vice Le Pelley, promoted; Oct. 7. Lieutenant Frederick Cornwall, to be Instructor of Musketry, vice Lieutenant Thomas Carlisle, who has resigned that appointment; Jan. 25.

83rd Foot—Captain William Surtees Cook, from half-pay Unattached, to be Captain, vice Molony, appointed to the Command of the Detachment of Troops in the Falkland Islands; Lieutenant Charles Clitherow Gore, to be Captain, by purchase, vice Cook, who retires; April 20.

Rifle Brigade—Ensign Archdale Robert Palmer, to be Lieutenant, by purchase, vice Pester, who retires; April 20.

3rd West India Regiment—St John Clarke, Gent., to be Ensign, without purchase, vice Murray, promoted; April 20.

DEPOT BATTALION.

Quartermaster Matthew Slattery, from the 58th Foot, to be Quartermaster, vice Thomas Moore, deceased; April 20.

FALKLAND ISLANDS.

Captain John Sharman Molony, from the 83rd Foot, to be Commanding Officer of Detachments of Troops, vice Abbott, who resigns that appointment and retires upon half-pay Unattached; April 20.

HOSPITAL STAFF.

Deputy Inspector-General James Edward Thomas Parratt, retired on half-pay, to have the honorary rank of Inspector General, in accordance with the Royal Warrant of Oct. 1, 1858; April 20.

BREVET.—To be Majors in the Army.

Captain William Surtees Cook, 83rd Foot; March 16, 1858.
Captain W. David Aitken, Bombay Artillery; July 20, 1858.
Captain Sir John Hill, Bart., 1st Bengal Cavalry; July 20, 1858.
Captain J. H. B. Dennis, 1st Bombay Light Cavalry; July 20, 1858.
Captain Charles R. Baugh, 9th Bombay Native Infantry; Dec. 7, 1858.
Captain Henry O. Mayne, 6th Madras Cavalry; Dec. 7, 1858.
Captain Alexander Carnegy, 31st Bombay Native Infantry; Dec. 7, 1858.
Captain George Smith, 2nd Bombay Light Cavalry; Dec. 7, 1858.
Captain W. G. G. Cumming, 17th Bombay Native Infantry; Dec. 7, 1858.
Captain W. F. Gordon, 1st Bombay European Regiment; April 20.

The undermentioned Paymasters to have the honorary rank of Major, under the provisions of the Royal Warrant of the 27th January, 1860:—

Paymaster William Henry Fitzgerald, of a Recruiting District; Jan. 1.
Paymaster Thomas Hanson Ratcliff, of the Royal Artillery; Jan. 10.

Digitized by Google

THE NAVY.

ADMIRALTY, APRIL 14.

PROMOTIONS AND APPOINTMENTS.—Second-Class Assistant-Engineer P. Greetram to the Fisgard, for charge of machinery of the Dart. Acting Third-Class Assistant-Engineers T. Spence to the Supply, H. H. Small to the Cumberland as supernumerary. Paymaster W. H. Thompson to the Jackal. Surgeons J. L. Palmer to the Chesapeake; K. Atkinson to the Jackal. Assistant-Surgeons C. F. Williams to the Wrangler; A. B. Johnson (acting), to the Cornwallis.

APRIL 16.—Second-Class Assistant-Engineers F. H. Hermann (confirmed) to the Opossum; E. T. Read to the Wellington, for charge of the machinery of the Charon.

Acting Third-Class Assistant-Engineer M. Baird to the Fisgard, for service in the Shamrock.

Paymasters E. Faulkner (additional) to the Asia; J. M. Lowray to the Bacchante.

Surgeon A. Brown to the Bacchante.

Clerk G. B. Wescott to the Bacchante.

Assistant-Clerk B. F. Meyer to the Bacchante.

APRIL 18.—Captain D. M'Leod Mackenzie to the Bacchante, commissioned as a flag-ship for foreign service.

Commander H. R. Wratislaw to the Ranger, commissioned.

Lieutenants J. H. Hatchard to the Implacable; H. T. Gammell to the Impregnable.

First-Class Assistant-Engineer T. A. Lewis to the Ranger; Second-Class Assistant-Engineer S. Windley to the Ranger; Third-Class Assistant-Engineer N. Stearn to the Asia, for service in the Osborne; Acting Third-Class Assistant-Engineer G. Park (b) to the Ranger.

Mates S. Long to the Bacchante, E. L. Green to the Royal Albert.

Assistant-Paymaster in Charge H. Somerville to the Ranger.

Midshipmen N. A. R. Spicer and J. C. Burnell to the Royal Albert, W. M. Mager to the Algiers, F. J. Easther to the Mersey, H. C. Kane to the Melpomene, R. G. Baker and W. G. Cocq to the Bacchante, H. D. Macorlay, to the Ariadne, R. B. Trollope to the Aboukir.

Naval Cadet H. P. Karney to the Bacchante.

APRIL 19.—APPOINTMENTS.—Masters. W. J. Olive, and F. W. Bateman (additional), to the Fisgard. Master's-Assistant J. E. Gage, to the Russell. Assistant-Surgeons P. Cowrie, to the impregnable; A. M'Bridge, to the Bacchante. Acting Assistant-Surgeon N. O. D. Parks to the Bacchante. Assistant-Clerks R. Dinwiddie, to the Victory, for the secretary's office; A. N. Irmes, to the Virago.

Alban, paddle, in No. 4 dock at Portsmouth, has no hands employed upon her at present, and from the state of her hull it is expected she will be broken up. This vessel was built as a 10-gun brig at Deptford; was afterwards lengthened and altered to a paddle steamer. She is of 405 tons burden, and 100-horse nominal power.

Albatross, 12, one of the old class of sailing sloops, will go into the dock at Chatham vacated by the Plover gun-boat, where she will be broken up.

Albion, 90. Measures are being adopted at Devonport to test the soundness of the timbers of the Albion.

Algiers. One of those cases which are now often witnessed in our naval ports occurred at Portsmouth on Wednesday, when one of the Algiers' crew, a "bounty" man, was discharged from the ship for "incompetency," amid the derision of the crew. The Algiers is a well-manned ship.

Arethusa, 50, was on Thursday brought up from Chatham Harbour to be taken into the dock vacated on the previous day by the line-of-battle screw steamer Rodney, 91. The Arethusa is to be considerably lengthened, in order to be converted into a 51-gun screw frigate.

Arrogant, 47, screw, Commander W. Edmonstone, was at Sierra Leone on the 22nd March.

Atalanta, 16, Commander Thomas M. S. Pasley, from the West Indies, having been descried becalmed outside Plymouth Sound on Saturday afternoon, the tug Zephyr was sent off to assist her in, when she saluted the flag of Port-Admiral Sir Barrington Reynolds, K.C.B., which was duly acknowledged by the Impregnable. The Atalanta left Antigua on the 15th of March, and has experienced a very favourable passage, with the wind ranging from north-west to south-west. The Atalanta was commissioned by her present commander, May 26, 1856, and has been constantly employed on the North America and West India station; she is reported to be in first-rate condition. During the commission she has lost three officers by death, viz., Mr. Norman, master, October 26, 1856; Mr. Kerr, Assistant-Surgeon, February 4, 1859; and Mr. Creak, master, in September, 1859. Mr. Nicholson was appointed master of the Atalanta, but died before joining.

Bacchante, 51, screw, was commissioned at Portsmouth, on Wednesday, by Captain Mackenzie, for the flag of Rear-Admiral Sir Thomas Maitland, C.B., the future Commander-in-Chief on the Pacific station. Mr. James W. Ozzard, we understand, will be Secretary to the Admiral.

Bann, steam surveying-vessel, Master James S. Wills commanding, making good defects at Devonport, will be ready to resume her station about the end of next month.

Bulldog, 6, paddle, fitting at Portsmouth, will go out to Spithead, to test her machinery, on the 23rd inst.

Donegal. Mr. George Lumb, gunner, of the Donegal, at Plymouth, was dismissed from the Navy on Tuesday by sentence of court-martial held on board the flag-ship Impregnable.

Duncan, 101, is in the steam-basin, Portsmouth, completing machinery.

Duke of Wellington. It is reported at Devonport that the screw steam-ship Duke of Wellington will go there to take the duty of the Royal Albert, and that a portion of the Royal Albert's crew will assist in navigating the Duke of Wellington to Devonport.

Edgar, 91, screw, Rear-Admiral J. E. Erskine, Capt. J. E. Katon. Further enquiries are going on respecting the late disturbances on board this ship, the result of which will be made known in a few days.

Euryalus, 51, screw, Capt. Tarleton, C.B. It is undertood that when she is completed she will proceed on a cruise to the Brazils and the Cape, and perhaps to China, to afford the young Prince Alfred an opportunity of visiting distant regions.

Forte, 51, screw, flag-ship of Rear-Admiral the Hon Sir Henry Keppel, K.C.B., Captain, E. W. Turnour, recently arrived at Portsmout on her way to the Cape of Good Hope station, has been found defective in her stern. She will be docked in No. 7 dock as soon as it is vacated by the Victoria.

Firebrand, 6, steam-vessel, Commander James Bruce, arrived at Spithead on Thursday last from Guernsey, having on board No. 1 and 7 batteries of the 10th Brigade Royal Artillery.

Hecate, steam-vessel, having undergone most complete repairs since her last term of commission on the slave preventive service, has been rigged, and is now ready for the pennant. She is to be re-commissioned in a few days.

Hero. The preparations for the reception of His Royal Highness the Prince of Wales on board this ship are progressing rapidly. The prince will occupy the captain's cabins, which will be upholstered and fitted up by Mr. Wakeling of Soho. Cabins are in course of construction on the upper deck under the poop on each side; one is intended for the captain, and the other for some members of His Royal Highness's suite. The ward-room officers' mess will be removed, and will occupy half the gun-room. Cabins will be made in the ward-room for a portion of the suite on the port and starboard side of the deck as far as the after hatchway, just before the aftermost capstan leaving room for the capstan bars. The commander's cabin will be foremost on the starboard side. Some gun-carriages must necessarily be removed in consequence of these alterations, and the guns themselves will be stored fore-and-aft, and will probably be cased and used for seats.

Hornet, 17, screw. This vessel, which had suffered considerably from the ravages of the *Teredo navalis*, is now completely repaired. Her machinery is in the hands of the steam-factory artisans at Portsmouth.

Indus, 78, Captain, Hall, C.B., was removed on Tuesday from Devonport Dockyard to the sheer hulk, and had her masts and bowsprit taken out; she was then brought again alongside the dockyard, where her crew were paid off.

Medusa, 4, steam-vessel, Commander W. Bowden. From advices received from this ship dated the 3rd of April, her arrival in England is hourly expected.

Melpomene, 51, Captain Charles F. Ewart, got up steam in Plymouth Sound on Tuesday, and went into Hamoaze to be fitted for the flag of Vice-Admiral Sir W. F. Martin, the recently appointed Commander-in-Chief in the Mediterranean.

Nelson, 91, screw, will test her machinery shortly in the steam-basin, Portsmouth.

Neptune is reported as nearly complete in her engines.

Nile. The funnel was raised on Tuesday, preparatory to her early departure for Bermuda from Plymouth. Mr. Richard Parkins, gunner, of this ship, tried by court-martial at Plymouth on Monday on a charge of drunkenness, pleaded guilty, and was sentenced to be dismissed from the Nile, and to be reduced to the rank of gunner of the third-class. The successor of George Lumbe, gunner (dismissed by court-martial from the service), joined the Nile in Plymouth Sound on Wednesday morning, and she got up steam immediately, tripped her anchor, and proceeded for her destination, Bermuda, with a fair wind from the eastward. On arrival at the West India station she will hoist the flag of Rear-Admiral Sir Alexander Milne, K.C.B.

Orlando. It is reported in Plymouth that the screw steam-frigate Orlando, 50, is about to be put in commission, and that Captain Parker will have the command.

Osborne, steam-yacht, Master-Commander G. H. K. Bower, has got up steam in the steam basin, for trial, and will shortly go out of harbour to test the super-heating boilers with which she is fitted.

Penguin, new contract-built screw steam gun-vessel, was taken into the North dock at the Devonport Dockyard on Tuesday, to be coppered, &c.

Princess Royal, 91. The repairs of this ship are nearly completed. It has been found necessary to fresh copper her forward and aft. She was coppered about seven years ago, and her midship section, although she has passed through a good deal of service, is yet quite sound. She was originally paid with Jeffery's marine glue, both on her sides and on her deck, which answered very well upon her deck but not upon her sides. We believe she is the only ship in the Navy upon which the experiment has ever been tried.

Prometheus, 5, steam-vessel, Lieut.-Commander T. B. Hollingsworth, was at Bathurst on the 26th March.

Ranger, screw gun-vessel, inspected by the Lords of the Admiralty last week, is ordered to be commissioned for service on the West Coast of Africa. She is now ready for the pennant, and is receiving her stores.

Rhadamanthus, paddle, Master Commander Sturdee, arrived at Portsmouth on Thursday morning from Woolwich, on her experimental trip, under the superintendence of Mr. John Dinnen, Admiralty inspector of machinery afloat. She brought round supernumeraries, &c., who were sent on board the Victory flagship.

Rodney, 91, screw, was on Wednesday floated out of No. 3 dock at Chatham, the tide having risen to the unexpected height of 16 feet 11 inches. The ship is coppered up to her load mark, and she is now moored alongside the sheer hulk. The Rodney has left Chatham to-day for Folly Point, to mooring occupied by the Goliath, 80.

Royal Albert, 121, Captain Henry J. Lacon, was removed on Tuesday afteroon from Hamoaze into the lock at Keyham Steamyard, Plymouth. The wind was blowing very strongly from the eastward. Commander George Biddlecombe, additional assistant-master-attendant, took charge afloat, and, having a paddlewheel steam-tug on either side, advanced cautiously against the wind towards Keyham shortly after two o'clock. On nearing, a powerful warp was, under the instructions of Commander James Brown, master-attendant, connected with the ship and a capstan on the south side of the lock, and a smart gang of blue-jackets and marines having fitted the capstan bars, soon got a strain on her. Other warps were attached from the port bow to capstans on the north side, and guiding ropes being also fixed to both her quarters, she became, when the tugs cast off, completely under control ashore, and the huge mass, handled almost like a toy, was, without the slightest grating or collision, quietly lodged in the lock, in charge of the assistant-master-shipwright, Mr. Henry Peake, who, with his foreman, Mr. Rowe, was in attendance to receive her. After being relieved of some 300 tons of coal, she will be placed in dock for repair, and will be fitted with four new boilers. Nearly a month will elapse before she can leave the yard. The flag of Rear-Admiral of the Blue George Elliott continues flying at the mizen of the Royal Albert.

Styx, 6, Commander Charles Vasey, was appointed to leave Antigua on the 17th of March for Barbadoes.

Surprise, 4, Captain Lord Edward Cecil, now stripping in the basin at the Devonport Dockyard, and which arrived from the West Coast of Africa on the 12th inst. at Plymouth, sailed thence on the 4th of May, 1857, for China, with a convoy of gunboats, with which she arrived at Hongkong. She was present on the 28th of December, 1857, at the bombardment of Canton, and touching at Amoy, Ningpo, and Shanghai, was at the Peiho on the 23rd of May, 1858. On returning she called again at Ningpo and Hongkong, and went to the Isle of Ling Ting, where she was engaged with and captured 27 piratical junks. Thence she proceeded to Hongkong, Labuan, Moarra, and Bruni, the chief town of the island of Borneo, where the captain and officers visited the Sultan. On the homeward route she called at Sarawak, Singapore, and Penang, the Mauritius, the Cape of Good Hope, St. Paul de Loando, and Sierra Leone. Mr. Jones, previously senior-assistant, succeeded to the duty of chief-engineer on the death of Mr. F. R. Purchase, October 8th, 1858. The former master, Mr. Samuel C. Wayth, was invalided at the Cape of Good Hope, and died on his passage home in the hired troopship Princess Charlotte. Her present master is Mr. Charles G. Johnston. Captain Cresswell, who previously commanded the Surprise, left at the Cape of Good Hope, on promotion, and was succeeded by Lord Edward Cecil, who had been ordered out from England to take the command.

Terrible. The defects of the Terrible, 21, Capt. Frederick H. H. Glasse, C.B., in Plymouth Sound, will be made good there.

Thunderbolt, 16, floating battery, was on Wednesday taken into No. 2 dock at Chatham to undergo a careful survey, as a series of experiments are to be made upon her by the long-range guns of Armstrong and Whitworth, and two mortar boats were also taken into the same dock to be overhauled by the dockyard authorities.

Torch, 5, recently completed at Chatham, has proceeded on a trial-trip for the purpose of testing her engines and machinery, under the direction of Mr. T. Baker, chief-engineer, and inspector of machinery at Chatham Dockyard, and the officers connected with the master-shipwright's department. The course taken was round the Nore, to about five miles below the Nore light. The machinery was found to work exceedingly satisfactory and smoothly, the speed attained under a moderate pressure being 10 knots an hour. The Torch returned into Chatham Harbour at the termination of the trip, and will take up her place with the Steam Reserve.

Trincomalee, 24, is ordered to be brought up from the reserve in ordinary at Chatham, and taken into dock, in order to be fitted as a training ship for the Naval Coast Volunteers at Newcastle and Sunderland.

Victoria, 121, screw, has completed her coppering in No. 7 dock, Portsmouth; she was warped out on Friday week, but from the peculiar manner in which she is placed, ordinary tides will not lift her. She is reported to be nearly complete in her engine departments.

Victoria and Albert, Royal paddle-yacht, Captain Hon. Joseph Denman, arrived at Portsmouth on Thursday morning from her cruise to Gibraltar. She sailed from the Rock on her return voyage on the 9th inst., and called at Cadiz and Lisbon, leaving the latter place shortly after midnight on the 14th inst. Vigo and Ferrol were subsequently visited by the Royal yacht, but in crossing the Bay she unfortunately broke her port paddle-shaft. The wheel was secured, and the remainder of the voyage was made with the remaining wheel. The superheating gear which has been recently fitted to the yacht requires considerable modifications prior to its being possible to use it on board. It is stated to have choked the draught of the fires, prevented the generation of steam, and, worse than all, covered the quarter-deck with exhalations from the funnel. The behaviour of the yacht at sea, during the passage out and home, and with heavy weather, is spoken of by all on board with the greatest possible praise. It is stated that with a strong head wind she made thirteen knots with scarcely any motion, and nothing beyond an occasional slight shower of spray over her bows. Captain Matthew Connolly, late Flag-Captain to Rear-Admiral Mundy, came home passenger by the yacht from Gibraltar. The Victoria and Albert will go into the steam basin to receive a new shaft, and burnish up for summer service.

Vigilant, 6, screw, now undergoing extensive repairs in No. 5 dock, Portsmouth. She will be in the hands of the coppersmiths in a few days.

Virago, 6, Commander Montague B. Dunn, in Plymouth Sound, received on Saturday the men lent from the Sanspareil, 70, to navigate the Howe, 121, from Pembroke to Plymouth, and on Sunday morning sailed for Queenstown.

The Duke of Somerset, First Lord of the Admiralty, held a levée on Thursday, at which the following officers were present:—Admirals Sir William Gage, Sir Henry Leeke Bennett, and Mainwaring; Captains G. J. Napier, F. D. Stewart, W. H. Morshead, N. Boys, R. Douglas, and P. G. Haynes; Commanders G. M. Jackson, A. F. Ellis, T. Mitchell, M. E. Smithett, R. Dowes, T. G. Drake, J. L. Perry, E. Griffiths, Hon. M. H. Nelson, and J. Ballard; Lieut.-Colonel R. C. Spalding, Royal Marines; Lieutenants D. Herbert, J. Pollard, H. Ryves, T. A. Butler, E. E. Maunsell, and J. O'Reilly, and Mr. J. M'Donald, master, and Mr. James Tomlins, master.

The shipwrights at Chatham have commenced converting the frames and preparing the timbers for the three of the new screw steamers ordered to be built at this dockyard, viz., the Royal Oak, 91; the Belvidere, 91; and the Reindeer, 17.

A large number of naval officers assembled at the office of Admiral-Superintendent Sir John Pasley, in Devonport Dockyard on Friday, when, it is said, the subject of leave was discussed.

Eighty-four artisans and labourers were discharged from Devonport Dockyard on Saturday last, being the same number as on Saturday the 7th.

Digitized by Google

THE NAVY DURING THE LAST 100 YEARS

A return moved for by Mr. Horsman has been published, from which some interesting facts may be gleaned as to the increase and decrease of the naval estimates and naval strength of this country during the last 103 years. The return comprehends the periods between 1756 and 1859, during which time we were engaged in no less than thirteen wars,—viz., four with France, three with Spain, two with America, one with Holland, two with China, and one with Russia—and spent in naval estimates a collective sum of 795,497,113*l.* 10*s.* 7*d.*, or a larger amount than is at present represented by the national debt. While the strength of the Navy in men is not much above 5000 more than it was in 1756, the estimates of the two periods are very different, the estimates for 1756 being 3,349,021*l.* 3*s.*, and for 1859-60, 9,878,859*l.* We merely point out this vast discrepancy, as we are at the same time well aware that the increased expenditure in the present day for wear and tear by machinery, coals, superior armaments, and superior vessels is absolutely necessary. In the year 1756 the total number of men borne was 52,809, and the estimated expense 3,349,021*l.* 3*s.* For the next seven years, in consequence of the war with France, we find a vast increase in the number of seamen, insomuch that in 1762 the number borne was 84,797, and the estimates for the Navy 5,954,251*l.* 12*s.* 9*d.* Peace being proclaimed in 1764, this vast mass of men was reduced to 20,603, and the Navy estimates fell in like proportion to 2,094,800*l.* 9*s.* 3*d.*, these numbers being further reduced in 1768 to 15,511 men and 1,526,357*l.* 0*s.* 11*d.* This is the lowest point ever reached in our Naval estimates. On the breaking out of war with America in July, 1774, they again rose to the sum of 2,104,917*l.* 4*s.* 3*d.*, and gradually increased up to the conclusion of the war to 8,063,285*l.* 12*s.* 9*d.* with an increase of 105,443 men. During this period, however, it must not be forgotten that the country was involved at the same time in a struggle with France, Spain, Holland, and America. In 1782, on the recognition of American independence, and in 1783, on the conclusion of peace with Spain, France, and Holland, the estimates again fell, and continued to fluctuate between 2,000,000*l.* and 3,000,000*l.* sterling, with an average of about 25,000 men borne. The war of the French Revolution breaking out produced the ordinary effects, and the estimates rose as the funds fell. In 1793, when war was declared, the number of men borne was 59,042, and the estimates 3,971,915*l.* 5*s.* 10*d.*; in the next year they increased to 5,525,331*l.* 11*s.* 3*d.*, with an increased list of 83,891 men borne on the books. Stride by stride they advanced, until in 1801 they rose to the enormous sum of 16,857,037*l.* 0*s.* 2*d.*, when the number of seamen and marines was 131,959. On the conclusion of the peace of Amiens, they again, for a short time, fell; but the stirring events of the period, the unsettled condition of Europe, and the want of confidence in France, precluded them from finding a peace level, and, although there was a decrease of more than 6,000,000*l.*, yet they still remained 6,000,000*l.* above the estimates of 1793, when the war commenced. Then ensued the great war with France, from 1803 to 1815, when the naval expenses and naval strength of the country advanced with gigantic strides, so that for four years, viz., the years 1811-12-13-14, they were always over 20,000,000*l.*, and in the latter year reached the enormous sum of 23,504,070*l.* 19*s.* 11*d.*, with a force of 126,414 men, which force, however, was not equal to that of 1813, when our ships were manned by no fewer than 147,047 men. Down went these estimates again on the conclusion of the peace, and continued in that condition up to the pet year of the non-alarmists, who believe in the good intentions of every country but their own, when they were only 4,434,783*l.*, and provided for only 26,041 men. From that time they have progressively increased up to our own days. The Chinese war of 1840 seems to be guilty of this increase; for, although peace was concluded in 1842-3, the naval estimates only temporarily declined, to rise again with fresh vigour and culminate in the year 1856-7, when this country was at war with Russia. In that year they reached the sum of 16,568,614*l.*, and maintained a force of 60,659 seamen and marines. They again fell on the conclusion of peace to more than 6,000,000*l.*, and in the year 1858-9 were 9,878,859*l.*, of which but a comparatively small portion was expended on the pay and maintenance of 58,360 men. What effect the present Chinese entanglement will have upon them we must leave to the judgment of our readers.

It is a rather unusual sight to see five flag-ships in one port in time of peace! The following are, however, now at Portsmouth:—Victory, Vice-Admiral Henry William Bruce, Commander-in-Chief; St. Vincent, Rear-Admiral Hon. G. Grey, Admiral-Superintendent; Bacchante, Rear-Admiral Sir Thomas Maitland, C.B., Commander-in-Chief (Pacific); Forte, Rear-Admiral Hon. Sir Henry Keppel, K.C.B., Commander-in-Chief (Cape); Edgar, Rear-Admiral John Elphinston Erskine, second in command, Channel Squadron. The line-of-battle ships at Portsmouth are the Algiers, 91, screw, Captain George W. O. Callaghan; Asia, 84, sailing, Captain George T. Gordon; Britannia, 120, sailing, Captain Robert Harris; Colossus, 80, screw, Master William Ellis; Duke of Wellington, 131, screw, Master Robert C. Allen; Duncan, 101, screw, Chief Engineer W. G. Barr; Edgar, 91, screw, Captain James E. Katon (flag); Excellent, 104, sailing, Captain R. S. Hewlett (Queen Charlotte); Illustrious, 72, sailing, Commander H. C. Harston; Mars, 80, screw, Captain J. N. Strange; Nelson, 91, screw, Chief-Engineer, C. H. Houghton; Prince of Wales, 131, screw; Princess Royal, 91, screw, Chief-Engineer, W. G. Wratten; Queen, 86, screw, Captain C. F. Hillyar; Frederick William, 86, screw; Royal Sovereign, 131, screw, Chief-Engineer Robert Taylor; Victoria, 121, screw, Chief-Engineer William Eames; Victory, 101, sailing, Captain Coote (flag). The heavy frigates are the Ariadne, 26, screw, Captain E. W. Vansittart; Bacchante, 51, screw, Captain D. M. L. Mackenzie (flag); Euryalus, 51, screw, Captain J. W. Tarleton; Forte, 51, screw, Captain E. Turnour (flag); Immortalité, 51, screw; Mersey, 40, screw, Captain Henry Caldwell; Shannon, 51, screw, Chief-Engineer William Austen; Sutlej, 51, screw, Chief-Engineer Peter Wood. There are also screw and paddle corvettes, screw gunboats and mortar boats innumerable, and steam floating batteries.

LEAVE OF ABSENCE IN THE NAVY.

The following new regulations have been issued, in the hope that a termination may be put to the scenes which have been from time to time witnessed on board ships, to the disgrace of the Naval Administration, more than to that of those immediately engaged in the *emeutes:*

"ADMIRALTY, 11th April, 1860.

"On ordinary occasions on which leave of absence may be granted by the captains or commanding officers of any of Her Majesty's ships, it is to be limited to a period not exceeding forty-eight hours at any one time, agreeably to the existing regulations of the Service.

"Whenever ships may be ordered into port or anchorage, for the purpose of making good defects, which must unavoidably occupy time, or when, from other causes, the stay of ships in port must, probably, be prolonged, the Commander-in-Chief, at his discretion, may authorise the captain to extend the period of absence to four days, according to circumstances, for such number of men as can be conveniently spared, without risk of retarding the equipment of the ships, or of delay to other works which may be in progress.

"It is to be understood on board all ships arriving from sea, that neither officers nor men are to be permitted to proceed on leave of absence without express authority from the Commander-in-Chief at the port, or the senior officer present. And whenever officers' stewards or other persons may, on such occasions, be permitted to land, in order to procure refreshments, or for other temporary objects, during the day, they are, nevertheless, to sleep on board the ships to which they belong.

"When ships are ordered to be dismantled, preparatory to being put out of commission, the officers and crews are to be kept together until the work of dismantling is completed. Every care is to be taken that the pay-books, and all other documents necessary in such cases for the payment and final discharge of the crew, are completed at the same time with the other necessary work on board the ship; and it is only when the completion of these documents may be unavoidably delayed, and when the crew can no longer be profitably employed, that they are to be allowed to be absent, with the sanction of the Commander-in-Chief; and never in such cases for more than twenty-four hours, or beyond the time at which the payment may be expected.

"Leave of absence to be granted to men discharged to flag-ships when the ships to which they have belonged are ordered to be put out of commission, will be regulated as heretofore, by directions from the Lords Commissioners of the Admiralty, and their Lordships reserve to themselves to determine upon other occasions, in the home ports, according to the requirements of the Service, when more extended leave of absence to officers or men may be granted. In exceptional cases, however, such permission may be allowed to individuals by authority from the Commander-in-Chief.

"It is to be expected that under the foregoing regulations there will be sufficient latitude for every reasonable indulgence; and it is to be distinctly impressed upon the seamen of the fleet that no men in receipt of daily wages are entitled to be absent without authority.

"All captains and commanding officers are, therefore, strictly enjoined, that every person absent without leave from the ship to which he belongs is to be checked on the ship's books for pay on the day immediately following that on which his leave may have expired, and all such pay is to be forfeited, agreeably to the Act of 16 & 17 Vict., cap. 69, section 13, and to Circular Order, No. 121, unless satisfactory explanation is afforded to the senior officer present.

"All seamen proceeding on leave of absence are to be furnished with liberty passes, showing the date, and the hour of the day, on which their leave will have expired.

"All seamen, who may be absent without leave from ships under sailing orders, are to be discharged—'Rq.'—on the ship's books, and their pay is to be immediately stopped, as well as any allotment which may be in force, and lists of all men so absent are to be sent to the Accountant-General of the Navy immediately before sailing.

"In all cases in which men absent without leave from ships which may have put to sea, may either be apprehended or may voluntarily join the flag-ship, or any other ship, at any port, as stragglers or deserters from the ships to which they have properly belonged; their names, together with all charges as stragglers or as deserters, are to be entered on the books of such flag or other ship, and they are to be borne for victuals only, to wait a passage to join their proper ships. The ratings of petty-officers, in such cases, will be suspended, and they are never to be entered on board such flag-ship, or other ship, with any higher rating than that of A.B., and they are not to be discharged as part complement to any other than their proper ships, without express authority from the Lords Commissioners of the Admiralty. On reaching their proper ships they will be received as part complement in any rating that may be open at the discretion of the captain, but the "Rq." in such cases will never be removed, nor will arrears of pay be allowed, except upon such complete explanations from the captains of the ships to which they have belonged as may be entirely satisfactory to their lordships."

THE COAST DEFENCES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I cannot allow all the absurd proposals which are making, and finding favour with the authorities, respecting our coast defences, to go forth without adding my humble protest against such folly. Depend upon it that, with such a sea board as we have, our best defences are floating ones; and if one-half the money which would be required for fortifications, with all their expensive requirements to man and support them, was appropriated to the increase of our Navy, we might defy the world; but in making that increase, after maintaining a powerful channel fleet, eschew all line-of-battle ships—large flush-deck frigates with plenty of teazing powerful gunboats, armed with such guns and worked by such men as we could put into them, England would be prepared for all contingencies, however strong or combined the attacks may be against her. Sailors and Marines are Englands best defence. And this is the opinion of an

OLD SOLDIER.

THE MILITIA.

The Northumberland Light Infantry Militia will muster for 27 days' training at Alnwick on the 3rd of May. The Northumberland Artillery Militia will be inspected at Tynemouth Castle on Friday next. On Monday this regiment had some excellent target practice with shot and shell.

The Hertfordshire Militia will assemble for twenty-seven days training on Monday the 30th inst., under the command of Colonel the Marquis of Salisbury, K.G.

MILITIA GAZETTE.

WAR OFFICE, PALL MALL, APRIL 17.

Argyll and Bute Militia—John A Sellar, Gent., to be Lieutenant; April 12.

Warwickshire Militia—2nd Regiment—Ensign Edward Arnold Hill, to be Lieutenant, vice Ronalds, resigned; April 12.

Regiment of Royal London Militia—Lieutenant James Cunningham, to be Captain, vice William Henry Muloch Holmes, resigned; Lieutenant Augustus Henry Garland, to be Captain, vice Thomas William Andrews, deceased; Ensign William Henry Howes, to be Lieutenant, vice James Cunningham, promoted; Thomas Waterman, the younger, to be Ensign, vice Ernest William Roberts, deceased; John William Eaton Hale, to be Ensign, vice Augustus Newton, promoted; April 13.

Memorandum—4th Regiment of West York Militia—The Queen has been graciously pleased to accept the resignation of the Commissions held by Captain Henry William Pemberton and Assistant-Surgeon Alfred Beckett.

WAR OFFICE, PALL MALL, APRIL 20.

Cornwall Rangers Militia—Harry Reginald Salusbury Trelawny, Esq., to be Major, vice Messenger, deceased; Captain Samuel Borlase to be Major; Lieutenant David William Hicks John Horndon to be Captain, vice Borlase, promoted; Lieutenant Edward Collins to be Captain; April 11. Owen Henry Morshead, Gent., to be Ensign; April 9. Richard Hambley Andrew, Gent., to be Ensign; April 13.

3rd Regiment of the Duke of Lancaster's Own Militia—Captain Percy Godfrey Botfield Lake to be Adjutant, from the 1st of January, 1860; April 2.

Herefordshire Regiment of Militia—Thomas Bullock Webster, Gent., to be Quartermaster, from the 27th day of October, 1859.

East York Regiment of Militia—John Purcell, Gent., to be Quartermaster, from the 16th February, 1860; Feb. 24.

Memorandum.—Royal London Militia—Her Majesty's Commissioners of Lieutenancy of the City of London, have been pleased to accept the resignations of Captains Arthur Cumming Thomas Barrow and Frederick Peto, and of Lieutenants William Henry Emerson, Robert Harris Hardy, George Coulson Childs, and John Vause Monckton; also to supersede the Commission of Lieutenant Miles Fisher Mouckton; April 13.

Regiment of Royal London Militia.—Theobald Butler Aldwell, late Brevet Lieutenant Colonel Royal Jersey Milita, to be Captain, vice Arthur Cumming Thomas Barrow, resigned; April 13.

ROYAL NAVAL BENEVOLENT SOCIETY.

The quarterly meeting of this society, which was instituted in 1739, for affording relief to officers (being subscribers) of the Royal Navy, their widows, and families, under circumstance of misfortune and distress, was held on Monday, at the Thatched House Tavern, St. James's; Lord Colchester in the chair.

The minutes of the last meeting having been read and confirmed, the quarterly account of receipts and expenditure from the 1st of January to the 31st of March, 1860, was read, showing—Disbursements, 571*l.* 1*s.* 9*d.*; receipts (including balance brought forward on the 31st of December, 1859, 131*l.* 19*s.* 5*d.*), 1326*l.* 7*s.* 4*d.*, leaving a balance in favour of the society of 755*l.* 5*s.* 7*d.* A list of subscriptions was then read.

After transacting some formal business, the court proceeded to consider a notice given at the last meeting by Dr. Evans:—"With a view to render the reading of Rule 5 more clear and intelligible, I propose that in future it be worded as follows:—The widows and families of those officers who were not subscribers to this society at the time of their death are not eligible to be relieved from its funds; neither are the widows and families of subscribing officers who did not pay their subscriptions for the last three years of their lives eligible for relief, provided the officers held ward-room rank so long."

It appeared that counsel's opinion had been taken, which declared that no rules of a society of this character could be made retrospective, they must be prospective. A discussion followed of some length, and the motion being seconded by Captain J. Lewis, it resulted in the resolution being carried with one dissentient; and on the motion of Mr. Ellis the following words were added by way of a rider:—"But the law is not to have a retrospective effect with reference to the relatives of subscribers who died before the three years' clause was introduced on the 21st April, 1851."

The motion as thus amended, was put, and was carried unanimously.

The court distributed 400*l.* to about 80 applicants, and a vote of thanks to the noble chairman being carried, the court adjourned.

Sir Charles Napier has given notice in the House of Commons for an address to the Queen, with respect to the expediency of increasing the naval reserve.

Mr. Robert W. Drummond, Acting Assistant-Engineer Royal Navy, and who was received by the Steam Reserve at Portsmouth, from the Siren, on his dismissal from Her Majesty's steamer Oberon by court-martial, was on Wednesday dismissed from Her Majesty's Navy, by order of the Lords Commissioners of the Admiralty, as an habitual drunkard.

It has been already stated that the Emperor Napoleon had approved the model of a gunboat constructed on a system to be propelled without steam, and has ordered boats to be built on this plan. The power which is intended to be substituted for steam is hot air. It will produce as much rapidity and be far more economical than steam. It is calculated that the yearly saving in the cost of fuel for the French Navy will be about 80,000,000f.—indeed, that the combustible used for cooking on a voyoge will nearly suffice to propel the vessel, and boilers will be dispensed with It is said that the experiments have succeeded so well that in addition to the gunboats now nearly completed a large vessel, the Reine Hortense, will be fitted to receive the new machinery. The inventor of this power, which may effect another revolution in navigation, is a French engineer employed at Lyons. The machiney, which has been made at Lyons, is soon expected in Paris.

VOLUNTEERS.

METROPOLITAN.

Civil Service Volunteers.—On Saturday the Civil Service Brigade, composed of the Audit Office, Post Office, Whitehall, Inland Revenue, and Admiralty companies, assembled for parade in the court-yard of Somerset House, previous to proceeding to Wimbledon Common for battalion drill. Notwithstanding the wretched state of the weather more than three hundred men were present, and after inspection, marched across Waterloo Bridge to the station, accompanied by the band of the Grenadier Guards; whence they proceeded by special train to Putney. Having marched from Putney to Wimbledon, the regiment was wheeled on to the common, and put through various manœuvres by their Adjutant elect, Captain Ennis. These movements, which were performed in the pouring rain, were gone through with great steadiness and precision, and showed that an extraordinarily rapid progress has been made since the establishment of the corps. In entirely ignoring the bad weather this regiment exhibited a spirit of pluck, and a disregard of personal convenience, which might be beneficially imitated throughout the Volunteer Service.

H.M. Customs Volunteers.—On Thursday, this corps (the 26th Regiment of Middlesex Rifle Volunteers) paraded, after 4 o'clock, on the esplanade in front of the Custom-House, after which they marched out to the country, in command of Captain Hamel, the senior officer, on horseback, preceded by the band of the Scots Fusilier Guards. The halt was sounded at the Manor House, near Hornsey-wood, where an inscription on the wall states that "Ye Queene Victoria halted here," &c. After refreshment, they marched down the Seven Sisters road to Upper Tottenham, over Stamford Hill, through Stoke Newington, to the Newington railway station, landing at Fenchurch Street, and arriving at the Custom House about 9 o'clock, after a pleasant march, in spite of wind and weather, proving soldier-like qualities, enlivened by the excellent music of the Scots Fusiliers' band, which played during the whole march to and fro without intermission, except at the halt. The whole proceedings were admirably conducted by the officers, Regimental Sergeant-Major Freelove, and the drill-sergeants of the Fusiliers.

London Rifle Brigade.—A meeting of the council was held at head-quarters on Monday, Mr. Alderman Rose, vice-president, in the chair. A cheque for 150*l.* has been received from Mr. Alderman Challis on account of donations obtained in the Cripplegate ward towards the fund of the brigade. Other contributions were also announced. The number of effective members is now 1476, and the enrolment is steadily progressing.

The Queen's (Westminster) Rifle Volunteers.—On Sunday afternoon, the Queen's (Westminster) Rifle Volunteers, to the number of 500, attended Divine service in Westminster Abbey. The corps began to muster in Palace-yard at 2 o'clock, and, shortly before 3, marched to the Cathedral. It had been previously announced that the sermon would contain special reference to the Volunteer movement, and accordingly a very large congregation was attracted. The preacher was the Dean of Westminster, and he took for his text Ephesians, 6th chapter and 13th verse, "Wherefore take unto you the whole armour of God, that ye may be able to withstand in the evil day, and having done all to stand." Having dilated at some length on what the elements of national strength and weakness respectively were, the Dean said he accepted the Volunteer movement as one of the most happy tokens for good. He regarded it as a declaration that there were things dearer to Englishmen than case, comforts, luxuries, buying, selling, and getting gain. By the greatest of sacrifices, the liberties and blessings which England enjoyed had been gained, and he knew not what ignominy and scorn would be the portion of the men who betrayed and surrendered them.

GLOUCESTERSHIRE.

Cotswold (10th Gloucestershire Rifle) Volunteers,—This fine company, now considered one of the crack corps, paraded at the Queen's Hotel, Cheltenham, and then marched, 79 strong, to the Police Office, headed by the band of the South Gloucester Militia. After the ceremony of swearing-in had been gone through, the company were addressed by Colonel Newman, who said, in the most complimentary terms, that he had not yet seen so fine and soldierly a company. In the evening the Cotswolds gave a grand military ball at the Assembly Rooms to about 250 of the principal nobility, gentry, and tradesmen of the town. Everything went off with the greatest *éclât*, and the company did not disperse until 4 o'clock the next morning.

HAMPSHIRE.

South Hants.—A general meeting of the members of the South Hants Artillery and Rifle Corps was held in the reading-room, Bilterne, on Monday evening, Stuart Macnaughten, Esq., chairman of the committee, presiding. The chairman announced that Her Majesty had been graciously pleased to accept their services. The corps will consist of the First Hampshire Artillery Corps, and two companies of Rifle Volunteers, Nos. 8 and 9. A letter was read from Captain Grimstone, who had been previously recommended by the committee as Captain Commandant, stating that in consequence of being about to leave the neighbourhood he was under the necessity of resigning; whereupon Robert H. Richardson, Esq., of Heathfield, was unanimously recommended by the committee to supply the vacancy. Now that Her Majesty has been pleased to accept the services of the corps, the drills will be more frequent. Joseph P. Hoare, Esq., of Brownlow, has erected, at his individual expense, a shed on his estate for this purpose.

KENT.

Chatham.—The affairs of the 9th (Chatham) Company of Rifle Volunteers are, we are happy to say, now proceeding on an extremely satisfactory footing, everything being done by the members themselves to efface the unpleasant recollections of the late proceedings in connection with the corps. At a meeting of the effective and non-effective members held on Monday evening last, for the election of two officers, Mr. Charles Isaacs was unanimously nominated for lieutenant, and Mr. James Grover for ensign. The drills are now being carried on with much spirit, the effectives meeting at six o'clock in the morning on Chatham Lines, and at six o'clock in the evening at head-quarters. A testimonial is about to be presented to Mr. J. Budden, from the members of the corps, as a mark of the high esteem entertained for that gentleman, notwithstanding the refusal of Viscount Sydney to appoint him captain.

MIDDLESEX.

South Middlesex.—On Monday evening a public meeting of the Kensington companies of this corps was held, in the Norland School-room, Queen's Road, Notting Hill, for the purpose of promoting and explaining the objects of the corps. At half-past six the members, in full uniform, assembled at the Hon. Edward Curzon's, Scarsdale House, and proceeded to the place of meeting, headed by their excellent band. The chair was taken shortly after eight o'clock by the Hon. E. Curzon, supported by Viscount Ranelagh, Lieut. Colonel Evelyn, Hon. Colonel Vereker, Dr. Spicer, Dr. Truman, C. L. Webb, Esq., Messrs. Bathurst, White, Dunford, and others. There were also a large number of ladies among the general company, which was exceedingly large. The hon. chairman in opening the proceedings of the evening, highly applauded the efforts made by the inhabitants of Kensington in the formation of rifle corps. The first resolution, to the effect that the formation of efficient Volunteer corps was of the highest importance to the country, was moved by Dr. Truman, who in a very learned and eloquent address, advocated the formation of rifle corps, as the only real safeguard of the country in case of surprise, of which he cited several instances from ancient history. The motion was seconded by T. Bathurst, Esq., supported by Torrens M'Cullagh, Esq., and unanimously carried. The second resolution, moved by C. Locock Webb, Esq., and seconded by Dr. Turner Ryan, was as follows:—"That the arrangements of the Second or South Middlesex Rifle Volunteers, are best calculated for promoting the efficiency of Volunteers in this neighbourhood." This resolution was also carried with acclamation. It was further unanimously resolved, on the motion of Mr. M'Cullagh, seconded by Mr. Dunford, and supported by Colonel Evelyn, "That this meeting strongly recommend the inhabitants of this neighbourhood to form the North Kensington Company of the Second or South Middlesex Rifle Volunteers." A vote of thanks having been tendered to the hon. chairman, several new members were enrolled, and the proceedings terminated.

West Middlesex Rifles.—This rapidly increasing corps, numbers the full complement at present sanctioned by the War Office authorities, viz., 6 companies, and it has been determined by the council that the present Major-Commandant, Lord Radstock, should at once be recommended for the appointment of Lieut.-Colonel, his lordship having from the first formation of the corps taken an active interest in its advancement, and he has proved himself thoroughly competent to take the command. It is intended shortly to apply to the Secretary of War for the sanction of 8 companies, with 1 lieut.-colonel, 1 major, 1 adjutant, 8 captains, 8 lieutenants, and 8 ensigns. The council have also at the request of a great majority of the members nominated the Rev. J. E. Cox, M.A., for the appointment of Chaplain to the West Middlesex Rifles. The mode of appointment of subalterns to the various companies has given universal satisfaction, each company sending in the names of six members from which number the commanding officer and council will select 1 lieutenant and 1 ensign. The funds of the corps are in a most prosperous condition, there being at the present time upwards of 1800*l.* balance in hand. It is intended to considerably enlarge the original plan of the butt, and to erect the necessary buildings with every convenience for the deposit of arms, and for shelter in wet weather at the practice ground, Wormwood Scrubbs. The uniform of the corps having stood the test of upwards of two hours heavy rain without the least damage in appearance, and being perfectly waterproof, it is generally approved of by the members as being the most serviceable that could have been chosen. The whole uniform, consisting of tunic, trousers, forage-cap, waist-belt, cross-belt, pouches, and leggings can be obtained complete for 3*l.* 15*s.* from the regimental tailor to the corps. The members march every Tuesday evening from head-quarters to St. John's Wood Barracks, accompanied by their excellent Volunteer band, for parade.

YORKSHIRE.

East York.—The Hull battallion of this corps, headed by their splendid band, and commanded by Major Pease, attended Divine service, at the Holy Trinity Church, Hull, on Sunday, when the Rev. John Scott, M.A., chaplain to corps, delivered a most eloquent and impressive address. This battalion is rapidly improving in their drill and exercises, and presented a martial, soldier-like appearance.

Huddersfield.—On Tuesday morning at Huddersfield, John Brook (son of Mr. J. Brook, registrar for the Huddersfield district), sergeant in the 2nd Company of the Huddersfield Rifle Volunteers, was mysteriously shot in his father's mill, at Apsley, where he is overlooker. He was found in the engine-room, at a little past eight in the morning, sitting against a chest in a helpless condition. His rifle was lying beside him. A ball had entered his left breast just below the ribs, and had come out below his left shoulder-blade. No one was near him, and, as he is unable to give an account of the occurrence himself, it is left to conjecture how he received the wound. He called upon a friend the night before, and asked for a few cartridges, saying he was going to practice next morning; and it is known that on the same evening he took his rifle into the engine-room to dry it. He was immediately conveyed to his father's house, where he now lies in a dangerous condition.

The National Rifle Association.—The council of the National Rifle Association having resolved that the chief prize and the gold medal of the association shall be shot for by the Volunteers at the National Rifle Association meeting in July next, with a small bore rifle, at ranges of 800, 900, and 1000 yards, are anxious that the competitors should contend as far as possible on equal terms. This can only be effected by confining them to one description of arm; but before deciding upon it the council invite the gunmakers of the United Kingdom to a competition with rifles of a minimum bore of ·451, and of a maximum weight of 9½ lb., the pull of the trigger not being less than 3 lb. This competition will take place at Hythe on the 1st of May. The rifle that gives the best figure will then be selected, subject to the condition of the manufacturer undertaking to supply the required number of 40 within two months of that date, and of their being equal in quality to the one chosen.

The targets for rifle practice, which are manufactured and sold by Messrs. Richards & Co., of Bishopsgate Street, for the use of the Volunteer Corps, are made according to the Government regulation size, of very thick cast-iron, with 6-inch divisional lines for marking hits, and indented to prevent gliding off of bullets. They are so arranged that any number of them may be firmly fixed side by side, or they may be separated and used singly; and the various dimensions and other details, according to the particular class of practice for which they are required, are exactly observed according to the rules laid down in the official manual of "Field Exercise and Evolutions of Infantry."

VOLUNTEER GAZETTE.

WAR OFFICE, PALL MALL, April 17.

Denbighshire Rifle Volunteers—No. 1 Company—Thomas Eyton Jones, Gent., to be Honorary Assistant-Surgeon.

No. 2 Company—John Ingman, Gent., to be Honorary Assistant-Surgeon.

20th Subdivision—Bedford Wilde Kenyon, Esq., B.A., to be Lieutenant; George Turner, Gent., to be Ensign; Samuel Gould, Gent., to be Honorary-Assistant-Surgeon; April 11.

1st Warwickshire Rifle Volunteer Corps—Major John Williams Sanders, to be Lieutenant-Colonel; Captain James Oliver Mason, to be Major; April 14.

Worcestershire Rifle Volunteers—11th Company—Lewis Charles Henry Tongue, Esq., R.N., to be Ensign.

14th Company.—John de Poise Duriense Tyrel, Gent., to be Lieutenant; Edward Green, Gent., to be Ensign.

16th Company.—John Chambers, Gent., to be Lieutenant; Arthur Wright, Gent., to be Ensign.

15th North Riding of Yorkshire Rifle Volunteer Company—Roper Slote Donnison Rowe Roper, Esq., to be Captain; Leonard Jaques, Esq., to be Lieutenant; William Robinson, Gent., to be Ensign, April 16.

2nd Sussex Rifle Volunteer Corps—Ensign Rodolph Alexander Hankey, to be Lieutenant; April 12.

13th Norfolk Rifle Volunteers—The Right Honourable Edward Vernon, Lord Suffield, to be Lieutenant; Thomas Cremer, Gent., to be Ensign; April 16.

Robin Hood Rifle Volunteer Corps—William Tindal Robertson, M.D., to be Honorary Assistant-Surgeon; April 7.

Hunts Mounted Rifle Volunteers—His Grace the Duke of Manchester, late Grenadier Guards, to be Captain Commandant; Frederick Polhill Turner, late Captain 6th Dragoon Guards, to be Lieutenant; George Onslow Newton, late Captain, Huntingdonshire Militia, to be Cornet in the 1st Corps of Mounted Volunteers; April 14.

13th Derbyshire Rifle Volunteers—David Peter Evans, Esq., M.B., to be Honorary-Surgeon; the Reverend Robert Hey, Clerk, to be Honorary Chaplain; April 16.

1st Denbighshire Rifle Volunteers—Colin Napier, Gent., to be Ensign; April 12.

1st Subdivision—Ensign John Devereux Pugh to be Lieutenant; April 12.

2nd Denbighshire Rifle Volunteers—Richard Chambers Roberts, Gent., to be Lieutenant; John Jones, jun., to be Ensign; April 12.

3rd Argyllshire Rifle Volunteers—Lieut.-Colonel Charles A. Stewart, to be Captain-Commandant; Charles McTaggart, Esq., to be Captain; Duncan Ferguson, Gent., to be Lieutenant; Thomas Brown, Gent., to be Lieutenant: Charles Greenlees, Gent., to be Ensign; Thomas Greenlees, Gent., to be Ensign; John Piric, M.D., to be Assistant-Surgeon; April 16.

1st Company Ross-shire Artillery Volunteers—Donald Munro, Esq., to be Captain; James Robertson Mac Iver, Esq., to be First Lieutenant; Alexander Morison, Esq., to be Second Lieutenant; April 13.

Dundee Rifle Volunteer Corps—6th Company—George Cox, Esq., to be Captain; James Johnston, Esq., to be Lieutenant; Thomas Nicholson, jun., Esq., to be Ensign; Feb. 17.

7th Company—Oliver Gourlay Miller, Esq., to be Captain; David Barrie, Esq., to be Lieutenant; Alexander Kay, Esq., to be Ensign; Feb. 17.

8th Company—William Wylie Neish, Esq., to be Lieutenant; Herbert William Thain, Esq., to be Ensign; Feb. 17.

9th Company—Edward Guild, Esq., to be Captain; John Cunningham Kilgour, Esq., to be Lieutenant; Hugh Ballingall, Esq., to be Ensign; April 13.

5th Forfarshire Artillery Volunteers—David Johnston, Esq., to be Honorary Assistant-Surgeon; April 10.

5th Forfarshire Rifle Volunteers—Robert Henderson Arklay, Esq., to be Captain; Laurence Thomson, Esq., to be Lieutenant; Robert Taylor, Esq., to be Ensign; April 10.

Wigtonshire Rifle Volunteers—3rd Subdivision—Henry Stuart, Esq., to be Lieutenant; Edward James Stopford Blair, Esq., to be Ensign; March 22. James Strang More, M.D., to be Honorary Surgeon; April 11.

4th Subdivision—Hugh Dun Stewart, Esq., to be Ensign; James Drew Esq., to be Ensign; April 11.

4th Aberdeenshire Artillery Volunteers—William Forsyth, Esq., to be Captain; Andrew Jopp, Gent., to be First Lieutenant; William Ramage, Gent., to be Second Lieutenant; April 14.

7th Aberdeenshire Rifle Volunteers—William Dingwall Fordyce to be Lieutenant; William Johnston to be Ensign; April 12.

4th Lanarkshire Rifle Volunteers—(Glasgow 1st Northern Battalion)—Ensign David Winton to be Supernumerary Lieutenant; Ensign William G. Murray to be Supernumerary Lieutenant; April 16.

14th Lanarkshire Rifle Volunteers (Glasgow)—Alexander Macfie Smith, Esq., M.D., to be Honorary Assistant-Surgeon; April 17.

19th Lanarkshire Rifle Volunteers—(Glasgow 2nd Northern Battalion)—Robert Cross Aitken, Gent., to be Ensign, vice R. B. Rodger, promoted; April 16.

66th Lanarkshire Rifle Volunteers (Glasgow)—John Pattison, Gent., to be Lieutenant, vice J. G. Booth, resigned; April 16.

81st Lanarkshire Rifle Volunteers (Glasgow)—Graham Gilmour Esq., (late of the Royal London Militia), to be Captain; John Kennedy, Gent., to be Lieutenant; William Grant, Gent., to be Ensign; April 12.

MOUNTED RIFLEMEN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Much has been written in your journal respecting the organisation of mounted riflemen. Will you allow me, as a mounted rifleman of many years' standing and as one who has seen active service in that capacity, to say a few words on the subject?

Those who speak of mounted riflemen as "infantry mounted in order to move quickly," seem, if they think of the horse at all, to consider it in the light of a velocipede or such like machine, which requires no skill to ride or to manage, which requires neither to be fed, watered, nor shod, and which, on being dismounted, does not need being held, but stands quietly in any place where it may have been left until its rider returns to it.

Mounted riflemen, required as they are to ride over rough and broken ground often at the full speed of their horses, must be perfect horsemen, their unremitting attention must be given to their horses, which require cleaning, foraging, watering, shoeing, &c., just as much as those belonging to any other description of cavalry. Their horses requiring all these cares, it is impossible for mounted riflemen to absent themselves from them even for a few hours to act as infantry; and as to being temporarily dismounted when in action to do infantry service, I may offer the following remarks: out of a body of mounted riflemen but a small proportion could be so dismounted, a large portion being required with the horses to hold them and to keep them near to the combatants, while the rest protect the horseholders; the dismounted mounted-rifleman in this case, unlike the untrammeled infantry whose reserves can move over any ground accessible to man, must look to his horse as his base of operations; he cannot venture far on ground impracticable for cavalry, for he would risk being totally cut off from his horse, his aid in case of success, and his refuge in retreat; it will be seen, therefore, that the value of a body of mounted riflemen thus employed can be but small (the dismounted portion not being so efficient as infantry, and the rest, incumbered with the horses, being obliged to remain passive), so that occasions rarely occur when it would be advisable to dismount and detach a few men. It does happen however, now and then, that such a course is necessary,—as, for instance, when it is required to make a dash for some position held by a few infantry, but inaccessible to cavalry. In these cases the party employed must return to their horses immediately the service has been performed.

I may add, in conclusion, that I have served upwards of two years in the field against an enemy with mounted riflemen, in an excessively intricate country, and remember but two occasions during the whole of that time in which some men, and those but a handful, were separated some minutes from their horses.

C. H. B.

THE VOLUNTEER SALUTE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Your correspondent "J. S. P.," in last week's Gazette, disposes of the officers in the Volunteer corps in a decided and truely military spirit, and, in his estimation, they should sink into insignificance after the Royal reception. I feel confident, however, that it is not the wish of one of the members of the Volunteer forces that their officers should be treated with less respect than is shown to the officers of the regular Army. Why the necessity for a recognition of the officer by the soldier in the regular Army, and the non-observance of the same relative position (whilst on duty) in the Volunteer force, is not exactly clear to me. The duties are analogous, and the commands of the officers are as readily responded to amongst the Volunteers as in the permanent Service. The salute is merely a matter of discipline in both Services. It is not the individual it is intended for so much as the Queen's uniform that covers him. It is true that the Volunteers as a rule, "are all from the same socia lclass," but this fact does not lessen the importance of preserving proper discipline; and surely the recognition of an officer chosen to command is as imperative on the Volunteer as on the regular; there is nothing derogatory in the act; courtesy would dictate it, if discipline did not. It is, I think, very desirable that the question of the military salute should be decided by the Commander-in-Chief, and promulgated to the Army, as the manner in which Volunteer officers are treated in the garrison to which I belong is anything but pleasant to those concerned. If those officers are not entitled to a salute from soldiers in the regular Army, let it be so understood; but if they are, then perhaps such a decision might prevent the non-commissioned officers and privates in the regular Army from staring with a contemptuous look when an officer approaches, a fact in itself most likely to render unpopular the Volunteer movement, and deter many from offering their services to their country when the position of their officers is not properly supported.

W. S. T.

VOLUNTEER ADJUTANTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I beg to draw your attention to paragraph No. 6 of War-Office Circular, relating to pay and allowances of adjutants to Volunteer Regiments, the latter part of which states, "Any other incidental expenses must be borne by the corps."

If "incidental expenses" are to mean allowance for lodging, light, &c., similar to that received by adjutants of Militia, the sooner such an arrangement is clearly understood to be the order of the day the better; for, otherwise, adjutants to Volunteer Regiments will find themselves, especially in country districts, not allowed "to follow any other profession or hold any other appointment, public or private," for the very liberal allowance of 8s. per day, out of which, after paying house-rent and washing-bills, where will be the balance credit?

As a rule, it does not at present seem to be understood that the Volunteer Service will be expected to provide for the lodging, &c., of the different adjutants employed; therefore, if you will inform me upon this point, you will oblige, yours, &c.

Live and Let Live.

THE INDIAN NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Having observed several communications in your paper relative to H.M.'s Indian Navy, and a rumour of a proposed radical change in the constitution of that Service, embracing the alternatives of total abolition, or amalgamation with the Royal Navy—as one interested in the welfare of this little Service, I beg to solicit your kind and powerful assistance in placing before the public a few remarks on its latter day achievements, which may be interesting at a period when the Service has arrived at a critical point of its career.

As a Service, it is literally unknown in the Western hemisphere; but if it has ever been alluded to by the British press, it has been in connection with some notable success, amply justifying the confidence at all times placed in it by the Government of India.

Sir, it is this little (by circumstances *obscured*) service, which, by the patient energy of its officers, toiling year after year in a tropical climate, has all but completed the splendid surveys of the Indian seas from Singapore to Suez, that in the China war of 1842-43 was proud to number in its squadron the little Medusa, which under the late gallant Commander Hewett, rivalled the far-famed Nemesis in her exploits, which were suitably acknowledged by the Chinese mercantile community. In 1849, its blue jacket batteries crumbled the walls of Moultan, to the admiration of the general commanding and engineering staff, ere yet Sebastopol and the Diamond battery loomed on the political horizon. In the Burmese War its squadron crushed the stockades of Rangoon, on Easter Sunday of 1852, and on successive days and nights poured red-hot hollow shot, from 8-inch guns, upon the devoted town, a thing unparalleled in the history of naval gunnery, and entirely originated by the scientific skill and experimental perseverance of Captain C. D. Campbell, then commanding the steam frigate Sesostris. In the late Persian war, where this Service was exclusively employed, the squadron so effectively did its work at Mohummerah, in the face of formidable difficulties, that, in the words of the late lamented Havelock (*vide* his published letters), "the gentlemen in blue had it all to themselves, and left us nought to do."

Passing to the great mutiny of 1857, little is it known at home that, when all England rang (and right deservedly) with the name of the gallant William Peel and his Shannons, another naval brigade, amounting in force to 2000 men, were day by day gradually raised and despatched up country, under the command of Indian naval officers, and dispersed over a wide extent of country for the protection of districts, where the great exigencies of that critical period would not permit of troops being spared to operate.

I wish particularly to give the following brief account of two remarkable actions of a small body of this brigade, as to enter into a detail of the whole of their services during the mutiny would be impossible.

On the 22nd November, 1857, No. 4 division of the brigade, comprising 86 men and officers, Lieutenant Lewis, H. M.'s Indian Navy, commanding, attacked the mutineers of Dacca, consisting of 276 men, 73rd Bengal Native Infantry, with a party of native artillerymen and two 6-pounder guns, posted ready for action in a strongly-fortified position called the Lall Bagh. The brigade charged under a shower of grape and canister (the guns commanding the only approach) with a cross-fire of musketry from loopholed verandahs, doors, and windows; forced the rebels successively from nine strong brick-built barracks and two mosques, driving them out with the bayonet, fighting desperately from post to post, charged up to the muzzle of their guns, took them, and finally drove the enemy headlong into the jungle with the loss of 70 killed and wounded, 41 of whom were left dead in the barracks or on the parade ground. The brigade lost 19 killed and wounded. This action, it is to be observed, entirely broke up an intended junction of the mutineers with those of the 34th B.N.I. at Chittagong, who had mutinied, and were at this very time marching on Dacca. Having received the news of the action, they halted irresolutely; tried to cross the river above Dacca; were opposed by a gun-boat judiciously despatched by Lieutenant Lewis for that express purpose; and finally dispersed into the jungles, where they perished miserably for want of food, or were hunted down by the Sylhet light infantry. If the brigade had been repulsed in their attack on the mutineers' position, and had been obliged to retreat, not a man would probably have escaped alive, for in their rear lay the city of Dacca, with a large population in a very excited state, ready to act upon the offensive on any reverse taking place.

I have thus, sir, attempted to narrate two of the most remarkable of the many actions of this almost unknown brigade, but which nevertheless did the State service during a sore time of trial. Raised on an emergency, when dark panic brooded over India, and British blood and sinew, and above all, British hearts, were as miser's gold; these 2000 blue jackets, did such feats as above recorded; garrisoned forts, manned field-batteries, cut through jungles, chased the rebels to their most secret lurking-places, though decimated with jungle fever and privation, and guarded and passed large convoys of stores to remote districts in the height of the monsoon, by roads perfectly impracticable to any not possessed of the resources of British seamen.

Before concluding, I think it necessary to observe with regard to H.M.'s Indian Navy, and its peculiar constitution as a seniority service, that the officer whose particular and certainly distinguished services I have alluded to in this letter, is still simply *what he was* before the formation of the brigade—Lieutenant Lewis. Now, Lieutenant Vaughan of the Shannon of 1857, who took the second detachment of the Naval Brigade from that vessel, up country, is now Captain Vaughan, C.B., of 1859. It will be easily understood I speak not disparagingly of this officer's services, but merely to show the contrast between the two Navies as to the rewards of distinguished merit.

Without entering into the question of the ultimate destiny of the Service, its abolition or amalgamation, &c. (the pros and cons of which seem to be discussed *con amore* in the communications I have observed in your paper), I believe I may venture to state in conclusion, that the feeling of the majority of the officers of the Indian Navy on the above points is much to the following effect: that, if the hour of its abolition approaches, the little Indian Navy looks to the country for a parting and graceful acknowledgment of its services, in the shape of a scale of pension proportionate to sacrifice of prospects;—if a mere change of constitution is contemplated, it only asks that its officers' interests should be protected and respected, and reform do its spiriting gently, for there is no interest (parliamentary or otherwise) to stand up for it in its need. That such may be the result, is the sincere desire of

A Well-Wisher to H.M.'s Indian Navy.

Army Pensioners' Society.—The following General Order, relating to this society, established for the purpose of providing situations for all Pensioners of good character discharged from Her Majesty's naval and mititary forces, has lately been issued from the Adjutant-General's Office, Horse Guards:—"Horse Guards, March 22.—Sir, I am directed by His Royal Highness the General Commanding-in-Chief to call your attention, and that of the officers under your command, to the Army and Navy Pensioners' Employment Society, which has lately been reconstituted, under the management of a committee of officers representing every branch of the Service. His Royal Highness considers the objects of the society to be excellent; and that its results cannot fail to exercise a beneficial influence both on the present soldiers and those classes from which they are recruited. The support which Her Most Gracious Majesty has given to the institution since its formation will be an additional recommendation to all who have the interests of her service at heart; and His Royal Highness will be glad to secure for the society that co-operation on the part of yourself and the officers under your command which will so materially contribute to its success, by the occasional transmission of the enclosed form of return.—To the officer commanding —— Regiment."

MILITARY UNIFORMS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The statement, in your GAZETTE of last week, that an alteration is to be made in the dress of the Military Train, offers an opportunity to refer to the very meagre dress given to the officers of the Line. There are so many erroneous notions abroad with respect to the Army that it is necessary to state, that neither officers nor men are indifferent on the subject of the uniform they wear. The better uniform a soldier has, the more pride he takes in his profession. Nothing has a more military appearance than a broad red stripe down the trowsers; nothing looks so scanty and meagre as the present thin stripe given to the Line. The former may be too expensive to furnish to the privates, but it would be a great improvement to the dress of the officers. Another improvement would be the green plume in the chaco; it is at present worn only by light infantry regiments; but this is a title *par excellence* that should now be obsolete. Every regiment is a light infantry regiment, every regiment is a rifle regiment; they all go through the same identical drill. The green plume would be of positive benefit in active service; the waving of it, by the wind or the movement of the soldiers, would distract many a deadly aim on the part of the enemy: that is why, I presume, it has been given to "light infantry regiments;" but every regiment is liable to be called upon to throw out skirmishers in action. Considering the distance at which shots are now taken, the plume would be of the greatest service in distracting the aim; its appearance, too, is far superior to the white ball on the chaco, which, like the bright silver ornament on the pouch belt of the Rifles, seems expressly made for a bull's-eye to an enemy. With respect to the term, "Rifle Regiments," the only way to have a real rifle regiment would be to send all—or a certain proportion—of the best shots in a regiment to form a Rifle Corps of as many battalions as was deemed necessary.—I am, sir, your obedient servant,

CHACO.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s*. 6*d*. per quarter, or 26*s*. per annum, payable in advance; and the postage—uniformly 1*d*. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

AGENTS FOR INDIA.

R. C. LEPAGE & CO., CALCUTTA.—Subscription, 20 Rupees per annum, including Postage, payable in advance.

MR. ALBERT SMITH'S MONT BLANC IS NOW OPEN EVERY NIGHT (but Saturday) at Eight o'clock; and TUESDAY and SATURDAY AFTERNOONS at Three o'clock.—Stalls, 3*s*., (which can be taken at the Box-office, Egyptian Hall, daily from eleven till five); area, 2*s*.; gallery, 1*s*.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly. Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence.

The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MAYALL's PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum*.

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

DOUDNEY & SONS' RIFLE SUITS.—1ST SURREY, 4*l*. 2*s*.; SOUTH MIDDLESEX, 4*l*. 10*s*.; RIFLE BRIGADE, 4*l*.—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s*. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:
1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.
2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS SUPPLIED WITH EVERY REQUISITE.

Bass Drums, 32 inches	£4 4 0
Tenor Drums, 20 inches, transparent heads	2 7 0
Brass Side Drums, 14 inches	1 8 0
Regulation Drums, brazed shell, as supplied to the Army	2 2 0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2 5 0
Oak (polished) Side Drum, 14 inches	1 5 0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0 8 6
D or E flat ditto	0 6 6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1 1 0
No. 2, Light Infantry Model	1 8 0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l*. 4*s*. Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l*. 12*s*. Mappins' Travelling Dressing Bag for Ladies, 4*l*. 4*s*. The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 5*s*. 6*d*., 10*s*. 6*d*., and 21*s*. at UNWIN & ALBERT'S, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, APRIL 21, 1860.

The old playwright who won the *plausus theatri* by putting into the mouth of a slave a claim to participate in all the sensations common to humanity, was probably as fond of the brutal excitements of the arena as any fine gentleman of the time. He lived in days when people admitted they had backs to their heads, and when the influence of animal passions was not questioned by the smallest and most eccentric school of philosophers. No one indeed has ever maintained, as far as we know, that all mankind were, or could be, placed by any amount of education or civilisation on a dead level of moral excellence; but it certainly has been maintained that man may be unmanned by training and culture so completely that he shall lose all admiration for physical force, all pleasure in the exhibition of its results, and become quite indifferent to any gladiatorial display, except such a one as may be witnessed in a collision of opinions in the maintenance of theses, or in a debate in a legislative assembly. There are no such men in Great Britain. It may be that we are not yet as civilised as our neighbours, but English-speaking races, here or in America, are still admirers of physical courage and calm endurance of suffering, to such an extent that we doubt if there was an educated gentleman who did not read some account of the fight this week, or evince some little anxiety as to the general results, even though he might be disgusted with the details of the contest. In the leading journal, last Wednesday, there were reports of two gladiatorial displays, one moral, the other physical. In a speech which occupied more than three columns of the *Times*, Mr. Gladstone, with marvellous ingenuity, fertility, eloquence, and research, expatiated on the advantages of education, learning, and self-control, and on the delights of philosophy; and fervid with faith and high purpose, indicated, in language of exceeding beauty and power, the ineffable happiness which accompanies and will await the man who follows the pleasant paths of learning and virtue. In the same journal there is about the same space taken up with an admirable account of the fight between Mr. Heenan and Mr. Sayers, and of the wonderful way in which they contended against each other—of the blows, of the injuries, and of the bloodlettings—of the lumps of shining muscle, of the polished skins of the antagonists, all faithfully and graphically done into English. "'Tis true, 'tis pity—pity 'tis 'tis true," that, owing to the backs of their heads, all the world read the account of the fight in preference to the speech of Mr. Gladstone. We do not mean to say that mankind were attracted by the description of mere muscle and blows and wounds, but that they were entranced by the account of the qualities—moral if you will—which characterised the men in the great but unequal contest. We see Mr. Heenan, like some giant gladiator, confident in youth, surpassing strength, magnificent proportions, and long training, stand up before us heaving out his polished ribs, and slowly winding his arms, through which glide the snake-like muscles, up and down, beneath the glowing skin at every movement. To him, with the sun in his eyes, rises up—shorter by head and shoulders—Mr. Sayers, lean and mulatto-skinned, and slight of limb. But he is the Champion of England—not, indeed, a Marmion or a Dymoke—the legalised representative of knight service or chivalry, but the best man of those who contend in prize-fights as a regular recreation, and who are supposed to be the guardians of a species of manliness, and the janissaries of the temple which is raised in our cities to the noble art of self-defence.

In two hours the youthful giant is a frightful object, blinded, bloody, infuriated as a wild beast, bellowing with rage, striking right and left, friends and foes—his fair hide covered with blackened weals, his hands puffed with dealing heavy blows, hideous gashes on his face—the centre of a yelling maddened crowd, among whom we are assured there were authors, poets, lawyers, doctors, and "even clergymen."

In two hours too the veteran prize-fighter who has been struck down again and again, as though dashed out of a catapult, is lying across the ropes all but strangled to death, and black in the face, with one arm disabled, but still ready to finish the work of blinding his antagonist with that well-trained arm which had so well carried out—*mancus inutili dextra*—the working of his undaunted heart and iron resolution. Was not this a revolting spectacle? Why do we not turn the page, and read the honeyed harmonious sentences, soft as the breath of the flute, where Mr. Gladstone speaks of a very different contest engaged in by men, who are "fighting with a mature and manful courage the battle of life?" He speaks of those who, "when they feel themselves lonely amidst the crowd—when they are for a moment disheartened by that difficulty which is the rude and rocking-cradle of every kind of excellence—when they are conscious of the pinch of poverty and self-denial, should be conscious that a sleepless eye is watching them from above, that their honest efforts are assisted, their humble prayers are heard, and all things are working together for their good. Is not this (he asks) the life of faith which walks by your side from your rising in the morning to your lying down at night—which lights up for you the cheerless world, and transfigures all that you encounter, whatever be its outward form, with hues brought down from heaven?" But, we were rather bent on considering the material struggle, where the hues are certainly not brought down from heaven. To the youth of Scotland Mr. Gladstone says: "You are all in training here for educated life, for the higher forms of mental experience, for circles limited, perhaps, but yet circles of social influence and leadership."

But the training of which most of us thought last Wednesday was that of water gruel or milling a sack; and our "circles of social influence" were prize rings. We are held by a new Διομεδους Αριστεια, and by the deeds of one to whom the goddess "Pluck," δῶκε μενος καὶ θάρσος ἰν' ἐκδηλος μετὰ πᾶσιν Αργεοισι γένοιτο ——

We are, in fact, spite of the brutality of the exhibition itself, forced to admire the power of mind over matter, and to recognise in Mr. Sayers, even on the verge of defeat, the same qualities as those which animated the Guards in the fight on the slopes of Inkermann against the Russian giant.

Will Manchester consider these things? We don't allude to Mr. Bright; for no one can believe for a moment that he was not one of the most anxious men in England to read the account of the battle, even though he hid the paper in the crown of his hat, and we are not sure he was not present in the flesh;—we mean the peace people, who will ignore the existence of the backs of their heads, and who will insist on it that mankind are not to be excited to fight unless by some unfair influences.

If it be beyond the philosophy of the men of peace to recognise the real influences, they are above or below humanity itself, and are unfit to take part in the government of the world. We regret, with them, that there should be any necessity for fleets or standing armies. We are sorry that the spectacle of two human beings pounding each other to death should be a source of pleasurable excitement to their fellow-men; but we accept the facts as they are—we cannot get rid of soldiers and sailors just yet—we must continue to bear the disadvantages arising from our having backs to our heads.

We fear that some of the administrative changes in the organisation of the Army made since the Crimean war have not quite answered the expectations of those by whom they were originated. It has often been said, and we believe with great truth, that the most unexceptionable part of our military machinery was the regimental system, and as regards young officers the regimental system has received a discouraging blow by the creation of the Depôt Battalions. The subject is to be brought before Parliament during the ensuing week by the Earl of Lucan, who is to call the attention of the House of Lords to the organisation of the infantry. Although Lord Lucan is a cavalry officer, he is yet a sound practical man, well informed upon all points relating to the other branches of his profession; and we are glad to find that he is about to direct public attention to the subject.

The institution of Depôt Battalions unquestionably was calculated to have a beneficial influence upon the men. The old two-company depôt arrangement could not be expected to bring forward recruits in their drill so quickly as a well-organised battalion with a permanent staff; and in this respect we should not seek to disturb the arrangements made at the conclusion of the Crimean war. With the young officers joining for the first time, we fear that the Depôt Battalion is the reverse of beneficial as regards its

Digitized by Google

effect upon their future military life. The first few months spent in the Army exercises an important influence on their career; and we can hardly imagine any contrivance more likely to make that influence of a sinister character than a Depôt Battalion. The field officers are, as a general rule, married men, not dining at mess, and in no wise interested in doing more than the letter of their duty prescribes, as regards the ensigns who have just joined. The regimental captains and lieutenants present are, generally speaking, few in number, and not improbably in the same category as the field-officers as regards their relinquishment of a state of single blessedness. The consequence is that a number of lads who have just been liberated from the restraint of home or a public school, in all the pride of the first enjoyment of Her Majesty's Commission, and as yet untaught the lessons which social experience of some duration can alone impart, are collected together and practically left to do as they please, as long as duties and parade are not neglected. In a regiment, the case is widely different. There, there is a kind of family bond of union, an interest in each youth who joins, a desire that he should be worthy of the corps; and the great body of the officers are men of knowledge and experience. The new ensign becomes at once a permanent part of the concern, not a temporary sojourner, as he is at the Depôt Battalion, and the effect upon him is proportionably advantageous.

It may be urged that there are difficulties in the way of so arranging matters that an officer should be made to join the head-quarters of his regiment at once without passing through the intermediate stage of the Depôt. A regiment may be in the field in India, or it may be on a long march; but we should propose (as we have more than once suggested in these columns) that every officer before he joins the Army and receives pay should be made to pass through a practical course of training in his duty as a regimental officer. A Depôt Battalion for officers alone would, in fact, nearly fulfil our wishes in this respect. We know roughly the number of officers required to fill the vacancies in the commissioned ranks of the Army annually, and that number, say 500 candidates, after passing a slight elementary examination, devised for the sole purpose of ascertaining their fitness to keep their accounts, make an intelligible report, and do their duty as company officers, might be sent to a self-supporting institution under a good commandant to learn their work for eight or nine months. Facilities for acquiring a knowledge of the higher branches of the military art might be afforded to those who choose to avail themselves of them; but this should be entirely voluntary, and no one should be compelled to do more than learn his business. At the end of the time they would join their regiments with a fair amount of proficiency in their work, and without having gone through the dangerous ordeal to which every subaltern is now exposed. We have before expressed our opinions upon this subject, and we should not reiterate them but that we have found them sustained by officers whose experience and position entitle them to every respect. We do not wish, with the Council of Military Education, that every ensign should be made to pass through Sandhurst; but we do wish that every ensign should get some practical lessons in the work he is now paid by the country for performing before he has begun to learn it. Economy, efficiency, and the comfort of the Service would all be increased by such a change; and we heartily rejoice that public attention is to be directed to a department of military organisation in which reform is required, and in which reform is so practicable.

The Report of the Committee which has so recently terminated its sittings at Somerset House, and of which Captain Heath was chairman, contains some very valuable information upon the subject of keeping naval accounts, and also upon paying the Navy, which it would be very desirable to introduce into the Service as quickly as possible.

The colonelcy of the 10th Regiment remains vacant by the death of Sir Thomas M'Mahon, and no recommendation has yet been made to Her Majesty respecting the selection of the officer to be appointed in his place

---

Lieut.-Colonel H. Hope Crealock, Her Majesty's 90th Light Infantry, has been selected to accompany Lord Elgin to China as Military Secretary. This officer served with his regiment in the Crimea from December, 1854, to February, 1855, and again from 28th March, 1855, till the end of the siege, including the assault on the 8th September, when he was inside the Redan with General Windham. He was placed upon the Staff at Constantinople; and on the last Chinese war breaking out, he went out as one of the Etat-Major, and at its close he proceeded to India, and arrived after the fall of Lucknow, but served with Lord Clyde in the subsequent campaign in the capacity of Assistant-Adjutant-General to Sir W. R. Mansfield. Colonel Crealock possesses the peculiar qualifications of a military secretary, and his reputation as a charming draughtsman and an accomplished officer is established in the Army.

In our impression of last week we alluded to the disgraceful system of touting now practised in connection with the periodical examinations for direct commissions at Chelsea Hospital. It was, therefore, with no surprise that, a day or two afterwards, we read the following paragraph in the *Times*:—

"We are sorry to learn that the rumours are well founded which have been for some time in circulation, to the effect that the examination-papers proposed to candidates for military appointments have been surreptitiously obtained by some of the candidates in anticipation of the examination. Whether the infamy of tempting the subordinates employed in printing these papers rests with the class of pretended military agents, or with other persons who are base enough to lend themselves to such disgraceful means of enhancing the value of their own teaching, remains to be proved; but this at least is certain, that the French questions in the examination for direct commissions now in progress have been obtained by some person, who has reprinted them, and then sold them to such of the candidates as desired to avail themselves of information so dishonourably purchased. The result has been that the whole examination has been vitiated by this discovery, that the exercises of the candidates have been cancelled, and that a new examination will at once begin. We have reason to believe that the Council of Military Education have laken great precautions to guard against such a disgraceful breach of confidence as this exposure reveals, but it is evident that their efforts have not met with full success. We trust that the General Commanding-in-Chief will spare neither trouble nor expense to bring those persons to justice who have first stolen and then sold what may be fairly regarded as the price of a commission in Her Majesty's Service."

The candidates were all obliged to present themselves afresh before the Council of Military Education, and are now undergoing a second examination with, it is needless to say, fresh papers of questions. Every step is being taken to guard against a repetition of such an irregularity, and to bring to light the delinquents in the present instance.

We wish we could see a system of quicker payments introduced into the Navy. The disadvantages of the present mode are many, but the most prominent is the dissatisfaction felt by the seamen, who always prefer receiving their pay and allotments at short intervals. The Manning Commission of 1859, amongst other suggestions, recommended strenuously a better regulation for the payment of wages, and we believe that the Admiralty are at present considering this point. It would be very desirable to have the recommendations of the Commission promptly carried out. As a general rule, seamen are incapable of managing their pecuniary affairs in a satisfactory manner, and the larger the amount they have to receive, the greater is the excess they are apt to indulge in. Quicker payments would necessarily involve payments in small sums, which would have a tendency to familiarise the men to the possession of money, and might be presumed to act beneficially in checking that thoughtless extravagance so characteristic of our seamen. At all events, the means of gratifying their excesses would be diminished in proportion to the sums they had to expend. Few things act more injuriously upon certain temperaments (and the sort of temperament we mean is very common amongst sailors) than the sudden possession of funds to an amount that seems to them large. The desire to expend it is proportionate to the amount, and the feeling is often aggravated by previous restraint. The consequences are excess, drunkenness, and insubordination. We do not believe that quicker payments and in smaller sums would be a cure for all the defects in our naval system, but that it could not act otherwise than beneficial to the Service is acknowledged by almost every one that has given the matter a thought.

We are heartily glad to learn that the Naval Reserve force is in a state which shows that sailors are not quite so suspicious respecting its character as they were said to be on the first motion of the machinery. It would appear that there are 850 sailors already enrolled, and that there have been, up to the present, 986 claims made. It must be remembered that these 850 men are sailors of good character, and rating as A. B., with five years' service at sea within the last ten years, and that they are all under forty years of age. Perhaps there may be more vigour in the apparatus by-and-by. All we can say is, "*Acquiret vires eundo.*"

HOSPITAL REPAIRS.

The following circular from the War Office has been issued by the Secretary of State for War:—

"With reference to Article 3, page 68, of the *Medical Regulations of the Army*, in which it is laid down that all repairs to hospitals shall be executed under the direction of the purveyor, Mr. Secretary Herbert has determined that until further orders the operation of this regulation shall be suspended, and that the following shall be substituted for it:—

"Repairs of an ordinary character to hospitals, from the immediate non-execution of which no inconvenience to the sick is likely to arise, will be executed by the Royal Engineer Department, in accordance with the regulations hitherto existing.

"In the case, however, of the principal medical officer considering that the necessity of any repair of an incidental nature is urgent, and that no delay ought to be permitted to occur in its execution, the purveyor is empowered to communicate at once with the engineer, triennial contractor, or with his agent, and to order the necessary work to be performed.

"In the event of unreasonable delay occurring in the carrying out of this order, the purveyor is further empowered to order the execution of the work through any other source which may be at hand.

"The purveyor when thus ordering the execution of a work by the engineer or contractor will simultaneously report his having done so to the commanding Royal Engineer of the district, with the grounds of the urgency of the case. The commanding Royal Engineer will take the necessary steps for causing the work to be inspected, and it will be measured, paid for, and brought to account by the Royal Engineer Department in the usual manner.

"The purveyor will similarly report to the commanding Royal Engineer, should he find it necessary on account of delay on the part of the contractor to order the work of other tradesmen, in order that the commanding Royal Engineer may take the necessary steps to charge the contractor with any extra cost which may be involved in so doing.

"Commanding Royal Engineers will communicate to the present triennial contractors the powers hereby granted to purveyors, and will make the necessary provisions in future terms of contract. B. HAWES."

LATEST INTELLIGENCE.

HOUSE OF COMMONS.—FRIDAY.

The subject of the recent prize fight was brought under the notice of the House by Mr. W. Ewart and Mr. Vincent Scully, who condemned such exhibitions, and called on the Home Secretary to declare what course the Government intended to pursue with respect to it.

Sir G. Lewis declared unequivocally that prize fights were illegal, but the Government did not intend to institute any proceedings against the principals in the late contest or their abettors. Without expressing any opinion of his own, he observed that some persons defended prize-fighting on the ground that it tended to foster a love of fair fighting, in preference to having recourse to the bowie-knife, the stiletto, or even the shillelah.

Colonel French asked the Secretary for War whether barrack masters were civil or military servants, and if civil, whether they were included in the 4th section of the Superannuation Act of last year.

Mr. Sidney Herbert said that although barrack masters were chiefly military officers, the situation was not a military one, and therefore they were as barrack masters civil officers, and came under the Superannuation Act.

Sir De Lacy Evans asked the Secretary of State for War on what principle it was that English officers of high rank had been refused permission to examine the Armstrong Gun Foundry at Woolwich; and at whose instance, or by whom the special order of admission had been given to certain foreigners of high rank and distinction.

Mr. Sidney Herbert said that the restriction placed on the admission of the public to the foundry arose from no wish to keep anything secret, for the mode on which the Armstrong guns were made was well known. When admission was more indiscriminate than at present, it was found that the large number of persons who resorted to the works impeded the workmen. Any officer who wished to visit the works could obtain an order for that purpose. It was he who issued the order for the admission of the distinguished foreigners adverted to by the gallant general.

Mr. Charles Wynne asked the Secretary of State for War, whether he was aware that during the recent "Examination for direct Commissions for the Army," it was discovered that the Examination Papers had been stolen or surreptitiously obtained from the office of the Council of Military Education, for the purpose of being sold to candidates for the said examination; and whether any steps had been, or would be, taken for the detection and prosecution of the person or persons by whom they were so stolen or obtained.

Mr. Gregory thought it hard that candidates who had already passed their examination should be compelled to undergo a fresh one. Some young gentlemen who had passed had actually returned to their homes in the country] In these cases the expenses of the candidates ought to be defrayed by the Government. This was not the first time that examination papers had been surreptitiously obtained. It was notorious that on a former occasion examination papers were sold at sums varying from 5*l.* to 2*l.*, and he had been furnished with the names of persons who were said to have been concerned in these proceedings. It was evident that if some candidates were able to obtain examination papers, the standard of examination was raised to the other candidates, who were thereby subjected to injustice. It was absolutely necessary that the Government should institute a searching inquiry into the matter, and punish those who might prove to be the delinquents. In the meantime he wished to know whether the candidates who had passed one examination and were called upon to undergo another would be repaid the expenses to which they would thereby be subjected?

Mr. Sidney Herbert stated that the expenses of candidates. under the circumstances mentioned, would be defrayed. The inconvenience of a fresh examination, however, would not be extensively felt, for he was informed that only four had passed before the discovery respecting the examination papers took place. The re-examination was resolved upon with the sanction of the Commander-in-Chief. It had been ascertained that the papers had been stolen from the printing office of Messrs. Eyre and Spottiswoode. The matter had been placed in the hands of Sir R. Mayne, the Chief Commissioner of Police, and there was reason to believe that the guilty party would be brought to justice. The House might rely upon it that the Government would spare no trouble or expense to put a stop to practice that would destroy all public confidence in these exami nations.

THE CAMPAIGN OF 1812.*

Sir Robert Wilson's "Narrative of the Invasion of Russia in 1812" places him at once in the front rank of military writers. Being Commissioner at the head-quarters of the Russian army, a friend of Alexander, and able to command the most authentic information, he enjoyed the greatest facilities for completing the task he undertook. Refusing to publish on the spur of the moment—refusing an offer of a thousand guineas, indeed, for his papers—he slowly gathered up documentary and personal information from the chief actors in the drama, and eleven years after it had come to so tragic a close, he set about the task of revising and giving form to his mass of material. In 1825 it was complete and ready for publication, but as it contained many things derived from living persons, he wisely determined to forego the literary glory he might have acquired, and ordained that his valuable book should not be printed and published until he and most if not all those whom it concerned were in their graves. Few indeed survive. Time has swept over them during an interval of nearly half a century, and has engulphed them in his waves. The change is, indeed, vast. Five years before the book was written Napoleon himself had died in his rocky prison. Wellington is gone, and the Marshals of Bonaparte have vanished one by one. Another Bonaparte sits on the throne of France, and combined legions of French and English have actually fought side by side upon Russian soil. The Grand Armée has reappeared, and has won dukedoms and bâtons for its chiefs. Slowly and with stealthy step the third Napoleon is augmenting French territory, and recommencing, with diplomatic arts and a strong arm at need, the career of Louis XIV. and his grander successor, the first Napoleon. France is again the foremost State in Europe, and her sister nations watch with anxiety the stirrings of an ambition which led her to Moscow fifty-eight years ago; and which, if the commercial treaty does not extinguish the rising flame, may call forth another Marlborough or another Wellington, to help to quench it with the costly sacrifice of human lives upon that devouring altar—*la Gloire*.

Sir Robert Wilson's Narrative has a double interest. It yields valuable lessons both to the military and the political student, but mainly to the former. The minuteness and exactitude of detail will enable the military reader to understand every incident in this wonderful campaign. The glimpses we get of Alexander of Russia, and of his relation to his nobles and military chiefs, will throw a light on the path of the student of politics. And both combined show us how it came to pass that Napoleon was so severely chastised.

In June, 1812, Napoleon had assembled an enormous army on the frontiers of Russia. He mustered at the outset 372,508 infantry and 79,775 cavalry, including the horse artillery. Before the campaign was over, the whole force amounted to 651,358 men and 187,121 horses, with no fewer than 1372 guns. The army was composed of men of many nations, French, Poles, Germans, Spaniards, Portuguese, Swiss, Dutch, Italians, Illyrians, Croats. In the main body that first entered Russia there were eleven corps of infantry and four corps of cavalry, and all the commanders were men of renown. Sir Robert Wilson sets down the whole force, at the disposal of Napoleon in 1812, at the enormous amount of 1,187,000, of whom 850,000 were French troops.

The whole force of regular soldiers in Russia at this period was 518,000 men. Two of the active armies opposed to Napoleon were respectively 129,050, and 48,000 strong. The larger body was under the orders of General Barclay de Tolly; the smaller army under Prince Bagration. The larger force was divided into six corps, and a reserve, composed of cavalry and artillery, was divided into three corps. The army of Bagration consisted of two corps and a division, and a reserve corp of cavalry, Besides these, there was a third army in the west, 43,000 strong, and a reserve army 34,300 strong. The total force engaged in the earliest operations was thus 254,350. But there were 50,000 men in Moldavia, who, set free by the peace with the Turks, played a most important part at the close of the struggle.

Having collected his host behind the Niemen, Napoleon, on the 24th of June, crossed that river near Kowno, and established his head-quarters in the town. Alexander, who was at a ball near Wilna, had intelligence of the passage the same night; and issued that famous proclamation, in which he declared he would not sheathe his sword so long as a single enemy remained in arms on the territory of his empire. Thus the great drama begun. The Russian army was widely spread, from Riga to Wolkowich on the upper Niemen. The first army was at Wilna, the second at Wolkowich, and a corps at Lida, midway between the two. Napoleon determined, therefore, to strike at Wilna, in the hope of engaging the first army and crushing it; but Barclay de Tolly saw the folly of risking an action; and three days after Napoleon set foot in Kowno the Russians were in full retreat for the entrenched camp at Drissa. The detached corps were ordered to gain the road to Drissa; but Napoleon saw his advantage, and took measures to cut them off. His hope was to separate the armies of Bagration and Tormanssow, and the corps under Doctorof at Lida, from the main body. But Doctorof was too quick for his enemies, and recovered his communications by daring and rapid marches. Bagration, confused by contradictory orders, pursued by Jerome Bonaparte, and outflanked by Davoust, displayed great skill and judgment in evading and fighting his enemies, and finally he escaped them all, and regained his communications with the main army. The details of this military adventure will be found full of interest to the student, and they have never been more clearly told than by Sir Robert Wilson.

During the period occupied by Bagration in his masterly retreat, the French army had become widely scattered, extending from Tilsit to Drogiczin on the Boug. Barclay de Tolly had retired upon Drissia in good order, and Napoleon had followed unable to inflict any considerable damage even on his rear-guard. "The only error committed by Barclay, so far," says Sir Robert Wilson, "was in having pushed the whole army into such forward positions, when it was evidently not his intention nor in his power to defend the Niemen line of frontier." Nothing can be more clear than that he risked his army, and that he owed his safety to "the extraordinary marching and laborious energy of the Russian soldiery." Arrived at Drissa, the Russian general found that he could not hold it. Sir Robert Wilson tells us a remarkable fact about this famous camp. It was traced on the left bank of the river "with only *one* bridge for communication with, or retreat to, the right bank;" an oversight which, had the Russians remained, Napoleon would have made them feel. But Napoleon had stayed fifteen days at Wilna, the first proof of that decay of activity of which he was destined to present many in his subsequent career. Had he arrived in front of the enemy at an earlier day, he might have accomplished his design of interposing himself between Barclay and Moscow, by occuping Polotzk; but, when he did arrive at Glubokoë, the Russian army had already filed out of the camp of Drissa, leaving Wittgenstein to cover the road to St. Petersburg, and had, moreover, passed through Polotzk. Alexander quitted the army for Moscow and St. Petersburg when he found that Drissa must be abandoned. Napoleon, foiled so far, not by the design of the enemy, but by the force of circumstances, flattered himself that he could anticipate the Russians by a movement upon Witepsk. The Russians were again before him. The fifteen days lost at Wilna never could be overtaken. Nay, so cleverly and swiftly did the Russians glide from Witepsk, that Napoleon's advance actually lost for the moment the clue to their line of retreat. Of course it could not long be concealed; and when Napoleon found it was upon Smolensk, and that Barclay had fairly got away, he halted to rest his army at Witepsk. Here he remained sixteen days, during which interval Bagration, after his tremendous march, effected a junction with Barclay; and Napoleon heard of the peace with Sweden, which liberated another army, and the defeat of the detached corps under Oudinot near Polotzk.

After this long delay Napoleon reassembled his army, widely scattered from Witepsk to Mohilev, brought it into line with a rapidity and accuracy worthy of his fame, and determined to press on to Smolensk. Barclay had disgusted the Russian generals by his indecision, and harassed the troops by fruitless marches and counter-marches, so that in eight days he lost 6000 men by fatigue. Driven into Smolensk by the weight of Napoleon's advance, he was forced to defend that holy city, which it cost Napoleon 12,000 men to capture, and which, after all, was not wholly his own when night fell. And here happened one of the most singular incidents in the war. Barclay retired behind Smolensk, apparently determined to fight. He was not attacked all day, and when night fell he found himself more than fifteen miles from the Moscow road at Loubino, distant from Smolensk only nine miles by roads in the hands of the French. Moreover, the Russian road was rugged and marshy, and over this road nearly the whole army, with artillery and materiel, had to pass. To cover the Moscow road at its junction with the cross road, Barclay had despatched literally a handful of men. But, perilous as was this movement, he may be said to have owed his escape from the fatal consequences to the laxity and mistakes of his enemies. Jomini says that Napoleon did not expect to find the Russian army so near Smolensk, and that he assumed its safe retreat. Hence the misdirection of the whole manœuvres of the day. Had Napoleon been as watchful as he was at Verona, he would have certainly destroyed the Russian army. It is wonderful that Napoleon should act on conjectures, but still more wonderful that Junot, who was within four miles of the mouth of the defile, did not occupy it, nor even move up to support Ney and Murat.

"Had the enemy," writes Sir Robert, "gained the hill over Loubino, the *debouche* would have been closed, for from the hill not only the egress of the defile was commanded, but a single bridge, with loose rafter planks, intersected the main road a few yards beyond and within grape-shot range, on which Duke Alexander of Wirtemberg, and other generals, indeed Barclay himself, stood many hours during the night crying, 'Tishe, Tishe,'—'Gently, gently'—to the drivers of the artillery and carriages of all sorts, of which there were ten thousand, under the apprehension that a quick pace might break up the platform."

Altogether, this is one of the most wonderful escapes ever made from an enemy, and that enemy Napoleon.

It was at this moment that Sir Robert Wilson, coming from Constantinople, joined the Russian army. He found the generals in a state of mutiny. All confidence in Barclay had disappeared. Wilson was implored to carry a message to Alexander, demanding a new chief, and telling him that if an order came to suspend hostilities it would not be obeyed. This is the most striking event in the course of the story; but we must refer the reader to Sir Robert Wilson's pages for the details, since they would suffer from an abridgment, and would occupy too much space to quote. Wilson frankly fulfilled his mission, and old Kutosow succeeded Barclay. Wilson carried back to the army a pledge from the Emperor that he would not treat so long as an armed Frenchman remained upon Russian soil; and Wilson was authorised to interfere in case Kutosow should disobey instructions. The army retreated to Borodino, where Kutosow was literally compelled to halt and fight. Napoleon only brought 140,000 into the field; he had, by this time, lost 105,000. Borodino, so well contested that the French could only, after enormous sacrifices, occupy the fringe of the real position, proved glorious for the Russian arms, and further weakened the enemy's army. The action is described in great detail, and is worthy a minute study. Kutosow retreated, and passed through Moscow, and with him 180,000 out of 200,000 of its inhabitants. Rostopchin, the governor, it is here abundantly proved, always intended to burn it, and he made Kutosow promise to give three days' notice of his intention to retire. Kutosow broke his word, and Rostopchin never forgave him. Nevertheless, he did burn the great city, but not until the enemy was within its ramparts. The burning of the city would have been less disastrous for the French, had not Kutosow, who was retreating towards Riazan, suddenly altered his route, and bent his steps towards Kalouga, taking post only five-and-twenty miles from Moscow. This was the most soldierlike movement in the whole war, for it placed the Russian army not only in front of rich and fertile districts, but within easy reach of Napoleon's communications. He was compelled to recede, but only as far as Taroutino, and from this point he was ready to spring forward at the first opportunity.

From this time Napoleon's star waned, until it set amid the ice of the Beresina. Had he retreated at once he might have regained a safe position, but he lingered at Moscow day after day expecting overtures of peace that never came, and compelled to submit to the humiliation of having his advances rebuffed. Kutosow would have treated had it not been for Wilson's energetic intervention with the full authority of the Emperor. Time passed; the French army grew weak, the Russian strong; the French were starving, the Russians well fed. Napoleon lingered a month at Moscow, tempting fortune, still confident and arrogant in appearance, but sorely perplexed. At length he retreated. It is in this retreat that he showed signs of failing vigour and judgment, and had Kutosow acted with energy, Napoleon's army must have been utterly destroyed before it reached Smolensk, perhaps Napoleon taken. But Kutosow avowedly acted on the principle of building a golden bridge for a flying foe. Thus he allowed the Emperor to escape at Malojaroslavets, at Krasnoi, at the Beresina. Both commanders seemed to neglect the opportunities offered by fortune. The whole of the retreat, so disastrous and terrible, is related by Sir Robert Wilson with exactness in its military details, and a horrible minuteness in the descriptions of its long-drawn tragedy that makes one shudder. The "horrible and heart-rending sufferings" of other armies are as nothing compared to those of the men, women, and children, who fled from Moscow.

"The Russians calculate that 125,000 of the enemy perished in different combats; that 48 generals, 3000 officers, and 19,000 soldiers were captured; that 100,000 were destroyed by cold, hunger, and disease, and that only about 80,000, including Austrians and Prussians, repassed the frontier, and that they (the Russians) captured 75 eagles or stands of colours, and 929 cannon, exclusive of those thrown into the rivers or buried; and this calculation as to totals cannot be impugned as exaggerated."

It is the grandest military tragedy recorded in the annals of the world, and should be a lesson to emperors and kings not to undertake vast enterprises to be carried on in distant climes against a brave and unyielding people. Such enterprises outgrow the powers of man to manage or control.

It has often been remarked that the fall of Napoleon may be dated from the burning of Moscow, the heroic act of Rostopchin. But, in reality, the fall of Napoleon dates from the contemplation of so vast an enterprise. His ambition had grown in proportion to his successes; but the growth even of his ability did not keep pace with his ambition. On the contrary, his powers had decreased. It was in the Russian campaign that he manifested the first symptoms of decaying power. That rapid and accurate judgment which he had shown in all his campaigns from 1796 to 1810 began to grow clouded. Instead of blazing out with a clear and continuous lustre, his genius

* *Narrative of Events during the Invasion of Russia by Napoleon Bonaparte, and the Retreat of the French Army in* 1812. By General Sir Robert Wilson, British Commissioner at the Head-Quarters of the Russian Army. Edited by his Nephew and Son-in-law the Reverend Herbert Randolph, M.A. (London: John Murray.)

Digitized by Google

gleamed in fitful flashes. Irresolution took the place of decision, and he lost what he never lost before—time. That slowness which told so heavily against him in 1815, and the tendency to make false movements which Sir George Cathcart has so well exposed in his narrative of the campaign of 1813, are first discernible in this famous Russian war. The brilliant campaign of 1814, so glorious for Napoleon, only showed that he was still capable of those swift strokes of skill which made him so terrible. Opposed to overwhelming odds he fought again as he had fought at Arcola and Rivoli, with the difference that in 1796 he fought with the energy of hope; in 1814 with the energy of despair. Among the causes of the fall of Napoleon, and there were many, we must place the simultaneous growth or, rather, overgrowth, of his ambition and the decay of his power. But Napoleon, in what we have ventured to call his decay, was greater than every living general except that one who had never lost a battle or a gun.

MORTALITY OF CHILDREN ON BOARD TRANSPORT SHIPS.

This subject, to which we have more than once sought to call attention in our columns, was brought before the House of Commons on Monday evening by Sir De Lacy Evans. In replying, Sir C. Wood stated that the transmission of the soldiers' wives and children to India took place under the direction and superintendence of the Emigration Commissioners, and he could not do better than read a report which they had drawn up on the subject. The facts were these:—

"Thirteen ships were originally taken up for the conveyance of 5410 souls. We have received intelligence of the arrival in India of nine of these ships, which carried 3747 souls. In these the mortality was 377, equal to 10 per cent. But this mortality was almost exclusively of children under five years old. Of adults (that is all above 12) there died 11 out of 1820=·60 per cent. Of children between 12 and 5 inclusive, 24 out of 866=2·77 per cent.; making, out of all above four years of age, 35 out of 2686=1·30 per cent. This is rather less than the whole mortality in Australian emigration (1·32 per cent.), and, considering the class of women, that the voyage occupied nearly four months, and passed twice through the tropics, it must be allowed to be very small. But among children under five the mortality amounted to 341 out of 1061=32 per cent. With very few exceptions it was caused by measles and scarlet fever, which broke out in almost every ship shortly after sailing. These diseases were, no doubt, aggravated by the weakness of both children and mothers, caused by the unusually stormy weather which prevailed in October and November last, when the ships sailed. It is to be observed, moreover, that the children under five years of age in these nine ships amounted to nearly 29 per cent., the average in the population generally being 13·10. This disproportion necessarily assisted the spread of the disease and increased the mortality. That the sickness was not caused by any defect in the ships or the provisions is to be inferred from the absence of any disease of the character of scurvy or typhus, as well as from the small mortality in children above four years of age. A more direct proof is afforded by the reports which we have received from Bombay and Madras. In each case an inquiry was, we believe, instituted; but only three reports have yet reached us—those on the Euxine, Statesman, and Lancashire Witch. They are annexed hereto, together with an extract of a private letter from Captain Wellesley, R.N., Commander-in-Chief of the Indian Navy. The mortality, as has been said, was attributable to the great number of very young children on board. In our emigration, this can be avoided, because our power of selection enables us to reject families containing many young children. But in sending out the soldiers' wives, it was inevitable that their children should be sent with them, so that the number of young children became a necessary part of the arrangement. The question remains whether due care was taken to ascertain that there was no sickness among the children before they were put on board. In this respect, the same plan was followed as has been followed for many years with complete success in regard Australian ships. The surgeons of the ships were required to be at the depôts as soon as the first of the people came in, and to continue there till they embarked. This period varied from three to five days. It is the interest of these surgeons, no less than their duty, to see that no infectious disease is introduced into their ships, not only because the introduction of such disease increases their labour and responsibility on the voyage, but because their remuneration at the close of it is reduced by every death that occurs. The surgeons had full authority and were bound to land any child whom they suspected to be suffering from infectious disease, and to delay the sailing of the ships so long as they had any doubt as to their sanitary condition. But every one's experience must satisfy them that no medical skill is sufficient to detect measles or scarlet fever in a latent form; and to have delayed the ships until time had been given for any latent disease to develope itself would have postponed their departure from this country till the cold and wet of winter had set in, and their arrival in India till the season had passed during which they could have been sent up the country. Moreover, if they had been detained in depôts on shore, it would have been impossible to prevent their going into the towns and being exposed to whatever infection was there prevailing. If they had been detained on board ship the cold and damp of November, added to the weariness of inaction, would have produced such depression of mind as must of itself have caused disease."

The *Calcutta Gazette* notifies: when a regimental officer not commanding his regiment, succeeds by seniority to the temporary command of the brigade, he will be granted an allowance of four hundred rupees per mensem as staff. A military staff-officer becoming senior officer at the station will exercise the command of the brigades without any extra allowance.

NAVAL TOPICS.

A discussion arose on Thursday night in the House of Commons, which elicited some interesting remarks from the Secretary of the Admiralty. The immediate occasion of these was a reiteration by Sir C. Napier of his complaints respecting manning the Navy and the deficiency of the Naval Reserve.

Lord C. Paget said that a return from the Comptroller General of the Coast Guard showed that we had a force available for immediate sea service of 6862 men and boys. The hon. and gallant admiral said we had no reserves beyond the reduced force of Coast Guard, the 6000 coast Volunteers, and the 800 Royal Naval Volunteers, but though 800 of the latter force had only yet been enrolled, there was very unnecessary alarm, both in and out of the House, as to the probable failure of that scheme. From the first he (Lord C. Paget) never felt that men would flock to that reserve force all of a sudden, but so far from thinking that the progress of enrolling was unsatisfactory, he was beginning to think that it promised well. The number of men was increasing weekly. It was only since the beginning of the present month that they had been prepared to enrol, the training ships not being previously in a state of preparation for exercise, and that was a fact well known to the men themselves. At beginning of April they commenced by enrolling between 30 and 40 men a-week, but now the number had increased to 100 per week. At the commencement of this year we had 11,000 more men than last year, and there was no difficulty in getting men to enter the Service, he would not say freely, but in a satisfactory way, and it should be recollected that lately they did not enter any but able seamen in the Navy, unless it were men who had before been in the Service, but had left. He thought it right to tell the gallant admiral that he was visited daily by officers of high and low rank in the Channel squadron, and that one and all said to him, "Cannot you persuade the gallant admiral to cease from the continual encouragement he is giving to a feeling of discontent amongst the marines in our ships?" His brother officers disapproved of his repeated complaints about men not having sufficient leave, when they had more than they ever got in former years. It was the continual system of breaking leave which had led to all the recent disasters; but irrespective of that one subject, the fleet was never in a more healthy or satisfactory state than at the present time. The men were making great progress, and general contentment prevailed in the fleet. The gallant admiral also complained of the paucity of petty officers; but when a fleet was created in a marvellously short time that would naturally be the case. But he made a still more unreasonable complaint, because he said the men were overworked, and their drill was excessive, and that great discontent prevailed in the fleet in consequence.

Admiral Napier said he complained of the system, not of the quantity of work.

Lord C. Paget understood the gallant admiral to say on a former evening that the men were overworked, and had an undue allowance of drill. That very day he received a visit from Admiral Elliot, the captain of the Channel fleet, who felt very much distressed at the statements which had gone abroad, and who stated that the greatest amount of drill in one day in that fleet was two hours, and that the weekly average was not more than one hour's drill a day, which the gallant admiral, the member for Southwark, would surely say was not excessive for gallant seamen. He fully admitted that the gallant admiral honestly desired to improve the Service, but a strong feeling prevailed at the Admiralty, and on board the ships, that his speeches in that House were doing incalculable mischief to a young fleet, which was now well-disposed, because they led the sailors to imagine grievances which really had no existence. He would not enter then upon the question of ship-building, because a notice had been given by an hon. member on the subject. He hoped that when it came on the whole matter would be thoroughly sifted.

In moving the vote for naval stores, Lord C. Paget gave a detailed reply to a charge made on a preceding night by Mr. Henley against the Government of neglect in not keeping up a proper stock of seasoned timber in the dockyards, stating reasons why, in his opinion, it would be unwise in the Admiralty to increase the establishment of timber. The expenditure of timber which they expected to take place this year was 60,000 loads, and the stock at the commencement of the year happened to be about the same amount, namely 59,000 loads. Notwithstanding the great expenditure of 65,000 loads last year, they expected to expend 60,000 loads this year; and they had taken a vote of 500,000*l.*, which would purchase 60,000 more loads, which would leave them so much on hand. At the end of the year, therefore, they would have two years' stock in hand. As to the number of years' seasoning which timber required, there existed great difference of opinion. The right hon. gentleman quoted evidence to show that three or four years' seasoning was required; but Mr. Greene, who used 36,000 tons of shipping of his own, which ran to Australia and India, said that for English oak two years' seasoning was quite sufficient, as the timber began to deteriorate after that period. That was a strong argument for not keeping a stock for more than two years' consumption in hand. One reason why it was not advisable to increase the stock of timber was, that the Admiralty were now building four iron-cased ships.

In answer to Sir J. Pakington,

Lord C. Paget said the iron-cased ship ordered by the late Board ought to have been launched before now, but there had been unforeseen difficulties in the construction of so novel a vessel. The other three were contracted for, but he could not exactly say when they could be ready. The Warrior and the Black Prince were to be of 6039 tons burden each, and they would carry 36 guns. The Resistance and the Defence would each be of 3668 tons. They would be of precisely the same scantling, and would be armed with plates of exactly the same thickness as the larger ones; but they would be of less dimensions, and they would only carry 16 guns each.

The sentence of death on Khan Bahadoor Khan has been confirmed, and he will be hanged in front of the Kotwali at Bareilly, on the very spot where he sat and watched the murder of his European victims.

THE STAFF OF THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As the Army Estimates are now before the country, and the amount of them severe—15,000,000*l.*—I wish, through your valuable columns, to draw attention to the extensive increase of the Staff of the Army since the Crimean war; and also, the new system of brigades for brigadiers—a creation of the Crimean war. First:

No. 1.—With the Staff.

Inspector-General of Infantry.

A general officer, pay and allowances	...		£1780
First aide-de-camp	,,	...	300
Second aide-de-camp	,,	...	300
1 assistant adjutant-general	,,	...	410
			£2790

This appointment is now held by a lieut.-general, thereby entailing a second aide-de-camp.

The duties of inspector-general of infantry were satisfactorily performed by the generals of districts before the Crimean war, and could now be equally well performed by the generals of divisions, who have little or nothing to do, owing to the above creation.

No. 2.—A General Officer attached to the Brigade of Guards.

A general officer	...	...	£1000
1 aide-de-camp	...	...	300
1 assistant adjutant-general		...	410
			£1710

The duties of this appointment were satisfactorily performed before the Crimean war by one of the adjutant-general's department, Horse Guards. But "*one*" *still* receives 100*l.* a-year for calling the muster-roll of the Brigade of Guards twice a year.

No. 3.—A general and injudicious increase of Staff-officers at various stations at home and abroad. The expense incurred would be excusable if properly distributed. For instance—an assistant quarter-master-general at Manchester and none at Plymouth; a large staff at Portsmouth in comparison to Plymouth; positively, at Plymouth a short time ago, with 4000 men, there was *one* staff-officer to *three* at Portsmouth, with much about the same strength of garrison. The same injudicious distribution abounds. Ionian Islands more Staff-officers than regiments! I cannot trespass further on your valuable space for the Staff. I must now proceed with Part II.:

The System of Brigades for Brigadiers.

The system of brigades for brigadiers in a small army like ours is a total fallacy. The old plan before the Crimean war was the best, for the following reasons: in all stations affording regiments enough to form a brigade, or more than one, the senior lieut.-colonel on parade took command of the brigade, and the senior major on parade of the regiment from which the lieut.-colonel was taken to act as brigadier, took command of the regiment; thus, one or two lieut.-colonels, according to the number of brigades formed, obtained the chance of commanding brigades, and one or two majors obtained the chance of commanding regiments. By this plan, an excellent opportunity was afforded officers of learning how to command brigades and regiments; by the new system of permanent brigadiers, lieut.-colonels never obtain a chance of a brigade, nor majors a chance of a regiment. Now, as to the expense, each brigade costs the country as follows:—

1 brigadier, pay and allowances	...		£1000
1 aide-de-camp	,,	...	300
1 brigade-major	,,	...	300
			£1600

There are nine brigades between England and Ireland, which equals the sum of 14,400*l.* a year for this useless and injurious system; adding the inspector-general of Infantry and the brigadier of the Guards, makes a total of 18,900*l.* *at home*. Far better to save 10,000*l.* a year, and call out the Yeomanry, at the cost of 8000*l.* a year.

It is indeed painful to feel how much is really required for our barracks and regimental hospitals, and to see good money thus squandered in useless Staff appointments and a new system, all of which is a creation of the Crimean war—a war which surely has cost us enough already.

I am, &c., A FIELD OFFICER.

THE WEST INDIA REGIMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the *Gazette* of Tuesday the 10th may be noticed the promotion of Brevet-Lieut.-Colonel Travers, from the 3rd West India Regiment, to be Major in the 1st West India Regiment, vice Murray, promoted *without purchase*. The justification of such a step is of course this: Brevet-Lieut.-Colonel Travers has 26 years' service. The senior captain of the 1st West India Regiment has 17 years' service, and is a brevet-major; the senior lieutenant has 12 years' service. Now, would it not strike one, on seeing this, that either they are too young or unfit to be promoted? And one, who is the latter, is manifestly unfit to hold Her Majesty's commission. Is it not, also, an injustice to the officers of a West India regiment, whose whole service is in the West Indies, varied by a two years' tour, at regular intervals, in a climate perhaps the most deadly in the world to a European constitution—the west coast of Africa—with not the slightest difference between their pay and that of their brother officers of the Line, who serve in Canada, the Mediterranean, or India, with extra pay, and at home, that when a step does take place in their regiment, they are excluded from the benefit to be derived from it?

In the West India regiments there are older captains and subalterns than in almost any branch of the Army; they have the worst climates in the world to serve in, no additional pay or allowances, no prospect of ever seeing active service and of sharing its advantages; and it really is disheartening to them to see their only chances of progressing in their profession taken from them.—Your obedient servant, Y.

FORAGE STOPPAGES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Not having seen any calculation on this all-important subject, I think a little time would not be mis-spent in considering what expense would be incurred by easing the cavalry officers of the burden of 8½*d.* for forage.

The present number of chargers borne on the strength of each regiment is 81. The contract rate, per ration, is 1*s.* 5*d.* (there is a fraction over, but it would be difficult to find out how much), but, with the exception of one quarter in England, where the rate is 1*s.* 6*d.* per ration, I understand on inquiry that the general rate is 1*s.* 5*d.* Half of this, at the present time, is paid by the officers by the stoppage of 8½*d.* The cost to the country, per regiment, amounts to 104*l.* 1*s.* 10½*d.* per annum. There are 28 cavalry regiments, but of these eight must be accounted as on foreign service (India), so that there remain 20 regiments for which to make the calculation. The amount for the whole cavalry would therefore be 20,941*l.* 17*s.* 6*d.* at 8½*d.* per ration. By doubling this amount we have the full cost at 1*s.* 5*d.* per ration, amounting to 41,883*l.* 15*s.*, being the sum required to be expended by the country, instead of the officers paying for the rations at 8½*d.* Is it probable that the Government will take upon themselves such a large increase to the Secretary of State for War's requirements as 20,941*l.* 17*s.* 6*d.* at a time when there appears to be such a great outcry against the demands made upon the public purse? and if not, is it possible to reduce this expense, so as to make it of such little moment, that we might reasonably hope cavalry officers might be relieved from this great bugbear? It can hardly be expected that any Government will be willing to take on themselves a large expenditure, without first inquiring whether such expenditure is necessary.

I would suggest that more horses are kept for the officers of a cavalry regiment than there is any occasion for, *i.e.*, in time of peace. Why should a field-officer have four horses? He has not so much requirement for them as a subaltern has. Why should a captain have three horses? The third is never used as a charger!—and why should the regimental staff have two or four according to their rank, when one is quite sufficient for the performance of their duties? It has been urged that the field-officer pays so much for his commission, and that his rank must be supported! *Ergo*, a field-officer of infantry should have four horses, as he has the same rank to support, and now pays the same price for his commissions. If any change could be effected in the number of horses to be rationed, I think now would be a good time for making such change, when the prices of cavalry commissions are assimilated to those of infantry. Now if each combatant officer was to be allowed two horses each, and the staff-officers one horse each, the number of horses per regiment would be reduced from 81 to 61. The annual expense for 20 complete regiments would be 31,542*l.* 1*s.* 8*d.*, at 1*s.* 5*d.* per ration; or an increase to the country on the present cost (viz., 20,941*s.* 17*s.* 6*d.*) of 10,600*l.* 4*s.* 2*d.* In making notes of costs of this nature, I believe a round sum to be preferable, so I have not taken any note of casualties caused by absence, or the full complement of officers not being made up, which would decrease the number of rations to be provided. On a march I would suggest that a light cart be allowed for the conveyance of servants of such officers as have only one horse; and when on active service more chargers could be allowed, as might be deemed necessary for the efficiency of the Service. No doubt there might be some grumbling at first amongst the old officers who have been accustomed to keep 3 and 4 each; but by some arrangement as this, *the many*—and those especially who are now candidates for the cavalry—would benefit without any injustice being done to the richer class of officers.

From what I have laid down as to the number of chargers necessary for the Service, it by no means follows that even less would not suffice. In fact, I see no particular reason why the French system of keeping *one* horse for *each officer* should not be adopted. This would cost 17,063*l.* 15*s.*, being *less than it now costs the country to half-ration* 81 *horses*, by 3878*l.* 2*s.* 6*d.*! It might then be a subject for consideration whether officers should not be allowed to keep more horses (according to their rank), it being understood that for such extra horses they should pay 8½*d.* per ration, thus enabling those who can afford the luxury of a second horse, a cheap means of indulging their wish without materially harassing the country with a large expenditure. Perhaps I might add that supposing each officer kept an extra horse, this half-ration, and the full ration at 1*s.* 5*d.* for the one horse, would cost the country the sum of 25,595*l.* 12*s.* 6*d.* per annum, being an increase of 4653*l.* 15*s.* on the amount it now costs to half-ration the 81 horses per regiment at present allowed.

Apologising for the length of my letter, I am, Sir,

Your obedient servant, NO FAVOUR.

THE STOCK.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is hardly worth while to trouble you any further on the subject of the "stock." But I ask you to admit these few lines to a place in your *Gazettee* in order that I may assure your correspondent, "F. R. C. S.," that though "One of the Old Army" I am not labouring under the confusion he is so good as to attribute to me. The "stock" I allude too was not of one uniform width. There were three sizes of them, as there were of jackets, and if a soldier was silly enough to select the broadest when he had a short neck, he had nobody to blame but himself. It is perfectly true, whenever there was hard work the soldier often took off his stock; but, nevertheless, I have seen men do their duty in the corps to which I had the honour to belong (one in which the exertion called for is occasionally not light), on service, without taking off, or complaining of the "stock." By all means equip your whole army *à la Zouave*, if you like; but while you have collars to your coats there must be a stock to keep them from contact with the person. The thinner the stock, provided it keep its shape, certainly the better. But thin as you may make it, it will occasionally be removed, for the same reason that men and boys at cricket, racket, &c., &c., will take off even the lightest silk neck-tie.—I am, &c., ONE OF THE OLD ARMY.

THE LATE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The disposal of the officers of the late East India Company's Army seems now under discussion. Some remarks made in your paper on the distribution of those belonging to the late Bengal Army were calculated to induce the public to suppose that Indian officers have profited by the mutiny, inasmuch as most of those belonging to Bengal have obtained Staff employment; but, as the Madras and Bombay officers have not so benefited, and as, united, they are more numerous than the Bengalees, I trust you will kindly remove so disadvantageous an impression, and, at the same time, permit me to suggest a scheme for the reorganisation of the Indian Army, which appears to me preferable to the proposed unqualified amalgamation of it with the Royal Service, and calculated to prevent the evils which by that measure the complicated interests of the Indian Service would sustain.

I beg to preface my remarks by stating that promotion in the Indian Service is proverbially slow, that the different grades in it are of longer service than similar ones in the Royal Army, and that this is as much the case now as when the late Duke of Wellington penned the following, extracted from Despatch 20, p. 78, vol. i. of the "Supplementary Despatches:"

"The last war with Tippoo Sahib proved that notwithstanding what had been done for the Army at different times by the Company, and immediately previous to it by the King, the officer's in the Company's Service, in proportion to the length of time they had served, were comparatively with those of the King's Service in a very inferior situation."

It may be as well to add that the transfer of the Indian Army to the Crown was prejudicial to our interests. Before the mutiny we were an independent Service—we are now a nondescript one. Independently of our longer service, amalgamation with the Royal Service would be our death-blow; for the Indian Army is, and always has been, a *poor* Service. No man with money would expatriate himself. Promotion, though slow, was ensured by the seniority system; therefore, if we are transferred to the Royal Service, where promotion mainly depends on ability to purchase, we can never hope to rise. We were entitled to Staff appointments, now no longer our exclusive right, and, by being held only for five years, of less value now than formerly. We are taxed. We have funds to which all have paid, and which payment was compulsory, and which must be affected by the amalgamation scheme; and many have purchased promotion in the hope that their sale on retirement would ensure them a little addition to their pension, this being generally the only pittance they could save.

If, therefore, the necessities of the State require that there should be one army, which would seem advisable, and as the mutiny can be alone attributed to political action operating on a mercenary body, and not to any inefficiency of Indian officers, and as we have been affected in our interests, as much vested as those of any other profession, we are as entitled to the usual consideration and compensation.

It would be a gracious act were the Crown, as a boon, to allow all officers now in the Service to count as service all periods of leave they may have had in or out of India, and that as many by this measure would be enabled to take a pension.

That a pension should be granted to one-third, and this one-third to receive a pension in five years. The remainder would be absorbed by death, and by those being permitted to enter the Royal Service who desired to do so.

The present native army to cease recruiting.

The strength of regiments to be fixed at 1000.

Discharge to be offered to those who wish to take it.

Service for pension to be reduced to 30 years.

Men willing to enter the native police to be allowed to do so.

Regiments below 500 strong to distribute their men in other corps.

By these means, and by the continual decrease of men by death, by becoming unfit for service, &c., the native army would in time cease to exist, or, at least, be reduced to the required limit.

It is evident that there must always be a native army, and it would be politically suicidal to discharge, except gradually, the present soldiery, although it might be advantageous to create a police force, and to foster a feeling of jealousy between it and the regulars as a means of keeping both in check.

Although the Pension List would, by the plan I have sketched, be largely increased, still, as pensions are merely annuities, it would cause but a temporary embarrassment; and, by combining a system of pension and amalgamation, any scheme for reorganisation could be easily formed; for a sufficient number of men conversant with native character and language would remain to fill political situations, to command native and police corps, while any deficiency in officers could be obviated by temporarily attaching to native corps junior Queen's officers, in order that, by association with natives, they might become acquainted with them, and make themselves competent to command corps under a new organisation. A. B. C.

THE REGENT'S ALLOWANCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As many officers complain of the expense of messing, perhaps you would allow me to suggest through your columns that the cost of the mess dinner might be reduced by altering the rule for the appropriation of the Regent's allowance. At present it is frequently (if not generally) applied towards paying for the wine. I need scarcely say that there are many officers in the Army who cannot afford to drink wine daily, and these (under the present rule) receive no benefit from the Regent's allowance, while their richer messmates receive a double share. If an order were given that the whole of the Regent's allowance should be applied towards reducing the cost of the mess dinner, every officer who dined at mess would receive an equal share.

Yours, &c. A HARD-UP SUB.

The Simla, 2440 tons, has been chartered by the Bengal Government to convey a Native regiment (1200 men) with the full complement of officers from Calcutta to Madras.

THE NAVY ESTIMATES.

These Estimates were discussed in the House of Commons, on the order for going into Committee of Supply on Monday evening.

Sir C. Napier took occasion to offer some general remarks upon the Navy, extending to a great variety of topics,—the alterations and changes of ships; the Channel Fleet, which, he said, had not been properly used, and was indifferently manned; the want of good petty officers, and the shabby treatment of warrant officers' widows; the mutinies in certain ships; corporal punishment, which he contended, though it could not be abolished, might be diminished, and should be carried out in a different manner; the mode of paying off ships, occasioning a waste of stores; the block-ships, of which he spoke with contempt; the Coastguard and Coast Volunteers, the insufficiency of the Reserve, and other miscellaneous matters. He interspersed his remarks with suggestions for improving the condition of the Navy, by an economical augmentation of the number of ships, by strengthening their armament, and effectually manning them.

Sir J. Elphinstone called attention to the case of the post-captains on the reserved list, entering into full and minute details upon the subject, arguing that they had been disappointed of what they considered their just claims by a quibble.

Mr. Lindsay complained of the increasing expenditure for the Navy, and asked the meaning of these enormous armaments. Whom were we arming against? Why, against France, who was increasing her war expenditure because she was afraid of us as we of her; and this in the face of professions of friendship on both sides. He thought something could be done to stop this mutual expenditure if right means were adopted. He insisted upon the extravagance of the dockyards' expenditure, and the unnecessary costs of ships in the Royal yards.

Sir M. Seymour supported the claims of the post-captains, and those of the widows of warrant-officers. He adverted shortly to some of the matters dwelt upon by Sir C. Napier and Mr. Lindsay, urging the very serious importance of the question as to the manning of the Navy.

Sir J. Pakington, with reference to the case of the post-captains, expressed his opinion that their request was well founded; and that, looking at the whole transaction, the view they took of the Order in Council rested upon a better ground than that of the Admiralty.

Sir F. Baring, who had drawn up the Order in Council, explained its intention, and contended that it would not bear the construction which the officers put upon it.

Mr. Henley referred to various statements in evidence as to the quality of the timber used in the dockyards, and the insufficient store of properly seasoned material, urging the importance of this question, which, in his opinion, founded upon details which he stated to the House, had not been met by the Admiralty in a proper manner. The Admiralty had come to the conclusion that 60,000 loads of timber would suffice to keep up the supply; but he contended that it was demonstrable by figures that this amount would not furnish a sufficient quantity of seasoned timber of proper dimensions, but leave a deficiency which no outlay of money could repair in an emergency.

Mr. W. Williams inveighed against the enormous amount of our naval expenditure.

Sir H. Leeke was of opinion that the reserved captains had been very hardly treated; their case was likewise advocated by Admiral Walcott.

Mr. Bentinck made a few observations upon some of the subjects touched upon by Sir C. Napier. He attributed the extravagant expenditure for the Navy to the system which rendered the Board of Admiralty a political body. The abuses in the public dockyards, he said, were beyond the control of the Board as at present constituted.

The House then went into a Committee of Supply upon the Navy Estimates, when Lord C. Paget, after moving the first vote, for the Admiralty Office, was proceeding to reply to the preceding speeches, but Sir H. Willoughby interposed an objection on the point of order, contending that Lord Clarence was precluded from continuing a debate then concluded.

This objection gave rise to a discussion, and, the point of order being pressed, Lord C. Paget was obliged to give way; the particular vote was debated in the usual manner, and ultimately agreed to, the amount being 160,280*l.*

The following votes were then agreed to, after much discussion:—287,725*l.* for the Coastguard Service, Naval Coast Volunteers, and Naval Reserve; and 64,322*l.* for the scientific branch.

BOUNTIES TO SOLDIERS AND SAILORS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I rejoice to find that the Secretary of State for War has had the moral courage to break through the trammeling fetters of routine, and essay the recruiting process *minus* the bounty fee—that prolific *irritamenta malorum* source, a bait which the pressing need of war alone justifies, and then as a *dernier résort* only. Should this total abolition of bounty fail partially of its expected result, the Horse Guards may then modify their plan by adopting hereafter the suggestions I made on this head, in your number of 28th January. As the Admiralty followed suit to the War Office lead, in respect of that most commendable plan of classifying punishable offences, why should they not also straightway adopt a like judicious plan now, and, whilst abolishing bounties, increase the daily pay of seamen at the end of the first year, and *pro rata* onwards? The Channel fleet, and other ships in commission, are now fully manned; the invasion panic has happily subsided, and our commercial marine is, alas, far from flourishing. Our demand for sailors is thus less urgent, and consequently the area of our choice of able seamen is all the larger—let me strongly urge the Admiralty, therefore, to adopt the whist maxim of "finesse boldly, when strong in trumps," as their partner at the Horse Guards has just done—their strength in trumps lying in the about to be disbanded militia.—I am, sir, yours truly, EMERITUS.

The Bombay left Bombay on the 28th March for Gogo and Vingorla with troops.

THE ROYAL ARSENAL CANTEEN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I am glad to see from the very sensible letter of Captain John Grant, late R. A., in your paper of this day, that the preparation of soldiers' food and the necessity of some provision for the cooking thereof, is recognised to a certain extent by the War Office; and I rejoice to learn that "Mr. J. R. Godley has been directed by Mr. Secretary Herbert to inform Captain Grant that his cooking waggons are still under experiment, although no further application for compensation can be entertained as to his cooking apparatus." Now the practical application of this *vexata questio* is much required in the Royal Arsenal, where near 10,000 men are daily employed, and frequently are called on to work by night as well as by day. Yet no accommodation of any sort is provided for their their Commissariat. There is now no place for them to obtain food of any kind, whether cooked or uncooked, within the Arsenal gates; no kitchen, buttery café, tea or refreshment room, *no canteen!* The clerks, foremen, artisans, and labourers, may munch their bread and cheese, or sandwiches, if they have brought them in with them, in the open air, or under a shed, or in their shops, between the hours allowed for meals, *i.e.*, from eight to nine, and from one to two, and again at six, P.M.; but there is *now* no place within the Arsenal walls, where the slightest refreshment can be obtained; neither tea, coffee, beer, nor beef, bread, butter, nor cheese. The men go in to work at six A.M.; when the clock strikes eight they rush off to their breakfast, and as the Arsenal walls enclose a space of at least two miles in extent, they have but little time to traverse the distance, even to the nearest shops or taverns in the town, and of course much time, valuable both to H.M.'s Government and to those employed, is lost in this hurry scurry in quest of food. The same thing occurs at dinner-time, and again at tea-time. Once upon a time, there was a canteen in the Arsenal, and so likewise in the Dockyard (so that there is a *precedent* for the War Office to act upon). Though why these canteens were abolished it is hard to say, for the necessity of food, both for men and horses, is acknowledged by the War Office, in so far as regards the military employed in the Royal Arsenal, and a Military Train waggon, containing the dinners of the men on duty, is regularly escorted into the Arsenal every day at one o'clock, and their horses are fed at the same hour.

At present the Arsenal regulations are constantly infringed by a system of supply on the sly, which leaves the *employés* in the Arsenal dependent upon any adventurers who will risk the chance of passing the Arsenal gates for the sake of turning a profitable penny, either in beer, oysters, coffee, &c. Such being the state of things at present, surely a fair trial might be given to any cooking apparatus that would afford to respectable mechanics (not to speak of clerks and other officials, who would be glad of such accommodation for lunch or dinner as the War Office has provided for its own clerks at Pall Mall) a means of obtaining a breakfast, lunch, or dinner, and tea, at the usual intervals, under such restrictions as are enforced in a well-regulated barrack canteen, such as the Royal Artillery canteen. A greater boon, therefore, than the restoration of the old Arsenal canteen, under proper regulations, could not be conferred upon all connected therewith; and thus a fair trial could be given to Captain Grant's cooking apparatus, or any similar invention.—I am, &c. TIB.

The unfinished Guards' Memorial at the lower end of Waterloo Place has for some months past worn a very desolate appearance with an unfilled pedestal and bare scaffolding. A question was put in the House upon the subject the other evening by Mr. Edwin James, who asked the First Commissioner of Works whether any person was about to place anything, and, if anything, what, upon the summit of a pedestal which had been standing for 12 months at the southern end of Waterloo Place, Pall Mall; and, if anything was to be placed there, when it might be expected to be done? Mr. Cowper was happy to assure the hon. and learned gentleman that the pedestal in Waterloo Place was not to remain vacant. A group of statues was to be placed upon it to commemorate the heroic conduct of the Guardsmen in the Crimea. The management of the memorial was in the hands of a committee of subscribers, and therefore he was not able to say when the work would be completed. Mr. Bell was the sculptor, and he had no doubt the statues would be placed on the pedestal before long.

A grand military amateur performance took place at the Woolwich Theatre on Tuesday evening in aid of the Royal Artillery Regimental Charitable Fund. The theatre had been handsomely decorated for the occasion, and its approaches were crowded with carriages containing the officers of various corps, many of whom arrived from London. Amongst the audience were Major-General Sir Richard J. Dacres, K.C.B., Commandant of Woolwich Garrison; Brigade-Major Shaw, Captain Freeth, Assistant-Quartermaster-General; Colonel Stransham, Commandant of the Woolwich Division of Royal Marines, and numerous officers of the Hussars, Royal Artillery, Military Train Corps, City of Dublin Artillery Militia, &c., &c. The pieces selected were "Little Toddlekins," "Prison and Palace," and "White-bait at Greenwich." Amongst the performers were Captain Phillips, R.A., Captain Ready, R.N., Captain Williamson, D.V.A., Lieutenant Lacy, 12th Regiment, Lieutenants Lacy, Bond, and Burgman, R.A. The garrison amateurs were powerfully aided by some of the "old stagers," whose annual performances at Canterbury have earned for them so much celebrity, while Mrs. Selby, Miss Bulmer, Miss Nason, and Miss Willard, gave every effect to the pieces. The last-named young lady (a pupil of Mrs. Selby) making a very promising first appearance on the occasion.

Mr. Jackson will, on Tuesday next, move that an humble address be presented to Her Majesty, praying that she will be graciously pleased to issue a Royal Commission to inquire into the system of control and management of Her Majesty's Dockyards, the purchase of materials and stores, the cost of building, repairing, altering, fitting, and refitting Her Majesty's ships.

MEDITERRANEAN.

GIBRALTAR, 10th April.—The Peninsular and Oriental Company's steamer arrived here with mails, &c., from England on Sunday evening last, and brought orders for the Hannibal, Renown, James Watt, Agamemnon, and Scylla to proceed without delay to Malta. The above ships will, in consequence, leave this day for the head-quarters of the Mediterranean fleet. The Doris, Lapwing, Quail, and Red Pole will remain on this part of the station. The Scourge is expected over shortly from Tangier. The Victoria and Albert (royal yacht) came in on the morning of the 8th instant, and left again at noon on the 9th for England, touching at Cadiz and Lisbon on her way. Captain Connolly, late of the Hannibal, from which ship he has been superseded at his own request, took a passage in the yacht. Captain Farquar, who succeeds Captain Connolly as Flag-Captain, is expected to join the fleet on or about the 20th inst. The town of Gibraltar is crowded with Spanish uniforms now that the war is over. The treaty of peace, although, we understand, signed, is not looked upon as by any means binding, and the chief difficulty arises on the score of the money to be paid as indemnity. The probability of difficulty arising on this subject was as may be recollected suggested by former advices. It is supposed that the Moors made peace too soon, and so were induced to admit conditions that they would not have entertained for a moment, had the late reinforcements, consisting of 19,000 men, arrived before negotiations had been finally settled. The chances, however, under any circumstances, are immensely against the Spanish Government ever receiving the 20,000,000 dollars. And this part of the treaty must either be carried out by the Moorish Government giving a bond for the amount, to be in all probability repudiated when they happen to be strong enough; or, which is more likely, the "Indemnity Article" will become a pretext for Spanish acquisition of territory, unless the European powers interfere, when it would become a complete dead letter. The indemnity was never regarded as *bonâ fide* by those acquainted with the circumstances of the two countries respectively, and time only will decide whether this article will be dropped, or become the source of protracted negotiations, resulting perhaps in continental misunderstandings, if not in renewed hostilities.

EXPERIMENTS WITH SMALL ARMS.—Last week a considerable number of noblemen, military officers, and other gentlemen, assembled by invitation of the Birmingham small arms trade at the Government shooting ground, Holford Mills, near that town, to witness the preliminary trial of a number of small bore rifles which had been manufactured expressly for the purpose of being submitted to the official inspection of the committee, of which Colonel Steele is the head. Among those present were the Marquis of Abercorn, the Earl of Lichfield, Lord Berwick, Sir Francis Edward Scott, Bart., Sir John Ratcliff, C. H. Newdegate, Esq., M.P., William Scholefield, Esq., M.P., — Vernon, Esq., G. F. Muntz, Esq., Colonel Dixon, superintendent of the Enfield Factory; Colonel Broadley Harrison, Major Fraser, and Captains Garnett and Montagu, of the 11th Hussars; Major Smythe, Major Sanders, Major Cordeiro, of the Portuguese staff and Artillery; Captain Warlow, Government inspector of small arms at Birmingham; Captain M'Innes, and Messrs. Charles, Lancaster, Pritchett, and Field, of London. The object of the experiment was to show that if a small bore-arm is considered to be suitable for military purposes, the Birmingham gun-makers can in the same way, and at the same cost as the ordinary service weapons, manufacture an arm of that kind which will shoot quite as well as any other gun, however costly, which can be produced. In the month of December, Mr. Goodman, their chairman, made application to the Government to be allowed to furnish a number of small-bore rifles to the committee before mentioned, with a view to challenging a competition with Mr. Whitworth's costly "hexagonal" small-bore gun. The application was granted, and hence the gathering of the present week. The guns in question were of the small Enfield pattern, with the exception that the bore was only ·453 instead of ·577. They were fired from a table rest, with 2½ drachms of powder and a 530 grain ball, the range being 500 yards, in a direction from south to north. The number of shots from each rifle was fifty, and there were no signs of fouling on the completion of the work, the last balls being rammed down the barrels with a common steel rod as easily as the first. The diagrams of the shooting gave eminently satisfactory results, one of the highest authorities among the spectators declaring publicly that the small-bore rifle, the performances of which had brought them together, would hold its own against any other which could be opposed to it, and would make as good shooting as any gun could possibly do, no matter how or by whom it was made, or at whatever cost.

Lieut.-General Sir Henry Somerset, K.C.B., quits the shores of India, after having held for upwards of five years the command-in-chief of the Bombay Army. With his retirement ends the general's active military career. The most distinguished portion of that career was passed at the Cape. Although, while he has been in Bombay, the times have called for the exercise of the highest military qualities of Indian generals, Sir Henry Somerset has been a very ordinary Commander-in-Chief. During the mutinies he was virtually superseded, and to others than the nominal head of the Army must be attributed the praise due for the rapidity with which troops arriving in Bombay were hurried on to the relief of their fellow-comrades in Central India and the North-West. It cannot, however, be regarded as a just cause of blame to Sir Henry Somerset, that when his years had fallen into the sere and yellow leaf, he could not compete for new laurels with the vigour and energy of youth. Apart from this, he has been much liked and respected during his term of office. If he was not a hero, he was an amiable, well-intentioned, Commander-in-Chief, who committed no gross acts of jobbery or injustice. He leaves the Presidency with the good wishes of all. Sir Hugh Rose succeeds to the command, to the intense delight of the Bombay army. Sir William Mansfield is still in Bombay, awaiting, it is presumed, further orders from home. —*Bombay Gazette.*

INDIA.

The following telegrams were yesterday afternoon received from Brigadier Coghlan at Aden at the India Office:—

"FEROZEPORE, March 25.

"Quiet prevails in India.

"A serious fire broke out in Dacca, which destroyed half the town. Six thousand families have been reduced to destitution. Subscriptions have been commenced to relieve the sufferers.

"There have been some agrarian riots among the indigo cultivators at Vererhuago (?) and the neighbourhood.

"The Governor-General was at Holy (?). He will join his camp at Hoshiarpoor, *viâ* Sjopwepor (?) and Moduon (?).

"Funds.—Government Five per Cent. Loan at 5 to 5¼ per cent. discount. Five-and-a-Half per Cent. Loan at par to ¼ per cent. premium. BEADON.

"In two districts of Lower Bengal much excitement has arisen, connected with the cultivation of indigo; but we apprehend no disturbances which will not be promptly suppressed by military police. The magistrates' power have been enlarged by a temporary law, and a special commission of inquiry will be issued.

"The Lieutenant-General of Bengal reports that he has every reason to believe that the excitement in the indigo districts is passing off, and that he has no apprehension of serious disturbances anywhere.

"Calcutta, April 1. PRESIDENT IN COUNCIL."

THE MEDICAL WARRANT IN INDIA.—A letter, dated Calcutta, 23rd February, says, "We were not cheered by the account you give of the prospects of the department. I do not see what is to be done. Out here we can do very little; our friends are few and powerless. Packenham, now down here, *en route* home, was, to the best of his ability, a friend to the department. He knows by experience, that in our department, as in all others here, the interests of the Queen's Service is made to yield before that of the old Company's people, and he thinks us very badly treated. We would be better off on the whole by allowing things to remain as they are, than by having the rank given by the Warrant, and the pay of corresponding military officers, without head-money or staff allowances. Surgeon-majors would benefit, and assistant-surgeons of six years' service would also, but surgeons and young assistants would lose. The argument which appears to me most logical is this:—The Warrant was given to improve our position. Was that position in this country such as to call for no change, or is it any improvement to add to one item of income and diminish another? On a consideration of these points, and the fact, well known to all who have looked into the subject, that even the increase thus made would not be out of proportion to the Indian officers' advantages, it would or ought to be allowed that the Warrant, pure and simple, should influence us. As I said to you in a former letter, it is virtually a promotion, and on this account ought to be a benefit to us. Comparisons between our emoluments and those of the Indian Service are familiar to you; no doubt you are better informed on the subject than I am. Hardy lays down a set of principles which he wishes me to send to you. Taking the proportion between the medical officers at home and the combatants at home, of relative rank, as regards pay as a starting point, if the same proportion were observed out here, it would be found that the result would not much, if at all, exceed what the Warrant would give us; *e.g.* a lieutenant at home gets 9*l.* 15*s.*, and an assistant-surgeon, on appointment, 15*l.* Observing, that proportion in India would give a lieutenant 256 rupees a month, and an assistant-surgeon about 385 rupees.

LUMPS FORT, PORTSMOUTH.—This new fort is progressing, and will be when finished an important battery, connecting the sea defences of Southsea Castle and Cumberland Fort. New Lumps is built upon, or rather in the rear of, Old Lumps, now in ruins; the latter being merely an ancient earthwork, raised about a century ago, but long since rendered useless by the encroachments of the sea. The wasting away of the low shore of this part of the coast is at times very great in places, and in the locality of the new fort, the rate of destruction may be guessed at pretty accurately. Old title-deeds of land hereabouts, show that the farms abutting upon the coast have lost many of their most profitable acres; and from the reduced acreage of some of the neighbouring meadows, a rough estimate has been formed of the annual loss sustained by the wasting of the cliff, which is here about three feet high. A fair average is about a yard per annum, but of course in some places it is more, in some less. People are now living who remember Old Lumps Fort when it was armed, and had a sea-face of solid masonry: all of which a stranger would think improbable. But it is nevertheless true, and so are the stories of old greybeards, who remember when the sea did not reach the outworks of Southsea Castle, which fortress is now only preserved from ruin by an artificial beach of squared stones, cemented and dovetailed into one another, and protected seaward by hundreds of piles.

These facts are trifling in themselves, but are suggestive of the ruin that awaits the extensive batteries now constructing at New Lumps. The sea is still encroaching, and the new fort is close to the shore. A hint was given by nature during the late extraordinary tides, when, if the wind had been southerly instead of northerly, the labours of the last few months might have been "wiped out." At present there is a "maiden top" between the new fort and the sea, but which, reasoning from past events, must soon be broached, and then the New Lumps Fort will, like its predecessor, be liable to the assault and battery of the sea.

Some persons have ventured to suggest, that Lumps Fort is not required. Our ancestors made similar remarks when Cumberland Fort was erected, about a mile further to the eastward. They called the latter fort, which cost about a million, "England's Folly," because it protects what nature has already protected by the Woolstonor Sand, viz: the entrance to Langstone Harbour. Without adding our doubts to those military and engineer critics who condemn New Lumps, we confine our remarks to this simple suggestion: that long before any human foe dares to face its batteries, a much more active enemy—the sea—will have swept away its moats and bastions, and silenced its guns, as it did Old Lumps fifty years ago.

Obituary.

It is with much regret we record the death of a young and distinguished officer, Colonel John Brandling, C.B., Royal Artillery, who died in Italy of an illness, the seeds of which were contracted in the Crimea, where Colonel Brandling commanded the 1st troop R.H.A.

It is with great regret that we record the death of Captain Leicester Vernon, M.P., late of the Royal Engineers, which took place suddenly on Saturday, at his residence, 51, Great Cumberland Street, Hyde Park. Captain Vernon left the Carlton Club at about four o'clock in the afternoon in his usual health and spirits, accompanied by a friend. In driving up St. James's Street his horses became restive, and the deceased gentleman got out of his carriage to ascertain the cause. In endeavouring to make the horses proceed he fell, but immediately recovered himself, and proceeded calmly to give directions as to the disposal of the horses and carriage, which he followed to the livery stables in the neighbourhood. He then, stating that he felt perfectly uninjured, walked to the top of St. James's Street, and got into a cab to be driven to his residence. At that time he complained of a slight pain in his chest. On reaching the middle of Regent Street he made further complaints of being unwell, and requested to be driven home. On reaching his house medical advice was immediately summoned, but before it could arrive Captain Vernon had breathed his last. The cause of death is ascertained to have been internal hemorrhage, produced by the rupture of a blood-vessel. Captain Vernon represented the county of Berks, and was an active and able member of the House of Commons.

We have to record the demise of Lieut.-General Sir Henry E. Bunbury, Bart., K.C.B., who expired at an early hour on Friday morning at Barton Hall, Suffolk, at the advanced age of eighty-one years. The gallant deceased entered the Army at a comparatively early age, served in Holland in 1799, and also in the expedition to Naples and Calabria in 1805-6, being present at the battle of Maida, for which he received the gold medal. In 1814 he obtained the rank of Major-General, and in 1830 he was promoted to that of Lieut.-General, when he retired from the Army. In 1815 he was nominated a Knight Commander of the Order of the Bath, in recognition of his military services. From December 1809, up to April 1816, he was Under Secretary of State for the War Department, and for some years represented the county of Suffolk in the House of Commons. The late baronet succeeded to the family honours and estates on the death of his uncle, the sixth baronet, in 1821. He was twice married; first, in 1807, to Louisa Amelia Fox, daughter of General the Hon. Henry Edward Fox, which lady died in 1828; and secondly, in 1830, to Miss Napier, daughter of the late Colonel the Hon. George Napier. The eldest son of the gallant general by his first marriage, Charles James Fox Bunbury, succeeds to the baronetcy. Sir Henry having retired from the Army, no promotion will take place in consequence of his demise.

We have to announce the death of Rear-Admiral the Hon. Charles Orlando Bridgeman, which took place on Saturday last, at his residence, near Oswestry. The deceased admiral was second son of Orlando, first Earl of Bradford, by the Hon. Lucy Elizabeth Byng, eldest daughter of George, fourth Viscount Torrington, and was born on the 3rd of February, 1791. He married on the 2nd of December, 1819, Eliza Catherine, eldest daughter of Sir Henry Chamberlain, by whom he leaves a family, being father of Lady Londesborough and Lady Corbet, wife of Sir Vincent Rowland Corbet. The late rear-admiral entered the Navy at an early age, and obtained his commission of lieutenant on the 10th of September, 1810; that of commander, on the 6th of May, 1814; captain, 2nd of September, 1819; and rear-admiral, on the 19th of January, 1852. Numerous families of rank are placed in mourning.

Many of our readers will hear with deep regret of the death of Professor J. Narrien, F.R.S., F.G.S., &c. For forty years Mr. Narrien was professor of mathematics, fortification, and astronomy at the Royal Military College, Sandhurst, almost the whole time at the senior department, the text books of the studies of that department having been edited by him. While a profound scholar in astronomical and mathematical science, he kept pace with the youngest student in all the more familiar literature of the day. His powers of general conversation and his great learning were equalled only by his extreme modesty, and the extraordinary aptitude he possessed in accommodating himself to the lowest capacity under his instruction. Study under Professor Narrien became indeed a real pleasure, and intercourse with him, whether in "the hall" or in the private circle, while it elicited from all the greatest admiration for his extraordinary learning, as well as for his many other estimable qualities, engendered in not a few the associations of a lasting private friendship. He had retired from the duties of his professorship about two years since. Two months ago the illness which has proved fatal attacked him. He died in his 78th year on the 30th March, at 16, Clarendon Road, Kensington, to the sorrow of a large circle of friends, military as well as civil.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Beswick—April 14, at Chichester, the wife of Captain Frederick Beswick, 21st Depôt Battalion, of a son.

Bird—April 14, at 36, Dorset Place, Dorset Square, the wife of Captain T. C. Bird, Madras Army, of a son, stillborn.

Chalmers—April 15, at Sand Rock Cottage, near Farnham, the wife of Frederick Chalmers, Esq., Rifle Brigade, of a daughter.

Clarke—April 16, at Southampton, the wife of Captain Clarke, Royal Engineers, of a daughter.

Cowell—March 31, at the Curragh Camp, Kildare, the wife of Captain Henry Cowell, 14th Regiment, of a daughter.

Jackson—April 12, at East Moulsey, Surrey, the wife of E. S. Jackson, Esq., H.M.'s Bengal Army, of a son.

Langley—April 17, at 7, Cleveland Terrace, Hyde Park, the wife of Colonel Langley, of a son.

Lightfoot—April 15, at Wood View Mount, Sheffield, the wife of Lieut.-Colonel Lightfoot, 84th Regiment, of a daughter.

Mackenzie—April 14, at 21, Waterloo Road, Dublin, the wife of W. Ord Mackenzie, Esq., M.D., Surgeon-Major 3rd Light Dragoons, of a daughter.

Wallis—April 15, at St. James's Place, Fermoy, Ireland, the wife of Captain A. B. Wallis, 33rd Regiment, of a daughter.

Wildey—April 17, at Cosham, near Portsmouth, the wife of Dr. W. W. Wildey, R.N., of a son.

MARRIAGES.

Beamish—Dougal—April 17, at St. James's Church, Piccadilly, by the Rev. Henry Hamilton Beamish, M.A., of Trinity Chapel, Conduit Street, father of the bridegroom, assisted by the Rev. Charles H. Ramsden, M.A., Edward Spraed Beamish, Esq., Captain Bombay Artillery, to Elizabeth, fifth daughter of John Dougal, Esq., of Glenferness, N.B.

Bull—Longford—Feb. 7, at Colwood, Vancouver's Island, by the Right Rev. Lord Bishop of Columbia, John A. Bull, R.N., and of H.M.S. Plumper, to Emma, third daughter of Edward Edwardes Longford, Esq.

Curtis—Saunders—April 19, at St. Margaret's Church, by the Rev. E. F. E. Hemkinson, Rector, Lieutenant James Dillon Curtis, R.N., to Emma Morley, eldest daughter of John Gower Saunders, Esq., of King's Lynn.

Dowell—Mansel—April 12, at Alverstoke, by the Rev. Thomas Walpole, M.A., George Dare Dowell, Esq., V.C., Captain Royal Marine Artillery, to Mary, youngest daughter of Robert Mansel, Esq., Captain Hants Artilery, late of the 6th Inniskilling Dragoons.

Fegen—Milton—April 12, at St. Nicholas Church, Hereford, by the Rev. E. Howells, M.A., Custos of the College of Vicars, Hereford, assisted by the Rev. C. J. Jones, M.A., brother-in-law to the bride, vicar of Westbury-on-Severn, Lieutenant Charles Goodwin Fegen, R.N., eldest son of the late Captain Fegen, R.N., Anglesey, Hants, to Harriette Alice, youngest daughter of the late William Milton, Esq., of "The Friars," Hereford.

Graham—Grant—April 4, at Beechwood, Stirling, N.B., by the Rev. Dr. Beith, Captain A. W. Graham, Bombay Rifle Regiment, and second in command Kandeish Bheel Corps, to Margaret Janet, sole surviving child of the late Captain Wm. Grant, 27th Regiment, Bengal N.I.

Hickley—North—April 17, at Sunbury, by the Rev. John George Hickley, rector of Walton, Somerset, assisted by the Rev. Henry Vigne, vicar of Sunbury, Captain Victor Grant Hickley, R.N., to Maria, youngest daughter of the late Rev. William North, of Walton-on-Thaems.

Hordern—Campbell—April 17, at St. George's, Hanover Square, by the Rev. Henry Daniel, rector of Rampton, Notts, Houstonne James Hordern, M.A., rector of Kingsdown, Kent, eldest son of the Rev. James Hordern, vicar of Dodington, to Catherine Jane, second daughter of the late Lieut.-Colonel James Campbell, of the 87th Regiment.

La Touche—La Touche—April 17, at Wymering, Hants, by the Rev. George Nugée, vicar, Major La Touche, to Elizabeth Cecilia La Touche, of Delgany, county Wicklow.

Lethbridge—Porch—April 17, at St. John's, Glastonbury, by the Rev. Charles Rumball, B.A., Oxon, the Rev. Elford C. Lethbridge, M.A., Oxon, youngest son of Captain Lethbridge, R.N., to Julia, eldest daughter of Thomas Porch Porch, Esq., Edgarley, Glastonbury.

Marshall—Snow—April 17, at St. Thomas, Devon, by the Rev. T. H. Maitland, uncle of the bride, assisted by the Rev. W. H. Howard, vicar of St. Thomas, Captain Edward Marshall, R.N., to Lavinia Maitland, second daughter of Thomas Snow, Esq., of Franklyn.

Palmer—Tayler—Feb. 28, at Patna, Archdale Villiers Palmer, Esq., of the Bengal Civil Service, son of Lieut.-Colonel Palmer, of Nazingpark, Essex, to Helen, the daughter of William Tayler, Esq., late of the Bengal Civil Service.

Penney—Lee—April 18, at West Boldon, by the Rev. J. R. Hall, M.A., Canon of Durham, assisted by the Rev. W. Ramsden, M.A., John W. W. Penney, Esq., B.A., son of the late Colonel Penney, H.E.I.C.S., to Mary, only daughter of James Lee, Esq., of Sandfield.

Plumpton—Johnstone—April 12, at Penge Church, Upper Norwood, by the Rev. A. McAlley, Robert Plumpton, Esq., of Adelaide Road, Hampstead, to Elizabeth, only daughter of the late William Montague Johnstone, Esq., Lieutenant R.N.

Ridley—Keane—April 17, at Christ Church, Worthing, by the Rev. W. H. Ridley, rector of Hambledon, Bucks, the Rev. Oliver Matthew Ridley, to Frances Elisa, only daughter of Colonel and Mrs. Keane.

St. John—Maunsell—April 12, at the parish church, by the father of the bride, J. H. H. St. John, Lieutenant 20th Regiment, to Victoria Elizabeth, youngest daughter of the Rev. F. R. Maunsell, rector of Castle Island, county Kerry.

Wisden—Mair—April 11, by the Rev. Ewd. Eedle, vicar of Southbersted, T. Faulconer Wisden, of the Royal Sussex Light Infantry Militia, only son of Thomas Wisden, Esq., of East Doure House, Bognor, to Caroline Anna, youngest daughter of Colonel Mair, Hothampton Place, Bognor.

Wolley—Warburton—April 12, at Overton, Flintshire, by the Rev. Henry Leslie, rector of Kilclief, Henry, son of the late Vice-Admiral Thomas Wolley, to Sophia, youngest daughter of the late Rev. Rowland Egerton Warburton, of Norley, Cheshire.

Young—Pink—April 17, at the Church of St. Alphege, Greenwich, by the Rev. William Aldwin Soames, vicar, assisted by the Rev. William Edmeades, rector of Nursted and Ifield, Kent, Major Charles Frederick Young, R.A., to Jane Taylor, third daughter of Henry N. Pink, Esq., of Croom's Hill, Greenwich.

DEATHS.

Bridgeman—April 13, at Knockin, Shropshire, Vice-Admiral the Hon. Charles Orlando Bridgeman, aged 69.

Bunbury—April 13, at Barton, Bury St. Edmund's, Lieut.-General Sir Henry Edward Bunbury, Bart., K.C.B., aged 81.

Cambell—April 1, at Corfu, John Cambell, M.D., Staff-Surgeon, aged 33.

Downes—March 7, at Mauritius, aged 11 months, Major Edward, the infant son of Captain Downes, Royal Artillery.

Fanshawe—April 13, at 19, Pembroke Square, Kensington, aged 36, Maria Catherine Charlotte, widow of Lieutenant Robert F. Fanshawe, E.I.C.S., and eldest daughter of the late Lieut.-Colonel Hugh Wrottesley, Bengal Army.

Glinn—April 5, at his residence, Hereford, Charles James Price Glinn, Esq., Commander R.N., aged 41.

Gunning—April 16, in Glocester Place, Portman Square, Lieut.-Colonel Gunning, aged 78, formerly of H.M.'s 69th Regiment.

Home—April 12, at his residence, Weston, Bath, Major-General John Home, H.M.'s Indian Army.

Hope—April 17, at Exeter, Colonel John I. Hope, Royal Engineers, aged 64.

Mainwaring—April 13, aged 61, Major Mainwaring, late of the 22nd Regiment. He served under the late Sir C. Napier in the Scinde campaign.

Neilson—April 12, at Boulogne-sur-Mer, aged 40, Francis Robert Neilson, Esq., General Manager of the Agra and United Service Bank.

Nickle—April 10, at Westbourne Terrace, Hyde Park, Catherine, relict of the late Captain William Nickle, formerly of the 88th Regiment.

Owen—April 3, at Malta, on his way to England, Lieut.-Colonel Conrad J. Owen, C.B., 3rd Regiment Bombay Light Cavalry, H.M.'s Indian Forces.

Rainey—April 8, at Bedford, at the house of her son-in-law, the Rev. John H. A. Rudd, Ann Loring Rainey, aged 76, widow of the late Captain James Rainey, of the 7th Bengal Cavalry.

Russell—March 3, of cholera, at Seetabaldee, William Charles, son of Captain J. G. Russell, Paymaster at Nagpoor, India, aged 2 years and 7 months.

Vandeleur—April 10, at Waterloo Road, Dublin, after a long illness, Elizabeth Emily, the beloved wife of Captain C. T. Vandeleur (late of the 34th Regiment), of Wardenstown, county Westmeath, and eldest daughter of the late Right Hon. Maurice FitzGerald, Knight of Kerry.

Vernon—April 14, suddenly, at 51, Cumberland Street, Hyde Park, Captain Leicester Vernon, of Ardington House, Berks, and M.P. for the county.

Wakeford—April 11, at Brighton, Rebecca, the dearly beloved wife of Lieutenant Joseph Wakeford, Esq., late of H.M.R. West Kent Regiment, aged 63.

White—April 17, at Clapham Common, Barbara Ahmuty Mouat, relict of the late Rev. Edward White, Chaplain of the H.E.I.C.S., and daughter of the late Major-General Biggs, Bengal Artillery.

Wood—At Graefrath, Prussia, Commander James Wood, R.N., son of the late John George Wood, Esq., aged 51.

The numerous friends of Sir James Outram will be happy to learn that a letter has been received from him dated the 17th March, in which he announces his recovery from the severe illness under which he recently laboured, and his resumption of his official duties. His own words are "I am perfectly well now, and have returned to work."

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., viâ EGYPT.—THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

SCREW STEAM YACHT FOR SALE, about 200 tons (O. M.), 40 horse-power; rig, a three-masted schooner. Has only been used about nine months in sea service, chiefly in a winter cruise in the Mediterranean, during which she proved an excellent sea boat. Has just been fitted with the superheating apparatus, reducing considerably her consumption of fuel, and increasing her speed. Consumption now, about 5 tons in 24 hours. Speed, under steam only, 10 knots; with steam and sail, 11 to 12 knots. Commodiously arranged for a family or party, and elegantly decorated. Abundantly provided with stores, including cutlery, china, &c., &c., and is ready for a cruise, without requiring any outlay, except for provisions. For further particulars, enquire of Mr. Thomas Hill, Southampton, where also the yacht may be seen and inspected.

ARMY, NAVY, EAST INDIA, AND COLONIAL AGENCY.

The undersigned act as GENERAL AGENTS in England for Officers and Members of the above services. A detailed Prospectus forwarded on application.

W. R. Looker & Co., 12, Pall Mall East, London, S.W.

INDIA.—OFFICERS IN THE ARMY AND CIVILIANS PROCEEDING TO INDIA, may insure their lives on most favourable terms in the MEDICAL, INVALID, AND GENERAL LIFE ASSURANCE SOCIETY. The rates of this Company, which transacts the business of the Delhi, Simla, North West and other Indian Banks, are lower than those of any other Office, while the Agencies at Calcutta, Madras, Bombay, Ceylon, and about 50 up-country stations in India, afford every possible facility for the transaction of business.

Prospectuses, Forms of Proposals, and every other information, may be obtained of the Secretary, at the Chief Office, 25, Pall Mall, S.W.

C. DOUGLAS SINGER, Secretary.

PERSONS PROCEEDING TO INDIA, or any of the British Colonies, can effect assurances on favourable terms with the COLONIAL LIFE ASSURANCE COMPANY.

Loans given to Civil or Military Officers proceeding to India on Her Majesty's service.

Agents at Calcutta, Madras, and Bombay, and in all the British Colonies, where premiums can be paid and claims settled.

The COLONIAL was established in 1846, and its present income is upwards of 100,000*l.* per annum.

Subscribed capital, 1,000,000*l.* sterling.

Divisions of profits have taken place on two occasions—in 1854 and 1859.

A Policy for 1000*l.*, opened in 1847, has been increased by the application of the Bonus to 1235*l.*

Constituted by Act of Parliament.

SAMUEL R. FERGUSSON, Resident Secretary.

LONDON ... 81, Lombard Street, E.C.; and at Messrs. PARIS & Co., 10, St. James' Street, S. W.
EDINBURGH (Head Office) 5, George Street.
DUBLIN ... 65, Upper Sackville Street.
GLASGOW ... 58, St. Vincent Street.

THE STANDARD LIFE ASSURANCE COMPANY. SPECIAL NOTICE.

BONUS YEAR.—SIXTH DIVISION OF PROFITS.

All policies now effected will participate in the division to be made as at 15th November next.

The Standard was established in 1825.

The first division of profits took place in 1835; and subsequent divisions have been made in 1840, 1845, 1850, and 1855.

The profits to be divided in 1860 will be those which have arisen since 1855.

Accumulated fund £1,684,598 2 10
Annual revenue 289,231 13 5

Annual average of new assurances effected during the last ten years, upwards of half a million sterling.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

The Company's Medical Officer attends at the office daily, at half-past one.

LONDON, 82, King William Street, E.C.

Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission, Author of "Adulterations Detected." "The Urine in Health and Disease," &c.

Wimpole Street, 20th January, 1860.

DINNEFORD'S PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION. As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS (and General Agents for the *Improved Horse Hair Gloves and Belts*), 172, NEW BOND STREET, LONDON, W., and Sold by all respectable Chemists throughout the Empire.

TEETH.—MR. ESKELL, SURGEON DENTIST, 314, Regent Street, W. (facing the Polytechnic), supplies his PATENTED INCORRODIBLE TEETH, which can be matched so closely in shape and colour to those left in the mouth, and are formed so exactly to nature, that the closest observer cannot detect the difference, and in all cases they restore perfect articulation and mastication. These teeth are fixed from one to a complete set upon Mr. Eskell's never-failing and painless principle of Self-adhesion, without extracting any teeth or stumps, or giving any pain whatever; and being incorrodible they possess the superior advantage of never changing colour nor decaying. Mr. Eskell's celebrated Osteoplastic Enamel, post free for thirty stamps, for Stopping Decayed Teeth, is a preparation which never changes colour nor affects the colour of the tooth, and is free from any injurious properties either as regards the teeth or general health. Its application is easily performed, and without giving the slightest pain. Deficiencies of palate effectually remedied. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation, free. Charges strictly moderate.—314, Regent Street, W. (opposite the Polytechnic), London.—Established 1847.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

A BOON TO NERVOUS SUFFERERS.

THE NEW MEDICAL GUIDE for gratuitous circulation. A NERVOUS SUFFERER having been effectually cured of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, by following the instructions given in the MEDICAL GUIDE, he considers it his duty, in gratitude to the author, and for the benefit of others, to publish the means used. He will, therefore, send post free, on receipt of a directed envelope, and two stamps, a copy of the book, containing every information required

"Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind."—*British Critic.*

Address, JAMES WALLACE, Esq., Wilford House, Burton Crescent, Tavistock Square, London. W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 to 8 Evening.

Send a Penny Stamp and receive free by post,

THE "INVALID'S OWN GUIDE," or Natural Restorer, without Medicine or expense, of perfect digestion, strong nerves, sound lungs, and refreshing sleep, to the most enfeebled, effectually removing indigestion (dyspepsia), nausea and sickness even during pregnancy, debility, nervousness, palpitation, cough, asthma, incipient consumption, dropsy, constipation, flatulency, diarrhœa, dysentery, biliousness, fevers, sore throats, catarrhs, colds, noises in the ears, rheumatism, gout, impurities, eruptions, hysteria, neuralgia, irritability, sleeplessness, acidity, palpitation, heartburn, headache, despondency, cramp, spasms, sinking, fits, bronchitis; also children's complaints. LORD BACON wrote a series of ingenious essays to exhibit the latent wisdom of the ancients lying hid in their mythological fables. But these fables sometimes puzzled him. For instance, that of the rejuvenescence of Pelias. Medea's recipe (as we should now call it) was, that old Pelias should be boiled, after being cut into pieces, in order that a fresh Pelias might be re-constructed. All that Bacon could make of this was, that there might be something in the boiling process (no doubt anticipating what we have the happiness to see in our own days, a good time coming, of baths, wash-houses, and tubbing); but he could make nothing of the cutting to pieces. Well, we have the advantage of Bacon here. To use his favourite analogy, even dwarfs, when mounted upon giants' shoulders, see farther than the giants themselves; so we, thus elevated, and enlightened by the lamp of Time (for Time, though painted with an hour-glass, should be represented with a light in his hand), can now see what Medea meant.

The goddess was looking a-head. The Pelias she had in view was no individual dotard. He was a representative man. And judging from recent events, he was specially meant to represent all corporate bodies, boards, and companies. We must leave public companies and shareholders to look after themselves, aided by the *Times* and the city articles of the daily journals. We have a duty to perform in the interests of the general public, on whose behalf we are unpaid directors; and we beg to announce that in our opinion Medea had an eye, in the fable of Pelias, most especially to the Board of Admiralty.

What with Lord Clarence Paget, before he was secretary; what with Sir John Pakington and the House of Commons since; and what with Louis Napoleon; who can deny that the Admiralty has been kept in hot water? If it be possible to boil a board, the Board of Admiralty must be sodden. And what with the *Times* always—on Thursday last, for instance—and the *Saturday Review* from time to time—as on Saturday last—the Admiralty is roasted too! Its fate so far, then, is doubly that of Pelias. Boiled and roasted both, shall it also be cut in pieces? "What is to be done with the Admiralty?" asks the *Saturday Review*. And it says, "No one time can be pointed out when the Admiralty ever deserved to be called efficient, nor does it show any tendency to become so. Those who really desire an effective, and at the same time thrifty management of the Navy, will do well to concentrate their efforts upon the reform of the constitution of the Admiralty itself." Pelias must be cut in pieces! The same thing was said in a trenchant pamphlet* reviewed in this GAZETTE on the 17th ult.:—

"There would lie the remedy. If Parliament would direct the attention of its committees more to the manner in which public affairs are administered; if it would see that right men are in right places, and, being there, that they have power to act freely, and are held responsible for their acts; if they would take care that departments are properly organised, on proper principles; that while there are checks and counter-checks among those in office, also that the large departments of State are not over-controlled,—mere playthings for men in to-day and out to-morrow, who may shape their administration upon panics and popular outcries,—it would accomplish an administrative reform that is greatly wanted.

"Only think what has been thrown upon the 'Surveyor of the Navy' during the last ten years. The Navy Estimates rose from five or six millions to twenty at the Russian war. Need we wonder that floating batteries were built and found of no use? and that gunboats followed in shoals, to be "hauled-up" at Haslar? What public company, or commercial man, with a business increasing from five millions to twenty per annum, would not think of dividing the responsibility by adding fresh heads to the management, or taking in at least one new partner? What would even be said, if all that relates to the rifle and great gun in the army were left under one single man's management? Can we wonder that a ship built at one dockyard costs a totally different rate per ton than at another? or that the accounts in both cases are probably unreliable? Need we be suprised that after steamers were long discouraged, then a fleet of iron vessels were suddenly launched, and their unfitness for war only discovered afterwards? that floating batteries, gunboats, small ships and large ships, and, lastly, rams, have each had a spasmodic and fitful turn at the royal dockyards? and that, notwithstanding, the constant cry of inventors has been, that nothing has any chance at the Admiralty!

"You give the Board of Admiralty enormous power; you lay upon the Comptroller of the Navy enormous labour, and leave him to do it alone. The fruits of this system, it is said, have been failures *always;* none was more loud in the accusation than the present Secretary of the Admiralty before he was in office—iron vessels fit for nothing, floating batteries useless, gunboats hauled up at Haslar, vessels laid down on one plan to be changed to another, ships cut down, cooked, patched, and lengthened, huge screw-vessels built, and last of all, the steam-rams. But all the time, there is no security that the last may not turn out to be much greater and more serious failures than any of the others. Don't blame Sir Baldwin Walker should it be so: he is only one man. Don't blame even the Duke of Somerset:—rams are now the naval fashion, which we are content to take from France, like crinoline and peg-top trowsers. But blame yourselves alone, gentlemen of the House of Commons, that your naval system of administration is defective, and wants reform."

The *Times* thunders out the same thing; and the report of the Commission now appointed "another, and another, and each so [illegible] last," is already, from bitter experience, prejudged, as destined only to go to "the limbo of Admiralty reports" referred to in one of our leaders a few weeks back. Yes, yes, we must quote once more: "To reform the dockyards, it is necessary first to reconstruct the Board; and the sooner this is done, the better for the welfare of the Navy and the safety of England."

Oh! but that's only the *Times* and the *Saturday Review!* Is it? No! It is the Duke of Somerset! He it is that has best proved the wisdom of Medea's prescription. In his memorandum on the Report of the Committee on Dockyard Economy (Parliamentary Paper No. 79 of the present Session), for which he was very unfairly taken to task in the House of Commons, a week ago, he does not confine his well-deserved irony and sarcasm to the Report of the Committee. Let us take a few instances. "The Committee point out the importance of an energetic supervision of the dockyards by the Surveyor of the Navy, or some one representing him."—"The instructions to the surveyor from the Board (says the Duke) have stated these visits to be a part of his duties, but, at the same time it appears that no authority has been given to the surveyor over the work in the dockyards."—"An officer sent from his department would have no power to give an order, or to exercise the supervision required."

"They recommend that 'a shipwright and an engineer officer, representing the Surveyor of the Navy, should visit the dockyards frequently.' (Para. 7). They point out the importance of an energetic supervision, instead of the system of correspondence, under which the business of the dockyards has been conducted from the Admiralty.

"The instructions to the surveyor from the Board have stated these visits to be a part of his duties; but, at the same time, it appears that no authority has been given to the surveyor over the work in the dockyards. He may submit his views to the Board of Admiralty, but, under existing regulations, an officer sent from his department would have no power to give an order, or to exercise the supervision required."

Again:

"The dockyards were managed by naval officers selected more on account of their rank and professional character, than with regard to their special qualifications for conducting these costly establishments. The Lords of the Admiralty endeavoured, in the intervals of their other duties, to remedy the defects in shipbuilding, and to regulate the management of the dockyards."

Once more: "The Lords of the Admiralty endeavoured, in the intervals of their other duties, to remedy the defects in ship-building, &c., and, accordingly, a comptroller of steam-machinery was appointed."—"This appointment tended rather to impede than to advance the progress of the steam Navy." We are quoting not the *Times* or the *Saturday Review*, but the Duke of Somerset (p. 100).

Then comes fresh cooking, not unfortunately of the dotard Pelias himself, but of the Board. "This arrangement, however," says the Duke, "was still incomplete. The surveyor was required to exercise a supervision over the establishments of the dockyards; but he had no recognised authority over those establishments." What need we more? Shall we not cut this Board in pieces? Or, are things a bit better now? The Duke again shall tell us: "The question of appointing a deputy comptroller has been for some time under the consideration of the Board [doubtless "in the intervals of their other duties!"], but nothing has yet been decided."

They have called the Surveyor of the Navy "Comptroller," and nothing more! There's a deed for a Board of Admiralty! There's the remedy for Lord Clarence Paget's alleged £5,000,000 of waste! There's an administrative reform! Well may the question be asked, "What is to be done with the Board of Admiralty?"

But we must do justice in another respect to the Duke of Somerset. It is evident that the late Dockyard Committee deserved the censure he passed upon their Report. He says (p. 101), "The Committee admit that many of their recommendations are not supported by the evidence which they have collected (para. 1015); indeed, it might have been said, that many are in direct contradiction with the opinions of the majority of the witnesses." Well may he add, "A report, founded on this uncertain basis, is not in accordance with the usual practice of Committees of Inquiry, and increases the difficulty of arriving at a decision upon their recommendations." In our opinion it is sheer impudence, and a breach of duty, too, in a Committee to report without or against evidence. Again, the Committee recommends "the system of paying for work now practised by the shipbuilders on the Thames;" but, says His Grace (p. 103), "The well-known shipbuilders on the Thames were not called as witnesses, and the evidence in favour of this system rests on the testimony of one foreman from a private yard."

We shall conclude with His Grace's most amusing comment—no doubt what was alluded to in the House of Commons as being sarcastic; but, in our opinion, it deserves to be called rather a Socratic criticism:

"The Committee themselves apparently felt that, in reporting on the best means of regulating the future expenditure of the dockyards, some general principles should be set forth, and they endeavoured to direct their inquiry to the attainment of this result. Their efforts were not crowned with success, and perhaps they did not sufficiently consider the station and occupations of the witnesses to whom they addressed these general questions. For instance, they repeatedly asked the following question of artificers and workmen, whose replies prove the narrow view which they took of the large subject referred for their opinion: 'Can you state any recommendation which your judgment and experience suggest, as tending to promote economy in the expenditure of public money, and to increase the efficiency of Her Majesty's dockyards?' When such a question is addressed to the second leading-man in a millwright's shop, it is not surprising that he should reply: 'There is some work comes into our shop which the workmen are not calculated to perform efficiently or cheaply, such as blind-rollers and hair-sieves, which could be done better and cheaper outside, and also other work which I do not remember.' To the same question a painter answers—that in his opinion, the most important regulation of dockyard economy is, 'not to let the sailors paint the ships in harbour.'"

The Committee on Dockyard Economy might have known "there is nothing like leather;" and we are somewhat curious to see their minutes of evidence after this very rare specimen.

The French are about organizing a grand expedition of a commercial character from Senegal to Timbucktoo, or to Karroo which is a city of 60,000 inhabitants.

THE ARMY.

3rd Dragoon Guards. Surgeon Allen is on his way from India *vid* the Cape, on sick leave to England.

4th Dragoon Guards. We have received the following letter from the non-commissioned officers and men of this highly distinguished regiment, repudiating the imputation of disaffection, to which, on the authority of a Brighton paper, we felt it our duty to give currency in our last number:—"Sir, we regret to see in your valuable columns of the 21st inst. an article, copied from the *Brighton Observer*, casting an imputation on the 4th Dragoon Guards, by representing them lately to be in a disaffected state, &c. But the editor of that journal has been good enough in a later number to contradict that statement, and we hope you will insert this in your next publication, in order that the truth may boldly stand forth to repair such wanton attempts made to stain a regiment of officers and men, whose conduct at home and abroad has gained for them a high reputation; and one which they intend henceforward to maintain unsullied.—We remain, &c., the Non-Commissioned Officers and Men of the 4th Dragoon Guards." In the letter addressed to our Brighton contemporary it is stated, "An allusion is made towards Colonel Bentinck, representing him as being harsh in the administration of punishment to the men, by cropping their hair, &c. But we assure you that in no instance has ever that officer resorted to such a course, except when he was reluctantly compelled to do so to some men whose conduct well merited such a punishment, and in many instances probably could have been brought before a higher tribunal. And we further wish to inform you, sir, that since he has taken the command of that corps, we have found him in every respect a kind and indulgent commanding officer to all well-deserving members of the regiment."

5th Dragoon Guards. Captain Hay is about to retire from the service.

7th Hussars. Lieutenant the Hon. Walter Harbord has arrived in England.

9th Lancers will not be moved up to Aldershot this year, but will remain at Exeter. The 9th are very popular in Exeter, the regiment having been originally raised there.

12th Lancers. A wing of this regiment arrived at Madras from Masulipotam, and left for England on the 15th of March. The officers accompanying it are Captain G. Horne, Captain H. E. Reader, Captain C. J. W. Allen; Lieutenants E. Brown (adjutant), J. C. Le Quesne, E. Gower, and J. B. Vaughan; Cornets J. Blacker, H. J. R. Cruise, A. J. S. C. Chichester, J. Sefton, and J. D. Jackson; Lieutenant Swindley, Lieutenant W. L. Browne; Riding-master W. S. L. Stephens; Quartermaster Blake; Veterinary Surgeon Steele. The Regiment, on its arrival home, will be quartered at Leeds, where the depôt, under Captain King, has already arrived.

16th Lancers. Two detachments of this regiment left York last week, where the head quarters at present remain, *en route* for Aldershot, and the remaining portion is expected to follow in the course of next month. They are, we understand, to be succeeded by the 12th Lancers from India.

17th Lancers. The regiment was on the march at Hingolie on the 15th March. We regret very much to learn that they had lost thirty-two men by cholera since the 1st of that month; but the epidemic was, by last accounts, decreasing daily.

18th Hussars. The vacancy caused by the death of Lieutenant Saunders will, we understand, be filled up by the transfer to this regiment of one of the lieutenants of the 12th Lancers, who would be placed on half pay on the return of the regiment from India, instead of being given to the senior cornet, as is almost invariably the case.

ROYAL ARTILLERY. — The new brigade to the Royal Artillery, to be styled the "15th Brigade," to be formed at Portsmouth according to a general regimental order, is to be officered as follows:—Colonels Taylor and Gostling; Lieut.-Colonels Francklyn, Craydon, Dixon, and Travers; Captains Dickson, Richards, Hope, Brendon, De Havilland, Wilkinson, Davis, and Bredin; Second-Captains Johnstone, Humfrey, Wilson, Bolton, Walker, Cuthbert, Hamilton, and De Winton; Lieutenants Martin, Rooke, Cuming, Bevan, Bazalgette, Smith-Neil, Hall, Goodenough, Cameron, Price, Webber, Sandys, Burgman, Scott, Montgomerie, and Maunsell.

His Royal Highness the General Commanding-in-Chief has appointed the following officers to the Horse Brigade—viz., Second-Captain F. Lyon, vice Wilkinson, promoted; Lieutenant C. L. A. A. De Cetto, vice Millman, promoted; Lieutenant E. S. Burnett, vice Arbuthnot, promoted; Lieutenant J. M. Burn, vice Hall, promoted; Lieutenant G. B. B. Hobart, vice Rideout, promoted; Lieutenant R. Handcock, vice Watson, promoted; Lieutenant S. P. Lynes, vice Walker, promoted; Lieut. W. S. Curzon, vice De Winton, promoted; Lieut. A. A. Stewart, vice Hamilton, promoted.

The under-mentioned officers of the Royal Artillery have been appointed Adjutants provisionally, under the regulations contained in the general order of the 5th of February, 1826—viz., Second Captain, Maurice Henry Fitmaurice to the 11th Brigade, vice Campbell, who resigns the adjutancy only; Second Captain, Edward Courtenay Vaughan, to the 15th Brigade, by augmentation; Second Captain, Joseph Hanwell, to the depôt, vice Byrne; Lieutenant Henry Brackenbury to the depôt, by augmentation.

The following officers have been appointed to the Depôt Brigade—viz., Captain G. H. J. A. Forbes, to be Staff Captain; Captain E. J. Bruce, by augmentation; Captain and Brevet-Major W. W. A. Lukin, by augmentation; Second Captain, T. E. Byrne, to be Recruiting Officer, by augmentation; Second Captain, H. A. Doyne, by augmentation; Second Captain, H. S. Arbuthnot, by augmentation; Lieutenant H. Bond, by augmentation; Lieutenant T. S. Seccombe, by augmentation; Lieutenant E. R. Cottington, by augmentation; Lieutenant T. M. Hazlerigg, by augmentation; Lieutenant A. de M. Prior, by augmentation.

The following transfers of officers have been ordered:—Second-Captain and Brevet-Major J M'C. Campbell to No. 6 battery, 14th Brigade; Second-Captain W. L. Yonge to No. 3 battery, 14th Brigade; Second-Captain H. T. A. Law to No. 7 battery, 13th Brigade; Second-Captain H. J. Alderson to No. 4 battery, 5th Brigade; Lieutenant H. D. Evans to No. 8 battery, 11th Brigade; Lieutenant G. R. Salmon to No. 6 battery, 11th Brigade; Lieutenant C. R. Franklen to No. 8 battery, 14th Brigade; Lieutenant J. R. Oliver to H battery, Horse Brigade, vice Franklin, who resigns his appointment therein.

The following officers are also posted as annexed:—Colonel Eardley Wilmot, to the 7th Brigade; Colonel Fitzmayer, to the 8th Brigade; Colonel Elliot, to the 3rd Brigade; Lieut.-Colonel Graydon, to the 15th Brigade; Lieut.-Colonel Wragge and Turner, C.B., to the 4th Brigade, on Major's pay; Lieut.-Colonel Fisher, to the 6th Brigade, on Major's pay; Lieut.-Colonel Haultam, to the 8th Brigade, on Major's pay; Lieut.-Colonel Rowan, C.B., to the 10th Brigade; Captain Seale, to the 14th Brigade; Major Walcott, to the 1st Brigade, vice Forbes; Second Captain Rideout to the 7th Brigade, vice F. Lyons; Second Captain Watson to the 10th Brigade, vice Doyne; Second Captain Broughton to the 1st Brigade, vice Walcott; Second Captain Jackson to the 12th Brigade, vice Vaughan; Second Captain Tucker to the 15th Brigade, vice Hanwell; Second Captain Schreiber to the depôt brigade. Lieutenants—H. Marshall, J. Taylor, J. L. M'Callum, W. M'Kown, C. Montgomery, W. Robinson, J. Blades, J. Ramsey, G. Leeds, and W. Smith, to the 15th Brigade; Paymaster Smith to the 15th Brigade; Quartermaster Behenna to the 15th Brigade; Quartermaster Hoye to the Depôt Brigade.

The B battery of the Royal Horse Artillery, under the command of the Hon. Captain Paget, left their barracks, Ipswich, with their guns and field train, and marched for Woolwich, where they are to be brigaded.

The following establishment for the Royal Artillery serving in India is published in general orders:—Establishment of Royal Artillery serving in India.—For Bengal: Horse brigade, Royal Artillery.—1 lieut.-colonel. Each battery to consist of 1 captain, 1 second captain, 3 lieutenants, 1 assistant-surgeon, 1 veterinary-surgeon, 2 troop staff-sergeants, 9 sergeants, 6 corporals, 9 bombardiers, 90 gunners, 70 drivers, 1 trumpeter, 1 farrier, 6 shoeing smiths, 3 collar makers, 3 wheelers—total of a battery, 207. Head-quarters, 14th brigade. — Consisting of 1 colonel-commandant, to remain at home; 2 colonels, ditto; 4 lieut.-colonels (2 Bengal, 1 Madras, 1 depôt at home); 1 paymaster, 1 adjutant, 1 quartermaster, 1 surgeon, 7 staff-sergeants and sergeants, as detailed for 11th brigade—total head-quarters staff, 18. Field batteries, each 218, as detailed for 11th brigade. Veterinary-surgeons for field batteries, 6. Head-quarters, 11th brigade.—Consisting of 1 colonel-commandant, to remain at home; 2 colonels, ditto; 4 lieut.-colonels, 1 paymaster, 1 adjutant, 1 quartermaster, 1 surgeon, 1 sergeant-major, 1 quartermaster-sergeant, 1 trumpet-major, 1 orderly room-sergeant, 1 paymaster-sergeant, 1 hospital-sergeant, 1 armoury-sergeant—total head quarters staff, 18. Bombay: 1 battery royal horse brigade as detailed for Bengal. Head Quarters, 13th Brigade.—Consisting of 1 colonel-commandant, to remain at home; 2 colonels ditto; 4 lieut.-colonels (2 Bombay, 2 at home); 1 paymaster, 1 adjutant, 1 quartermaster, 1 surgeon, 7 staff-sergeants and sergeants, as detailed for 11th brigade—total head quarters staff, 18. Each field-battalion to consist of 1 captain, 1 second-captain, 3 lieutenants, 1 assistant-surgeon, 2 battery staff sergeants, 8 sergeants, 9 corporals, 9 bombardiers, 100 gunners, 70 drivers, 2 trumpeters, 1 farrier, 6 shoeing smiths, 3 collar makers, 2 wheelers—total, 218. 13th Brigade.—Field batteries, each 218, as detailed for 11th Brigade. Veterinary surgeons for field-batteries, 4. Madras: 1 battery royal Horse-Brigade, as detailed in Bengal. 1 lieut.-col of 14th Brigade. Field batteries of 14th Brigade, each 218, as detailed for 11th Brigade. Veterinary surgeons, 2.

A few days since, Sergeant Fletcher, Royal Artillery, employed in the recruiting service at Croydon, visited Woolwich, and committed suicide at the house of his brother-in-law, by taking prussic acid. He was deficient in his regimental accounts to the amount of 13*l*.

ROYAL ENGINEERS.—The 18th Company of Royal Engineers will proceed from Weymouth to Aldershot, instead of joining head-quarters as was originally ordered. Captain Longley has proceeded from Chatham to Weymouth to take the company to Aldershot, Captain Hawthorn having been ordered to remain at Weymouth. Lieutenant Maude and O'Brien, of the Royal Engineers—the former from Chatham, and the latter from Plymouth—have proceeded to Dover to join the staff of the Commanding Royal Engineer at that station.—Lieutenants J. B. Patterson and H. D. Crozier, with one hundred and one rank and file, one woman, and one child, of the 11th Company Royal Engineers, under the command of Captain and Brevet-Lieutenant-Colonel Browne, arrived at Bombay from Poona on the 24th March, and embarked for Mauritius per P. & O. Co.'s steamer Norma.

MILITARY TRAIN. The 3rd battalion is under orders to change quarters from Woolwich to Aldershot.

Scots Fusilier Guards. Lieut.-Colonels the Hon. I. Strange Jocelyn and Mure are about to retire from the service, by which Captains the Hon. Hugh Annesley and Campbell, and Lieutenants White and Elwes obtain promotion.

5th Fusiliers. The 1st battalion is ordered home from India.

8th Regiment. The 1st battalion is ordered to return from India this year.

16th Regiment. The 2nd battalion at Clonmel is under orders for the Curragh.

19th Regiment. Major F. M. Alison, A.D.C. to Lord Clyde, has arrived in England from India on leave of absence.

22nd Regiment. The 1st division of the 1st battalion now stationed at Beggar's-bush Barracks, Dublin, will proceed to Cork about the latter end of this month, and embark at that port on board Her Majesty's steam-ship Megæra for Malta. The Megæra will also take out other draughts of troops. The head-quarters of the battalion will very shortly follow.

24th Regiment. The 1st battalion has been ordered home from India.

29th Regiment. A deserter from this regiment, named Thomas Kirkwood, a native of Hull, committed a brutal murder on Monday last in that town, and has been committed for trial. A woman named Parker was his victim.

32nd Light Infantry. A guard of honour of this regiment, under Capt. Harmar, received His Royal Highness the Prince of Wales at Dover, on Tuesday, on his return from abroad.

43rd Light Infantry. The head-quarters arrived at Madras on the 18th of March from Calcutta, in the ships Zenobia and Sesostris. The officers present were Lieut.-Colonel Primrose; Major Booth; Captains Disbrowe, Rocke, Glover, and Trafford; Lieutenants the Hon. A. Harris, Berners, Brett, Glover, Crozier, Hatchell, Blyth, Talbot; Ensigns Garland (adjutant), Young, Hogarth, M'Neill; Paymaster Morgan; Quartermaster Williams; Surgeon Barclay; Assistant-Surgeon Madden.

47th Regiment. On Tuesday this regiment, stationed at Shorncliffe Camp, received an unexpected order to leave for Dover on the following morning; the cause currently assigned being, that the range of huts they occupied, the B range, being required for the accommodation of the patients at the general hospital, who it was considered advisable to remove in consequence of some defect in the drainage manifesting itself rather unfavourably to the health of the patients in hospital; a sanitary commission having recommended such removal as early as possible. The regiment, under the command of Lieut.-Colonel Kelly, accordingly marched from the Camp on Thursday morning *en route* to Dover, the strength of the regiment being as follows:—32 officers and 34 sergeants, 605 rank and file. One company of the regiment with the heavy baggage being left at Shorncliffe.

ROYAL MARINES.—A general court-martial, of which Colonel G. E. Hunt, second-commandant, Royal Marines, was the president, assembled this morning at the Royal Marine Barracks, by order of the Lords of the Admiralty, for the trial of Privates John Sullivan and Henry Cartlidge. The first prisoner tried was John Sullivan, a man of most determined character, whose conduct was so violent that he had to be brought into the court-martial room by force, handcuffed, and in the charge of a double escort. He was arraigned under the following charges: 1. For having, when a prisoner in the day-room waiting the promulgation of a district court-martial held on him, wilfully damaged his shell-jacket by cutting off the buttons and shoulder-straps. 2. For having, when a prisoner, struck with his hand, on the head, Sergeant George Knott, 73rd Regiment, who had been giving evidence against Private Henry Cartlidge, Royal Marines. 3. For having behaved with gross disrespect to Captain A. D. H. Nepean, Royal Marines, captain of the day, when visiting the prisoners, in saying, "I will be — if I don't knock somebody down," or words to that effect. On the charges being read over to the prisoner he merely laughed, and refused to plead. The various witnesses were accordingly examined in support of the prosecution. The prisoner Henry Cartlidge was tried on two charges—1. For having assisted to rescue a prisoner from the garrison patrol, saying he would be —— if the picket or any one else should take him. 2. For having struck with his clenched fist on the head, and violently assaulted, Sergeant George Knott, 73rd Regiment, who had at the time been giving evidence against him. Evidence in support of the charges having been given, the Court deliberated some time, but the results of the trials will not be known until they have been confirmed at the Admiralty.

The Admiralty order relative to the augmentation of the Royal Marine force has been issued. The augmentation is to consist of an additional company to each division, and one company to the Royal Marine Artillery. The Light Infantry companies are to consist of 1 captain, 2 subalterns, 6 sergeants, 6 corporals, 3 drummers and buglers, and 109 privates; and the Royal Marine Artillery companies to consist of 1 captain, 4 subalterns, 11 sergeants, 9 corporals, 1 bombardier, 3 drummers and buglers, and 132 gunners. The Staff to be composed of 1 deputy-adjutant-general, 1 assistant-adjutant-general, 5 colonels commandant, 5 second colonels commandant (1 Artillery to each), 20 lieut.-colonels (4 Artillery), 5 paymasters (1 Artillery), 5 barrack-masters (1 Artillery), 5 surgeons (1 Artillery), 9 assistant-surgeons (1 Artillery), 1 laboratory instructor (Artillery), 4 gunnery instructors, 5 musketry instructors, 10 adjutants (2 Artillery), 5 lieutenants and quartermasters (2 Artillery), 5 quartermasters (1 Artillery), 10 sergeants-major (2 Artillery), 5 quartermaster sergeants (1 Artillery), and 5 barrack-sergeants (1 Artillery)—total 106, making the whole establishment of Marine Light Infantry 116 divisional companies of 14,732 men, and 17 companies of Artillery of 3,162 men; grand total, 18,000. In order to facilitate the speedy enrolment, their Lordships have reduced the standard height for recruits to 4 feet 6 inches for growing lads from the ages of 18 to 20, and to 5 feet 6 inches, for young men from the ages of 20 to 30 years. The 113th (new) company will be appointed to Chatham; the 114th to Portsmouth; the 115th to Plymouth; and the 116th to Woolwich.

Colour-Sergeant Elisha White, who has been 18 years a non-commissioned officer in the corps, has received the good conduct medal and gratuity of 15*l*. awarded him by the Lords of the Admiralty for long and meritorious services.

Major A. A. Douglas and a recruiting party from the Royal Marine Light Infantry are ordered to proceed to Aylesbury to raise men for the Chatham division.

Captain Goold, 2 sergeants, and 48 rank and file of the Royal Marine Light Infantry, arrived at Woolwich on Saturday, paid off from the North American and West Indian flagship Indus, Vice-Admiral Sir Houston Stewart, K.C.B. Captain Seymour, R.M., Lieutenant Bottomley, 1 sergeant, 1 drummer, and 24 privates left head-quarters, Woolwich, for Portsmouth, to join the Bacchante, commissioned; and a recruiting party, consisting of Major Pym, R.M., 2 sergeants, 2 corporals, and 1 private, also left for Melton Mowbray, on recruiting service.

52nd Light Infantry. This gallant regiment was reviewed by Lord Clyde during his recent visit to Sealkote. After the review his Excellency addressed the 52nd:—"Fifty-second Regiment! 'tis now fifty, ay, some fifty-three summers ago, when a boy fresh from school (I was in the brigade composed of the 9th Regiment, 2nd battalion 43rd Light Infantry, and 2nd battalion 52nd Light Infantry, then in Portugal), I found myself in action for the first time under the command of one (General Sir John Moore) whose name is familiar to the ears of the gallant regiment now before me, who then were held up for a pattern to the British Army, and in whom I now recognise the same soldier-like bearing and discipline which then were so much and justly praised. It has always been the fate of your gallant corps to uphold the honour of your Queen and country in whatever position you have been placed; and to-day I watched with a scrutinising eye your marching past, and cannot too highly compliment you.

Digitized by Google

Every head was to the front, and not an eye turned to glance right or left. Fifty-second! It is now many years since I have had the pleasure of seeing you; and to-day you have again truly realised the golden opinions of the olden time, and likewise the good opinion of all who see you or under whom you serve, with credit to yourselves and success to the arms of your country. If I had time to see your further movements in the field, they would, I am confidently assured, please me as well as what I have now witnessed. As I march to-morrow morning, I shall say Good-bye! God bless you all!"

56th Regiment. Captain Fox Maule Ramsay, whose death from cholera in India we announced last week, was a nephew of Lord Panmure, and acted as private secretary to his lordship in 1855, when he was at the head of the war department. He had been 18 years in the Service. By his death Lieutenant Hill and Ensign Lloyd obtain a step of rank without purchase.

78th Highlanders. The Edinburgh banquet to the gallant 78th Highlanders came off on Tuesday evening, in the Corn Exchange of that city, with a brilliancy and success which showed how fervent is the gratitude and how deep the respect entertained by all sections of the community towards the heroic avengers of Cawnpore and the saviours of our Indian empire. A gigantic Highland trophy, draped with folds of the Mackenzie tartan and brilliantly illuminated, was placed at the north end of the hall. Above, radiant in golden letters, were the words "Welcome 78th," and the motto of the regiment, "Cuidich n' Rhi," the whole surmounted by the Royal crown of Scotland blazing in gas, surrounded by a wreath of green and gold foliage. The centre of the southern wall was graced by a corresponding Oriental trophy, which, as beseemed its origin, had a still more rich and ornate appearance. The floor was divided into nine tables, running longitudinally, and, including those at the sides, were laid out for upwards of 1400 persons. The guests present by invitation, both ladies and gentlemen, were numerous and distinguished. The whole line of route, from the Castle to the Corn Exchange, in Grassmarket, was lined with people eager to see the gallant fellows proceeding to the banquet; and the sound of loud cheering some time announced their approach to the ear before they were visible to the eye. Some of the buildings in Grassmarket were decorated profusely with flags and evergreens, while the house immediately opposite the Exchange was brilliantly illuminated with devices of various kinds in gas. At about five o'clock the troops entered the hall, headed by six pipers, and were received by the whole company standing—the ladies waving their handkerchiefs, and the gentlemen cheering. The Lord Provost occupied the chair. The duties of principal croupier, in consequence of the absence of Sir John M'Neill from indisposition, were discharged by the Hon. Mr. Bouverie Primrose. Toast followed toast in rapid succession, proposed and responded to with warmth of feeling, and grace of language, the speakers being eminent citizens, and soldiers whose heroic deeds have shed glory on their name. Music, too, lent its indispensable aid to the occasion, and the whole *fête* passed off with a degree of success all that could be desired. The speeches of the evening were those of the Chairman, Colonel Ewart, Lieut.-Colonel Hamilton, Lieut.-Colonel M'Intyre, and Sergeant-Major Pocock, who returned thanks for the non-commissioned officers and privates, and whose allusion to Sir James Outram called forth tremendous cheering from the men.

86th Regiment moves to-day from Gosport to Aldershot to be stationed.

16th Depôt Battalion, Templemore. By the kind permission of Colonel Irwin Commanding, the Sergeant-Major and Sergeants of this Battalion gave their annual ball and supper on Wednesday evening, the 18th inst. The ball-room was decorated by Armourer-Sergeant Skelton (staff) and Sergeant Pegg (39th Depôt), and reflected great credit on their very good taste. The top of the room was decorated by a star of bayonets and gold leaf with the following mottoes surrounding the whole:—"Battalion Staff," "8, the King's," "16, Bedford," "18, Royal Irish," "39, Dorset," "86, Royal County of Down." The supper table, which was supplied with every variety of the season, reflected the highest credit on Mr. Cahill, confectioner, &c., Templemore—upwards of 100 guests sitting down. The refreshment-room did great honour to Sergeant Bath (16th Depôt), and with the addition of a piano presided at by Drum-Major Phillips, formed a pleasant and agreeable lounge. Mr. M'Hennessy supplied the spirits, &c., which were of first-rate description. The Bandmaster and part of the North Tipperary band were present. Dancing commenced about 10 o'clock, and was carried on with the greatest spirit until the morning was far advanced. Amongst the guests present were Colonel and Mrs. Irwin, and nearly the whole of the officers at headquarters, Mr. Horrell, R.E.; J. Forsyth, Esq., M.D.; J. Fitzgerrald, Esq., of the Bank of Ireland, &c., &c.

Privates John Pilsworth, 2nd Battalion, 8th Depôt, and William Downes, 1st Battalion 16th Regiment have each been tried by general court-martial of repeated acts of desertion, &c., and awarded the former four years penal servitude, and the latter two years imprisonment.

The mishaps to which the batteries of artillery sent out to China by the Himalaya were subjected were again brought before Parliament this week. Mr. Herbert again gave explanation, saying that Lord Elphinstone had telegraphed proposing to send a ship to meet the Himalaya and to carry the 14th Dragoons home, but unfortunately the answer, which was immediately sent by telegraph did not reach him till after he had despatched the 14th Dragoons. He then undertook to send another vessel, the Auckland, which broke down at Aden, and had to return to Bombay, and the Peninsular and Oriental Company were unable to provide another vessel. This was one of those accidents to which they were liable in a route where it was necessary, in order to effect an operation, to have notice beforehand. The two batteries of artillery were embarked on the Himalaya at Southampton [the Secretary of State is mistaken, they embarked at Portsmouth] on the 15th of January, and reached Alexandria on the 29th of January. The No. 1 battery disembarked from the Himalaya on the 11th and 12th of February. This battery with three-fourths of the stores, left Suez on the 19th of February in the Berenice, and arrived at Ceylon on the 15th of March in perfect security. The remaining stores of this battery were despatched in the Simla on the 30th of February. The second battery was disembarked from the Himalaya on the 9th and 10th of March, and was placed on board the Chersonese at Suez. The Chersonese sailed on the 15th of April. Those were the dates, and the House would perceive that the detention of the second battery was considerable. With regard to the powder, Captain Milward, who commanded the second battery, said that on opening the limber boxes he found that the damp had considerably damaged the powder, but the fuses, which were in a different part of the ship, were uninjured. The total amount of ammunition was 112 rounds a gun, and a portion of this might be so damaged as to be useless, but sufficient provision had been made by sending out 812 rounds for each gun. Independent of the ammunition already in China, and what would probably be sent out from Calcutta, there would be 924 rounds for each gun of these batteries.

By the overland mail received in London yesterday afternoon we learn that Sir J. Hope Grant, with his staff, had arrived at Hong Kong. Several troop-ships laden with the expedition were on their way up from Singapore, and at Hong Kong immense preparations were being made for the campaign. Our private letters inform us that Major-General Straubenzee was about to return home.

The Duke of Cambridge has issued a general order, directing that any soldier who, on the completion of his limited term of service, is desirous of re-enlisting, is to be granted three months' leave of absence, for the purpose of visiting his friends, before he re-engages himself.

The Duke of Cambridge has desired it to be promulgated that in the event of a Turkish medal, or any other medal of distinction granted by a foreign power, being lost, he has not the means of replacing the same.

Deputy-Inspector-General T. D. Hume, M.D., who has been appointed principal medical officer at Chatham, in succession to Inspector-General J. R. Taylor, C.B., who is under orders to proceed to the Cape of Good Hope, commenced his duties at Fort Pitt Hospital on Tuesday.

General Sir George Brown, G.C.B., K.H., has lately made an inspection of all the regiments of infantry in Dublin garrison, and appeared much pleased at the high state of efficiency displayed by each of them.

WAR OFFICE, PALL-MALL, APRIL 27.

10th Regiment of Foot—Major General Thomas Burke to be Colonel, vice General Sir Thomas M'Mahon, Bart. G.C.B., deceased; April 11.

Captain Richard O'Connell, Royal Artillery, to be Major; April 11.

The Commissions of the undermentioned Officers of her Majesty's Indian Military Forces to bear date the 24th, instead of the 26th, May, 1859, viz.:—

Lieutenant General Sir John Cheape, K.C.B., Bengal Engineers.

Major General T. A. Duke, Madras Infantry.

The undermentioned promotions to take place in her Majesty's Indian Military Forces consequent on the decease of Lieutenant General Frederick Larkins Doveton, Madras Cavalry, on the 20th December, 1859 of

Lieutenant General Thomas King, Madras Infantry, on the 29th December, 1859; and of

Major General John Home, Bengal Infantry, on the 12th April, 1860;

To be Lieutenant-Generals

Major Gen. Patrick Montgomerie, C.B., Madras Artillery; Dec. 21.

Major General William Henry Hewitt, Bengal Infantry; Dec. 30.

To be Major-Generals.

Colonel Morden Carthew, Madras Infantry; Dec. 21.

Colonel Augustus Abbott, C.B., Bengal Artillery; Dec. 30.

Colonel James Edward Gordon Morris, Bombay Infantry; April 13.

The under-mentioned Officers of her Majesty's Indian Military Forces, retired on full pay, to have a step of honorary rank as follows, viz.:—

To be Major-Generals.

Colonel John Glasfurd, Bengal Engineers; April 27.

Colonel Robert Farquhar, C.B., Bombay Infantry; April 27.

To be Colonels.

Lieutenant Col. Cortlandt Taylor, Madras Artillery; April 27.

Lieutenant Col. Chas Frederick Liardet, Madras Inf.; April 27.

Lieutenant Col Gravenor Kirby, Bengal Artillery; April 27.

Lieutenant Col. Thomas Martin, Bengal Infantry; April 27.

Lieutenant Col. De Renzie James Brett, Madras Infantry; April 27.

Lieutenant Col. James Sleeman, Bengal Infantry; April 27.

To be Lieutenant-Colonels.

Major Peter Christie, Bengal Artillery; April 27.

Major Hugh Mackenzie Bengal Infantry; April 27.

Major William James Church, Madras Infantry; April 27.

Major Gardiner Harvey, Madras Infantry; April 27.

Major Francis John Carruthers, Madras Cavalry; April 27.

Major Arthur More Molyneux, Madras Infantry; April 27.

Major James Grant Stephen, Bengal Infantry; April 27.

Major Thomas James Gardiner, Bengal Infantry; April 27.

To be Majors.

Captain Robert William Duff Nickle, Madras Infantry; April 27.

Captain Matthew Wood, Madras Infantry; April 27.

Captain Thomas Haines, Madras Infantry; April 27.

Captain William Charles Alexander, Bengal Cavalry; April 27.

Captain Thomas Jenkins, Madras Infantry; April 27.

Paymaster Charles E. Preston, half pay, 18th Foot, to have the honorary rank of Captain, under the provisions of the Royal Warrant of the 27th January, 1860; Jan. 1.

Quartermaster Thomas Hassall, half pay Royal Artillery, to be Captain, the rank being honorary only, under the provisions of the Royal Warrant of 17th Dec., 1855; April 12.

The following is substituted for the notice which appeared in the Gazette of the 30th December:—

The undermentioned Gentlemen Cadets of Her Majesty's Indian Forces, to have the local and temporary rank of Lieutenant, while doing duty at the Royal Engineer Establishment at Chatham, viz.:—

William Shepherd; Dec. 30.

Robert Procter Tickell; Dec. 30.

Bruce Outram Seton; Dec. 30.

Edward Gilbert Clayton; Dec. 30.

Edward D'Oyley Twemlow; Dec. 30.

Sydenham Cubbon Clarke; Dec. 30.

John Donaldson Cruickshank; Dec. 30.

Cortland Alexander McGregor Skinner; Dec. 30.

ADMIRALTY, APRIL 20.

Corps of Royal Marines—First Lieutenant and Quartermaster Henry Fallowfield Cooper, to be Captain; First Lieutenant and Adjutant Joseph Hamilton Maskery, to be Captain; First Lieutenant William Henry Hore West, to be Captain; First Lieutenant Henry Colton Mudge, to be Captain; First Lieutenant and Quartermaster Ambrose Wolrige, to be Captain. Second Lieutenants to be First Lieutenants—Robert Good Sharp, Thomas Martin Whale, Edward Owen Browne Gray, William Repton Friend Hopkins, Alfred Emanuel Otter, Frederic Amelius Ogle, Francis Edmund Begbie, George Harrie Thorn Colwell, James Samuel Derriman, Edward Pellice Hill, Hugh William Bamber, Herbert Everitt, Henry Evelyn Sturt.

APRIL 25.

First Lieutenant William Henry Clements to be Quartermaster; First Lieutenant James Stirling Mould to be Quartermaster; First Lieutenant James Pulteney Murray to be Adjutant.

THE VICTORIA CROSS.

War Office, April 27.

The Queen having been graciously pleased, by a warrant under her royal sign manual, bearing date the 13th of December, 1858, to declare that non-military persons who, as Volunteers, have borne arms against the mutineers, both at Lucknow and elsewhere, during the late operations in India shall be considered as eligible to receive the decoration of the Victoria Cross, subject to the rules and ordinances already made and ordained for the government thereof, provided that it be established in any case that the person was serving under the orders of a General or other officer in command of troops in the field, when he performed the act of bravery for which it is proposed to confer the decoration; Her Majesty has accordingly been pleased to signify her intention to confer this high distinction on the undermentioned gentleman, whose claim to the same has been submitted for Her Majesty's approval, on account of an act of bravery performed by him in India, as recorded against his name, viz.:—

Indian Naval Brigade—Mr. George Bell Chicken—For great gallantry on the 27th September, 1858, at Suhejnee, near Peroo, in having charged into the middle of a considerable number of rebels, who were preparing to rally and open fire upon the scattered pursuers. They were surrounded on all sides, but, fighting desperately, Mr Chicken succeeded in killing five before he was cut down himself. He would have been cut to pieces, had not some of the men of the 1st Bengal Police and 3rd Seikh Irregular Cavalry dashed into the crowd to his rescue, and routed it, after killing several of the enemy.

THE NAVY.

ADMIRALTY, APRIL 21.

APPOINTMENTS. — *Lieutenants* R. W. D. Abercromby to the Wrangler; H. F. Campbell to the Hannibal; St. Vincent D. Lake to the Wasp.

Mate C. G. Harvey to the Marborough.

Second Master J. R. Warren to the Ranger.

Paymaster H. Campion to the Fisgard (additional).

Midshipmen Hon. A. C. L. Cadogan to the Bacchante; H. D. Macauley and R. B. Trollope to the Euryalus, as supernumeraries.

Naval Cadet H. G. Gawne to the Aboukir.

Clerk J. W. Torbett to the Edinburgh.

APRIL 23.— PROMOTIONS AND APPOINTMENTS.—Chief-Engineer F. J. Newton to the Bacchante. First-Class Assistant-Engineers D. W. King to the Asia, for charge of machinery of the Eurotas; W. Hall, to the Asia, as supernumerary. Second-Class Assistant-Engineers J. W. Sanders to the Royal Albert for the Partridge; E. Brown to the Bacchante. Third-Class Acting Assistant-Engineers D. Dunn and G. A. C. Bencke to the Bacchante.

Masters'-Assistants W. P. Haynes to Euryalus; T. Robinson to the Wrangler.

Assistant-Paymasters G. W. Muir and F. A. Keogh (additional) to the Victory.

APRIL 24.—Commanders F. N. R. Wasey and J. B. Ballard to be Inspecting Commanders of the Coast Guard.

Lieutenant C. R. Scott to the Wellington.

Secretaries R. Munday to Rear-Admiral Codrington; F. Cleve, C.B., to Rear-Admiral Talbot; G. P. Martin to Vice-Admiral W. F. Martin.

Second-Class Assistant-Engineer J. Morsey to the Asia, for charge of the Rainbow.

Third-Class Assistant-Engineer R. Oliver to the Cumberland, for service in the Cochin.

Acting Third-Class Assistant-Engineers J. Watson, P. Murray, and L. M. Green to the Arrogant, as supernumeraries for disposal.

APRIL 25.—Lieutenant C. G. Fane to the Sanspareil.

Chief-Engineer C. Robertson to the Archer. First-Class Assistant-Engineer M. Murray (confirmed) to the Asia, as supernumerary. Acting Third-Class Assistant-Engineer J. King (b) to the Cornwallis.

Assistant-Surgeons A. B. Johnson (confirmed) to the Cornwallis; C. Strickland (confirmed) to the Doris; C. Keenan to the Ranger; Acting Assistant-Surgeons G. Duncan to the Cressy; G. H. Maunsell to the Cumberland; E. T. Rofley to the Wasp.

Assistant-Paymaster H. P. Breenan to the Victory, as supernumerary.

APRIL 26.—Chief Engineer M. Powell to the Terrible.

Second-Class Assistant-Engineer T. Witt to the Fisgard, for service in the Bann.

Surgeon J. Wallace (confirmed).

Assistant-Paymaster J. N. Robinson to the Victory, as supernumerary.

Aboukir, 90, screw, Captain Douglas Curry, at Devonport, has received orders to prepare for sea.

Algiers, 91, screw, Captain George D. O'Callaghan, has been paid down at Portsmouth, and her crew granted additional leave. She has warped from the dockyard jetty to the berthing hulk Sultan, in Portsmouth harbour.

Argus is at Messina, protecting British interests during the Sicilian insurrection.

Arrow, 4, was transported on Monday from Keyham to her moorings off Devonport dockyard.

Atalanta, 16, Captain Thomas S. Pasley. The crew were paid off at Plymouth on Tuesday in the presence of Captain M. J. Williams (Royal Adelaide), Flag-Captain to Rear-Admiral Sir T. Pasley.

Cæsar is at Naples, with a view to the protection of British interests and property.

Centurion left Lisbon on April 16th: destination unknown.

Conqueror, 101, Captain Sotheby, C.B., crossed royal and topgallant yards in Hamoaze on Tuesday, got up steam, slipped her moorings, took a trial cruise of three hours outside the Breakwater, and returned and anchored in Plymouth Sound, where she received her powder.

Dee, 4, has been placed under steam-basin shears, at Portsmouth, to land machinery belonging to the various ships fitting at that port.

Diadem left Lisbon on the 16th for a cruise.

Duncan, 101, screw, came into No. 7 Dock, Portsmouth, on Tuesday, to be coppered. She is nearly complete in her machinery.

Espoir. On Friday week a second trial of the machinery of the screw steam gun-vessel Espoir, 5, took place outside Plymouth breakwater: revolutions, 98 per minute; pressure, 20 lb.; speed, 10·05 knots.

Euryalus, 51, Captain John W. Tarleton, C.B., has been berthed alongside the Bellerophon, receiving hulk, in Portsmouth harbour.

Firebrand, steam-vessel, Commander Bruce, arrived at the Royal Arsenal Pier, Woolwich, on Wednesday, from Portsmouth, having on board the regiment of Norfolk Militia, who disembarked and marched to the barracks, to occupy the quarters vacated by the Dublin Artillery Militia. The officers and men of the latter regiment embarked in the afternoon on board the Firebrand for Portsmouth garrison.

Forte, 51, screw, Captain E. Turnour, flag-ship of Rear-Admiral Sir H. Keppell, K.C.B., A.D.C., left No. 7 Dock, Portsmouth, and steamed into the basin at 1·50 P.M. on Tuesday. As she entered the basin, the ship hung a few seconds; it is supposed that she touched the mud, which a proper use of the dredging machine would remedy. Her crew were turned over to her from the Victorious hulk the same day. She was to have gone out to Spithead on Thursday and sailed for Plymouth on Saturday (this day), but, while entering the basin, she accidentally carried away her jib and flying jib-booms, and damaged her bowsprit cap by starting the fastenings. On going out of the basin into the harbour, she met with another accident, she drove the peak of her anchor into her bow. Altogether, the Forte has experienced nothing but little mishaps ever since she left Sheerness; being quite a new ship, she was, nevertheless, leaking at her stern, and this defect, added to her loss of jib-booms, &c., will, it is supposed, detain her a day or two longer.

Hero, 91, Captain Seymour, was taken into No. 1 dock at Keyham Steamyard on Tuesday.

Indus, 78, late flag-ship on the North American station, paid off at Devonport, has been placed among the ships in ordinary. The portion of her crew belonging to the eastern ports were conveyed thither by the Flying Fish, 6, screw, Commander Hope.

Orion is at Palermo, protecting British interests during the insurrection in Sicily.

Osborne, yacht, Master-Commander George K. Bower, went out of Portsmouth harbour on Tuesday, and steamed round the Isle of Wight, to try her new boilers and new superheating steam apparatus, the latter fixed on Mr. Joseph Field's patent. Everything worked well, only being rather short of steam, the highest temperature that could be obtained by the superheater during the run was 320°. Mr. Field was on board during the trial. The Osborne will try her speed at the measured mile as soon as the high winds moderate.

Partridge, gun-boat (tender to the Royal Albert), from Portsmouth, arrived at Plymouth on Tuesday, and went into Hamoaze.

Plover, 5, steam gun-vessel, is being prepared for the China waters, to replace the other vessel of that name destroyed at the attack on the Peiho forts.

Pluto left Lisbon for England on the 12th, but was obliged to put into Vigo with her engines broken down.

Porcupine 3, Captain H. C. Atter, left Plymouth Sound on Friday week for the coast of Scotland.

Queen, 86, Captain Charles F. Hillyar, is under orders for foreign service.

Rhadamanthus returned on Wednesday to Woolwich, having completed her second trial trip preparatory to shipping Mr. Wethered's superheating steam apparatus.

Rodney, 91, was towed from Chatham on Monday by the African and Adder steamers, brought up at Folly Point, where she now lies at anchor.

Royal Albert, 121. A serious accident occurred last Saturday evening on board this vessel, now in the basin at Keyham steam-yard, Plymouth. It having become necessary to remove her four old boilers, on Saturday morning the men commenced getting them out; three, weighing each 28 tons, were removed before 5 o'clock in the afternoon, and the remaining one, equally ponderous, was hoisted out of the hold the required height; but just as preparations were being made to raise the shears for the purpose of conveying the boiler over the side, the fall of the chain broke, and the cumbrous machine fell on the deck in the waist, smashing to pieces the plank, one of the beams, and several of the "carlings," but, fortunately, without dropping further. Having been canted, as is the custom when clear of the hatchway, it jammed itself against the fragments of the carlings and beams in such a manner as to be completely suspended over the hatchway through which it had been just raised. At the moment 20 or more shipwrights were employed directly below, "spotting" over the bed on which the boiler had rested, and had it gone down the probability is that the greater number, if not the whole of them, besides the enginemen and a portion of the crew, would have been crushed to death, the height being more than 50 ft. The boiler was subsequently removed. Another accident occurred on board on Tuesday, when the men commenced to hoist the new boilers in. One of these, weighing 26 ton 6 cwt., was within seven feet of the hold, it came down with a tremendous surge to the bottom, and by the rebound carried away all the temporary shores. A large hole was knocked in one of the plates of the boiler, and another plate started. Providentially, none of the men were injured. Some decayed plank has been discovered in her port quarter.

Surprise, 4, Commander Lord E. Cecil. The crew were paid off at Plymouth on Tuesday morning in the presence of Rear-Admiral Sir T. S. Pasley, Superintendent of Devonport Dockyard. The men were well conducted.

Terrible, 21, screw, Captain Glasse, at Plymouth, is ordered to take in stores for foreign service, it is supposed for the Mediterranean. She was paid wages on Tuesday, and is to be ready for sea by the 1st proximo.

Thunderbolt, 16, steam-floating-battery, has been taken into dock at Chatham to have her bottom examined and cleaned, and coated with Peacock's composition to prevent corrosion.

Torch, screw gun-boat, has been taken into dock at Chatham to be fitted.

Trafalgar left the Tagus on the 16th instant.

Trincomalee. Admiralty orders have been received countermanding the order previously given for the Trincomalee, 24, to be fitted as a training-ship for the Naval Coast Volunteers at Newcastle and Sunderland; and she is not to be taken in hand until further orders.

Victoria, 121, screw, got up steam on Tuesday and Wednesday last in the basin at Portsmouth. The general performance of her engines was very satisfactory, which were tested with all the power allowed at moorings. Steam, 20; revolutions, 51; vacuum, 25½. Her engines are of the largest size, and made by Messrs. Maudslay and Co.

Virago, 6, Commander Dunn, steamed from the Sound into Hamoaze on Saturday, to have some defects made good. She went alongside the coal depôt.

Vivid, conveyed His Royal Highness the Prince of Wales from Ostend to Dover on Tuesday. The passage was an exceedingly boisterous one.

The Duke of Somerset held a *levée* at the Admiralty on Thursday, when the following officers paid their respects to His Grace:—Admiral Ramsey, Captains H. G. Morris, A. L. Kuper, A. Mellersh, S. Mercer, G. G. Bowyear, E. W. Pilkington, T. Saumarez, and C. Patey; Commanders Sir Malcolm M'Gregor, Bart., G. F. Westbrook, H. D. Grant, J. Shears, G. E. K. Gore, A. J. Mann, G. Raymond, W. G. H. Johnstone, J. N. Norman, A. Thrupp, F. N. Wasey, W. C. F. Wilson, C. F. Boughey, A. H. Hoskins, and T. Creser; Lieutenants J. Yules and E. L. Strangways.

Several of the officers of the Russian frigate Askold, now in Plymouth Sound, visited Devonport Dockyard on Tuesday morning.

STATIONS OF THE ROYAL NAVY IN COMMISSION.

Banshee, 2, steam-vessel, Com. C. A. Campbell, 1858, Mediterranean.
Banterer, sc. gunboat, Lieut.-Com. H. P. Knevitt, 1855, East Indies.
Beagle, 4, sc., Com. E. Hay, 1858, East Indies.
Black Eagle, st.-yac., Mast.-Com. J. E. Petley, 1844, particular service.
Blenheim, 60, sc., Capt. F. Scott, C.B., 1848, Coast Guard.
Boscawen, 70, Rear-Admiral the Hon. Sir F. W. Grey, K.C.B., Capt. R. A. Powell, C.B., 1855, Cape of Good Hope.
Bouncer, 2, sc. gunboat, Lieut.-Com. A. R. Owen, 1852, East Indies.
Brilliant, Com. C. H. Gardner, 1848, Naval Reserve Training Ship.
Brisk, 16, sc., Capt. A. F. R. D'Horsey, 1857, Cape of Good Hope.
Britannia, training-ship, Capt. R. Harris, 1849, Portsmouth.
Brune, st.-ves., Lieut.-Com. E. F. Lodder, 1854, Coast of Africa.
Buffalo, screw, Mas.-Com. A. Brown, 1854, particular service.
Bustard, 2, sc. gunboat, Lieut.-Com. F. W. Hallowes, 1856, E. Indies.
Buzzard, 6, st.-v., Com. F. Peel, 1855, S.E. Coast of America.
Cadmus, 21, sc., Capt. H. S. Hillyar, C.B., 1854, Mediterranean.
Cæsar, 90, sc., Capt. T. H. Mason, 1849, Mediterranean.
Calypso, 18, Capt. F. B. Montresor, 1851, Pacific.
Cambrian, 40, Capt. J. J. M'Cleverty, C.B. 1848, East Indies.
Cambridge, gunnery-ship, Capt. A. W. Jerningham, 1851, Devonport.
Camilla, 16, Com. G. T. Colville, 1855, East Indies.
Caradoc, 2, st.-ves., Lieut.-Com. C. M. Buckle, 1847, Mediterranean.
Castor, Com. J. Palmer, 1855, Naval Reserve Training Ship.
Centaur, 6, st.-v., Com. E. D'o, D'a, Alpin, 1853, East Indies.
Centurion, 80, sc., Capt. H. D. Rogers, C.B., 1846, Channel Squadron.
Chesapeake, 51, sc., Vice-Admiral J. Hope, C.B., Capt. G. O. Willis, 1856, East Indies.
Clio, 22, screw, Capt. T. Miller, 1855, Pacific.
Clown, sc., gunboat, Lieut.-Com. W. F. Lee, 1855, East Indies.
Cockchafer, 2, sc. gunboat, Lieut.-Com. H. L. Holder, 1854, East Indies.
Conqueror, 101, sc., Capt. E. S. Sotheby, C.B., 1852, Channel Squadn.
Cordelia, 11, sc., Com. C. E. H. Vernon, 1855, Australia.
Cornwallis, 60, sc., Capt. G. G. Randolph, C.B., 1854, Coast Guard.
Cossack, 20, sc., Capt. R. Moorman, 1857, N. America and W. Indies.
Cressy, 80, sc., Capt. the Hon. C. G. J. B. Elliot, C.B., 1841, Mediterr.
Crocodile, 8, rec.-sh., Com. W. Greet, 1854, off the Tower.
Cruiser, 17, sc., Com. J. Bythesea, 1856, East Indies.
Cumberland, 70, Capt. C. F. Schomberg, 1851, Sheerness.
Curaçoa, 31, screw, Capt. A. Phillimore, 1855, S.E. Coast of America.
Cyclops, 6, st.-ves., Capt. W. J. S. Pullen, 1856, East Indies.
Dasher, 2, st.-ves., Com. P. De Saumarez, 1845, particular service.
Dauntless, 31, sc., Capt. L. G. Heath, C.B., 1854. Coast Guard.
Dee, 4, tr.-sh., Mast.-Com. T. C. Pullen, 1844, particular service.
Diadem, 32, sc., Capt. J. H. Cockburn, 1850, Channel Squadron.
Donegal, 101, sc., Capt. H. Broadhead, 1846, Channel Squadron.
Doris, 32, sc., Capt. E. Heathcote, 1852, Mediterranean.
Dove, China.
Drake, sc., gunboat, Lieut.-Com. A. R. Blane, 1856, East Indies.
Eagle, 50, Capt. E. Tatham, 1854, Coast Guard.
Edgar, 91, sc., Rear-Adm. J. E. Erskine, Capt. J. E. Katon, 1856, Channel Squadron.
Edinburgh, 58, sc., Capt. E. C. T. D'Eyncourt, 1849, Coast Guard.
Elk, 12, Com. H. Campion, 1855, Australia.
Emerald, 51, sc., Rear-Admiral Sir A. Milne, K.C.B., Capt. A. Cumming, 1854, North America and West Indies.
Encounter, 14, sc., Capt. R. Dew, 1858, East Indies.
Esk, 20, sc., Capt. Sir R. J. Le M. M'Clure, C.B., 1850, East Indies.
Euryalus, 51, sc., Capt. J. W. Tarleton, C.B., 1852, Portsmouth.
Excellent, 46, gunnery-ship, Capt. R. S. Hewlett, C.B., 1850, Portsmouth.
Exmouth, 90, sc., Capt. J. J. Stopford, 1841, Mediterranean.
Fairy, screw-yacht, tender to Victoria and Albert yacht, Portsmouth.
Falcon, 17 sc., Com. A. G. Fitzroy, 1857, Coast of Africa.
Fawn, 17, sc., Com. R. P. Cator, 1858, Australia.
Ferret, 8, Com. W. E. Fisher, 1856, particular service.
Firebrand, 6, st.-ves., Com. J. M. Bruce, 1855, particular service.
Firefly, 4, st.-ves., Com. A. L. Mansell, 1855, Mediterranean.
Firm, sc., gunboat, Lieut.-Com. W. R. Boulton, 1854, East Indies.
Fisgard, 42, Commod. Hon. J. R. Drummond, C. B., Woolwich.
Flamer, sc. gunboat, Lieut.-Com. H. M. Bingham, 1851, East Indies.
Flying Fish, 6, sc., Com. C. W. Hope, 1854, Devonport.
Forester, 2, sc. gunboat, Lieut.-Com. A. J. Innes, 1853, East Indies.
Formidable, 84, Capt. R. B. Watson, C.B., 1842, Sheerness.
Forte, 51, sc., Rear-Admiral Hon. Sir H. Keppel, K.C.B., Capt. E. W. Turnour, 1857, Portsmouth.
Forward, 2, sc., Lieut.-Com. C. R. Robson, 1851, South America.
Furious, 16, st.-ves., Captain O. J. Jones, 1855, East Indies.
Fury, 6, st.-v., Com. J. C. Wilson (acting), East Indies.

The following screw steam-ships are in a very advanced state for launching at Chatham :—Undaunted, 51 ; Orpheus, corvette, 21 ; and Rattlesnake, 20. In dock there are the Powerful, 84, which is to be fitted for a screw ; and Arethusa, 50, to be lengthened 70 feet and fitted for a screw-propeller.

A large number of smiths and artificers belonging to the Royal gun factories at Woolwich, assembled in front of the office of Mr. J. Anderson, the Superintendent, on Wednesday, and demanded a higher rate of pay. In consequence of a refusal to comply with their request about 50 or 60 struck work, intimating their desire to be discharged, as there was no scarcity of work elsewhere and a better remuneration for their labour. They thereupon demanded their wages and left the service.

Mr. Alfred Taylor Dale has received a "board" promotion to the rank of Lieutenant for passing his five-years' examination with a first class certificate, including his examination at the Royal Naval College. He is appointed to H.M.'s steamer, Ranger.

PAYING WAGES IN THE NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I am glad to find from a paragraph in last week's GAZETTE that the report of the recent Admiralty Committee upon keeping naval accounts and paying the Navy is now made public. It would appear, however, that the evidence had not been read when you went to press, judging from the tenour of another paragraph. I therefore forward a copy specially marked with reference to the important question, how the seamen in the Royal Navy should be paid, which may save you the trouble of wading through all that merely relates to naval book-keeping.

As a paymaster of the Navy I take some interest in that subject, though you will scarcely wish to have your valuable space occupied with it. Suffice it to say that a Circular was sent by the Committee to 91 paymasters, 63 of whom responded, and almost all declared in favour of the new ships' books introduced two years ago, or what is called the "record book system." (Vide Blue Book, p. 134, App. No. 5). I know no paymaster who has a desire to see the books of the Committee adopted, but at present we are obliged to lend the report to one another, as few copies have yet been sent to Her Majesty's ships.

On the more important subject of paying the seamen, pray may I ask what is meant by the writer in last week's GAZETTE saying that "Seamen would always prefer to receive their pay and allotments at short intervals?" In the Royal Navy seamen are already paid a proportion of their wages every month, if they will have it, but they often decline. They are never paid "allotments!" An allotment is a portion—about half of a man's pay, which he assigns to his wife, or parents, &c. ; and these allotments, also, are always paid every month to the persons entitled to them on shore.

The Manning Commission of 1859 certainly did not recommend any alteration in this, but thought it should be extended to newly-raised men in ships fitting out, who were debarred from these advantages. This question was under the consideration of the Admiralty when the Commission was sitting, but it was settled a year ago ; and such men, even while supernumeraries, are now paid monthly allowance, and are permitted to allot half their wages immediately they come aboard like other seamen. (*Ibid.* p. xiii and xvii.)

When you have read this Blue Book, and given us your own impartial judgment in the matter, the Service will be content ; but, bearing upon this question, permit me to refer to what appears in yesterday's *Times*, as evidence at the court-martial on the Edgar's men, the preceding day. Captain Louis, in command of the Marines who were tried for insubordination, states, that the men "wished to know when they were likely to get their leave, as their money was being either spent or stolen from them." Does this look as if our men have too little or too much money about them? Does it warrant more frequent payments, unless more frequent leave can be granted?

The matter is most important, and the recommendation of the committee must work almost a revolution in the Service, either for good or evil. It is certainly of great importance that the next step be not a blunder. The Navy is not so overpopular as to bear being tampered with.

No doubt improvident men would wish to draw their last penny whenever they could get it, to spend as—what the Committee call—"pocket-money," or, in plain terms, on drink and women. But as often as you pay them, they of course will want to go ashore. What effect will monthly settlements be likely to have upon the remnant of discipline we yet retain in the fleet?

But our best seamen don't like this frittering away of their wages. They prefer a sea-going ship, where there is less temptation to take up their monthly allowance, and no six-monthly settlements as we have in the ports. They like "a good pay-day," and something to take home with them when paid off, as they have in the merchant navy.

Even in the home ports can it be advantage for a man to spend all his wages as pocket-money? What can a man do with all he earns, unless he goes home to his family? That is why leave and the payment of wages are so intimately bound up together. Tempt the sailor to take his pay, to the last farthing, at times when he cannot be allowed to go to his family, and what will he do with it? The good men—like the Marines of the Edgar, who had all "good," or "very good" characters, while six of them had good-conduct badges—will wish to get ashore, "because their money is stolen." As to the bad, and those who have no families in port to go to, their reasons for going on shore must be equally obvious. And which is worst—to keep the bad to gamble and steal, and the good to have their money stolen on board ship after you have paid them, or to let them go on shore?

One more question. Why is it that after forty years without mutinies in the Navy we have at last something very often very like them now, and all more or less connected with leave? There is nothing of the kind in the merchant service ; and though the merchant-sailor is paid the greater part of his wages in a lump when discharged, only a fraction of blackguards among them squander their money. The others take their money home for their household comforts, and many deposit in savings' banks.

Depend upon it, sir, there is a kind of "fast sailing" that won't do the Navy any good ; and some blunders may turn out to be crimes indeed!—I am, sir, yours, &c.,

A PAYMASTER R.N.

The ship Rainbow has just delivered a cargo of Italian oak at Portsmouth dockyard. It is said that this timber had been collected for the French naval yards, and that a large quantity of similar character had already been delivered. Whether this be true or not, the cargo which the Rainbow has discharged is one of the finest assortments of Italian oak which has ever been delivered at Portsmouth dockyard.

An English sailor, going into a foreign church, heard a person offering up a prayer to St. Martin, beginning, "O Mihi, beate Martine, ades," or "sis propitius," or something of that kind. Jack, on giving an account of what he had heard, said that he could not make much of it, but it seemed to him to be "All my eye and Betty Martin." Hence the phrase as applied (and shall I say exemplified in the case before us?) where a great fuss is made about very little.—J. Eastwood,—*Notes and Queries*.

THE MILITIA.

NORFOLK ARTILLERY.—H.M.S. Firebrand arrived at Woolwich on Wednesday, and disembarked the Norfolk Artillery from Sheerness, for garrison duty, to relieve the Dublin City Artillery. The regiment consisted of Lieut.-Colonel Commandant F. L'Estrange Astley, Major John Penrice ; Captains J. H. Wodehouse, R. S. Bedingfield, Harbord, and Edward H. Rust D'Eye ; First Lieutenants Longe, Harbord, and Count de Wezele ; Second Lieutenants Brice, Beddingfield, and Stracey, and 240 rank and file. They have taken up their quarters at the Royal Marine Barracks, vacated by the Dublin City Militia, in command of Lieut.-Colonel R. F. Handcock, who have embarked on board the Firebrand for Portsmouth.

SOUTH MAYO ROYAL RIFLES.—We understand that the Right Hon. the Earl of Lucan has appointed Robert Ruttledge, Esq., D.L., of Bloomfield (late 24th Regiment), to be Lieut.-Colonel of the South Mayo Royal Rifles, vice Lieut.-Colonel Palmer, deceased.

East Essex Rifles; under the command of Lieut.-Colonel Edward Henry Moore Kelly, will assemble in Colchester on Monday next for 28 days' training. In consequence of the camp being fully occupied by the Indian depôts the men will be billeted upon the publicans of the town.

On the same day the West Essex Militia, under the command of Lieut.-Colonel Ruggles Brise, will assemble at Chelmsford for a similar period of training.

Inverness-shire Highland Light Infantry, under the command of Lieut.-Colonel the Hon. Simon Fraser, will assemble at Inverness on the 1st of June for 27 days' training.

The Kent Militia Artillery, under the command of Lieut.-Colonel Cator, is ordered to assemble at Dover on Friday next for a course of training and drill.

The Right Hon. the Earl of Granard, K.P., Her Majesty's lieutenant for the county Leitrim, has made the following appointment to the Leitrim Rifle Regiment of Militia :—Dr. Patrick J. Cunningham to be Assistant-Surgeon, vice Carpenter, resigned.

The Hampshire Militia will assemble for 27 days' training on Monday next.

The Herefordshire Militia will assemble on Monday. The regiment consists of 600 men.

The 3rd West York Militia left Newcastle-upon-Tyne, where they have been for upwards of 12 months, on Tuesday and Wednesday last, and in two divisions arrived at their head-quarters in Doncaster. The regiment, which is in a high state of discipline, numbers about 920 men. The head-quarters reached Doncaster on Wednesday, forming the second division. The precise time when the disembodiment will take place is not known, and it is expected that the men will remain in billet until Monday or Tuesday next.

The first division of the Tipperary Militia Artillery embarked at Portsmouth on Monday, on board the Firebrand, for conveyance to Sheerness. The City of Dublin Artillery have moved from Woolwich to Portsmouth.

Four companies of the Royal Lancashire Artillery, consisting of 300 men, arrived in Cork from Spike Island on Wednesday morning, and proceeded to Cork barracks, where they are stationed for the present. The officers accompanying them were—Captain Furnival Holmes and Lieutenants Johnson and Harrison.

The Durham Militia Artillery will remove from Parkhurst to Gosport and Fort Moncton, to-day (Saturday).

The City of Dublin Artillery Militia are quartered at Gosport, Haslar, and Blockhouse Fort.

The removal of the 2nd Royal Cheshire Regiment of Militia from Shorncliffe has been for the present countermanded.

The Royal Wiltshire Militia left Dover, on Tuesday last, *en route* for Devizes, for the purpose of being disembodied.

MILITIA GAZETTE.

WAR OFFICE, PALL MALL, APRIL 24.

Memorandum.—Worcestershire Regiment of Militia—It is Her Majesty's pleasure that Lieutenant John Peel Durdin be removed from the strength of the Worcestershire Militia.

Her Majesty has been graciously pleased to accept the resignation of the Commission held by Captain Ernest Peel, in the above Regiment.

Eastern Regiment of the Militia of Suffolk—Hill Mussonden Leathes, Esq., late Captain, to be Major, vice Walker, resigned; April 14.

3rd Regiment of the Royal Surrey Militia—Robert Christopher Arbuthnott, Esq., to be Ensign; April 16.

6th Regiment of West York Militia—John Birkbeck, Gent., to be Ensign; April 3.

90th or Stirlingshire, &c., Militia (Highland Borderers)—Ensign George Scott to be Lieutenant, vice Ewens, resigned; March 30.

Haddington, Berwick, Linlithgow, and Peebles Regiment of Militia Artillery—Lieutenant Sir Samuel Stiming, Bart., to be Captain, vice Shairp, promoted; April 19.

Artillery Battalion of the Royal Sussex Militia—Captain William A. St. Clair, to be Major, vice Chester, resigned; April 16.

WAR OFFICE, PALL MALL, APRIL 27.

5th or Royal Elthorne Light Infantry Regiment of Middlesex Militia—Lieutenant Roderick Campbell to be Captain, vice Foster, resigned; Feb. 4.

Artillery Regiment of Royal Lancashire Militia—Captain Benjamin Remington Williams to be Major, vice Henry Thomas Fyors, resigned; April 21.

1st Devon Regiment of Militia—Henry Bourchier Toke Wrey to be Ensign; April 17.

Queen's Own Regiment of Oxfordshire Yeomanry Cavalry—Major the Lord Alfred Spencer Churchill to be Lieutenant-Colonel, vice the Earl of Jersey, deceased; Captain Henry Bagnett to be Major, vice Lord Alfred Spencer Churchill, promoted; Lieutenant the Honourable John Fiennes Twisleton Wykeham Fiennes to be Captain, vice Barnett, promoted; Cornet Montagu Arthur Lord Norreys to be Lieutenant, vice The Honourable John Fiennes Twistleton Wykeham Fiennes, promoted; Beville Ramsay, Esq., late Captain 62nd Regiment, to be Cornet, vice Duffield, resigned; April 25.

3rd Regiment of the Royal Surrey Militia—Robert William Webb, Esq., late Lieutenant of 37th Regiment of Foot, to be Captain, vice Barclay, resigned; April 25.

King's Own Light Infantry Regiment of Militia—Lieutenant Henry Studdy, of the Bengal Army, to be Lieutenant, vice Dunstervile, resigned; April 23rd.

West Essex Militia—Frederick Peto, Gent., to be Lieutenant; April 18.

2nd Royal Lanarkshire Militia—James Davidson Mackay Coghill, Esq., to be Assistant-Surgoon, vice John Gibson Smith, resigned; April 19.

The Chamberlain to the King of the Netherlands arrived at Devonport on Tuesday for the purpose of visiting the Government establishments.

VOLUNTEERS.

METROPOLITAN.

THE METROPOLITAN RIFLE CORPS.—It is the intention of the commandants of the respective rifle corps of the metropolis and suburbs to have a grand field day of all the effectives under their command, on Saturday, the 5th of May, in one of the public parks. There is much difference of opinion as to Saturday being the most convenient day for such a gathering. The Saturday half-holiday movement is at present only carried out to a very limited extent, and that more especially applying to clerks in the City. As a general principle, it is the most busy day in the week, and therefore not so convenient for the rifle corps effectives generally as a Monday or Tuesday. In order, therefore, to ensure a strong muster on such an occasion, the general feeling and convenience of the Volunteers, it is considered, ought to be consulted. There is another point, and that is that in many quarters such a gathering will be premature, as a very large proportion of the effectives are still without arms, and it would be absurd to see half the men with rifles and the other half without. Again, through the procrastination and red-tapeism at the Lord-Lieutenant's office, there are rifle corps in existence who have double the number of men waiting for enrolment than they have sanction for, and consequently the effectives are exceedingly chary about getting into uniform without knowing whether their services will be accepted or not. These circumstances combined are therefore calculated to prevent the demonstration being so effective as it is desirable it should be.

LONDON RIFLE BRIGADE.—At a meeting of the council, held at head-quarters on Tuesday, Mr. Alderman Rose, vice-president, in the chair,—present, Lord Denman, Sir Francis Doyle, Mr. R. W. Kinnaird, M.P., Alderman Allen, Alderman Mechi, Major Eastwick, and Captain Gardner,—a deputation from the non-commissioned officers of this corps attended to state their opinions as to the most desirable mode of making future appointments of officers. The Council assured the deputation that it was their earnest desire to consult, as far as practicable, the feelings of the brigade generally, and that at an early day the commanding officer and vice-president would call a meeting, when the matter should receive the fullest consideration. In the meantime, no other appointments would be made. The deputation then retired, after having expressed their thanks for the kind manner in which they had been received by the Council. The chairman announced that Mr. Alderman Challis had sent a check for 36*l.* 4*s.* 3*d.*, the balance of contributions collected in the Cripplegate Wards; also the following donations to the Band Fund:—Major Close 10*l.* 10*s.*; and Sergeant F. R. Gibson, 2*l.* 2*s.*

THE LONDON SCOTTISH.—This corps, which meets for drill at Westminster Hall, received on Wednesday evening a valuable addition to its strength, as it was joined by a body of 50 Scottish artisans, who marched into the hall, headed by Mr. Pettie, one of their number, to whom their organisation is mainly due. The steadiness with which they marched, and their general appearance excited universal admiration. This is a satisfactory proof of the readiness of the artisans to join in the Volunteer movement, and shows that the industrious and provident members of this class are able to do so when the expenses of a Volunteer corps are moderate, as in the case of the London Scottish.

THE SIX-FEET VOLUNTEER GUARDS (33nd Middlesex) mustered on Wednesday afternoon at Hungerford Hall, and, under the command of Captain the Hon. T. C. Bruce, proceeded to St. George's Barracks, arrangements having been made for their drill there twice a week during the present season. It had not transpired when they would appear in public for the first time, and those only saw them who chanced to be passing the line of march. They turned out in a fatigue jacket of scarlet twilled flannel, edged with black braid, and looked remarkably well, their great average height alone giving them an imposing appearance. This corps contains many soldiers by profession, and promises to be in great strength and efficiency at the review of Volunteers by the Queen in June. The full dress is a tunic of scarlet cloth (single-breasted), trimmed with black silk braid; trowsers of black buckskin with scarlet stripe; helmet of black leather, with drooping plume of bronze feathers, and the usual accoutrements.

LONDON IRISH.—The members of the Irish Volunteer Corps attended, by invitation, a public meeting of the Irish residents of the Tower Hamlets district, held on Tuesday evening at the Beaumont Institution, Mile-End, for the purpose of forming a company in that neighbourhood. About 100 members of the corps marched in uniform from Hungerford Hall, headed by the newly-equipped brass band, through the City to the place of meeting, where they were well received by a large assembly. During the march, which was enlivened by the band playing many national airs, the uniform of the corps excited great admiration. At a little after eight o'clock, the Marquis of Donegal was voted to the chair, and, in a very eloquent address, dwelt on the necessity of forming Volunteer corps, and said that his countrymen had already exhibited a warm desire to aid in the extension of the movement. He hoped to see the London Irish Rifles one of the most, if not the most, efficient corps in the metropolis. The meeting was subsequently addressed by the Rev. J. Courtney, Mr. Hamilton Geale, Mr. M. J. O'Connell, Mr. Prendergast, Sir H. W. Barron, Lord Otho Fitzgerald, Mr. S. Lover, &c., and resolutions approving of the establishing of the corps, and a pledge to increase its effective strength, were adopted. After giving three cheers for "the Queen and the Irish Volunteers," the band, which was stationed in the spacious gallery, struck up "God save the Queen." A vote of thanks to the chairman terminated the proceedings. The mission of the corps appeared to be productive of the desired end, for many recruits were enrolled.—The members of this corps are now actively engaged in drill exercise, and have, in addition to Hungerford Hall and Burlington House, secured the Wellington Barracks, St. James's, and the Tower, for their greater accommodation. The latter place will be for the exclusive use of the division now in course of rapid formation.

VICTORIA.—The election of additional officers of the Victoria Rifles took place last week, it having been decided to increase the present complement of men by the addition of two new companies. The Victoria Rifles is, with the exception of the Hon. Artillery Company, which can scarcely be called a Volunteer Corps, the only regiment representing the old volunteers which were reviewed by George III. in Hyde Park in 1803. At that time they were called the Cumberland Sharpshooters, from the fact of the Duke of Cumberland being the commander, and they were particularly distinguished for their excellent skirmishing and rifle practice. Major Barber Beaumont presented to the corps a medal to be shot for, and it was won by the present major of the Victoria Rifles. The uniform at that time was a light green, and the men carried a wooden mallet in their belts to drive the bullets into the barrel of the rifle. When the Volunteers were disbanded this corps formed themselves into a club for rifle practice, and in 1830 the Duchess of Kent conferred upon them the title of the "Royal Victoria Rifle Club," so named after the Princess Victoria. The Duke of Wellington was colonel of the corps, and, in 1853, an offer of their services was made to the Government, the effective strength of the corps at that time consisting of 300 men. The corps has now a practice ground at Kilburn, with armoury and club-house, and a range for ball practice of 475 yards, now in course of extension to 1200 yards. The members of the corps are desirous of having the name of "Royal" prefixed to that of the Victoria Rifles, as was the case when they were "the Royal Victoria Rifle Club," and there is every reason to believe that the required permission will be granted.

QUEEN'S WESTMINSTER.—This fine regiment mustered at Westminster Hall on Saturday afternoon, and in despite of the inclemency of the weather marched out for upwards of two hours, taking a circuitous route through the principal thoroughfares of the city of Westminster, and returning past Buckingham Palace, along the Mall to the foot of Waterloo-steps, where the several companies separated, and proceeded to their respective armouries for dismissal. Morning drill, under the direction of the adjutant (Major Mayne) will take place in St. James's Park four times a week, from eight till eleven. There is also a muster for morning drill at Prince's Gate, Knightsbridge, at seven o'clock.

ST. PANCRAS AND NORTH MIDDLESEX.—This corps progresses strongly in numbers, and the drills, which take place regularly every Monday, Wednesday, and Friday evening at the Regent's Park Cavalry Barracks and at the St. Pancras Vestry Hall, are well attended, and the precision with which the effectives, who have their rifles, handle their arms, is exceedingly praiseworthy. The council are about taking premises as the permanent head-quarters in the vicinity of the Regent's Park Barracks, where their armoury will be established, so as to prevent the necessity of the effectives having to go to the Vestry Hall, a distance of about a mile and a half, to procure their rifles, and then after drill march back again to deposit them. A gentleman, holding the rank of a colonel in the army, has, it is believed, consented to take the command of the corps, and it is gratifying to state that the subscriptions and donations in support of the brigade are flowing in liberally.

ST. GEORGE'S DAY AND ST. GEORGE'S RIFLES.—Monday last being St. George's Day, the Volunteer Rifle Corps of the parish of St. George's, Hanover Square, celebrated the establishment of the corps. The banquet took place in Willis's Rooms, St. James's, Sir Hamilton Seymour, G.C.B., G.C.H., in the chair, who was supported on his right by Lieut.-Colonel Lindsay, on his left by the Rev. Mr. Howorth, rector of St. George's parish, also by the Earl Grosvenor, Viscount Ranelagh, Viscount Bury, Major-General Downing, Colonel MacMurdo, C.B., Inspector-General of the Volunteer Corps, Colonel Hicks, Colonel Daniel, Major Lyon, &c. After the usual loyal toasts, the Chairman proposed the Volunteer Force. Colonel M'Murdo, in replying, stated that the volunteer force on that day amounted to 124,000 effective men, of whom between 10,000 and 12,000 were metropolitans, and 14,000 artillery. If only one in ten of the able-bodied population joined the volunteer corps, they would have, according to the last census, a volunteer force of 550,000 men; and if one in five of the able-bodied population joined, they would then have an effective force of upwards of 1,000,000. England need not fear when such a figure was attained. He was a member of a select committee, the object of which was very well known, which had to inquire as to the means of moving a force to any point, and the result to which that committee had come was that the railway rolling stock of England was sufficient to move all the armies of Europe to a given point. The Chairman then proposed the toast of "the St. George's Volunteer Rifle Corps," coupling therewith the name of Colonel Lindsay. The health of the chairman, and several other toasts followed, and the company did not break up till a late hour in the evening. It must have been most encouraging to the several commanding officers who were present on this occasion to witness the enthusiastic reception which was given to Lieut.-Colonel Lindsay upon his entering the banquet-room, as also when he stood up to address his corps, in reply to the graceful remarks which the chairman made upon his conduct and position among them as their commanding officer. In short it was one of the most stirring scenes from first to last, and one which may serve as an example of unanimity to other corps throughout the country; as being essential to the well-working and contentment of the members. The sooner the St. George's arrive at their number of 500 the sooner will Colonel Lindsay be in a position to consider himself rewarded by the exertions he has made. The dinner, which was of the most *recherché* description, was provided by Mr. Willis, and the general appearance of the tables was grand, rendered so by the magnificence of the plate, of the most splendid description, which had been contributed gratis by Messrs. Hunt and Roskell, and Messrs. Garrard, who are members of the corps. The value of the plate was estimated at 15,000*l.*

PADDINGTON.—This corps, under the direction of General Downing, its captain-commandant, is progressing in efficiency, although not greatly increasing in numbers, and the drills are well attended. A rumour is abroad that it is intended by the War Office very shortly to amalgamate small local corps and form battalions of 800 men in each district. Should this be the case, it is believed that the Paddington will fall in with the West Middlesex, whilst in all probability, the Highgate Rifles and the Hampstead Corps will be associated with the St. Pancras and North Middlesex.

DURHAM.

STOCKTON-ON-TEES.—There is in progress a movement at this place for raising an artillery corps.

GLOUCESTERSHIRE.

BRISTOL VOLUNTEER ARTILLERY CORPS.—The arrival of four 18-pounder guns and ammunition waggons for the use of this corps was celebrated on Thursday by a public demonstration. The streets and shipping were gaily dressed with flags, and throughout the day merry peals issued from several church belfries, and cannon were discharged at various points. The Bristol Volunteer Rifle and Artillery Corps mustered in Queen Square (the scene of the Bristol riots) at 3 o'clock, and were thence marched to Princes Street, where at half-past three a procession was formed in the following order:—Detachment of Police; Queen Charlton troop of North Somerset Yeomanry Cavalry, under the command of Captain Haviland; band and right wing of Bristol Volunteer Rifles, under the command of Lieut.-Colonel Bush; and band and corps of the Volunteer Artillery, under the command of Major Savile, with the guns and waggons, each drawn by four fine horses, sent for the occasion by Mr. Wall, traffic manager of the Bristol and Exeter Railway; the left wing of the Bristol Rifles, under command of Major Payne; two companies of the Bath Volunteer Rifle Corps; and rear-guard of North Somerset Yeomanry Cavalry. The route taken was by the Grove, Welsh-Back, Bridge Street, Wine Street, Corn Street, Clare Street, through College Green, Park Street, and the Queen's Road, to the Victoria Rooms, Clifton, in the open area in front of which the guns were placed for the day amid loud cheers. Throughout the whole line of procession the shops were closed, and the weather being remarkably fine, the occasion was made a general holiday. In the evening a banquet took place at the Victoria Rooms.

KENT.

FOLKESTONE RIFLE VOLUNTEERS.—Captain Percival, late Lieut.-Colonel of the 1st Dragoons British German Legion, having joined the Folkestone Rifle Volunteers, was on Monday morning last sworn in before Captain Kenniot, R.N., Mayor of Folkestone, and took the command of the corps immediately. It is understood that field exercise will commence at once, and be carried out in the most energetic manner, to bring the corps to the best possible state of efficiency.

LANCASHIRE.

LIVERPOOL.—The local press has during the past week been teeming with articles and letters complaining of the delay in the organisation of the Rifle Volunteers, pursuant to the memorandum issued by the Secretary of State for War to the Lords-Lieutenant of counties. It seems there is no complete regiment of Volunteer Rifles in Liverpool, but, as appears from the *Army List*, there are no less than 14 several corps, represented by 60 or 70 officers; and 5 captains of these corps possess the puzzling rank of Captain-Commandant. This seems to be the chief bugbear in the way of organisation, for we are informed the captains commandant imagine their claims to majorities in battalions are insuperable; on the other hand it is contended that they hold no superior rank out of their own corps, and the consequence of this conflict of opinion is that in meeting to battalion under the second principle laid down by the Secretary for War the captains split upon the rock of their real or imaginary precedence, and in addition the prospects of promotion by seniority for the future is in some form or another alarming to each individual corps, for although the officers may be admirably adapted for their posts in their own companies, it does not follow they would be equally acceptable in others of the same battalion. The writers in the local press have recommended another course of proceeding, which has been adopted with success in the 1st brigade of Artillery Volunteers in Liverpool, and is shortly this: 1st. That on several corps agreeing to battalion, the colonel should be chosen. 2nd. That it should be decided that promotion up to the rank of captain should go by seniority through the respective corps, and not through the battalion. 3rd. That, after the organisation has been recognised by the Government, the major should be elected by a board composed of all the officers of the battalion. 4th. That the promotion of field officers (after the first election) should go through that rank by seniority, and that the junior major should always be elected by the board of officers. 5th. In the present state of things, it has been suggested that it would be desirable, if practicable, to induce a well-qualified Militia officer to accept the rank of major, as this would introduce an independent element, which is much needed, and will materially assist the organisation. It is evident that as the Volunteers in Liverpool have chosen to enrol themselves in several small corps, instead of regiments, the *second* Government principle is the only one which can bring them together; for all the corps doubtless possess different elements, which cannot at present be fused into a regiment, properly so called—their uniforms are different, financial arrangements and rules are likewise dissimilar; but as the Government require union for administrative purposes and drill, the best thing they can do is to pull together, and adopt some or all of the recommendations alluded to above; for the authorities having chalked out a plan to meet the circumstances of the case, the officers lay themselves open to the animadversion of the public, if they allow their personal desire for rank to interfere with the progress of the Volunteer movement.

MIDDLESEX.

WEST MIDDLESEX.—The West Middlesex Rifles having now reached six companies, are about to elect a lieutenant-colonel, and it is understood that Lord Radstock, the present major-commandant, will be elevated to that position. It is also intended to apply to the lord-lieutenant for sanction to increase the corps to eight or ten companies, and steps are being taken at Wormwood Scrubbs to enlarge the butt, and

Digitized by Google

to erect a place for the shelter of the effective members of the corps from inclemency of weather when out at rifle practice. The Rev. Mr. Cox, a minister of the Church of England, and an effective member of the corps, has been elected the chaplain of the regiment. In this, as well as other corps, however, it is found that the "Volunteer" band system does not work well, and steps are about to be taken to remedy the evil by having a paid professional band.

THE 2ND OR SOUTH MIDDLESEX RIFLE CORPS, comprising nine strong companies, were inspected in Hyde Park on Wednesday evening by Major-General MacMurdo, the ground being kept by the Civil Service Volunteers. In spite of the inclemency of the weather, Her Majesty passed through Rotten Row, to witness the assembling of the Volunteers, and His Royal Highness the Prince Consort and His Royal Highness the Prince of Wales were present on horseback. A great multitude of people also watched the evolutions of the Volunteers with extraordinary interest. The South Middlesex were under the command of Lord Ranelagh.

WARWICKSHIRE.

5TH COMPANY.—On Thursday last the members of the 5th Warwickshire Rifle Volunteers presented to Sergeant-Major Robertson at Leamington a handsome silver tankard, as a testimonial of their appreciation of his services. The cup, which was provided by Mr. Bright, jeweller, of Leamington, was elegantly chased and bore the following inscription:—"Presented to Sergeant-Major Robertson by the non-commissioned officers and members of the 5th Warwickshire Rifle Volunteers, as a slight testimonial of their appreciation of his ability and zeal in bringing the company to their present state of efficiency, April, 1860."—The presentation took place in the Jephson Gardens. The members of the corps, who had marched from the Great Western Railway Station, headed by their new band, mustered in large numbers, and the assemblage of spectators was very great, the cold north-easterly wind notwithstanding. At about half-past six Captain Machin, advancing towards Sergeant-Major Robertson, said: "The members of the Fifth Company desire to present to you this tankard, as a small tribute of the great respect which they entertain towards you. Every one of the members of this company feel that all the little knowledge and skill they possess in this new occupation which they have taken upon themselves, is entirely owing to your kind assistance. I feel it would be a work of supererogation for me to attempt to offer any praise to you—your merit as a soldier is amply testified by those medals which you bear on your breast. We hope that your connection with us may be a long one; and, if anything should happen to sever that connection, our hope is that, when you use that cup, which you have so well and deservedly gained, your recollection of us may be associated with pleasant feelings. And I can assure you, on our parts, that we shall ever recollect you with feelings of pleasure. I have great pleasure in handing to you this cup. May you long use it with health and prosperity." Sergeant-Major Robertson said: "Captain Machin, officers, and gentlemen of the 5th Warwickshire, I cannot find words to express my thanks for this unexpected favour at your hands—favour as it must be; one that you all know that it is not the duty of a drill-sergeant or sergeant-major to court. It is his business frequently to find fault and direct: it is the business of others to obey. It is all the more pleasant to look at this mark of your esteem, from the short time I have been with you in trying to make soldiers of you—not to show you that I myself am a soldier, but for the purpose of making soldiers of you. I have never yet found one Warwickshire Volunteer who did not give signs of being able to do it if he liked; showing that gentleman can be soldiers in the ranks and out of the ranks. This mark of your esteem I hope to be able long to preserve; and I trust when I come in after life to drink out of it, or look at it, it may bring to remembrance the many pleasant hours passed in my attempt to make soldiers of the Leamington and Warwick Volunteers. Yet, gentlemen, you must bear in mind that you are not all through yet. You have got through a creditable inspection. It is a simple matter for a drill-sergeant or sergeant-major to get you through that; but our captain is not quite satisfied—the number of the drills is not so large as it should be. Every part of the machine ought to work well, and there should be no such thing as a superiority of excellence; every man should be up to the mark. The wheel will not go right if any part is out of order; every man should know his position. The only fault I am obliged to express, and for which I may be fully excused doing, is that the attendance has not been altogether what might be desired. The drills have been very few, and there is that awkward squad as it is called. I think we had better have the name changed. You will, doubtless, be surprised if I were to tell you that, if a man who had been a soldier for twenty years got leave of absence for a month, he would have to go again to the awkward squad, it being supposed that he had forgot his drill in that month. After what Captain Machin has said, I feel a difficulty in making a suitable reply. I can add nothing. Allow me again to return you my most sincere thanks; and may I be allowed to give expression to a hope that before I have finished with you, one and all of you will be as well able to go through the different duty belonging to the company's drill as a few are now? There is one thing, gentlemen, which I think I may tell you without fear of contradiction, namely, that this company has worked up itself with all credit; but that is no reason why I should be satisfied myself. You have got officers, as I know, well able to get this company to work—as able as in any other company. Allow me to thank you all once more."

YORKSHIRE.

RICHMOND.—A meeting of the corps at this place was held in the Borough Hall on Tuesday last, Captain Roper in the chair. It was decided that each member should be at liberty to select the quality of cloth for his uniform, and have it prepared under his own direction. Mr. Cooper, of York, saddler, attended at the meeting, and exhibited specimens of belts and pouches, which were generally approved and admired

BRIDLINGTON.—On Saturday last, the members of the Bridlington Volunteer Rifle Corps, presented their drill-sergeant, Mr. Jackson, with a purse of money, as a small token of their high and universal respect for him, on account of his excellent soldierly discipline and exemplary conduct. The event eliciting the above testimonial was Mr. Jackson's removal to Beverley, where his presence is required in training the East York Militia.

YORK.—The members of this corps have determined to attend a full parade, in the Guildhall of the city, to-morrow (Sunday) morning, and afterwards proceed, headed by the band, to the noble cathedral to attend divine service. The honorary chaplain to the corps, the Rev. Canon Key, will preach on the occasion. This corps now musters nearly 200, attends with praiseworthy zeal to drill, morning and evening, under the direction of its indefatigable officers. Good use has been made of the supply of Government rifles, and a highly creditable degree of proficiency has been attained in the "manual." The more advanced portion of the corps is going through a course of judging distance drill, after becoming proficient in which it will only be necessary to pass an examination by the inspector-general for the district, and the anxiously wished-for target practice will immediately commence.

VOLUNTEER GAZETTE.

WAR OFFICE, PALL MALL, APRIL 24.

28th Company of Cheshire Rifle Volunteers—Alfred Watkin, Esq., to be Captain; John Cunliffe, Gent., to be Lieutenant; James Frodsham, Gent., to be Ensign; John Hamilton Larmuth, Gent., to be Honorary Assistant Surgeon; April 7.

29th Company of Cheshire Rifle Volunteers—John Marsland Lingard, Esq., late of 1st Royal Cheshire Militia, to be Captain; Thomas Steen, Gent., to be Lieutenant; John George Graham, Gent., to be Ensign; April 10.

14th Shropshire Rifle Volunteers—Henry Corbett, late Captain Shropshire Militia, to be Captain; Daniel Jones, Gent., to be Lieutenant; John Meire, Gent., to be Ensign; April 21.

Worcestershire Rifle Volunteers—1st Battalion—Frederick Winn Knight, Esq., M.P., Captain in the 1st Worcestershire Rifle Volunteer Corps, to be Lieutenant-Colonel.

1st Lancashire Artillery Volunteers—The Rev. Abraham Hume, D.C.L., F.S.A., to be Honorary Chaplain; April 9.

6th Lancashire Artillery Volunteers—Captain-Commandant Robert Raynsford Jackson, to be Major; John Butler Bowdon, Esq., to be Captain; John Baynes, Esq., to be Captain; Christopher Alston, Gent., to be First Lieutenant; John Railton, Gent., to be First Lieutenant; April 9.

12th Lancashire Artillery Volunteers—Joseph Bond Morgan, Gent., to be First Lieutenant; March 2.

4th Lancashire Rifle Volunteers—Samuel Hall, Gent., to be Ensign; April 12.

26th Lancashire Rifle Volunteers—Captain John Thompson, to be Captain-Commandant; April 16.

27th Lancashire Rifle Volunteers—William Gray, Esq., M.P., to be Major; William Barton Whittam, Esq., to be Captain; Joseph Whittam, the younger, Gent., to be Lieutenant; April 9.

3rd Manchester or 40th Lancashire Rifle Volunteers—James Higgin, Gent., to be Lieutenant; April 10. George Powell Barnes, Gent., to be Ensign; April 14.

63rd Lancashire Rifle Volunteers—Isaac Simm, Esq., to be Captain; James Nuttall, Gent., to be Lieutenant; April 9.

5th Company of Northampton Rifle Volunteers—Saul Isaac, Gent., to be Lieutenant; Michael Louisson Levey, Gent., to be Ensign; April 18.

7th Cumberland Rifle Volunteers—Charles Lamport, Esq., to be Captain-Commandant; Michael Falcon, Gent., to be Lieutenant; Anthony Peat, Gent., to be Ensign; April 12.

8th Cumberland Rifle Volunteers—Henry Dodgson, M.D., to be Honorary Assistant-Surgeon; April 12.

5th Corps of the Hampshire Rifle Volunteers—Francis Ingram Conway Gordon, Esq., to be Captain; Henry Ford, Gent., to be Lieutenant; Thomas John Bridge, Gent., to be Lieutenant; Alexander Hellard, Gent., to be Ensign; April 14. Edward Griffin, Lieutenant, R.N., to be Ensign; April 17.

6th Company of the Hampshire Rifle Volunteers—Captain Richard Purvis, R. N., to be Lieutenant; Horatio Compigne, Gent., to be Ensign; John Robert Kealy, Gent., to be Honorary Assistant-Surgeon; April 17.

2nd Manchester or 28th Lancashire Rifle Volunteers—Joseph Holdsworth Forney, Esq., to be Captain, vice Turner, resigned; Daniel Boote, Gent., to be Lieutenant, vice Acres, resigned; April 19.

54th Lancashire Rifle Volunteers—James Hewitt Pye, Gent., to be Lieutenant; April 20.

2nd Devon Mounted Rifle Volunteers—Charles Huxley Hall to be Lieutenant; April 18.

3rd Devon Mounted Rifle Volunteers—William Hawker Bernard to be Captain; Newdigate Hooper Kearney Burne to be Lieutenant; April 10.

8th Devon Artillery Volunteers—John Holman, to be Captain; Richard Holman, to be First Lieutenant; John Dewdney Harris, to be Second Lieutenant; March 31.

1st Devon Rifle Volunteers—Edward Bond, to be Captain; George Hirtzel, to be Ensign; April 12.

1st Devon Artillery Volunteers—Richard Rendle Miller Daw, to be First Lieutenant, vice J. Holman, resigned; Thomas Beedle to be Second Lieutenant, vice R. Holman, resigned; March 30.

7th Devon Artillery Volunteers—Edward Divett, to be Captain; Henry Cranstoun Adams, to be Lieutenant; John Wood, to be Second Lieutenant; March 11.

5th Devon Rifle Volunteers—John Walrond Walrond to be Captain; Charles Robert Collins to be Lieutenant; John George Sydenham to be Ensign; March 22.

10th Devon Rifle Volunteers—George Hay Smyth Yates to be Captain; Francis Young to be Lieutenant: Cyrus Woodley Croft to be Ensign; March 27.

11th Devon Rifle Volunteers—William Talley to be Ensign; March 11.

14th Devon Rifle Volunteers—George Welland Mackenzie to be Ensign (Gazetted in error as George Mackenzie); March 1.

19th Devon Rifle Volunteers—Windham Hunt Holley to be Lieutenant (Gazetted in error as William Hunt Holley); March 3.

20th Devon Rifle Volunteers—William Buller Heberden to be Ensign (Gazetted in error as William Buller Henderson); March 3.

21st Devon Rifle Volunteers—Thomas Goldie Harding to be Captain; Reginald Reynolds to be Lieutenant; William Rochfort Keats to be Ensign; March 6.

22nd Devon Rifle Volunteers—Edward Baring Gould to be Captain; March 27. Solomon Perry to be Lieutenant; Joseph Mathew, to be Ensign; March 5.

23rd Devon Rifle Volunteers—Gustavus Adolphus Ferreira to be Lieutenant; Charles Archibald Langley, to be Ensign; March 29.

24th Devon Rifle Volunteers—Frederick Blandy to be Captain; George Peters Neave to be Lieutenant; Francis Richard Hole to be Ensign; March 28.

25th Devon Rifle Volunteers—John Henry Kennaway to be Captain; John Woollcombe Sillifant to be Lieutenant; Joseph Vickers Newberry to be Ensign; April 4.

20th West Riding of Yorkshire Rifle Volunteers (Doncaster)—Robert Storrs, Gent., to be Honorary Assistant-Surgeon; the Rev. John Campion to be Chaplain; April 9.

27th West Riding of Yorkshire Rifle Volunteers (Ripon)—John Rhodes, Esq., to be Captain; Robert Kearsley, Gent., to be Lieutenant; Thomas Wood, Gent., to be Ensign; Charles Husband, Gent., to be Honorary Assistant-Surgeon; April 13.

Memorandum:—The 7th West Riding of Yorkshire Rifle Volunteers (Halifax), will for the future hold the fourth place in the said West Riding, and will be designated accordingly.

1st Cinque Ports Artillery Volunteers—First Lieutenant Edward Astley, to be Captain; Second Lieutenant Percy Simpson Court, to be First Lieutenant, vice Astley, promoted; George Thomas Thompson, Esq., to be First Lieutenant; James Stillwell, Esq., to Second Lieutenant; William Henry Payn, Esq., to be Second Lieutenant; Francis Ezekiel Barton, Esq., to be Assistant-Surgeon; April 21.

6th Cinque Ports Rifle Volunteers—Lieut.-Colonel Julius Brockman Backhouse, to be Lieutenant; April 20.

1st Corps of Mounted Rifle Volunteers—Charles Edward Pryor, Gent., to be Honorary Assistant-Surgeon; April 21.

6th Oxfordshire Rifle Volunteer Corps—Samuel Field, Gent., to be Lieutenant; Charles Duffell Faulkner, Gent., to be Ensign; April 25.

Staffordshire Rifle Volunteer Corps—31st Company—Sampson Hanbury, Esq., to be Captain; April 19.

32nd Company—Henry Loveridge, Esq., to be Captain; William Henry Tudor, Gent., to be Lieutenant; Alfred Young, Gent., to be Ensign; Henry Hancox, Esq., M.D., to be Honorary Assistant-Surgeon; April 19.

8th Hertfordshire Rifle Volunteers—Richard Bright, Gent., to be Lieutenant; Arthur Henry Jenny, Gent., to be Ensign; April 22.

2nd Company of Northamptonshire Rifle Volunteers—Philip Henry Lee, Gent., to be Ensign; April 23.

11th Suffolk Rifle Volunteers—Walter Johnson Weller Poley, Gent., to be Lieutenant; Robert Frost Siedman, Gent., to be Ensign; April 14.

Wiltshire Volunteer Rifle Corps—5th Company—George Waylen, Esq., to be Honorary-Assistant-Surgeon; April 21.

11th Company—Lieutenant John Simpson Fraser, to be Captain; Ensign William Batt, to be Lieutenant; Edward Brotherton Carroll, Gent., to be Lieutenant; Richard Jenkins, Gent., to be Ensign; William David Gooch, Gent., to be Ensign; April 21.

14th Company—Charles Penruddock, Esq., to be Captain; April 24.

City of Edinburgh Rifle Volunteer Corps—John Hall, Gent., to be Lieutenant; Alexander Fairgrieve, Gent., to be Ensign; April 20.

1st Lancashire Rifle Volunteers—Francis Maxwell, Esq., to be Captain of the 1st Company, vice Sir Archibald Islay Campbell, promoted; Ensign Adam Morrison to be Lieutenant in the first Company, vice John Ellison Cowan, resigned; Ruthven Campbell Todd, Gent., to be Ensign in the 1st Company, vice Morrison, promoted; April 23.

NOTICE.—The Queen has been pleased to command that as "The Artillery Company" of London has always been known under the title of "The Hon. Artillery Company of London," that designation shall in future be officially borne by the Regiment.

The Hon. Artillery Company of London—The surname of the Ensign gazetted on the 3d inst., is Fglese. and not Eglise, as then tated.

REVISED ARMY ESTIMATES.

The revised Army Estimates have just been published, and are divided into six parts—viz., forces, civil establishments, supplies, works and buildings, educational, and non-effective, for which a total sum of 14,842,546*l.* is asked, being an increase of 1,983,249*l.* on the estimates of 1859-60. The number of men to be provided for is 145,269, and the pay and allowances for this force amount to 4,736,701*l.*, further augmented by miscellaneous charges, put down at 620,285*l.* The first of these items is 1,012,227*l.*, and the second 57,916*l.* beyond those of last year. The embodied militia will cost 320,000*l.*, a decrease of no less than 240,000*l.* on the previous year's estimate; while the volunteer corps ask 20,000*l.* less than last year, and figure for the comparatively modest sum of 68,000*l.* The next division is that of the civil establishments, in which we find a large increase over 1859-60. The departments of the Secretary for War and of the General Commanding-in-Chief are put down for 196,224*l.*, an increase of 10,630*l.* upon the last estimates; the manufacturing establishments, military storekeepers, barrackmasters, lodging-money, rents, &c., are estimated at 874,005*l.*, an increase of 14,965*l.*; and the wages of artificers and labourers at 865,234*l.*, showing an increase of 115,706*l.* The third division includes clothing and necessaries, estimated at 324,000*l.*, a decrease of 126,000*l.* on the previous year; provisions, forage, fuel and light, barrack furniture and bedding, &c., figure for 1,278,377*l.*, an increase of 181,593*l.*; and warlike stores for land and sea service, will absorb 2,088,088*l.*, an increase of 940,463*l.* upon the estimates of 1859-60. The fourth vote comprises fortifications, civil buildings, and barracks—the first item

Digitized by Google

being down for 645,355*l.*, an increase of 196,783*l.*; the second for 206,500*l.*; and the third for 707,607*l.*, the two latter showing a decrease of 29,457*l.* and 125,885*l.* respectively. The fifth division—the educational—demands an increase of 7190*l.* upon the last estimates, and is down for 277,547*l.* These five divisions comprehend the effective services, and comprise a total of 12,707,923*l.* The non-effective services, which include rewards for military services, pay of general officers, pay of reduced and retired officers, widows' pensions and compassionate allowances, pensions and allowances to wounded officers, in pensions, out-pensions, and superannuation allowances, demand 2,134,623*l.*, a decrease of 12,882*l.* upon last year; thus making up the total amount of 14,842,546*l.* required for the coming year, and showing a net increase of 1,983,249*l.* upon the estimates of 1859-60.

A letter from Sebastopol states that the graves of the British officers have not received that respect which the Russian authorities had promised. The black marble cover on the tomb of Sir Robert Newman had been removed, and the hinges on the gates taken off for the sake of the metal. The tablet on the tomb of Captain Allix was taken away. The slabs that covered the grave of Commander Hammett of the Albion were removed, and the remains of that officer exhumed, the bones and some portions of the uniform being scattered about the grave, which had evidently only been opened a few days before. Other graveyards presented a dilapidated state, and the whole thing does not appear very creditable to our old enemies the Russians.

The private view of the great picture of the Relief of Lucknow: the meeting of Havelock, Outram, and Colin Campbell, takes place to-day at the gallery of Messrs. Agnew and Sons, 5, Waterloo Place. As this picture has been for two years in the hands of Mr. Barker, the eminent painter of the Allied Generals, and has been entirely composed from the drawings made in India by Mr. Limagren, we apprehend it will be one of the most interesting exhibitions of the season.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.

EDITED BY W. H. RUSSELL, ESQ., LL.D.,

(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

MR. ALBERT SMITH'S MONT BLANC IS NOW OPEN EVERY NIGHT (but Saturday) at Eight o'clock; and TUESDAY and SATURDAY AFTERNOONS at Three o'clock.—Stalls, 3*s.*, (which can be taken at the Box-office, Egyptian Hall, daily from eleven till five); area, 2*s.*; gallery, 1*s.*

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly. Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence.

The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MAYALL'S PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum*.

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

DOUDNEY & SONS' RIFLE SUITS.—1ST SURREY, 4*l.* 2*s.*; SOUTH MIDDLESEX, 4*l.* 10*s.*; RIFLE BRIGADE, 4*l.*—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s.* ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum: this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS SUPPLIED WITH EVERY REQUISITE.

Bass Drums, 32 inches	£4 4 0
Tenor Drums, 20 inches, transparent heads	2 7 0
Brass Side Drums, 14 inches	1 8 0
Regulation Drums, brazed shell, as supplied to the Army	2 2 0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2 5 0
Oak (polished) Side Drum, 14 inches	1 5 0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0 8 6
D or E flat ditto	0 6 6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1 1 0
No. 2, Light Infantry Model	1 8 0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l.* 4*s.* Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l.* 12*s.* Mappins' Travelling Dressing Bag for Ladies, 4*l.* 4*s.* The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 5*s.* 6*d.*, 10*s.* 6*d.*, and 21*s.* at UNWIN & ALBERT'S, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, APRIL 28, 1860.

The recent debates in the House of Commons on naval matters have placed the warrant and petty officers of the Navy in such a conspicuous position, that Members of all opinions, as well as Ministers, have been obliged to pay them some attention. They were acknowledged to be the backbone of the Navy. The only wonder is that, as their utility was known long ago, this very useful class of officers should have been so neglected as to admit of their grievances being freely imported into parliament without any effort on their part to carry them there. The mischief must be active that surges to the surface after this fashion. All of a sudden, after going through all sorts of processes, such as royal commissions and bounties, we have found out that whatever affects the warrant and petty officers affects the whole Navy. We always imagined that the "warrant" was the great prize in the sailor's lottery, and to win it, the object of his ambition and the completion of his hopes. We now hear that these prizes have been refused, instead of being sought for; and it is stated that this is one of the causes why the Navy is so unpopular with the merchant sailor, who sees no chance of promotion if he enters the Queen's Service.

Without indorsing this opinion to its full extent, let us hear what the warrant and petty officers complain of. They have made many appeals to successive Boards of Admiralty in vain; and as long back as November 1858 they faggoted their grievances together, and presented them in a lump to the Manning Committee, of which the Earl of Hardwicke was chairman. Now we must understand that it is the boatswain, gunners, and carpenters of Her Majesty's Navy who are about to speak on behalf of themselves and the petty officers, and not the editor of a newspaper. They say that they have lost rank, and were placed at the bottom of the list of officers (below the cadets) in 1844, for which no reason was assigned. "So that in the event of a ship losing her officers above the rank of a cadet, the cadet would take command of the ship." The reply to this question put by the Earl of Hardwicke was, "Yes, though the boatswain and gunner were experienced seamen, and the cadet a mere child." Again, they state that "the increased size of our ships, and the scarcity of mates and midshipmen, have increased their duties, and occupied their time which should be devoted to the care of their stores and accounts."—that "they have no relative rank in the Army."—that "loss of position is loss of prize-money and check-money." Without stopping to go into details of their pecuniary loss, let us hear what effect the loss of rank had upon the warrant officers when taken prisoners during the Russian war. The gunner of the Tiger, for instance, "was not treated as an officer; he held a position at the bottom of the list, approaching that of petty officers, and, there being no relative rank in the Army for warrant officers, by which he could receive any allowance, or any scale of diet, he was treated "as a common sailor." And yet this officer would, on board a Queen's ship, in the event of a commissioned officer falling sick, be selected to keep the quarter-deck and take the command of the vessel for the time being. Again, they say, "they have no increased pay for increased service," that is, the officer just placed in the first class receives the same amount of pay as the one who has served twenty years in the first class. Again, "In 1830, the pensions payable to the widows of gunners, boatswains, and carpenters were abolished." This was a most grievous change, and was considered so by the Government, for Mr. Cardwell put a question to Sir R. M. Bromley, wishing to ascertain the sum necessary to restore the widows' pensions, and the answer was "19,150*l.*" We believe the sum granted by the Chancellor of the Exchequer is 500*l.* Then they say that "no length of servitude or age entitles a warrant officer to retirement so long as a medical board pronounces him fit to serve," and that, "when unfit for service, there is no certain scale of superannuation—which depends upon the whim of the Board of Admiralty;" and further, they say, "that if wounded or hurt in the Service, they are not pensioned as formerly, according to the nature of the injury, but should the hurt be of a nature to prevent them doing sea duty, they are placed on harbour duty at reduced pay, and all future promotion stopped." So that if a warrant officer is in the second or third class, there he must remain, no matter what length of service he has gone through, or how exemplary his character may have been, or the nature of the wound. And lastly, they allege that the "senior warrant officers have norewards for 'war service,' either by promotion or otherwise."

The above are the warrant officers' views of the "warrant," which, by the Admiralty, is held up as a prize for good conduct and meritorious services. It is a pity that the possessors don't think much of it, and that it should be despised and refused by many petty officers and excellent seamen. That the "warrant" has been so refused there can be no doubt, and it is now acknowledged by many officers that this has been the principal cause of the unpopularity of the Service. It is of no use having "regulations" by which, in extraordinary cases, a warrant officer can be promoted to be a commissioned officer, if such regulations are so beset with a thicket of hindrances that they can never be jumped over. No such promotion has ever taken place. The passage from the forecastle to the quarter-deck, though ostentatiously guarded, should be really open to give the bribe its full value. Barriers to rank ought to be so contrived as to whet the thirst and enhance the prize. "Now," said Nelson, when clearing for action, "a peerage, or Westminster Abbey." Nelson had a chance of both. This feeling should influence every rank in the Service—"who will work and dare, shall rule;" instead of which we have a knack of bestowing "good conduct badges and stripes," which, if we may credit the wearers, are sometimes a troublesome grievance.

With sincere regret we hear of numerous instances of ill-feeling and internal troubles in Volunteers Corps. Those who are the enemies of these bodies rejoice exceedingly; but we do not believe that those dissensions are likely to be fatal to the Volunteers, as their friends fear, and their enemies hope may be the case. The "grasshoppers on the bank" make more noise than the cows in the clover. In the Army the manifestations of jealousy and personal animosity are restrained by discipline. Among the Volunteers, as among all masses of men where there is no such compressing force as that of discipline, and where there are posts to excite ambition and envy, there will certainly be foolish exhibitions of disappointment and irritation, just as there must be in such a numerous body of men who cannot control their ill-temper, their pride, or their folly. It is to be hoped that Volunteers, whether officers or privates, will not make matters worse than they are by seeking to impart to themselves a military constitution, or by imitating the regulations of the regular Army. Any such attempts must fail. It is ridiculous for a Volunteer officer to expect the privates, who are gentlemen of his own position in society, associated voluntarily together, to pay him the same marks of respect as a private soldier is obliged to render to an officer in the Army. Many of the disputes which have arisen, have been caused by pretensions on the part of officers to be treated as if they held the same position in regard to their men as is held by regimental officers in respect to the rank and file. On the other hand, it is obvious that there must be obedience prompt and unconditional on the part of Volunteers towards their officers, or the corps can never be drilled or taught to do their duty. If men are not accustomed to treat those who command them with a certain sort of respect as officers, it becomes exceedingly difficult to ensure that obedience, without which the association of men to act together as armed bodies becomes impossible, or at all events fruitless.

But all such points should be left to the good sense of the Volunteers. When an officer feels he is not popular, whether the feeling against him be right or wrong, the best thing he can do, in our opinion, is to resign. It is better to adopt that course than to throw a corps into confusion; but we should not be disposed to think well of any corps in which there was more than one *emeute* of the kind. Let the kindliness, good sense, and gentlemanly forbearance of the Volunteers stand them in lieu of the forced discipline of the Army, and in cases where the harmony of a corps is threatened by personal feelings or jealousies, let the contending parties abide by the judgment of their comrades, as gentlemen; or, if that be impossible, let them select some man of even temper and ordinary judgment as a referee, and we

Digitized by Google

shall soon cease to be perplexed with these rumours of wars, which pain us among all true friends of the great English Landsturm.

We would, at this time, whilst the new Militia Bill is in course of preparation, avail ourselves of the opportunity of bringing forward the case of the Militia surgeons, and of showing why they should be placed on the permanent staff of their regiments. These officers, upon the disembodiment of their corps, are unable either to obtain or regain private practice, because families will not employ as their medical attendant a gentleman who is liable to be summoned off at any moment. This is a universal feeling in society, and especially applies to the female members. There is much of confidence, much of a private nature, to be entrusted to the medical attendant of every family; and this, it is natural enough, those who are necessitated to do so would wish to be conferred upon one, and one individual only. Every father or mother, therefore, in the selection of their family physician, will prefer to secure the services of one permanently resident amongst them, to him who is this year a civilian, and the next away, the occupant of camps and barracks. Thus from private practice the Militia surgeon is virtually debarred. Next, as regards his obtaining any public appointments. This, too, is next to impossible. The vacancies to such are few and far between, and when they do occur the competition to election is so great that the friends of a resident candidate would invariably carry the day in consequence of the Militia surgeon being unable to give any guarantee as to the permanency of his stay amongst them,—the period that he could or would discharge the duties of the office,—in fact, the advertisements frequently state that no Militia surgeons need apply. The residence, too, of the surgeon of a Militia regiment, when disembodied, is compulsory; he can obtain no such appointment as travelling physician, or even surgeon to a ship. He is compelled by Act of Parliament to reside at the head-quarters wherever that may be; and for what? For the retainment of his office, and the miserable pittance of 2*d.* per head per week for attendance upon the staff, a sum averaging only 30*l.* per annum, and which in reality often barely pays for the medicines and appliances which they are bound to supply. The placing of these officers upon the permanent staff, as is strongly recommended by the present Director-General, and giving them a daily pay of 10*s.* for their services to those entitled to them, and for the inspection of Line and Militia recruits, would be but an act of justice to these officers. It would, however, at the same time be an act of justice to the country; for by such a proceeding, as was shown in evidence adduced before the late Royal Commission on the Militia, it would effect a saving over the present mode of payment for the examination of recruits of no less a sum than 4000*l.* per annum. For all these reasons we trust to see what we have here adverted to adopted.

What is this Royal Commission on the Dockyard Expenditure to lead to? If we remember aright, so far back as the year 1846 the *Times* called attention in a series of articles and letters to the unsatisfactory state of the Dockyards, when the Admiralty, at the instigation of Sir Henry Ward, who was then Secretary, sent an officer to investigate and report upon their existing defects. Subsequently, a Select Committee of the House of Commons, presided over by the First Lord of the Admiralty, inquired into all matters connected with the Navy; and, in order that nothing at the time should remain unnoticed, a Committee of Revision, of practical officers, visited the Dockyards in 1848, the result of which was a series of Admiralty Board Minutes, directing various improvements in Dockyard management.

Until the Russian War broke out the Dockyard system appeared to be working more economically and efficiently, but a departure was then found necessary from day pay-work to what is called "Task and Job;" thus, the door was at once opened for extravagance in the expenditure of materials, and hence the deficiency of timber in our yards so properly brought to light by Mr. Henley. The extravagance was soon made so promient, that Committees of Inquiry were set in motion in 1858 relative to Marine Steam-Engines and Dockyard economy. But in all this the real question of Admiralty control appears to have been put aside, and, except an occasional growl from Sir Charles Napier, that ancient board of mismanagement seems doomed to pass on without inquiry or even comment.

Lord Clarence Paget, himself, seems to think it too sacred to be touched, as he throws his shield over it in the Royal Commission he has just granted to Mr. Jackson.

We can easily see the further uselessness of the Commission, unless some means be found for supplying the deficiency in the Admiralty administration of the dockyards.

Who will "bell the cat?"

The *Moniteur de la Flotte*, in an article on the right of search, claims for Turgot the credit of having proposed to England the abolition of the custom of seizing on the goods of merchants in time of war, and boasts that the refusal of our Government to do away with privateering cost us in fifteen years no-less than 71,000 sailors, who were taken prisoners by French cruisers, and the many ships which they manned. Our contemporary states that Mably in 1748 suggested that the governments of Europe should come to an understanding that their ships of war were not to molest merchant ships of their enemies; and M. de Rayneval in his treatise, "Sur la Liberté des Mers," laid it down as undoubted international law, that a neutral flag was absolutely free in the open sea, and therefore could not be subjected to a search. In 1831 the governments of England and France, followed by those of Europe, subsequently came to an arrangement with the view of suppressing the slave trade, by which the right of search of suspicious vessels was recognised. But the treaty expired, and no attempt was made to renew it. Our contemporary is aghast at the audacity with which our ships-of-war "visit" not only French but American ships, and insists with unction on the persistent refusal of the United States either to admit the right of search, or to consent to abandon privateering in event of war. But the writer is forced to admit that ships-of-war, being the police of the ocean, have a right to satisfy themselves of the nationality of traders, and of their claim to hoist the flag under which they sail. It is not easy to see how that assurance can be obtained without a visit and the exercise of the right of search. The convention between France and England has materially interfered with the rights claimed by our men-of-war, and almost restricts their powers to the single act of forcing a merchant vessel to hoist its flag; but an officer in command of any cruiser can, at all times, whenever he suspects fraud, send a boat alongside, and visit the ship for the purpose of examining her papers, on his own responsibility. It is difficult to define what may be the penalties of unnecessary visits and searches; but it is obvious that absolute freedom of the seas and immunity from all search are quite impossible, unless we would let all the ruffianism of the world loose upon the waters; and it is probable that, should a war arise between great naval powers, we should fall away into the ancient practice of making prize of our enemy's merchantmen—for France would assuredly be unable to resist the temptation of cruizing against our commerce, and we would be forced to retaliate in kind, however unequal the nature of the contest.

His Royal Highness the General Commanding-in-Chief will hold a Levee at one o'clock on Monday next, the 30th instant.

Lord Clyde has been relieved of the command in India, and may be expected in England earlier than was anticipated by those who were aware, some time ago, that His Excellency intended to remain for another year in India. It is probable his lordship will arrive in England next July.

We understand that Sir John Pennefather will not assume the chief command at Aldershot until the 1st of July next, up to which period General Knollys will command the troops in camp.

The following Army promotions, consequent on the deaths of Lieut.-Generals Fleming and Home, reported this week, will take place; Major-Generals Sir James Holmes Schoedde, K.C.B., Colonel of the 55th Regiment, and Sir H. Bentinck, K.C.B., Colonel of the 28th Regiment, to be Lieut.-Generals; Colonels Charles Franklyn, C.B., commanding a Brigade at Gibraltar, and G. C. Mundy, Lieut.-Governor of Jersey, to be Major-Generals; Lieut.-Colonels G. C. Clarke, of the Scots Greys, and G. V. Mundy, of the 19th Regiment, to be Colonels; and Majors J. P. Mayers, 86th Regiment, and J. R. Heaton, 37th Regiment, to be Lieut.-Colonels in the Army.

Brevet-Major H. Holford Stevenson, of the 79th Highlanders, has been appointed Aide-de-Camp to Major-General Cameron, commanding the troops in Scotland.

Captain C. Peach Pemberton, Scots Fusilier Guards, has been appointed Aide-de-Camp to Brigadier-General Brook Taylor, commanding a Brigade at Aldershot.

There is some sort of evil genius meddling with our recruiting for the Army and our manning the Navy, and our shipbuilding and our "hearts of oak," Italian or British. Of his doings in the latter departments have we not heard enough, and is not the Admiralty likely to hear more? And now it appears that the new forms of attestation for the Army are so cunningly devised, that the magistrates refuse to attest recruits under clauses which are as they contend illegal. Of course this obstacle will be removed some fine day.

As we have received several inquires respecting the return of regiments from India, it may be well to state that the corps now actually on their way home, are the 12th Lancers, 14th Light Dragoons, 53rd Regiment, and 60th Rifles (1st battalion). The regiments ordered home are the 5th Fusiliers (1st battalion), 8th (1st battalion), 24th (1st battalion), and 37th. We are not aware of any other transfers from the Indian to the Home establishment likely to take place this year.

It will be seen that the telegram in the papers of Friday, respecting the loss of the Dove and Algerine by the fire of the Peiho forts, was brought to the attention of the House of Commons, and that there is some reason to doubt the truth of the statetment. On 14th March the Sampson, which had been cruizing in the Chinese waters off the Peiho, arrived at Hong Kong from Shanghai. She had been cruising in company with the Dove, Actæon, and Algerine, and her dispatches did not give any information calculated to make us think the news is true. Nevertheless it may be, and we regret to say that the official statement of probabilities does not extend to a demonstration of impossibility. We think it will be found by experience that gun-boats are very well adapted to go up shallow waters, "provided there is no enemy on the shores," but that they are quite useless in attacking heavy earthworks, and trying to do work which can only be done by "tiers of guns." If fleets cannot go up those waters, it is madness to expose gun-boats to the fire of land batteries, unless they are intended to cover the operations of troops which shall assault these batteries from the land-side.

It must be apparent that, in the recent Paymasters' Warrant there exists at any rate one glaring inconsistency, and which is, that a certain individual who has never performed any military duty, may actually receive a military title and rank in a much shorter time than one who has been a combatant officer, and, perhaps, served his country well in the field of battle. For instance, John Smith, Esq., is appointed Paymaster; and, after five years' service in this position, attains the honorary rank of Captain. Lieutenant Brown, with ten years' service, appointed Paymaster; and, after five years, made Hon. Captain. Thus, John Smith, who has done nothing but keep accounts for five years, precedes Lieutenant Brown by ten years. A case was exhibited in this journal of the 14th instant, whereby a commissioned officer of twenty-nine years' standing was forestalled in the honorary rank of Captain by a civilian. We venture to suggest, as a remedy for the grievance complained of, that the rank of Captain be given to officers of not less than ten years' service, with three as Paymaster; that of Major, to those of eighteen years as Commissioned Officer, with seven years as Paymaster; and we hope that this proposition, which, if it costs the country anything, would only entail an expenditure too trifling to mention, may be favourably entertained.

A very creditable attempt was made some time ago by a number of artizans in the Parish of St. Luke's, to form a rifle corps. They clubbed their money, invented a cheap and serviceable dress, suited to their condition and available as a uniform, and assembled for drill in the school-house of the church, lent to them for that purpose by the Rev. Harry Jones, who took a deep interest in their proceedings. All these good citizens required was the recognition of their existence by the Government; and they stipulated that their officers should be on the full or half-pay of the regular Army, so as to secure the utmost efficiency and guard against jobbery. Their application was forwarded to the Marquis of Salisbury, but his lordship did not think it right to forward it. Lord Elcho heard of the corps, came down to them, and succeeded in inducing them to join the Scottish Corps, of which his lordship is commandant. The men are disappointed, but have accepted the amalgamation sooner than not act at all.

THE MEDITERRANEAN.

MALTA, 14th April, 1860.—H.M.'s screw steam-tender, Boxer, Lieutenant T. S. Graham, arrived on the 6th inst. from Messina and Terranova; and the screw steam-frigate Amphion, arrived on the 9th inst. from Queenstown and Gibraltar.

We have much pleasure in stating that, at the solicitation of the Trustees of the "Seamen's Institute," Rear-Admiral Codrington, C.B., has consented to become the President of that useful and well-conducted establishment.

We deeply regret to learn the sudden death of so gallant an officer and gentleman as Captain William Magrath King of the Royal Artillery, belonging to this garrison.

The liners Orion and Cæsar were at Naples by last accounts.

Malta is thoroughly armed.

21st April.—H.M.'s line-of-battle ship Orion, Captain T. T. B. E. Frere, entered our harbour on the 16th inst. from Naples and Palermo; and sailed yesterday for Gibraltar and Plymouth.

H.M.'s screw gun-boat Assurance, Commander C. M. Aynsley, left our port on the 15th inst. for Messina; and returned yesterday morning. She reports Messina and Syracuse quiet, but the country in a very disturbed state.

H.M.'s screw line-of-battle ships London, Captain H. Chads, arrived on the 17th inst. from Cephalonia; and Victor Emanuel, Captain T. C. Clifford, C.B., proceeded on the same day to Corfu.

H.M.'s screw steam-frigate Amphion, Captain T. Cochran, left our port for Palermo on the 17th inst. for Messina.

H.M.'s steam-tender Boxer, Lieutenant Graham, proceeded on the 17th inst. for Catania, and returned this morning.

The squadron under the command of Rear-Admiral G. Rodney Mundy, C.B., consisting of the screw-liners Hannibal, flag-ship, Agamemnon, James Watt, and Renown, and the corvette Scylla, arrived this morning from Gibraltar.

FLEETS AND NAVIES.*

He must be a more than ordinary writer who can, in the present day, treat of a profession, such as the Navy of England, and make it interest the general reader. Captain Hamley has been in this respect most successful in his self-imposed task, and, apart from possessing in no small degree the talent of his accomplished relative, the author of the "Story of the Campaign of Sebastopol," in saying what he has to say in felicitous and attention-engrossing language, our gallant author evidently understands his subject thoroughly, and handles it *con amore*. At this particular moment, when Europe stands startled at the vision of an Imperial will dictating from Paris fresh boundaries to her states; when Italy is shrinking from the iron claw hitherto hid under a silken glove; when England, ill at ease, is trying from her white cliffs to peer through the haze in which looms a huge fleet and a magnificently organised Navy, only six hours' distant from her peaceful and almost unprotected shores; such a book as this is particularly opportune. We welcome it for another reason: if it is not written by a sailor, it is at any rate by one whose evidence is quite as valuable upon the subject of which he treats, as that of any seaman; and it is a promising sign that a member of that corps, the Royal Marines, which is identified with all the proud triumphs of the Navy, should remember that the decks of our men-of-war is his field of fame, and that he should strive by earnest testimony to show how the fleets of England may still bear high our name in that great hour of battle towards which we are slowly but steadily drifting.

The first chapter is devoted to the French navy. It treats of the policy of France, and shows that the supremacy of the seas is not an idea originating with Napoleon III., or Admiral and Minister of Marine Hamelin. "Henri Quatre," says Captain Hamley, "Sully, Louis Quatorze, Colbert, Napoleon I., all saw that a country whose coast trended on seas and oceans, must be maritime, must be naval; that it was a destiny involved in the position, and that a people so sea-girt must be powerful on the sea, in order to uphold an ascendancy among nations; *that to be supreme at all, they must be supreme there.*"

For this supremacy we have fought France; for it we must again fight her directly she attempts to exercise such supremacy over those highways of commerce thronged with our merchantmen and goods, and where she figures not, except in an armed and threatening character. We can share the supremacy of the seas with no military power; it is a throne which admits of but one occupant. We must be supreme or secondary. Are we prepared for the latter condition?—to trade, to pass to and from our colonies, on the sufferance of one, who can at any moment seize our merchant ships, or starve us into submission by a blockade of our coasts,—and such would be our position to-morrow, if Napoleon III. attained the object at which he is aiming. It is in the *personnel* of the French navy that we see real reason for alarm, and for exertion on our part. It has been improved and modified, and rendered quite as formidable in its new character as the introduction of steam and screw-propellers have called for change in the build and organisation of their fleet. Napoleon III. had excellent materials in the officers, sailors, and ships, left him by the Orleans dynasty, out of which to form the basis of the present navy of France, and he has ably taken advantage of them.

Our author gives a concise and excellent account of this new organisation. In the first place, the maritime conscription upon the sea-board of France, which takes place at certain intervals of time, affords a grand aggregate of 162,000 men between 18 and 50 years of age: a portion is drafted off, and must serve the state for 7 years, at the expiration of that period they may claim a discharge, or volunteer to continue to serve; those that quit the navy and return home are, of course, available as a reserve force in case of need. Besides these volunteers and drafts of the original conscription, there are always a certain proportion of seamen who serve in the navy, preferring it to other service; and that—the best—section of the naval service of France, is recruited constantly from the school-ships, where a large number of boys are regularly trained up for the purpose. This navy, which can by conscription be expanded or contracted with ease, is divided into five sections. Two of them are called first-class divisions; and three, second-class divisions. The first-class divisions are stationed at Brest and Toulon; they each consist of a staff officer and seven companies, divided into first-class seamen (1), seamen-gunners (2), seamen-sharpshooters (3), engineers (4), stokers (5), two companies of the sailors of the inscription (6), and one company of volunteers (7). Such is a first-class division.

A second-class division has an *état-major* and two companies only; one company consists of sections of the four first classes of men named above, and the second company is composed of inscribed and volunteer seamen. At Cherbourg, L'Orient, and Rochefort, are stationed one each of these second-class divisions. The men are known by the division to which they belong; and, when a ship is required to be manned, the facility with which she can have supplied all the *man*-elements for putting to sea and fighting an action is self-evident.

In fact a French man-of-war is considered very much in the light of a floating or moveable fortress, into which the naval commander-in-chief can by the above simple arrangement throw a garrison of infantry, artillery, riflemen, and engineers at a day's notice. The next great improvement has been in the internal economy of the French navy. Uniformity is insisted upon in the routine of every ship; and it is not, as in our Navy, left to the whim and caprice of every captain. At one hour the French sailors are to retire to their beds, to have certain meal hours, certain drills, certain rest. "Crimes are all classed," says Capt. Hamley, "the different punishments prescribed, and a due and legal investigation provided for in all cases." Thus system and uniformity assure the French sailor, in whatever ship he enters, that he shall be treated alike. Captain Laplace does not let him spend all the morning watch in his hammock or smoking his pipe, whilst Captain Bouêt sends him to scrub and holystone from 4 o'clock to 7 a.m. Pierre or Jacques in the Foudroyant may not get as drunk as he pleases on Sunday, or break his leave for as long as he likes every day in the week; whilst Antoine and Auguste find the Tonnerre a greater penitentiary on that day of rest than at any other time. Each man knows what he has to expect, what to do, and how he ought to be worked. This uniformity insures not only efficiency, but contentment; the lack of that uniformity is the bane we fear of the British Navy, in these days when the men can so readily compare and contrast the routine of one ship with another. Agreeing as we do with Captain Hamley in the remark that, "as builders of ships, as constructors of machinery, we may and shall challenge the world, and that our present difficulty lies in a different source—man-power;" we shall pass on to that important question, merely pointing to the second chapter, as one very interesting to those anxious to appreciate the condition of our Navy, so far as its ships are concerned. But it is men, and seamen, too, trained and organised to handle the deadly weapons now placed in their hands, that we really require. We have in steam-ships a power never before possessed in sea-fights, of moving rapidly from point to point of the line of battle; of manœuvring *after* the roar of cannon shall have stilled the breeze; of supporting a shattered squadron, or ship; of doubling on a failing foe after the fight shall have commenced, and his weak point developed itself: but, to take full advantage of this power, of this moveability, the man-power must have a character in unison with the military, rather than naval, disposition which such future sea-fights will represent. The best seamen in the world thrown suddenly into a fleet at Portland, meeting an equal number of French ships with the first-class division of their navy on board, will fight at a terrible disadvantage. On our side, brute courage and nautical skill; on their side, a splendid organisation, a perfect knowledge of their weapons, and uniformity. On our side, here and there a ship in sufficiently good order to handle her guns well, whilst others would be manned with raw merchant sailors, ignorant of arms and powder. On their side each ship as efficient as her neighbour, each able to play her part thoroughly, practised gunners as captains of their guns, well-trained riflemen to sweep your decks when you attempt to close. For a descent on our coast the advantage of the French system over ours, if we have a system, is still more marked. Every French sailor, thrown on shore, combines in himself all the activity and *savoir faire* of our blue-jackets, together with the steadiness in manœuvring and knowledge of the rifle possessed by our Marines. They are, in short, a steam navy adapted to the wants of the new era in which we live. Ours is in a nondescript condition, wavering and halting between the past and present. Without going into a close analysis of the able arguments advanced by Captain Hamley in support of the report of the Manning Committee and their recommendations, we would simply ask what difficulty can there be in the way of giving our active Navy an organisation almost as military in its character as that of France? We cannot have a conscription; we do not require one. Let every man who enters the Navy engage for ten years at least; and make every boy and apprentice we train up return ten years' service to his country as ordinary and able seaman before he can claim his discharge. Let the State, upon her part, engage never to perpetrate such a breach of contract as to discharge men so engaged for ten years without due and sufficient warning; and, if so discharged, they shall on re-entry be allowed to count the former period of service for pensions and increased pay. When war occurs, to this, the standing Royal Navy of England, attach a naval militia, somewhat upon the plan suggested recently by Admiral Bowles. Surely, without going into details, something like this might be carried out, and although totally contrary to all preconceived notions of our naval veterans, we cannot help thinking England would then show a better naval front, and possess a force capable of holding the seas for three months after a declaration of war. Those twelve weeks would at once enable us to summon from our 300,000 seafaring men in the home and foreign trade such a reserve as might be necessary, and in twelve weeks they would be taught to fight a gun and handle a rifle. Of reserves we think there is a great deal too much said, until the front is more perfect. We want a strong, standing Navy, one capable of receiving and repelling the first onslaught of the French marine. It is that first onslaught which will be the danger; defeat that, and we have no fear for the results of the after-fight. We agree with Captain Hamley that sailors' homes or barracks at the divisional sea-ports would be a very great improvement over the wretched hulks for our men. We would advocate naval savings' banks, naval schools, and naval libraries at each of these stations. Naval cantonments might easily be formed under military supervision and order, in which the married sailors and petty officers might have each their little home. There would be no necessity for parliamentary grants for such a purpose, public enterprise would soon construct these, when it was shown that seven per cent. profit might be made on the speculation, and our seamen save as much more from their hard-earned wages by escaping from the grog vendors and land sharks of our sea-ports.

It behoves all men interested in the reform of the Navy to bear in mind that the present great stalking horse of those who would check and delay progress, is the expense; and although we hold that our money would be better spent on the man-power than the machine-power of the Navy, we are as yet apparently in the minority. We trust, therefore, that Captain Hamley will turn his attention closely to this point, and place before the public, as we feel sure it can be shown, that the improvements he suggests will in the course of a very few years save us millions in bounties, in fleets that cannot put to sea for want of men, in ships that cannot fit out because sailors will not serve under some unpopular captain, and in public panics, affecting funds, insurance companies, and general taxation. The gallant officer was doubtless afraid of frightening off the general reader by an array of figures, and he was right; but in his second edition, which we hope soon to welcome, we would suggest that he goes into the expense of such improvements as could be immediately carried out without any alarming increase of our Navy Estimates, and he will then put into the hands of unprofessional men the best sledge-hammer with which to breach the walls of prejudice and ignorance at present surrounding the whole question.

* *Fleets and Navies; France and England.* By Captain Charles Hamley, R.M. (Edinburgh and London: Wm. Blackwood & Sons.)

HER MAJESTY'S LEVEE.

The Queen held a Levee on Tuesday afternoon in St. James's Palace, at which the following officers of the Army and Navy were presented to Her Majesty, the names having been previously left at the Lord Chamberlain's Office, and submitted for Her Majesty's approval: Paymaster G. W. Anderson, R.N.; Commander J. H. Alexander, R.N.; Major Alison, A.D.C. to Lord Clyde, *on his return from India*; Captain G. Baillie, on return from India; Lieutenant F. Bailey; Lieut.-Colonel V. Baker, on promotion; Second-Lieutenant R. Baker, R.M.; Lieutenant J. Balderson; Lieut.-T. Bateman, on appointment to the Royal Glamorgan Militia Artillery; Dr. T. W. Belcher, Royal Cork Artillery; Major M. Best, on return from India, and appointment to the 25th Regiment: Sir F. Blackwood, Lieutenant, R.N.; Lieutenant Bones; Lieutenant G. Bradford; Lieutenant Braud, on appointment to Royal Marines; Major-General Braybrooke, on promotion, and return from Ceylon; Lieutenant C. Bridge, R.N., on promotion and appointment to H.M.S. Algiers; Lieutenant A. W. Broadhurst, on his return from India; Lieutenant F. D. M. Brown, V.C., on his return from India; Lieut.-Colonel H. de Geyt Bruce, on promotion, and return from India; Surgeon W. Brydon, on return from India, and being nominated C.B.; Lieutenant A. L. Buckle; Major Somerville Burney, on promotion; Lieutenant W. H. Buttanshaw; Colonel Hon. George Cadogan, on his return from a military mission in Sardinia; Colonel G. Campbell, C.B., on appointment as inspecting field-officer from the 52nd Regiment; Lieutenant R. Campbell, Scinde Horse; Major-General Cameron, on appointment to the command of the troops in Scotland; Lieutenant the Hon. J. Carnegie, R.N., Her Majesty's ship Euryalus; Lieut.-General Sir J. Chatterton, on promotion; Cornet J. Chaffey, on appointment to 5th Lancers; Cornet Child; Cornet C. P. Christie; Cornet C. C. Churchward; Cornet Nassau Clark; Lieut.-Colonel H. Clerk, on promotion; Lieutenant H. R. Clinton; Captain Close; Captain R. A. Cooper, on promotion, and appointment to the Scots Fusilier Guards; Lieutenant W. Corballis; Commander the Hon. A. L. Corry, on promotion; Lieut.-Colonel G. Sackville Cotter, on promotion, and return from active service, Lucknow; Captain J. E. Cracroft, late Deputy Commissioner, 1st class, in the Punjaub; Lieutenant G. Cracklow, on return from India; Lieutenant S. M. Crowe; Lieutenant E. St. John Daniel, R.N., on promotion and return from foreign service in India, and on receiving the Victoria Cross: Lieut.-Colonel Viscount Dangan, on promotion and return from India; Ensign R. T. Dawson, on appointment to 25th Regiment; Lieutenant E. Mallet de Carteret, on return from India; Ensign Duesbury; Major-General Eden, on appointment to colonelcy 34th Regiment; Lieutenant W. Edgeworth, on appointment 5th Lancers; Major Ewart, on appointment to Head-quarters Staff; Cornet A. Ewing, on appointment to 5th Lancers; Lieut. C. G. Fane, R.N., on his return from foreign service; Major Fellowes, on appointment to the Staff; Commander E. Field, R.N.; Lieut.-Colonel E. Fisher, on promotion; Captain L. Flower, on promotion; Captain H. Floyd, on promotion; Cornet A. Floyd, on appointment to the 9th Lancers; Lieut. J. Franklin; Dr. J. Fraser, Deputy Inspector-General Army Medical Department; Captain Tyler; Major Gamble, on appointment to the Staff, as Assistant-Quartermaster-General, South-Eastern District; Paymaster E. Gibbs, on appointment to Royal Horse Artillery; J. B. Gibson, M.D., C.B., on appointment as Director-General Army Medical Department; Lieutenant Conway-Gordon, on return from India; Major Charles Gough, on receiving the Victoria Cross; Lieutenant Sir Edward A. Hamilton, Bart., on appointment to the Coldstream Guards; Lieutenant G. Harris; Rev. J. P. Harris, late chaplain to the garrison of Lucknow, on return

Digitized by Google

from India; Assistant-Surgeon W. H. Harris, M.D.; Lieutenant Hon. W. Harbord, on return from India: Captain F. S. Herries; Colonel Holloway, R.M., Aide-de-Camp to the Queen, on being made a C.B., and on return from China; Cornet H. P. Holford, on appointment to 10th Hussars; Lieutenant Horrex; Captain Sir W. Hoste, R.N., on appointment of groom in waiting to the Queen; Lieutenant Isaacson, on appointment, to the Royal Marines; Assistant-Surgeon H. W. Jackson; Lieutenant H. Jackson; Lieut. C. C. Jervoise; Captain Kempt; Captain W. J. Lake, R.N., on promotion; Lieutenant Sir A. K. Lake; Lieutenant E. A. C. Lambert, on return from India; Major-General Lawrenson, on appointment as Inspector-General of Cavalry; Captain Richard Lomax, 6th Royal Lancashire Militia; Deputy Inspector-General Loughmore, on appointment as Professor of Military Surgery at the Army Medical School; Lieut.-Colonel E. W. D. Lowe, on appointment to 21st Royal North British Fusiliers; Captain W. G. Luard, R.N.; Cornet Luscombe; Lieut.-Col. Macdonald; Brevet-Capt. R. M. Macdonald; Lieut. R. K. Macquoid, on return from India; Captain Malcolmson; Lieutenant A. Malcolmson, on appointment, 5th Lancers; Vice-Admiral Martin, on appointment to the command of the Mediterranean squadron; Captain J. Meaden; Captain G. P. Mends, R.N., on promotion, and return from China; Lieut.-Colonel J. E. Michell, on promotion, and return from India; Commander H. St. John Mildmay, R.N.; Assistant-Surgeon J. U. C. N. Murphy; Captain H. Murray, on return from India; Captain Luke O'Connor, on promotion, and on his return from India; Lieutenant Guildford Onslow; Brigadier-General Lord G. Paget; Captain W. Parker; Commander Mark R. Pechell, R.N.; Assistant Surgeon John Pinkerton; Lieut.-Colonel the Hon. C. D. Plunkett, on his return from India; Captain Pulman; Major-General James Ramsay, on promotion; Captain Constantine Read; Captain Renshaw, on promotion; Sub-Lieutenant T. R. Richardson, on appointment 1st Life Guards; Lieutenant R. P. Ridley, on appointment 5th Lancers, and return from foreign service; Lieutenant Viscount Royston, on return from India, and appointment to 11th Hussars; Staff-Surgeon H. S. Sanders, on return from India; Major F. S. Savage, on promotion; Major-General the Hon. Sir James Scarlett, K.C.B., on appointment as Adjutant-General; Major Scott, on promotion; Ensign H. Scriven; Captain F. Seymour, on promotion; Captain Sheffield; Lieut.-Colonel Shute, on his return from active service; Captain Alfred F. A. Slade, on his return from India; Capt. Edward Sladen, on return from India; Major Richard Playne Smith, on promotion; Assistant-Surgeon Clement Smith, M.D., on return from India; Lieutenant Studley V. Smith, on his appointment Royal Engineers; Lieutenant H. Spalding; Major H. H. Stevenson, on appointment as aide-de-camp to Major-General Cameron; Vice-Admiral Sir Houston Stewart, on his return from foreign service; Lieutenant Colonel Sullivan, on appointment to the 5th Lancers; Lieutenant Swinton, on appointment to the Royal Marines; Sub-Lieutenant Hon. R. A. J. Talbot, on appointment to First Life Guards; Captain F. S. Taylor; Brigadier-General Brook Taylor, on appointment to Aldershot; Captain Ternan; Lieutenant and Adjutant N. B. Thoyts; Captain Wm. Dalrymple Thompson; Captain Lennox Tredcroft, R.A., on promotion, and his return from India; Lieutenant E. W. Trevor; Major-General Sir A. Tulloch, K.C.B., on promotion; Lieutenant B. de B. Tupper, on appointment Royal Artillery; Lieut.-Colonel Turner, C.B., on promotion, and return from India; Lieutenant Thomas Turner on return from India; Lieutenant H. T. Vachell; Cornet Boyle Vandeleur, on appointment to 5th Lancers; Major General Horatio Nelson Vigors, on promotion; Lieutenant Robert C. Vyner, on appointment to the Grenadier Guards; Lieutenant N. H. Wallace; Captain Waud, on his marriage; Lieutenant Guy Webster; Lieutenant P. W. C. Wells; Lieutenant V. P. Whalley, on appointment to Royal Artillery; Captain Francis Williams; Colonel Sir David Wood, K.C.B.; Lieutenant R. J. Wright, on promotion; Captain Young; Lieutenant T. N. Walker, on his return from Delhi.

COLONEL LYSONS ON VOLUNTEER DRILL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The accompanying letter has been addressed by me to the editor of a cotemporary journal, in reply to a leading article and letter which appeared in his number of the 7th instant. I am induced by the opinion of several officers, both of Volunteers and the Line, to believe that the contents may be of use to the Volunteer Service in general. May I therefore hope you will find space for it in your valuable columns in order that it may gain still greater publicity?—Your obedient servant, D. LYSONS, Colonel.

SIR,—In reply to a letter signed "Free Lance," and to your observations thereon, which appeared in your Number of the 7th April, I shall be obliged to you if you will give a place in your columns to the following remarks.

Lest it should be supposed that I have any personal interest in recommending the use of the manual entitled "Drill and Rifle Instruction for the Corps of Rifle Volunteers" in preference to the "Field Exercise Book" for the regular Army, I beg to inform you that I had the honour of being a member of the Committee appointed to revise the latter, and as such, the details and the writing of the book were entrusted to me. I am also the author of the former, I think this will be a sufficient reply to your remark. "Here we have the Horse Guards versus the War Office." It may be hardly necessary to add that I have no personal or pecuniary interest whatever in the sale of either of the books.

When the Volunteer organisation was first proposed I was directed to compile a drill book for the Volunteer Rifle Corps, making it as short and as simple as possible, taking for my ground work the movements recommended by Sir Charles Napier in his well-known pamphlet on the defence of England. I accordingly compiled a system of drill complete in itself, and sufficient for everything that could be required on active service, but differing in a few details (in order to arrive at greater simplicity) from the "Field Exercise Book."

The original intention with regard to Volunteers was, that each corps should be independent, that there should be no battalions. Since then the Volunteer movement has assumed a very different aspect, and the number of gentlemen who have come forward has far exceeded all expectation. In consequence of the growing importance of this great national force, the organisation of the corps has been somewhat altered. I have by adding to the original system, and by assimilating some of the details more closely to those of the regular Service, endeavoured to meet the increased requirements of Volunteers as regards drill.

"Free Lance" would have done well had he taken the trouble to have read "the book as it is," previously to writing his letter. It is evident from his erroneous statements that he has never seen the later editions of the Drill and Rifle Instruction for the Corps of Rifle Volunteers," although over 10,000 copies are already in circulation.

There are only two points of difference now remaining between what he calls the "green book," and what he calls the "red book."

First—"Free Lance" states, "distance between front and rear rank," "Line, 30 inches; Volunteer, 45 inches; the latter is more difficult to keep dressed to, and looks ill." I take the liberty of differing with him entirely. If he refers to the "red book," page 37, paragraph 5, he will find that regular soldiers marching in line with trailed arms always move with an increased distance between their ranks. I never heard of any difficulty in this, nor did I ever consider that regular troops looked ill when marching with trailed arms; previously to forming fours to pile arms, and to performing the manual exercise, the rear rank must increase its distance. Surely it is simpler and better to get rid of all the short steps, and the long steps, the steppings up and the steppings back, entailed by the 30-inch distance, and to adopt an increased distance which will answer all purposes.

Secondly—The posts of officers differ slightly from those laid down for the regular Service. If "Free Lance" will refer to a note at the bottom of page 44 of the seventh edition of the "green book," he will find a very good reason for this difference.

The other details which "Free Lance" objects to have long since been altered, and the so-called deficiencies supplied except the sizing of a company. Men nicely sized look pretty on parade; but I consider that it is of far greater importance on service to place brothers, friends, or comrades together, and let them fight side by side, than to attend only to the appearance of a corps. I have always looked upon Volunteer corps as defenders of their country, men who meant business, not as pretty playthings; and my system of drill has been written under those impressions.

I beg to be allowed to assure "Free Lance" that, although the details he objects to have been altered in the later edition of the "green book" for the sake of uniformity, they were not introduced into the first edition without due consideration, and were fully approved of by the highest authorities. For the purpose for which they were intended, they were improvements on the drill of the Regular Service; moreover, the slight differences could not have led to any inconvenience had the Volunteer companies been required to move under that system with regular troops.

"Free Lance's" impression that the drill in the "green book" was slovenly and inferior is perfectly erroneous, unless he made it so; the system, properly carried out, is extremely smart and quick.

In my humble opinion, there is a very false idea afloat regarding the system of drilling Volunteers. People seem to imagine that they must either slave through all the intricacies of extension motions,—goose step, the slow march, saluting, &c., &c.,—or be drilled in a "slovenly," "inferior," and "loose" style. This appears to me a great mistake; for I believe if Volunteers do endeavour to learn the whole of the drill taught to regular troops, they will break down in the attempt, and, after all their exertions, their movements will then prove to be slovenly, inferior, and loose; but if they will be contented with fewer movements and one simple method of performing them, they will be able to work them up to such a pitch of perfection as even, by aid of their superior intelligence, to surpass the soldiers of the Line.

Volunteers cannot be drilled on the same system as recruits for the regular Service, nor is it necessary that they should be so drilled; the latter are usually taken from the lower classes of labourers, who join with all sorts of slouching, slovenly habits contracted from the nature of their work; it is necessary by a long, tedious system, carried out hour after hour, day after day, to break them off these habits and form new ones. It takes years really to establish this second nature.

This long and tedious system is not applicable to the drill of Volunteers; for it is evidently impossible, even were it necessary, to break the habits of years by occasional drills. Volunteers must turn their natural habits to good account by the exercise of their superior intelligence; and I recommend them to learn no more than they can easily remember, at all times, even should they be unable to attend drill for months together.

The carriage of gentlemen of the higher and middle classes, to which Volunteers belong, is in itself sufficiently correct for all practical purposes. Look at half-a-dozen English gentlemen taking a walk in the country; how well they will move together; with what an elastic step will they knock off mile after mile.

With a little practice this natural habit can be brought to perfection, and turned to purposes of drill, more especially if people would not imagine they were going to learn anything wonderful, difficult, and new. I have recommended in my drill-book, to the great astonishment of my drill-sergeants, who may not understand the broad principles on which the instruction is based, that the Volunteers should not be halted if they lose step, but be allowed to move on some distance: "Now, if any set of Volunteers out walking will place themselves in line, with their best-drilled man on one flank to regulate the length of pace and cadence, and will then start off without any word or command, and walk five or six miles, talking and laughing as much as they please, before they have gone far they will settle down to a good even pace, and, by the end of their walk, they will find themselves stepping together without any effort, as well as any regular soldiers;" and I think my advice will not be found so far wrong after all. What is marching, but walking evenly and steadily.

The "Volunteer Manual" was intended for the use of every Volunteer, and not only for the officers who may in addition be provided with the "Field-Exercise" book, and the "Instructions of Musketry."

In conclusion, I would wish "Free Lance" to understand that, as far as I have had an opportunity of judging, the officers of the regular Service are not in any way inclined to "sneer" at the Volunteer movement; on the contrary, they appreciate it most highly, and are most anxious to afford Volunteers assistance in every way in their power. I have felt proud of being selected to work for them, and have endeavoured to keep pace with their requirements. I shall still be most happy to devote my time to their service, if I can be of use.—I am yours, &c.

D. LYSONS, Colonel, Assistant-Adjutant-Gen.

A MUSEUM OF NAVAL ARCHITECTURE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have often wondered, when examining with interest and instruction the models of ships of war which are placed in the Musée de la Marine in the Louvre, at Paris, that England—possessing as she does a collection of models of naval architecture, illustrative of the improvements which we have made in our ships from a very early period up to the present time—should, through the Lords Commissioners of the Admiralty, shut up such objects of national interest in a small ill-contrived, ill-arranged room in Somerset House, where practically no one ever sees them.

Public attention is just now directed to the consideration of how we shall show to the best advantage our national collection of pictures, the contents of the British Museum, and of other institutions controlled by Government. The "Committee on Public Institutions" has recently issued a report, containing very sensible and practical suggestions which, when carried out (as no doubt they will be), are calculated to confer great advantage on the community at large. I suppose they forgot to ask some questions about the "Model Room" at the Admiralty, or to visit it; for, if they had seen its contents, they could have arrived at no other conclusion than this, that so valuable and important a collection ought to be removed as soon as possible to a convenient building, where, properly arranged and classified, it should be open to the inspection of the "Navy estimate" paying public.

The Model Room, as I have stated, contains models of our ships from a very early period,—from so far back as the "Great Harry" to almost our last ship of war.

There are full-rigged models, as well as sectional models, and in endless detail every part of a ship separately dealt with. We have our old friend, the Queen, 100-guns, which we used all to look at with such pleasure in the transept of the Great Exhibition of 1851, and a most beautiful and accurate model, too, of the Victoria and Albert, as well as the "Osborne," "Fairy," and "Elfin."

Then, the Museum contains specimens of woods of various countries, scientifically arranged—an important collection in itself.

Again (not long since removed to Whitehall, to the Model Room of the Steam Branch Department) are models of marine steam-engines and steam-vessels, which might be well added to the proposed museum.

The patterns, or duplicates of what are called naval stores should also form a portion of the collection. These I believe are in a room at Somerset House.

Those curious old pictures of our dockyards might also find their way, without being much missed by "My Lords," to the walls of the museum.

The model rooms of the dockyards also should contribute and send such models as may not be required for practical purposes; and with all these contributions I think I am not going too far when I say, that a museum of great national interest could be put together at a very moderate expense.

The important question remains. To what locality in the metropolis should the models be removed? Strictly speaking, the Royal United Service Institution would appear to have the first claim, for it has been self-supporting, and has not leant upon the Government for aid; but I fear there would not be sufficient space for such a gallery as I suggest, or for the erection of additional buildings.

The South Kensington Museum would also be an admirable place to construct a room or gallery for the models, which might be somewhat similar to those which have been erected for the exhibition of the English pictures; rooms, I may observe, which do great credit to the good sense of the management of that excellent institution. They are well lighted, well ventilated, and, above all, have been constructed at a moderate cost.

In 1854, an idea for the formation of a naval architectural gallery was submitted to the then directors of the Crystal Palace at Sydenham, which has been partially carried out by subsequent Boards; but models of ships cost a good deal of money, and consequently the project was not carried out in its integrity. But here is a different proposition. The Government have all these models, ready and paid for, and all that is required is to place them in a suitable building, and show them to the public.

Some future time, if you will let me return to this subject, I can point out how still more interesting this proposed museum would be, by having models of some of the best ships of our mercantile marine, sailing and steam; how models of our fishing-boats with their engines of capture might be also shown; how our yachts might be exhibited, and with what advantage to the museum we might show our hydrographic charts on its walls;—in a word, to collect such objects for this marine museum as would make it worthy of our island-nation, and of its maritime excellence.—I am, &c., J. D.

A very splendid testimonial has been presented to Major-General James Ramsay, late at the head of the Bengal Commissariat Department. It consists of six solid silver groups, each subject different, and all characteristic of India. The two large centre pieces stand twenty-four inches high, and the four smaller groups fourteen inches high, representing different native tribes and animals of India, with the cocoa-nut, palm, sugar, cane, bamboo, and banana trees introduced; each group is modelled from nature and original, except the Arabs, which, by order, were modelled with some alteration from the piece of plate presented to the Junior United Service Club by H.I.M Napoleon III. The cost of this testimonial, we are informed, is about 500 guineas, and is the work of Messrs. Charles Williams and Co., of Oxford Street.

RIFLED CANNON.

The following very interesting article upon the recent improvement in rifled ordnance appears in the *Revue Européenne* :—

"In the spring of 1859 the French army marched to Italy, having with them the small rifled cannon, the renown of which became in a few weeks so great in Europe. The result of long and mysterious study and experiment, the new arm, until then unknown to our artillery, was welcomed by them as an instrument of victory, and did not fail to justify all the hopes that had been conceived of it; but all had not yet been attained. Since the great battle of Solferino, where the French cannon played so conspicuous a part, inventions have been pouring it on every hand, which professedly leave in the background our remarkable arm. But do they, in fact, do so? An arm of this kind is not produced by chance. They who know that our cannon was the result of investigations the most searching and scientific, of experiments the most persevering, followed up day by day for nearly 10 years, will hesitate before they give full credence to the advantages asserted to have been so rapidly obtained in other countries. They, perchance, may be disposed to think that more than one of the military nations of the Continent who now loudly proclaim the superiority of their rifled cannon, may one day regret having too hastily transformed their guns. It is during actual warfare that mistakes are dangerous. These so vaunted cannon, so easily invented, which are made from one end of Europe to the other, are yet to be put to the proof. They are mostly yet enveloped in mystery, and we cannot, therefore, examine them in detail; but we may be allowed to observe in general terms that their greater or less excellence in the practice-ground, even admitting that it be established, is but of secondary importance as compared with efficiency, handiness, and durability on actual service. Free England, less reserved in her revelations, affords us a little more information. *The Times* undertakes to declare that success is complete and definitive on the other side of the Channel. This word 'definitive' is, perchance, a little hazardous in artillery affairs. We certainly have seen improvements in arms deemed theretofore incapable of improvement. It is not sufficient that an artillery arm be made in accordance only with theoretic notions, however apparently incontestable; other conditions must be fulfilled to avoid practical failure. The communications of *The Times*, how discreet soever—perhaps designedly so—have been welcomed by the public with much interest. Many of its readers, unskilled in technical information, have read with wonder the accounts of the enormous distances at which the Armstrong and Whitworth cannon have struck an object of comparatively small dimensions. Had they been less unacquainted with the experiments made in France during severals years, they would no doubt have been less disposed to wonder. We certainly must not treat lightly the results obtained by our neighbours—results certainly remarkable, and which do honour to their invention; but we must not, at the same time, forget to appreciate their worth. We admit as perfectly correct all the figures given by *The Times*. We will go further, and admit them as definitive bases, although only obtained from a limited number of expements with new guns; but, admitting all this, we see no reason for apprehension. Let us endeavour to explain why; it is a simple matter of comparison. The new English cannon are not of bronze, as are most of ours, but of wrought iron. This is perhaps an advantage, since the chances of injury to the interior due to the ball are thus sensibly diminished; but we must also remember that in the French rifled cannon the ball does not touch the gun, being protected by zinc covering, a soft metal, which alone comes in contact with the rifling, and thus doing away with the principal objection to the use of bronze. Our neighbours have, it would appear, solved the difficult problem of breach-loading, but it still remains to be seen whether it may not in practice be open to serious objections, not only as regards the mechanism, but also as to other points. The Armstrong and Whitworth cannon are but recent inventions. The late experiments have certainly furnished remarkable results, but we have yet to learn what may occur after some service in the field. If certain rumours are to be accredited, some doubts may exist as to their efficacy. What is said with regard to the results, cited by *The Times*, of Whitworth's six-pounders having lost at each shot about 120 feet in length of range? If this were to happen continually, what would become of the gun? Judging from the discussion in the House of Commons on the 5th of March last, it would seem that the Armstrong and Whitworth guns are not very simple or handy on service. The Minister of War, although he stated that the Armstrong guns were superior both as to precision and destructive power, added that it would be necessary to send with them to China special workmen of Sir William Armstrong. The practical value of the English cannon appears to us, as yet, open to question, while ours have been tested by service. Let us now consider the probable part which the new cannon may be called on to play, and in doing this we will confine ourselves to its consideration in siege service and in field service. As regards the first, the largest limit is open to conjecture. It appears without doubt that when besiegers and besieged are supplied with artillery having great precision and very long range, which is a problem now solved, the old system of attack and defence must be abandoned. Although skill and science may do much, yet it is probable that sieges will for the most part cease to be undertaken in warfare, and that either fortified places will be bombarded at great distances, or that the stake will be played out on the field of battle, leaving besieged places to be reduced by investment. As to field service, the importance of the new artillery is more easy to determine; and as for this purpose it is necessary to enter into some technical details, we will endeavour to do so as simply and intelligibly as possible. We must first establish two points:—1. What special properties field artillery should possess. 2. What conditions of firing should be satisfied. The most essential of all qualities to attain is, we may venture to affirm, a lightness and easiness of transport, which will enable the artillery to follow, so to speak, all the movements of the troops. This property, so conspicuously attached to our rifled cannon, largely contributed, as is well known, to the success of the campaign in Italy in 1859. The adoption of the 24lb. howitzer cannon of the Emperor realised in France some years since a progress of the value of which our campaign in the Crimea enabled us to form a correct judgment—that is, a unity of calibre. This is of much importance, since the projectiles are all alike capable of being used in all the guns. Another point is the facility of transport of ammunition. It is indispensable to have a provision of powder and projectiles necessary for all eventualities closely following the guns. The best solution of this problem is that which allows the greatest quantity to be taken with the least number of horses and ammunition waggons. Facility of transport and simplicity are, as it appears to us, the principal qualities of a field artillery, independently of considerations of firing. These qualities are possessed by our artillery, and in these we may be considered to be in advance of all our rivals, and it is in these, as we shall see, that rests true superiority. As to firing, certain conditions relate to range, and certain to precision, but with a close connection between the two. The range of a gun depends partly on the inclination given to it; the more this is increased, within certain limits and without any difference in the charge, the longer is the range, or, in other words, the greater the distance to which the projectile will be propelled. We will explain this more fully presently. If two guns be directed to the same point, that of greater precision is that the projectile of which arrives the nearest to the point in a right or straight line, and the least distant from such right line to the right hand, or to the left. There is, therefore, precision in length or distance, and precision in direction. Precision in direction is one of less importance on the field of battle. The point aimed at, whether infantry, cavalry, or artillery, almost always offers a front of a certain breath, and whether the projectile travel a little to the right or left of a right line is of no great consequence. This precision of direction is the least difficult to effect. Precision in length or distance, or, in other words, so firing that the projectile shall attain the exact distance of the point aimed at, is the more difficult problem. On the field of battle one only of the elements of firing is variable, that is the elevation of the gun, since the charges being all prepared are all of the same weight. If the distance of the object were exactly known, it would be sufficient to give the gun the necessary elevation; but, unfortunately, this distance is almost always unknown. It cannot be measured, and the most skilful can only appreciate it by the eye, with large errors, frequently of many hundred yards in 2000 or 3000. "At what distance are we?" is the first and general inquiry when the artillery commence the operation, and, as very rarely two opinions agree, the fire opens at hazard. In a short time, it is true, they find the range by observation of the effects of fire; but the same uncertainty arises on every change of position, and a great many shots are consequently thrown away. Moreover, it is not easy to always observe the effects of the shot at great distances, besides which the smoke and other accidental causes frequently prevent observation. In every point of view the field of battle and the practice ground are very different places. Some compensation is certainly afforded by the chance effects of shots falling within or beyond the object aimed at. While on this subject we must notice that it is most essential in all practicable cases to employ artillery with the least possible elevation, since the shots then plough as it were the earth, and destroy all in their course, and the advantage of this brings out the disadvantage of artillery with very long range. The observation of the effect of the firing, which is often the only means of rectifying the range, becomes more impracticable the more the distance is increased. Very difficult at 2000 or 3000 yards, it becomes immeasurably more so a little further. Of what practical use is it, then, to have an arm with an exceptional range of 4000 yards, for instance? It is something to talk about, but that something is full of delusion. The distance is estimated (how? we would ask) from the enemy; the necessary elevation is given, and the gun is fired. What happens? An error in judging the distance is made, perhaps of a third. If the enemy is at 3000 yards, the projectile passes over his head; if at 5000, the ball falls 1000 yards short. In such a mode of firing, one shot in a hundred may tell. Moreover, the elevation being necessarily great, the projectile falls to the earth like a thunderbolt, in a nearly vertical line, and at once buries itself without any ricochet. If it be a ball, it may by chance kill one man; if a shell, it may destroy two or three. Our soldiers at the Crimea nicknamed two of the Russian batteries, by way of derision, 'Bilboquet' and 'Gringalet,' as, being at a distance of some 3000 or 4000 yards, the elevation of the guns was so great that in several months, though firing night and day, they did not kill a single man; and this, be it remembered, though the exact distance was known. Contrast with this that at the Battle of Traktir, one 24 lb. shot killed 17 Russians formed in column, the gun being at a low elevation, and the difference between firing at high elevation at great distance, and with low elevation with a ploughing shot will readily be seen. Cannon at long range cannot, therefore, be employed but in very exceptional cases, if ammunition be not thrown away. It will also follow that ordinarily the range in battle will be limited to 1500 or 2000 yards, and if for some special reason it be deemed necessary to adopt a longer range it must be limited to 3000 yards, any further point being out of the reach of even good telescopes. It would be erroneous to suppose that by reason of these new cannon, battle will be given hereafter at great distances. Attempts may doubtless be occasionally made to open a cannonade at long range, but the necessity of economising ammunition, the obtaining certain and decisive results, and the utilising cavalry and infantry, will lead probably to actual fighting at not much greater distances than heretofore. The rifled cannon, as effective as the old at short distances, will still have a superiority, as it will render more difficult the formation of cavalry and infantry, and can at greater distances throw disorder into an enemy's reserves, harass his retreat, &c. It was in this manner that our artillery was so effective in the last campaign, owing, however, much to its facility of being moved. All the nations of Europe are, and wisely, desirous of accomplishing the same progress, but the future will show it is a strange error to attempt it by an exaggerated length of range. It certainly is remarkable as an attainment of gunnery that Armstrong and Whitworth cannon should, at an angle of 35 degrees., throw a projectile some 10,000 yards; but it has no practical value, and, indeed, becomes a vice if done at the cost of the simplicity of the gun. What deserves more attention is uniformity in firing, which is more difficult of attainment. For purposes of warfare the best artillery is such as is simple at the same time as efficient. We may be allowed to say that if the various foreign inventions tend to keep us on the alert, they by no means are cause of apprehension, since at the present moment we will venture to say that our artillery has no superior in Europe, and for this assertion we have the advantage of actual experience. Its simplicity is extreme. The rifled 8lb. gun only weighs 600lb.—although in bronze it wears well in service. Four horses can move it rapidly up an incline apparently almost inaccessible. It may be used with good effect at considerable distances up to 9000 yards, and even more if it were desirable. It throws an oblong projectile of 8lb., which produces all the effects necessary, not only as regards men and horses, but also other obstacles. Its supply of ammunition is easy and not inconveniently weighty, since four horses can draw 100 charges. The projectile, although hollow, may be used as a ball; it may contain a sufficient quantity of powder to be used as a shell, for which purpose it is furnished with a metallic fuse adapted to various distances. Experiments are now being made to afford a means of judging distances by means of a small rocket, with a percussion apparatus, to be fired from these guns, so that the point at which the rocket arrives may be more accurately judged of. We cannot pass without observation two other rifled cannon we have for field service. The first is a mountain 8lb. gun, in which the same projectile is used as before mentioned, the gun being of extreme simplicity and so light (200 lb.) as to be conveyed on the back of a mule, and capable of following infantry everywhere. Its range and precision of fire are equal to those of the 8-pounder already described. The second is the 24lb. howitzer cannon of the Emperor, rifled like the others, and capable of not only field, but siege service. The French artillery, then, has nothing to envy in the recent inventions of foreign countries."

These observations are interesting, and in the main, correct. It is not true, however, that the French excels the Whitworth gun in facility of transport, and it is doubtful if it be much more simple. It is true that the French gun has been found terribly effective against the Austrian artillery, and that it subdued the fire of the Tyrolese jagers. In reference to range, however, the article is very erroneous. The greater the range the lower the trajectory, and the more effective the piece at short distances as well as long ones. It *is* therefore "of practical use to have a gun with a range of 4000 yards," because it must be much better to operate with at 2000 yards than a gun which has only a range of 2500 yards. That is the whole question. There has been, indeed, a lamentable deal of nonsense talked and written about "long range," and about the damaging effects of bolts, which in reality will fall at 8000 or 9000 yards "like thunderbolts" without ricochet. But our good allies must know that with a shell it is a different affair; and that a shell regularly built, like Armstrong's, bursts into a regular flight of missiles at the longest range as well as at the shortest, and *may* kill *more* than two or three, which at 9000 yards is by no means a small achievement.

"Bilboquet" and "Gringalet" were, as we well know, effective enough for their real object. That object was *not* to kill men in our camp, but to keep the valley of the Tchernaya clear, and to annoy parties going out to cut brushwood or to get water from the river. When they fired towards Inkerman the shot was heard in the air, and the camp being quite out of range, it is not so wonderful that no one was killed. Of the shot at the Tchernaya we never heard till previous to this article. The information we receive is, however, very useful. *We learn that the French have a mountain gun, which weighs* 200lbs., *which may be used with good effect up to* 9000 *yards, and more!* This is a startling piece of news.

THE FRENCH NAVY.

It is impossible for us to affirm that any accession is being made to the French naval forces in distant waters, because the departure of men-of-war for New Caledonia and the island groups of the Pacific may be intended to provide for vacancies created by the return of ships, the term of which has expired on those stations. But we do not observe any mention of such returns, and we read continually of ships being sent out.

The "Cassard," a new armed steam-yacht, Commander Dubuisson, has gone round to Cherbourg, from Havre, to be fitted for the reception of Prince Napoleon on his projected summer cruise.

The Imperial yacht "L'Aigle" is under orders for Nice, to be at the disposition of the Emperor.

Rear-Admiral Paris's division, consisting of the liners "Algesiras," "Redoutable," and "Imperial," arrived in Toulon on the 23rd from Gibraltar, which they left on the 11th April. The steam despatch-boat "Casabianca" was under orders for Cayenne. At Gabon they were speaking of an expedition against the King of Dahomey.

The transport "Dorade" is under orders for Oceania, and the transport "Bonite" was spoken with on 4th March, on her way to New Caledonia.

In view of the unsatisfactory state of things in Servia, Montenegro, and the adjacent provinces, as also of possible eventualities elsewhere, the Porte has decided on maintaining an effective force of 100,000 men, on a war footing, in Roumelia. The head-quarters of the whole will be at Pristina, near Kossova, a strategic position of great strength and central convenience for operations against any of the districts within which disturbance may be apprehended.—*The Levant Herald.*

THE INSUBORDINATION ON BOARD THE EDGAR.

A naval court-martial assembled on Monday on board Her Majesty's ship Victory, in Portsmouth harbour, for the trial of John Clarke, a private in the Royal Marines, belonging to Her Majesty's ship Edgar, on the charges "of having, when the port watch was ordered to fall in on the starboard gangway, endeavoured to delay and discourage the service by falling in with that watch, when he belonged to the starboard, and by afterwards denying that he knew to which watch he belonged;" and, secondly, "for misconducting himself and disobeying orders while being conveyed in the Edgar's cutter to Her Majesty's ship Victory." The court comprised—Rear-Admiral Sir H. Keppel, K.C.B., President; Rear-Admiral J. E. Erskine; Captains Gordon, O'Callaghan, Hewlett, C.B., Harris, Hillyar, Wilson, Caldwell, Strange, Vansittart, Turnour, and Mackenzie.

The principal evidence as to the origin of the disturbance was that of Captain Katon, commanding the ship Edgar, who deposed: On the 5th of April, the day after the ship's arrival at Spithead from Lisbon, leave was granted to 50 of the ship's company—35 seamen and 15 marines. Their leave extended until 7·30 on the 7th. Again, on the 7th, the same leave was granted to the same number of seamen and marines. On the 9th leave was extended to 12 per cent. of the ship's company. This was extended to the seamen, but, as 12 per cent. of the marines were already on shore, leave was not granted to them. On the afternoon of the same day, the marines, through their officers, requested to see me. I was engaged at the moment, and said I would see them when at leisure. Immediately afterwards Lieutenant Storey, of the Royal Marines, reported to me that the marines refused to dismiss. I replied, "Never mind, let them remain, and I will see them when at leisure." About a quarter of an hour afterwards I went on the quarter-deck and ordered the marines to fall in there, and inquired of them what they wanted. They said they wished to know if their long leave was stopped; that they knew that some of the Donegal's people were on shore at Portsmouth at that time, and that it was hard they could not have the same indulgence. I told them that, to the best of my knowledge, their leave was not stopped. I could not speak for certain, but thought when orders came from the Admiralty relative to fitting the ship they would probably get their leave, and advised them to go to their work quietly, for what they were doing was the wrong way to get their leave. They then went away. On the following day I was on board, between 1 and 3 P.M., when Commander Waddilove reported to me that the marines had been behaving in an insubordinate manner, and that John Clarke, the prisoner, had been behaving insubordinately, by stating that he did not know what watch he belonged to, and that he, the Commander, had in consequence placed him in irons.

Several witnesses were examined in support of the charges respecting insubordination on board the ship. As regards the second charge, Mr. Harnett, naval cadet, said he was in the cutter of the Edgar on the afternoon of the 10th inst., conveying the prisoner with others on board Her Majesty's ship Victory. On leaving the Edgar the prisoner was making a noise, when I told him to hold his tongue. He said he was a prisoner, and that he was glad to get out of the —— slave ship; that he had been a guard over convicts, and that they were better fed than a poor soldier, and he hoped he should get seven years' transportation.

The prisoner read a short defence, in which he pleaded that, on the first charge, he did not know, when questioned by Commander Waddilove, to what section of the watch he properly belonged; and with regard to the second charge, he was merely speaking of a former ship.

The court found that a spirit of insubordination had been shown by a portion of the crew of H.M.'s ship Edgar, at Spithead, on the 10th inst., and also found the prisoner guilty on the charges brought against him, and sentenced him to two years' imprisonment, with hard labour, in the gaol at Winchester, and at the conclusion of that period to be dismissed H.M.'s Royal Marine forces with disgrace.

The court was then re-sworn, and immediately proceeded to try James Haining, gunner, Royal Marine Artillery, and John Menzies, Royal Marines, on charges of "having prevented Sergeant Lashbourn and Corporal Stack from putting John Clarke, the prisoner in the last case, in irons, in the forecockpit, and for having rescued him from their custody," but the charge was not sustained. Next day the court was constituted to try W. Matthews, T. Doidge, A. Fry, W. Harvey, W. Parker, C. Lucus, A. Gunsten, F. Trickey, D. Mooney, and C. Cannon, privates, Royal Marines, and H. Dawson, private, Royal Marine Artillery, on two charges of disobedience of orders. The whole of the prisoners, with the exception of Gunsten, were sentenced to twelve months' imprisonment. Gunsten was found guilty on the second charge only, and was sentenced to nine months' imprisonment.

On Thursday morning the same officers assembled as on the previous day, and were sworn a court to try Matthew Lad, private, R.M., on a charge of saying to Corporal Stacks, when ordered by him to go on deck and fall in with his watch, "I will go on deck, but I'm——if I work for you or any one else." The court found the charge proved, and sentenced the prisoner to two years' hard labour in Winchester gaol; and at the expiration of that time to be dismissed Her Majesty's service with disgrace.

The court then assembled for the last time to try 19 privates of the Royal Marines and Royal Marine Artillery belonging to Her Majesty's ship Edgar, on a charge of having, on the 19th inst., been guilty of insubordination and delaying the service by assembling on the main deck, instead of at once proceeding to the upper deck, when ordered by the commanding officer to do so. The court did not consider the charge sustained by the evidence, and without hearing the prisoners' defence, acquitted them.

We learn, from a return to parliament issued yesterday, that the British regimental establishment for 1860-61, of all ranks, numbers 144,148; and the effectives of all ranks, on the 1st of this month, 133,962. The return of the Indian establishment for 1860-61 is 83,585; and effectives (India), 94,829. The total number of embodied militia on the 1st of the month was 19,333.

HOUSE OF COMMONS.—FRIDAY.

In the House of Commons last night, Mr. Kinnaird asked the Secretary of State for India, whether he had received any official account of the origin and causes of the late disturbances among the Ryots in Lower Bengal, and whether any measures were in contemplation for increasing the number of European magistrates, and for improving the police generally in Bengal, in accordance with the recommendations of the late Lieutenant-Governor.

Sir C. Wood said, that there might perhaps be some allusion to the Ryot question which had not yet come under his notice. The Bengal police had been reorganised by the express direction of the Lieutenant-Governor.

Sir M. Farquhar wanted to know what had been the fate of the jewels taken at Lucknow, and whether the report was true that they had been given to the King of Oude.

Sir C. Wood said that the King of Oude had claimed certain jewels which the Governor-General had ordered to be given up to him. Whether those jewels were captured at Lucknow he could not say, but as a matter of inference he thought it probable they were.

Mr. Dalgleish asked whether the Admiralty had received any intelligence confirming the statement in that day's papers, that the fire from the Chinese forts had sunk two English frigates at the mouth of the Peiho?

Lord Clarence Paget replied that the Admiralty had received a dispatch from Admiral Hope, dated the 15th of March, which announced that the two vessels reported to be sunk had arrived the day before in company with the Samson; therefore there was no reason to believe the rumour true.

Mr. Mildmay asked the Secretary of India whether there was any truth in the statement in the *Times* of Monday, the 23rd inst., as to the conduct of the Indian cadets in passing through Egypt being "systematically outrageous," and if that statement was true, whether the right hon. gentleman was prepared to take steps for discovering and punishing past offenders, and for exercising more control over those young gentlemen in future.

Sir C. Wood was sorry to inform the House that he had received a despatch from our Consul-General in Egypt, containing statements substantially the same as that which had appeared in the *Times*. The Consul-General did not expressly state that the persons concerned in the outrage were officers in the Indian Service, but there were expressions in the dispatch from which it must be inferred that they were. He had written to India to desire that inquiries should be made into the case, and that he should be furnished with the names of the persons who should be found to have participated in this disgraceful proceeding.

Colonel Dickson called the attention of the Secretary for War to the hardship and inconvenience experienced by Militia officers called out for training in Ireland in places where there is no barrack accommodation in not receiving lodging-money where the troops are billeted.

Mr. Sidney Herbert admitted the inconvenience involved in the case to which the gallant colonel had alluded, and said it was solely owing to the large sum required for the Army Estimates that he did not like to increase it by an allowance for Militia officers under the circumstances stated.

Colonel Lindsay asked the Secretary of State for War whether it was his intention to recommend Her Majesty to reinstate the officers who were promoted to the rank of Colonel for distinguished service in the Crimea, in an approximate numerical position to that which they attained when they were first promoted to that rank, and of which they have been deprived by their claims being overlooked when a revision of the lists took place, on the recommendation of the Royal Commission of 1858.

Mr. Sidney Herbert said he was fully aware of the hardship which existed in the case pointed out, but he knew not how it could be remedied. If the gallant officer could suggest any means by which it could be done he would have great pleasure in laying the proposal before the Commander-in-Chief.

Captain Annerley called the attention of the noble Secretary for Foreign Affairs to a communication in the *Times* of yesterday, describing the manner in which the graves of British officers in the Crimea had been desecrated, and expressed a hope that the noble Lord would endeavour by diplomatic communications, or by issuing instructions to our Consul at Odessa, to prevent a repition of such disgraceful proceedings.

Lord J. Russell expressed his regret at being obliged to admit that the statement in the *Times* was perfectly correct. He had sent instructions to our Consul at Odessa which he hoped would prevent the repetition of such outrages; he had also directed our representative at St. Petersburgh to make the strongest representation on the subject to the Russian Government.

The Under-Secretary of State for War, the Earl de Grey and Ripon, has addressed the annexed circular to the officers commanding militia regiments, dated the 21st inst.:—"Some misapprehension having arisen as to the interpretation of the latter part of article 67 of the Militia Regulations, I am directed by Mr. Secretary Herbert to acquaint you that no pay is admissible for any officers who do not present themselves at the head-quarters, or who may be absent from their duty during the whole training period, but that the article above quoted applies only to such officers as may after joining be prevented by sickness, duly certified, from attending their duties. The pay of the colonel or commandant will, however, be regulated by the circular of the 15th Nov., 1859."

INDIAN STAFF APPOINTMENTS.—The *Hurkaru* understands that orders have been, or will be immediately, sent from England to India, to suspend for a time the operation of the general order of 1855, that all staff-appointments shall be vacated after they have been held for five years. It has been ruled that the present incumbents, whose tenure of office expired on the 23rd of March, are to be allowed to continue temporarily on the staff, but are not to be re-appointed for any further period, pending the measures now under consideration for the re-organisation of the Army, which will, as a matter of course, involve great changes in the staff, and include a revision of all the offices.

Obituary.

We have to record the death of Lieut.-General Edward Fleming, C.B., Colonel of the 27th Regiment. This gallant officer, having entered the Army in 1802, served with the 31st Regiment in Sicily and Calabria, under Sir John Stuart, in 1806, and in the following year was at the taking of Alexandria and the storming of Rosetta. In the Peninsula, he served the campaigns of 1808-9-10 and 11, including the battles of Talavera, Busaco, Albuera (where he was severely wounded), and several minor actions. Since then, he saw hard service all over the world, in the East and West Indies and Canada. Lieut.-General Fleming acted for thirteen years as Inspecting Field Officer of Glasgow District, and was presented by Glasgow with the freedom of the city. He commanded for many years the Limerick District where he was popular with all parties. He was owner of the Belleville estate, in Cavan, his native county.

Captain Stephen Grenville Fremantle, youngest son of the late Admiral Sir Thomas Fremantle, G.C.B., expired at his residence at Swanburne, Bucks, on Thursday last, in the 50th year of his age, deeply lamented by a large circle of friends and relations. The deceased officer entered the Navy in 1823, and served in the first Chinese war. He was high up in the list of captains, having received his post-rank in 1842. His last command was the Juno, 26, which he relinquished about two years since. Captain Fremantle had been in a declining state of health for some time.

Lieut.-General John Home Home died very suddenly during the night of Saturday last. He had been apparently in excellent health during the evening of that day, but was found dead on Sunday morning in his lodgings in Pall Mall, having to all appearance died without the least pain during the night. Lieut.-General Home entered the Army in 1813, and served for many years in the Grenadier Guards. The colonelcy of the 56th Regiment, which is rendered vacant by his demise, was only conferred upon him last October, on the death of the Earl of Westmoreland.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

FRASER—April 24, at Woolwich, the wife of Captain G. H. Fraser, R.A., of a son.

GORDON—April 21, at her father's residence, Stowford Rectory, Devon, the wife of Major S. B. Gordon, 45th Regiment, of a son.

GORDON—April 21, at Hillowton, near Castle Douglas, N.B., the wife of D. A. Gordon, Esq., of Culvennan (late Rifle Brigade), of a daughter.

GUNN—April 19, at H.M.'s Dockyard, Chatham, the wife of Dr. William Gunn, R.N., of a son.

MAYNE—April 23, at 14, Kensington Gate, the wife of Major Taylor Mayne, of a son.

MULLER—March 10, at Secunderabad, the wife of Captain Muller, of a son.

RICHARDS—April 19, at Stoke Devonport, the wife of Captain W. H. Richards, of a son.

ROSS—April 21, at Chatham, the wife of Lieut.-Colonel Archibald Ross, R.E., of a son.

TEMPLEMAN—March 20, at Shahjehanpore, Rhohilkund, East Indies, the wife of the Rev. Edward Templeman, Assistant-Chaplain H.M.I.S., of a son.

YOUNG—April 19, on board H.M.S. Blanche, at Portsmouth, the wife of Lieutenant Young, R.N., of a daughter.

MARRIAGES.

BULLOCK—TOULMIN—April 24, at St. Peter's Church, Kensington Park, by the Rev. Henry Battiscombe, M.A., of St. Germans, Blackheath, Frederick Rheinwald Bullock, Esq., Lansdown Road, Notting Hill, second surviving son of John Bullock, Esq., Sevenoaks, Kent (late of Guildford), to Emily Laura Maria, only daughter of the late Captain Samuel Toulmin, 63rd B.N.I.

DENNYS—PROCTOR—April 24, at St. Mary's, Islington, by the Rev. Albert Badger, M.A., and the Rev. James Prosser, M.A., vicar of Thame, Oxon, Haddock, second son of Commander Lardner Dennys, R.N., to Anna Byron, youngest daughter of the late William Proctor, Esq.

GOLDINGHAM—GARDEN—April 24, at St. Stephen's, Westminster, by the Very Rev. the Dean of Westminster, assisted by the Rev. W. Tennant, the incumbent, and the Rev. F. Tonkin, uncle of the bride, James Arbuthnot Goldingham, Esq., 3rd Regiment M.L.I., son of John Goldingham, Esq., M.C.S., to Christina Cameron, only child of the Rev. Francis Garden, Sub-Dean of H.M.'s Chapels Royal.

GORDON—CREALOCK—April 21, at St. John's, Paddington, by the Rev. G. M. Prescott, Archibald Gordon, Esq., M.D., C.B., Deputy-Inspector-General of Hospitals, to Mary Preston, second daughter of the late Wm. Belton Crealock, Esq., of Stanhope Place, Hyde Park.

LOWNDES—MASSY—April 19, at Galbally, by the Rev. George Massy, rector of Knockany, and uncle of the bride, assisted by the Rev. John Arden Bayley, curate of Everdon, Northamptonshire, Lieut.-Colonel John Henry Lowndes, late 6th and 47th Regiments, to Eliza Mary, eldest daughter of Hugh Massy, Esq., of Riversdale, county Limerick.

SEYMOUR—LEE—April 24, at St. James's Church, Piccadilly, by the Lord Bishop of Lichfield, assisted by the Rev. Dr. Cureton, canon of Westminster, and the Rev. James Bennie, John B. Seymour, Esq., Captain Royal Marines Light Infantry, to Isabella, second daughter of Dr. Robert Lee, Saville Row, London.

DEATHS.

BOWRING—April 21, at his residence, 9, Union Place, Blackheath Road, Greenwich, Kent, aged 71, Mr. R. G. S. Bowring, late of H.M.'s Victualling Yard, Deptford.

BRANDLING—April 16, at Woodsley House, Leeds, the residence of his brother-in-law, Sir Peter Fairbairn, Lieut.-Colonel John James Brandling, R.A., aged 39.

BURROWES—April 16, at Pau, in France, James Edward Burrowes, younger son of the late Major Burrowes, of Stradone, county Cavan, Ireland, aged 39.

CAMERON—April 20, aged 72, at St. Leonard's-on-Sea, Lieut.-Colonel Nathaniel Cameron, of Danygraig, near Swansea, Glamorganshire, late of the 79th (or Cameron) Highlanders, and last surviving son of the late General Sir Alan Cameron, K.C.B., of the Enacht Branch of the house of Lochiel.

FAGAN—April 21, at Tiverton, Devon, of hooping cough, Fannie Isabelle Ingilby, second daughter of the late Captain R. C. H. B. Fagan, Bengal Artillery, aged 8.

FLEMING—April 23, at 14, Glocester Square, Hyde Park, Lieutenant-General Edward Fleming, C.B., Colonel 27th Regiment (Inniskillings).

GRAFTON—April 17, at Cambridge, Lieut.-Colonel Augustus Grafton, of the Bombay Army, aged 72.

GRAHAM—April 23, at Fareham, Hants, Colonel William Dashwood Graham, late of the Bombay Engineers, aged 47.

HOME—April 22, very suddenly, at his lodgings in Pall Mall, Lieut.-General John Home Home, of Bassendean, Berwickshire, Colonel of H.M.'s 56th Regiment, aged 63.

HOTHAM—April 14, at York, Captain George Hotham, Royal Engineers.

KERRISON—April 20, at 30, Norfolk Street, Lady Kerrison, widow of Lieut.-General Sir Edward Kerrison, Bart., aged 74.

KING—April 8, at Malta, after three days' illness, Captain William Magrath King, Royal Artillery, aged 34, youngest son of Captain King, Military Knight of Windsor, and nephew of the late Right Hon. Lord Chief Justice Tindal.

KING—March 1, at Fort William, Calcutta, of malignant cholera, Lieutenant James Walker King, 60th Royal Rifles, 1st Batt., eldest son of Sir James W. King, Bart., Clk., aged 23.

Charles Lewis Gruneisen, Secretary.

Offices: 33, Norfolk Street, Strand, W.C.

CUNNINGHAM'S PATENT SELF-REEFING TOPSAILS, &c.

Copy of a letter from Captain J. M. Outridge, of the Champion of the Seas, 1946 tons register, belonging to Messrs. J. Baines & Co., dated Liverpool, April 14, 1860.

"To H. D. P. Cunningham, Esq., R.N.

"I have great pleasure in reporting to you upon the admirable working of your patent topsails, on board the Champion of the Seas, under my command. I can reduce sail with half the crew required on the ordinary plan, and in much less time. I have heard it said that your topsails are not suitable for such large ships as the Champion of the Seas; but, my experience of their working, proves this to be a great mistake. My main topsail-yard is upwards of eighty feet long, and weight of it five tons; a very (I think) satisfactory proof they are suitable for any vessel now afloat. The officer of the watch can always take the mizentopsail into a close reef himself."

Office, 12, London Street, Fenchurch Street, London, E.C.

N.B. The Champion of the Seas has been fitted about four years.

DIVING APPARATUS.

C. E. HEINKE, Submarine Engineer, 79, Great Portland Street, London, W., begs to call the attention of Ship-owners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS & APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

LYONS MEMORIAL.—The Committee for erecting a MONUMENT to the late Admiral Lord LYONS, being anxious to commence the work at once, particularly request that intending subscribers will as soon as possible pay their contributions to the bankers undermentioned, or to the Hon. Secretary; a sum of 100*l*. being still required fully to carry out the proposed plan.

Amount previously advertised £544 1 0

JULLIEN FUND.—Committee Room—50, New Bond Street, W.

The committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

Committee for the Distribution of the Jullien Fund.

Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.

April 25th, 1860.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., viâ EGYPT.—THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

SCREW STEAM YACHT FOR SALE, about 200 tons (O. M.), 40 horse-power; rig, a three-masted schooner. Has only been used about nine months in sea service, chiefly in a winter cruise in the Mediterranean, during which she proved an excellent sea boat. Has just been fitted with the superheating apparatus, reducing considerably her consumption of fuel, and increasing her speed. Consumption now, about 5 tons in 24 hours. Speed, under steam only, 10 knots; with steam and sail, 11 to 12 knots. Commodiously arranged for a family or party, and elegantly decorated. Abundantly provided with stores, including cutlery, china, &c., and is ready for a cruise, without requiring any outlay, except for provisions. For further particulars, enquire of Mr. Thomas Hill, Southampton, where also the yacht may be seen and inspected.

ARMY, NAVY, EAST INDIA, AND COLONIAL AGENCY.

The undersigned act as GENERAL AGENTS in England for Officers and Members of the above services. A detailed Prospectus forwarded on application.

W. R. Looker & Co., 12, Pall Mall East, London, S.W.

SOUTHSEA STEAM MARBLE WORKS, COTTAGE GROVE, SOUTHSEA, PORTSMOUTH.

Established 1849.

A. W. BAKER respectfully informs his Friends, Patrons, and the Public in general, that he has erected improved Steam Machinery, and will now be enabled to execute all orders without delay, at London prices.

A large stock of marble and enamelled slate chimney-pieces in show-rooms, monuments, tombs, tablets, headstones, &c.

DUTY OFF FRENCH PERFUMERY.

MONEY ADVANCED on BILLS, BONDS, or MORTGAGES, in a few hours. Gentlemen of property immediately and privately accommodated on their personal security. Address, or apply to, Mr. Morris, Solicitor, 58, Pall Mall, St. James's Palace, S.W.

WANTED, LEFT-OFF CLOTHES FOR AUSTRALIA.—Mr. & Mrs. JOHN ISAACS, 319 & 320, Strand, W.C. (opposite Somerset House), continue to give the highest price in cash for Ladies', Gentlemen's, and Children's Clothes, Regimentals, Underclothing, Boots, Books, Jewellery, and all Miscellaneous Property. Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

DINNEFORD'S PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION. As a Mild Aperient, it is admirably adapted for Delicate Females *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

Prepared by DINNEFORD & CO., Dispensing Chemists (and General Agents for the *Improved Horse Hair Gloves and Belts*), 172, New Bond Street, London, W., and Sold by all respectable Chemists throughout the Empire.

TEETH.—Mr. ESKELL, Surgeon Dentist, 314, Regent Street, W. (facing the Polytechnic), supplies his PATENTED INCORRODIBLE TEETH, which can be matched so closely in shape and colour to those left in the mouth, and are formed so exactly to nature, that the closest observer cannot detect the difference, and in all cases they restore perfect articulation and mastication. These teeth are fixed from one to a complete set upon Mr. Eskell's never-failing and painless principle of Self-adhesion, without extracting any teeth or stumps, or giving any pain whatever; and being incorrodible they possess the superior advantage of never changing colour nor decaying. Mr. Eskell's celebrated Osteoplastic Enamel, post free for thirty stamps, for Stopping Decayed Teeth, is a preparation which never changes colour nor affects the colour of the tooth, and is free from any injurious properties either as regards the teeth or general health. Its application is easily performed, and without giving the slightest pain. Deficiencies of palate effectually remedied. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation, free. Charges strictly moderate.—314, Regent Street, W. (opposite the Polytechnic), London.—Established 1847.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald*.

Liverpool, 134, Duke Street.

A BOON TO NERVOUS SUFFERERS.

THE NEW MEDICAL GUIDE for gratuitous circulation. A NERVOUS SUFFERER having been effectually cured of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, by following the instructions given in the MEDICAL GUIDE, he considers it his duty, in gratitude to the author, and for the benefit of others, to publish the means used. He will, therefore, send post free, on receipt of a directed envelope, and two stamps, a copy of the book, containing every information required

"Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind."—*British Critic*.

Address, James Wallace, Esq., Wilford House, Burton Crescent, Tavistock Square, London. W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 to 8 Evening.

CURE OF CHRONIC COUGH BY

DR. LOCOCK'S PULMONIC WAFERS.—From Mr. Smedley, Bookseller, Sleaford, Oct. 22.

"Gentlemen,—I can speak with confidence, particularly of the Pulmonic Wafers, with which I have not only been relieved, but cured of a chronic winter cough. Hundreds of boxes I have sold, and still the sale is as great as ever. Signed, J. Smedley."

DR. LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs.

TO SINGERS AND PUBLIC SPEAKERS they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1*s*. 1½*d*., 2*s*. 9*d*., and 11*s*. per box. Sold by all medicine vendors.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle*, *Cottage Gardener*, and *Field*. In boxes, 1*s*., 3*s*., 10*s*. 6*d*., retail of all Nursery and Seedsmen. Wholesale of Price's Patent Candle Company, Limited.

LAST week we adverted to the grievances of the warrant officers of the Navy, as contributing to render the Service unpopular, by diminishing, if not altogether annulling, the value of those appointments which are held out as the greatest prizes of the sailor. Apart from the other drawbacks of the warrant, the mere fact that a boatswain is required to administer corporal punishment, explains clearly why the post, which claims the best seaman in a ship, should not only be no object of ambition, but may be both despised and refused. After all our efforts to raise the character of our tars, by teaching them habits of sobriety and thrift, giving them books at sea and a "home" on shore, we seem still to think that the man who should be the model sailor of a thousand has in his composition an instinct of brutality which reconciles him to this degrading duty. The regulation notion of a boatswain appears to be the same old Ben Bowline, whose chief employment was to go about rope's-ending the loblolly boys on board the vessel known in nautical nomenclature, as the "Bellyruffian." When this is the highest position a sailor can look to, it is to be expected that the lower steps on the ladder of promotion are even less attractive, and of course rather shunned than sought. Nevertheless, we must confess to some surprise at hearing that four line-of-battle ships of the Channel Squadron are in want of as many as 68 petty officers, being an average of 17 to each ship. It requires us to imagine a regiment short of 17 sergeants and corporals to appreciate this deficiency. No wonder that on board one of these vessels there has been a degree of insubordination amounting to a small mutiny. The petty officers are, as it were, the sinews of a ship; for it is through them the commander sways the crew, as the crew act themselves by the halyards and blocks on the rigging. Without completeness in both respects there can be no efficiency. It may be possible to "wear ship" in an extremity with broken gear, but what captain would trust to such a chance when he can keep all perfect? Although it has lately been shown that an Englishman can hold his ground against a powerful adversary with his left hand, this gives us no encouragement to send our ships into action without their right arm. It will be of no avail to us to hold our ground—to fight a drawn battle: we have to maintain a superiority, and when we strike must win. Hence we must foster every element of our strength. The mischief arising from a deficiency of petty officers is apparent even in these piping times; and to what might it not grow in war, when discipline, concert, and unity of action are imperative. But, to secure aspirants, the position of a petty officer must be so improved as to render it one that will be coveted, instead of shunned. We may determine that nobody who enters the Navy at the hawser-holes shall go out at the cabin windows; the Admiralty may set its face against future Sir Cloudesley Shovels; but let such promotion as we do leave open to our sailors be at least no discouragement. By the Good Conduct Warrant a petty officer is now placed in a worse position than an able seaman, inasmuch as the latter is awarded a penny a day for each of his stripes, while the stripes obtained by the former, after his promotion, bring him nothing. Thus a petty officer of 15 years' standing obtains no emolument for his three stripes, while he has the mortification to see a petty officer of yesterday, but who has been 15 years an able seaman, receive 3*d.* a day more than himself. Clearly, therefore, it is the interest of an A.B. to decline promotion until he has served the specific time, which will insure him from pecuniary loss; for length of servitude as a petty officer brings no increase of pay. It is true that in the Army, sergeants, who hold the same relative rank, receive no good-conduct pay, but they have been awarded a uniform allowance of twopence a day as compensation. This difference of treatment is a constant source of irritation to sailors. They complain that the Government mete with one measure to the Army, and with another to themselves, and there is certainly truth in the statement. Even the rate of pay is unequal. A first-class petty officer receives for continuous service 2*s.* a day, while a sergeant in the cavalry is awarded 2*s.* 4*d.* Non-continuous service gives the first-class petty officer 1*s.* 9*d.* a day, while the daily pay of the infantry sergeant is 2*s.* The rates of pensions present a corresponding disparity; and there are other points of difference, on which, after what has been said, it will be unnecessary to dwell. Such comparisons, indeed, are always better avoided; but in this instance they form a standing provocation and grievance, which it is impossible to blink. However we may push them aside, they will be dragged out on the forecastle, and talked over in the middle watch, and round the ship's bows. The authorities, then, and the nation will do well to look them in the face, that the injustice they indicate may be promptly redressed. It has lately been discovered that the sailor is distrustful; we all know he has a large development of the bump of jealousy; and, as he is naturally generous and confiding, we must consider that both sentiments have been engendered by ill-usage. The authorities should be as careful as his sweetheart to afford no ground of offence, and, above all, to give the sailor what he prizes best, fair-play. If the rank of the petty officer, instead of being undefined, be made clear and distinct, if his pay be equitably adjusted, and his good service rewarded, the position will no longer be regarded with indifference. Sailors covet promotion as eagerly as soldiers, but they have learnt that it should bring some decided advantage, and this does not accrue from the position of petty officer. Jack has ceased to believe in a little cherub sitting up aloft. He knows there is nothing like taking care of one's self; and, whatever we may say, we shall never convince him that a badge on his arm and three barren stripes are a compensation for threepence a day.

Austria was very averse to the Italian war. It was a struggle she had long foreseen; for though no threats had been directed against her—though it was not until the first day of the year which began and closed the conflict, that France, the only power she could be called on to oppose, showed her any sign of ill-will—an instinct of peril had led her to provide against it. At the critical moment her preparations were complete; and, emboldened by the resources which military organisation and military science had accumulated, this proverbially non-aggressive power, which has made the *status quo* a policy, and whose inertness is a tradition, preferred rather to precipitate hostilities than leave to a sinister, though yet undeclared, enemy the choice of the moment for action. England may some day be induced to take a similar decision. We may get weary of keeping up a race with France in building line-of-battle ships and equipping armanents in a time of profound peace; and, as Pyrrhus had a notion that his victories might be worse than defeats, we may come to the conclusion that such an uneasy peace is less endurable than war. In short, we may grow as fretful under our harness as Austria, and, like her, choose rather to be the first to draw the sword than give the enemy the full time he requires to mature his designs, and carry out his preparations to their utmost extent.

There need be no delicacy in discussing such a contingency. Our neighbour and ally, to do him justice, has dealt very openly with us, and if he has worn two faces, has, at least, not covered them with that mask which he exhibited to Austria. On Tuesday night Lord Lyndhurst reminded the House of Lords that one of the first acts of Louis Napoleon, as President of the French Republic, was to institute a commission for the resuscitation of the French Navy; and on his accession to absolute power, four years afterwards, he immediately called for the report of this commission, which, as a little expansion of its labours, had not only drawn up a scheme for giving France a naval superiority, but demonstrated the practicability of an invasion of England. In furtherance of these projects we have seen the fleets of France attain proportions which, for a moment, did indeed surpass those of our own; a maritime conscription has organised her whole nautical population, so as to render it available for service at a moment's notice; and a network of railways connects all her military stations with a great *port d'aggression*, which confronts our shores like a standing menace. All this has been done in open day, and under our own eyes. Looking at the aggressive attitude of France, at the overbearing ascendancy she is assuming on the continent, at the encroachments she is making and seems disposed to extend, at her secret "convention" with Russia, and the critical posture of affairs in Turkey, Switzerland, and Sicily, there is no calculating at what moment we may be called upon to act; and all agree that the rupture, come when it may, will be the work of an instant. Have we profited by the warnings we have received, and the unmistakable, and indeed undisguised, indications of the French Emperor's designs, to provide against the collision? The Duke of Somerset has given a statement of the relative strength of the French and English Navies in ships, which represents us as superior in line-of-battles, but admits an inferiority in frigates. This, however, with our immense resources, can be soon pulled up; and, if there were no other deficiency, we might feel pretty secure. Let us take it for granted that England now possesses a greater number of ships than France; that notwithstanding the rumours in circulation, our Channel and Mediterranean squadrons are fully and efficiently manned, and that we have even a body of seamen waiting in port for ships to be commissioned, instead of ships waiting for months, as the custom was, for a crew. Such a condition of our armaments, though a great advance and adequate for the present moment, affords no provision against eventualities. Moreover, it must be borne in mind that France can assemble her whole Navy at a given point, while England must guard all her widely-scattered possessions, as well as a long line of defenceless coast. Notwithstanding the altered and even unknown conditions which steam has introduced into naval warfare, it seems out of the range of possibility that an English squadron could be disabled by defeat, yet, in common prudence, we must provide for even this contingency. Still more should we be prepared to meet the possible junction of the French fleet with that of Russia, which might endanger the command of the Channel, and, if it did not cover a descent, at least intercept our gold ships. But the picture drawn of our progress in this respect, after being denuded of the varnish, by no means presents things in that cheerful light which the Duke of Somerset and Lord Alfred Paget would have us believe. It is soon discovered that the Coast-Guard, the batch of Marines, and the Coast Volunteers, are dragged in for show, and add nothing to the effect. The group—it is nothing more—which alone should command attention is the Royal Naval Volunteers. Here is England's sheet anchor—a thousand men! There is no need to warrant their quality, for everyone knows it is of the best; but, supposing all forthcoming at the critical moment, how far would they serve us to man a fleet? The First Lord declares that the difficulties inseparable from a new scheme are only just surmounted, and that the Volunteers will now rapidly increase in numbers, and soon form an effective reserve. As we stated last week, we are not disposed, under all the circumstances, to take a desponding view, but neither is there any ground to exult. Having been only a month in operation, the scheme can hardly be said to have failed, and the public will certainly not condemn it until it has had a fair trial.

THE ARMY.

7th Dragoon Guards. Captain Lamb has leave to England from March 15 to September 15. Captain Welstead has arrived home, being about to retire from the Service.

9th Lancers. Captain Marshall has joined at Topsham Barracks.

12th Lancers. Captain Harford, Acting Paymaster of the left wing, is to remain at Madras a month after the departure of the regiment to settle his public accounts, joining his corps at home by the overland route.

14th Light Dragoons. The following Complimentary Order by the Commander-in-Chief was issued on the departure of this fine regiment from India: "Her Majesty's 14th (the King's) Light Dragoons will embark for England by detachments on the 11th and 13th inst., and the Commander-in-Chief, while congratulating the regiment on its return home, after a long tour of duty in India, desires to record the highly honourable and gallant service rendered by this distinguished corps since its return to this presidency from Bengal. The breaking out of the war with Persia altered the destination of the regiment from England to that country. On its return from that campaign the regiment landed in Bombay, and was hastily despatched on field service, to aid in the suppression of mutiny and rebellion in Central India. The distinguished and gallant conduct of the regiment in that brilliant but arduous compaign are matters of history, and won for it the frequent and well-deserved praise and applause of their distinguished commanders, Colonel Sir Charles Stuart and Major-General Sir Hugh Rose. Her Majesty has been pleased to acknowledge the brilliant service of this regiment by the distinctions and promotions bestowed upon the officers, whose noble leading has been so frequently noticed in the public despatches. In saying farewell to all, the Commander-in-Chief wishes the regiment a speedy and prosperous voyage home, and a happy meeting with long absent friends." Brevet-Lieut.-Colonel J. A. Todd, has obtained leave to precede the regiment to England by overland route.

ROYAL ARTILLERY.—The following comprise all the recent changes of stations of officers:—Lieut.-Colonels—Haultain, from Woolwich to Northampton; F. J. Travers, from the Cape of Good Hope to Portsmouth; Dixon, from Plymouth to Portsmouth; Turner, C.B., from Madras to Woolwich; Fisher, from Woolwich to Malta; Francklyn, C.B., from Woolwich to Portsmouth; Graydon, from Malta to Portsmouth; Maude, C.B., from Bengal to Plymouth. Majors—Curtis, from Leith Fort to Bengal; Richards, from Gibraltar to Portsmouth; Hope, from Malta to Portsmouth; Brendon, from Quebec to Portsmouth; De Haviland, from Ireland to Portsmouth; Walcott, from Bengal to Woolwich; Bredin, from Madras to Portsmouth. Captains—Twiss, from China to Woolwich; Sievwright, from Bengal to Plymouth; Seale, from Shorncliffe to Bengal; Saunderson, from Jersey to Woolwich; Wilkinson, from Ireland to Portsmouth. Second Captains—Lyon, from Quebec to Ireland; Milman, from Bengal to China; Martin, from China to Leith Fort; Wyllie, from China to Bengal; Johnson, from Ireland to Shorncliffe; Carden, from Ireland to Jersey; Percival, from Plymouth to Christchurch; Arbuthnot, from Bengal to England; Biddulph, from Bengal to Gibraltar; Stirling, from Bengal to Malta; Hill, from Bombay to Quebec; L'Estrange, from Halifax to Ireland; Watson, from Ireland to Portsmouth; Rideout, from Bengal to Quebec; Johnstone, from Woolwich to Portsmouth; Broughton, from Madras to Bengal; Humfrey, from Plymouth to Portsmouth; Nicolls, from Ireland to Plymouth; Wilson, from Ireland to Portsmouth; Barton, from Mauritius to Madras; Bolton, from Guernsey, to Portsmouth; Walker, from Ireland to Portsmouth; Hamilton, from Ipswich to Portsmouth; Cuthbert, from Bengal to Portsmouth; Vaughan, from Mauritius to Portsmouth; Doyne, from Portsmouth to Woolwich; De Winton, from Ipswich to Portsmouth; Jackson, from Gibraltar to Mauritius; Tucker, from Shorncliffe to Gibraltar; Schrieber, from Guernsey to Woolwich. Lieutenants—Burn, from China to Bombay; Hobart, from China to Bengal; Handcock, from Plymouth to Ireland; Curzon, from Malta to Ipswich; Lynes, from Halifax to Ireland; Steward, from Woolwich to Ipswich; Cottingham, from India to Woolwich; Seccombe, from Malta to Woolwich; Prior, from Gibraltar to Woolwich; Hazlerigg, from India to Woolwich; Scott, from Brighton to Gravesend; Marshall, from Woolwich to Northern District; Taylor, from Guernsey to Northern District; M'Cullum, from Dover to Scotland; Montgomery, from Woolwich to Pembroke; Robinson, from Dover to Brighton; Blades, from Woolwich to Scotland; and Ramsay, from Woolwich to Northern District.

ROYAL ENGINEERS.—The following alterations have recently taken place in this corps:—Colonel Hadden, appointed to the command at Colchester; Captain Longley, appointed to command the 13th Company at Weymouth; Captain Brine removed from Cork to Limerick; Captain Fraser, on sick leave. The following removals are ordered:—Lieut.-Colonel Fanshawe, from Montreal to Barbadoes; Colonel C. E. Ford, to return home from Barbadoes; Captain Warren, to proceed to Canada; Lieutenants J. H. Wilson from Barbadoes to Chatham; Blunt, from Shorncliffe to Gibraltar; Brine, from Devonport to Malta; Engledue, from Chatham to Portsmouth; D. G. Jones, from special service to Portsmouth; Fellowes to Barbadoes; O'Brien, from Chatham to Plymouth; Carroll, from Chatham to the London district; Pole, from Sheerness to Devonport; Stacke, from Chatham to Ireland; Bigsby, from Chatham to Woolwich; Ardagh, from Chatham to Pembroke; Robertson, from Chatham to Aldershot; and Peck from Chatham to Ireland.

The whole of the men, horses and stores of the A troop of the Royal Engineer train, vacated their quarters at Brompton Barracks on Tuesday morning and proceeded to Aldershot Camp, by easy marches. The following are the officers with the Royal Engineer train, viz:—Captain R. W. Duff, Lieutenant C. H. C. Halkett, and Lieutenant A. B. Hicks.

Grenadier Guards. The present year being the 200th anniversary of the formation of the First (or Grenadier) Regiment of Guards, raised by Charles II., after the restoration in 1660, as his own Royal Regiment of Guards, it is intended to commemorate the event by a grand entertainment. At a meeting of the officers, held a few days since, comprising Colonel the Hon. James Lindsay, Colonel Hamilton, C.B., Colonel J. Lambert, Colonel Lambert, Lieut.-Colonel Wynyard, Lieut.-Colonel Bradford, Colonel Conway, C.B., Lieut.-Colonel Ponsonby, &c., it was arranged to celebrate the event by a dinner of the officers now connected with the distinguished corps, and all those who have at any time served in the regiment. His Royal Highness the Prince Consort, who has been Colonel of the regiment since the death of the Duke of Wellington, was solicited, and has consented to preside on the occasion. It is proposed that His Royal Highness the Duke of Cambridge as General Commanding-in-Chief, the Secretary of State for War, and the superior officers and gentlemen connected with the military administration of the country, also that the colonels and lieut.-colonels of the Household Cavalry, of the Coldstream and Scots Fusilier Guards shall be invited. A dinner is also to be given to the non-commissioned officers and soldiers of the regiment. The officers' banquet is to take place on Saturday, the 16th proximo. Her Majesty has been graciously pleased to place at the disposal of the committee of officers formed to carry out the proceedings the Banqueting-hall of St. James's Palace.

7th Fusiliers. Captain Lord R. Browne, has arrived in England, on sick leave, under new rules.

19th Regiment. Lieutenant R. Molesworth has leave to England, under new rules.

29th Regiment. We regret to read in the *Sunderland Times* of last Saturday a melancholy and fatal accident, by which the life of a promising young officer of the 29th Regiment was sacrificed, on the Seaham Railway, on Thursday afternoon last. Ensign Everard, it appears, had been along the beach, towards Ryhope, learning, with his company, the rifle practice, and was returning along the Seaham line, when a coal train was seen approaching him. Mr. Everard, in jumping out of the way, unfortunately failed to observe that another train was approaching on the other line. He was immediately knocked down, and it was feared that he was killed; examination showed, however, that he still lived, though severely injured about his head, and covered with blood. He was at once conveyed to the barracks, where he has since expired. The rifle range on the beach at Sunderland is considered to be one of the best in England. For some years past detachments from the various regiments quartered in the different garrison towns in the northern district have been brought down to Sunderland Barracks to receive instruction in ball practice. The three companies of the 29th Regiment at present stationed there have arrived from Preston about a month ago. Yet it will be scarcely credited that although three accidents of precisely a similar nature to the above have occurred to the coast-guardsmen on duty along the coast within the last four years, each of which terminated fatally, no steps have ever been taken by Government to provide a proper road to the rifle ground. It may seem strange, but it is nevertheless true, that the only means of access at high tide is by marching on the Seaham Railway for upwards of a mile, which is used by the troops about eight times daily. The melancholy death of Mr. Everard has caused great excitement in Sunderland; but it is indeed a matter of surprise that accidents have not occurred more frequently.

37th Regiment. Major R. P. Harrison has leave to England for 18 months from date of leaving the regiment.

41st Regiment. H.M.S. Perseverance arrived at Portsmouth on Monday, having sailed from Jamaica on the 5th of April, with the head-quarters and six companies of the 41st Regiment, comprising:—Col. J. E. Goodwyn, in command; Major H. W. Meredith; Captains J. E. Harvey, A. N. Fowler, R. E. Maude, and E. L. B. Lowy; Lieutenants H. G. Nowlan, R. Pack, and W. F. B. Michell; Ensigns H. G. L. Lynch, Charles Miller, and F. P. A. Bracken; Paymaster James Simpson, Adjutant Isaac King, Quartermaster Charles Ward, Assistant-Surgeon G. L. Hind, and Brevet-Major F. C. Bligh; 491 rank and file, 41 women, and 83 children. The regiment disembarked next morning at Portsmouth, and left for Aldershot.

42nd Regiment. Captain G. Fraser has leave to England for 18 months from date of leaving the regiment.

Royal Marine Light Infantry. The somewhat extraordinary circumstance of trying a private of the Royal Marines by "drum-head court-martial," with the subsequent infliction of corporal punishment, occurred at Chatham this week to a private of the Royal Marine Light Infantry named Joseph Wakefield, for a most gross act of insubordination. The prisoner, who is a man of exceedingly bad character, was tried by district court-martial for deserting from head-quarters and making away with his regimental necessaries; and the finding of the court having been approved by the major-general commanding, the whole of the officers and men of the division were drawn up in the barrack square to hear the sentence promulgated. The prisoner having been marched to the centre, the sentence was read, the court adjudging him to be branded with the letter "D" and to be imprisoned for 168 days. The instant the prisoner heard his sentence he turned round to Lieut.-Colonel M'Killop and shouted out with an oath that he would not do it, but that he (Colonel M'Killop) "might do it himself;" and there is no doubt he would have rushed at that officer had he not been prevented by the escort. As this flagrant act of insubordination took place in the presence of the entire division, the Commandant, Colonel Rea, felt it his duty to make a prompt example of the prisoner, and at once gave orders for what is termed a "drum-head court-martial" to immediately assemble on the parade ground, when the officers who were selected to form the court-martial sentenced the prisoner to receive 50 lashes. The entire battalion then proceeded to the rear of the barracks, and the prisoner having been stripped and fastened to the triangles, the full number of lashes was inflicted, the prisoner bearing his punishment without uttering a word of complaint. Colonel Rea afterwards assembled the division, and, addressing the men in energetic language, stated it to be his determination to suppress the slightest symptoms of insubordination, and in all breaches of military discipline to carry out the law. The infliction of corporal punishment is exceedingly rare in the Chatham division of Royal Marines.

53rd Regiment. Lieut.-Colonel W. Payn is permitted to precede the regiment to England by the overland route.

60th Rifles. 1st battalion. At the recommendation of a medical board, Colonel Dennis, C.B., is permitted to precede the regiment to England by the overland route. On arrival, he will report himself. Captain J. D. Dundas, Lieutenants F. V. Northey, C. Ashburnham, J. Preston, A. Woodgate, Ensigns G. Tottenham and N. W. Wallace, being in excess of those required to do duty with the battalion *vid* the Cape, will proceed to England by the overland route.

69th Regiment. Lieut.-Colonel P. Fenwick has leave from India to England for 18 months from date of departure from regiment.

74th Regiment. Brevet-Colonel J. MacDuff and Major W. K. McLeod have leave to England for 18 months from date of leaving the regiment.

87th Regiment. Major C. F. Campbell has leave to England, under new rules.

91st Regiment. Lieutenant W. H. Baillie has obtained leave to England for 18 months from date of leaving the regiment.

1st, 2nd, and 3rd Depôt Battalion, Chatham. A general inspection and review of the whole of the troops of this garrison took place on Tuesday afternoon, on Chatham Lines, by Lieutenant-General Sir J. F. Love, K.C.B., K.H., Inspector-General of Infantry. The entire force of the garrison was drawn up on the Lines shortly before twelve o'clock, the troops on the ground comprising the Royal and Indian Engineers, under the command of Lieut.-Colonel A. Ross; the 1st battalion of infantry, commanded by Colonel H. Jervis; the 2nd battalion, under the command of Colonel R. N. Phillips; and the 3rd battalion, which was commanded by Lieut.-Colonel Fairtlough; and the corps of Royal Marines, under the command of Lieut.-Colonel Moore—to the number of nearly 5000 men of all ranks. General Love, attended by Colonel D. Lysons, C.B., and Major Page, his aides-de-camp, arrived on the ground shortly before one o'clock, accompanied by Major-General Lord De Ros, Major-General Eyre, Lieut.-Colonel Gordon, and a numerous staff. The troops were formed in contiguous quarter-distance columns, and received the general with a salute, after which they marched past in slow and quick time. A variety of manœuvres followed, all of which were executed with remarkable steadiness and precision. The firing of the troops, each of whom had 10 rounds of blank cartridge, was very good. After a number of movements had been executed, which occupied nearly three hours, the troops were marched off the ground to their quarters, General Love expressing himself well satisfied with that portion of the inspection. Each battalion has since been inspected separately by General Love, who examined the books and accounts of each, the inspection occupying several days.

MONTHLY MILITARY OBITUARY.

General Sir Thomas M'Mahon, Bart., G.C.B., Colonel 10th Foot.

Lieut.-Generals John Home Home, Colonel 56th Foot; Edward Fleming, C.B., Colonel 27th Foot.

Major-Generals Orlando Felix; William Henry Law, retired full-pay, 83rd Foot.

Colonel John Isaac Hope, Royal Engineers.

Lieut.-Colonels J. J. Brandling, C.B., Royal Artillery; William Spring, retired full pay, Fort Major.

Major Edward M Earl of Longford, 2nd Life Guards.

Captains John Theobald Ling, 2nd Dragoon Guards; Sidney C. Jackson, 70th Foot; John Dowland, half-pay, 67th Foot.

Lieutenants Richard Saunders, 18th Dragoons; James W. King, 60th Foot; Robert Richard Fennessy, 64th Foot; Isaac R. Darcy, retired full-pay, 8th Veteran Battalion.

Quartermaster Thomas Moore, Depôt Battalion.

Deputy-Inspector-General J. Connell, half-pay.

Surgeons J. Campbell, Staff; Dennis Murray, M.D., half-pay 1st class; Frederic Detmer, half-pay, 2nd Dragoons, King's German Legion.

The importance of connecting all the military arsenals and stations throughout the country, north and south, by one unbroken continuous line of railway, has for years past occupied the attention of our highest military authorities. A favourable opportunity of obtaining this long-desired object now presents itself by means of a bill called the Metropolitan Extension, promoted by the London, Chatham, and Dover Company. His Royal Highness the Duke of Cambridge has, on former occasions, expressed before committees of the House of Commons his strong feeling of approval, in a military point of view, of an inland access to Dover, which is not exposed to an enemy for the last four miles from the sea, as the South Eastern line from Folkstone. This object will be obtained when the company's line inland from Canterbury to Dover is opened for traffic by the close of the present year. His Royal Highness again gave evidence last week in favour of the present line, and if carried, which we fully expect, there will be the means of transporting, without any break of bulk, any number of troops and stores to and from the north and south of England free from the objection which has hitherto existed, of conveying them through the streets of London. The importance of these facilities can hardly be over-rated, when we consider the advantages of a rapid though unbroken connection for military movements. The Commander-in-Chief has stated his views in favour of the line; looking upon it as the great military artery of the country; expressing his objection to the present state of communication, which, except by going very much round, affords no means of uninterrupted transit between north and south; and also indicating his opinion that sending troops through the streets of London was very inconvenient and objectionable.

The whole of the recruiting parties for the regiments in India are ordered to be called in to join their depôts at Chatham. The recruiting parties for the Royal Engineers are also to join the head-quarters of their establishment at Brompton.

Orders have been received at Fort Pitt General Hospital for the following medical officers to proceed to the stations named:—Assistant-Staff-Surgeon Wales, to Winchester; Assistant-Staff-Surgeon Fraser, to Birr; and Assistant-Staff-Surgeon Kennedy, to Curragh.

We hear that Surgeon C. A. Gordon, C.B., of the 10th Foot, is to be promoted to the rank of Doctor-Inspector,

Digitized by Google

for the purpose of proceeding immediately to China, and joining the expeditionary army. Dr. Gordon has seen extensive service in India, and was principal medical officer of the force under Sir Edward Lugard, during the late mutiny.

SHORNCLIFFE.

The internal economy of most of the Militia regiments now embodied deserves especial commendation. Foremost among them in this respect at the present time is the 90th Stirlingshire militia or Highland Borderers. Amongst other arrangements of a highly gratifying character is that of an extensive reading-room, supported entirely by the voluntary subscriptions of about 400 non-commissioned officers and privates of the regiment; the whole under the management of a committee of a non-commissioned officer, drummer, or private soldier of each company, the president of which is a commissioned officer. The payments are 2*d.* each member entrance, and 2*d.* per month subscription; this enables the committee to purchase 17 daily, weekly, and periodical publications; amongst the former the *Times* figures, and the ARMY AND NAVY GAZETTE amongst the weeklies. The papers after the second day are sold to the members, and are by them mostly transmitted to their friends. Games of chance are strictly forbidden; but chess, drafts, dominoes, solitaire, and other harmless games are provided in abundance; in addition to which the members are supplied with pens, ink, paper, envelopes, and stamps, at cost price, and a place set apart for those who are anxious to correspond with their friends; smoking in the room is strictly forbidden. The result has been a large diminution of crime, which arises from a too frequent attendance at the canteen or the low beer shops in the neighbourhood of the camp. The officers of the regiment have arranged regimental games to come off in about a fortnight's time, when the following games are to be contested: highland-fling dance, putting the stone, standing high leap, throwing the hammer, long race, running high leap, throwing the caber, hurdle races, hop step and jump, wheelbarrow and sack races: the prizes to consist of knives, meerschaum pipes, fancy shirts, &c., &c., but no money prizes.

The Army Gazette.

THE VICTORIA CROSS.

War Office, April 28.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the undermentioned soldier, whose claim to the same has been submitted for Her Majesty's approval, on account of an act of bravery performed by him in India, as recorded against his name, viz.:—

Private James Pearson, 86th Regiment (now of the 56th Regiment).—For having gallantly attacked a number of armed rebels, on the occasion of the storming of Jhansi, on the 3rd of April, 1858, one of whom he killed, and bayonetted two others. He was himself wounded in the attack. Also, for having brought in at Calpee, under a heavy fire, Private Michael Burns, who afterwards died of his wounds.

WAR OFFICE, PALL MALL, MAY 4.

2nd Regiment of Life Guards—Cornet Conwy Grenville Hercules Rowley, from the 4th Light Dragoons, to be Cornet and Sub-Lieutenant without purchase, vice Cuninghame, promoted; May 4.

4th Light Dragoons—Lieut.-Colonel Frederick Charles Alymer, from half-pay Unattached, to be Lieut.-Colonel, vice Brevet-Colonel Alexander Low, who exchanges, receiving the difference between Infantry and Cavalry; Major George John Brown, to be Lieut.-Colonel by purchase, vice Frederick C. Aylmer, who retires; May 4.

Military Train—Captain Charles Hunter, from the 24th Foot, to be Captain, vice David Gibson, who exchanges; May 4.

10th Regiment of Foot—Lieutenant Matthew Coke, from the 12th Foot, to be Lieutenant, vice Phillips, who exchanges; May 4.

12th Foot—Lieutenant Henry Long William Phillips, from the 10th Foot, to be Lieutenant, vice Coke, who exchanges; May 4.

15th Foot—Lieutenant Francis Robert Fishbourne, to be Instructor of Musketry, vice Lieutenant Cuthbert, promoted; April 1.

19th Foot—Captain Montgomery Williams, from the 84th Foot, to be Captain, vice Thomas Conway Lloyd, who exchanges; May 4.

21st Foot—Lieutenant Isaac Tristram Coffin to be Captain, by purchase, vice John Henderson, who retires; Ensign John Blaksley to be Lieutenant, by purchase, vice Coffin; May 4.

24th Foot—Captain David Gibson, from the Military Train, to be Captain, vice Charles Hunter, who exchanges; May 4.

25th Foot—Ensign Henry James Harvey to be Lieutenant, without purchase; Assistant-Surgeon John Thomas Milburn, from the Staff, to be Assistant-Surgeon, vice Creasy, who exchanges; May 4.

30th Foot—The surname of the Gentleman appointed to an Ensigncy by purchase, on the 17th ult., is Braine and not Brain, as stated in the *Gazette* of that date.

60th Foot—Ensign Henry Richard Treeve, to be Lieutenant, without purchase, vice J. W. King, deceased; March 2. For Lieutenant J. S. H. Algar, to be Lieutenant, &c., which appeared in the *Gazette* of the 27th April, read, Lieutenant J. S. H. Algar, to be Adjutant, &c.

63th Foot—Sergeant Henry Sladden, to be Quartermaster, vice Tunks, who retires upon half-pay; May 4.

84th Foot—Captain Thomas Conway Lloyd, from the 19th Foot, to be Captain, vice Montgomery Williams, who exchanges; May 4.

87th Foot—Ensign John Hooker Vowell to be Instructor of Musketry; Feb. 3.

91st Foot—James Thomas Rogers, Gent., to be Eusign, by purchase, vice Robertson, appointed to the 3rd Dragoon Guards; May 4.

100th Foot—Lieutenant Francis Bernard Bleazby, from half-pay, late Land Transport Corps, to be Lieutenant, vice Derbishire, who resigns; May 4.

Gold Coast Artillery Corps—Ensign Gisborne Horner, to be Lieutenant, without purchase, vice Charles Hewett, promoted, without purchase, to an Unattached Company; May 4.

DEPOT BATTALION.

Lieut.-Colonel and Brevet-Colonel Richard Chambre Hays Taylor, C.B., from the 79th Foot, to be Lieut.-Colonel, vice Whitmore, placed upon half-pay; May 4.

Captain John Pennock Campbell, of the 30th Foot, to be Instructor of Musketry, vice Captain S. B. Gordon, 45th Foot, promoted; April 20.

UNATTACHED.

Lieutenant Charles Hewett, from the Gold Coast Artillery Corps, to be Captain, without purchase; May 4.

HOSPITAL STAFF.

Assistant-Surgeon James Gideon Creasy, from the 25th Foot, to be Assistant-Surgeon to the Forces, vice Milburn, who exchanges; May 4.

Acting Assistant-Surgeon James William Crow to be Assistant-Surgeon to the Forces, vice McDermott, promoted; April 30.

BREVET.

Brevet-Colonel Edward Walter Crofton, Royal Artillery, to have the local rank of Brigadier-General in China; Jan. 14.

Lieut.-Colonel Edward Brice, Madras Horse Artillery, to be a Lieutenant-Colbnel in the Army from 10th July, 1858.

Major George Chetwode, 8th Light Dragoons, to be Lieut.-Colonel in the Army; March 30.

Captain Charles Woodland, 1st Madras Native Infantry, to be Major in the Army; May 4.

Quartermaster Thomas Tunks, retired on half-pay 63th Foot, to have the honorary rank of Captain, under the Royal Warrant of 17th Dec., 1855; May 4.

The undermentioned promotions to take place consequent on the death of Lieut.-General John Home Home, Colonel of the 56th Foot, on April 22.

Major-General Sir James Holmes Schoedde, K.C.B., Colonel 55th Foot, to be Lieut.-General; April 23.

Brevet-Colonel Charles Franklyn, C.B., Lieut.-Colonel half-pay Unattached, serving with the temporary rank of Major-General on the Staff of the Army at Gibraltar, to be Major-General; April 23.

Major and Brevet-Lieut.-Colonel George Calvert Clarke, 2nd Dragoons, to be Colonel; April 23.

Major John Perkins Mayers, 86th Foot, to be Lieut.-Colonel; April 23.

Captain Charles Taylor Du Plat, Royal Artillery, to be Major; April 23.

The undermentioned promotions to take place consequent on the death of Lieut.-General Edward Fleming, C.B., Colonel of the 27th Foot, on the 23rd April, 1860:—

Major-General Sir Henry John William Bentinck, K.C.B., Colonel of the 28th Foot, to be Lieut.-General; April 24.

Brevet Colonel Godfrey Charles Mundy, Lieut.-Colonel half-pay Unattached, Lieutenant-Governor of Jersey, with the local rank of Major-General, to be Major-General; April 24.

Lieut.-Colonel George Valentine Mundy, C.B., 19th Foot, to be Colonel; April 24.

Brevet Major John Richard Heaton, 37th Foot, to be Lieut.-Colonel; April 24.

Captain Samuel Burges Lamb, 10th Foot, to be Major; April 24.

STATIONS OF THE BRITISH ARMY.

Corrected up to 5th May, 1860.

[Where two places are mentioned, the last-named is that at which the Depôt is stationed.]

1st Life Guards—Regent's Park
2nd do.—Hyde Park
Royal Horse Guards—Windsor
1st Dragoon Guards—Bangalore; Canterbury

ENGINEER WORKS.

The Under-Secretary of State for War, Sir Benjamin Hawes, has issued the subjoined circular from the War Office, dated the 2nd inst.:—

"Mr. Secretary Herbert desires that the attention of commanding engineers at all stations, and of controllers of army expenditure abroad, be called to the necessity of consulting the customs of the country in fixing the terms upon which supplies for engineer purposes are to be made and engineer works are to be executed.

"2. When once the terms are agreed to by a contractor they should be enforced with as much strictness as the interests of the public service and fairness to rejected candidates require, and with a view to the public receiving the full return for the price paid (care being taken that no unnecessary objections are made), it being evident that the easier the original terms the less the public, in the long run, will have to pay.

"3. The following are a few of the numerous instances in which the terms originally fixed may enhance, and, indeed, in cases which have come under Mr. Herbert's notice, have really enhanced, the cost of public works, without any corresponding advantage.

"4. A specification may provide for a description of brick which, however good in itself, is little, if at all, superior to that which is made in the neighbourhood of the proposed work.

"5. One description of brick, stone, or timber, may be insisted upon when a choice of several might be given.

"6. The time for the supply of materials may be so short that it is not possible for a dealer to get a consignment from the source of supply, and he is obliged, in fixing his price, to calculate upon having to purchase the material in a limited market.

"7. The time for the completion of a work may be so short that the contractor has to calculate for unusual expense of all kinds, not only in the supply of materials, but labour.

"8. Workmanship and fittings may be insisted upon to which the inhabitants of a country are not accustomed, and which few will undertake, or, if they do, at extravagant prices only.

"9. No bond should be required, except when it is absolutely necessary, and the payments should be made as frequently and the reserves as small as possible.

"10. No contract should be made except with those who are known to be competent to perform it; but at the same time the most extended competition should be resorted to among all that are competent.

"11. In consequence of the modifications made by Circulars 411 and 526 in the system of contracts for large

Digitized by Google

works at home stations, Mr. Secretary Herbert has reason to believe that the public have obtained better terms; and he trusts that officers commanding the troops at foreign stations will co-operate with the comptrollers of army expenditure and with commanding Royal Engineers in adopting these principles.

"It is most desirable that the commanding Royal engineers and controller of army expenditure should, from time to time, consult those persons who generally tender for engineer works or supplies, including unsuccessful candidates, as to the nature of the arms which are most advantageous to them, and that every facility compatible with the interests of the service should be afforded to the contractor in carrying out the work.

"13. Whenever it is found by actual experience at foreign stations that work may be carried on by the hire of workmen and the purchase of materials at a cheaper rate than by contract, the former system may be adopted either in place of periodical or special contracts."

COST OF THE WEEDON INQUIRY.

A Parliamentary return, printed at the instance of Colonel Dunne, shows that the cost of the Weedon Commission amounted to 9835*l.* 0*s.* 6*d.*, which is thus accounted for:—Remuneration to Colonel French (commissioner), including personal and travelling expenses, 538*l.* 9*s.* 2*d.*; do. of Mr. Selfe (commissioner), 60 days, at 5*l.* 5*s.* per diem, 315*l.*; do., Mr. Dew, the Secretary, for his services, 324*l.* 9*s.* 0*d.*; personal and travelling expenses of Mr. Turner, Mr. Selfe, and Mr. Dew, 157*l.* 9*s.* 8*d.*; allowances to witnesses for attendance, 17*l.* 17*s.* 4*d.*; paid for notes of evidence, 390*l.* 4*s.* 4*d.*; claim of Messrs. Quilter, Ball, Jay, and Co., public accountants, in investigating the store accounts at Weedon, 8039*l.* 4*s.* 10*d.* The Treasury auditor has reported to the Commissioners of the treasury on the above charges. Referring more especially to the enormous sum claimed by Messrs. Quilter and Co., the auditor says, "I feel it my duty to disallow it, as having been incurred without authority and without reasonable proof of necessity, and as involving, both from the course pursued in the investigation and the high rate of charges made by the accountants employed, a useless and extravagant expenditure." He also states that the report of Quilter and Co. does not present those accurate results which might have been expected from professional accountants, after the expenditure of so much time and labour, and that the report "is really of no practical value." The auditor, it appears, wrote to Quilter and Co. for detailed information with regard to their account, but he states that all he had been able to ascertain from them was, that the number of clerks employed from first to last was 21, of which number, with slight occasional interruptions, 17 were continuously employed. In answer to his inquiry respecting the pay allowed to their clerks, they replied, "the remuneration paid to our clerks is a matter strictly between them and us, and upon which it is not the practice either to give or require explanation" The auditor has, however, consulted other accountants, and obtained the ordinary scale of charges, from which he is enabled to report, "that considerably less than half the amount claimed by Messrs. Quilter and Co. would afford ample remuneration for their service, supposing that the time claimed had been usefully employed." Upon the claim of Mr. Selfe (who is in receipt of a salary as a police magistrate) the auditor thus remarks:—"The next item is the account of Mr. Selfe, chairman of the commission, amounting to 328*l.* Of this account the sum of 137*l.* is for hotel and travelling expenses; the remainder is charged as personal remuneration, at the rate of five guineas a day for 40 days employed in the examination of witnesses—viz., 21 days in London and Weedon, 12 at Woolwich, and seven at the Tower, 210*l.*; and at the same rate for 20 days employed at home "perusing and abstracting Blue Book in July, 1858, in perusing evidence, drafting, revising, and considering report with my fellow commissioners, secretary and accountants, 105*l.*" The auditor, while reminding the Commissioners of the Treasury that Mr. Selfe has a salary as a police magistrate, omits to state that Mr. Dew, who received three guineas per day (exclusive of 84*l.* 0*s.* 6*d.* for personal and travelling expenses), is a clerk in the House of Commons, in receipt of a fixed stipend. Messrs. Quilter and Co. have refused to abate any portion of their account, but have consented to a competent reference on certain conditions, one of which is that they should be allowed to withdraw the account already furnished, in order to submit another at what they term their "usual charges," which they state will give them a larger claim on the Treasury. The Treasury decline to consent to any conditions which could have the effect of incurring a charge which they designate as "enormous" and "extravagant." The matter must, therefore, be arranged by the hon. member for Lambeth in committee of supply. The report and correspondence from which the above facts are gleaned forms an instructive, if not a very satisfactory, State paper.

THE REGENT'S ALLOWANCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—My attention has been drawn to a letter in your journal of the 21st ult., signed "A Hard-up Sub." (the author of which is totally unknown to me), but it contains matter well worthy the notice of those in authority.

Whoever will read the correspondence recently published between the Right Honourable the Secretary of State for War and the Lords of the Treasury, must be satisfied of the zeal, ability, and independent spirit with which that gentleman, aided by the Commander-in-Chief, has addressed himself to the economy of the Service.

Before advocating any remedy, let us examine the present practice in regard to the annual grant of Parliament, called the Regent's allowance. Each officer who dines at the mess can drink a certain portion of wine either at or after dinner at a diminished price, the extra being charged to the Regent's allowance. It is obvious, therefore, (as I found when a subaltern) that in order to obtain this benefit the officer must also expend some portion of his pay, or to him the grant is a dead letter. But the injustice does not end here; for the allowance is so managed, that whatever is gained by the "Hard-up Sub.'s" abstinence, goes to augment the regimental mess fund. I will mention the grounds which were urged in my time for this practice. First: the gentility or respectability of officers drinking wine at the mess, although one-half, and generally two-thirds rose and left the table without doing so; as is, I believe, also the custom of the present day in the Infantry. A complete revolution has taken place in the habits of society since the original grant of the kind and princely donor. I once received a letter from the late Sir Charles Napier, in which he assured me that when he joined the 52nd Regiment as an ensign, he could not on 5*s.* 3*d.* a day afford to drink wine at all, and, consequently, abstained from so doing; and, he added, "my then commanding-officer, the celebrated Sir John Moore, being asked whether he considered a man temperate who only drank his 'first thirds' after or at dinner, replied, 'No, he may be a moderate, but he is not a temperate man.'" A friend of mine told me that he dined with the Duke of Wellington at Walmer, where seven out of thirteen, including the Duke himself, drank nothing but water. Supposing, however, that these examples fail in producing imitation, I ask what there is to prevent the quota of daily allowance being appropriated to lowering the messing of every officer, and thus enable the advocate of respectability to lay out the same sum in drinking his wine if he wish to do so?

The other or second reason which I have heard assigned is that the Regent's Allowance is a trust for a specific purpose—a trust, however, which to my certain knowledge is or has been violated by almost every regiment in the Service, when a temporary necessity has rendered it expedient. But the truth is, that no analogy whatever exists between a trust created for a particular object by the will of an individual founder and an annual grant of Parliament. Nay, if it did exist, the Secretary of State for War, who is the Lord Chancellor of the Army, has certainly an equal right with his civil coadjutor to interpose when the altered conditions and habits of society render it necessary for the public welfare.

All allowances granted to the Army by Parliament are given to Her Majesty in like manner with their pay, who, through her Secretary of State, directs their administration. All that is necessary to carry out the will of Parliament is that the officers of the various companies in Her Majesty's Service shall, either in their corporate or individual capacity, reap its benefit. It is forgotten that the longevity of this grant does not render it prescriptive, although it is highly probable it will never be revoked; but that fact renders it amenable to the authority of the Secretary of State for War.

Upon what other authority, I should like to know, than that of Her Majesty, did the very proper regulation in regard to mess and band subscriptions originate in 1827, and the equally appropriate instructions as to their application (of which, to my certain knowledge, some commissioned officers still entertain erroneous ideas), as contained in Her Majesty's regulations, under the head of "Interior Economy of a Regiment?" After forty-five years' service, and fifteen in command of a regiment, I hope I shall not be considered presumptuous in earnestly bringing this subject to the notice of His Royal Highness the Commander-in-Chief.—I am, sir, yours &c.,

G. O.

THE VICTORIA CROSS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Crowded as your columns necessarily are, will you afford me space to ask the Colonel-Commandant at Woolwich, whether Sergeant-Major Woon, who is stated in your paper to have saved the life of one of his officers, as also that of a drummer-boy, during the desperate assault upon the Chinese battery in the Peiho, at the imminent risk of his life, has been recommended for the Victoria Cross, an honour which the noble and gallant soldier too well deserves?—I am, yours, &c.,

A LOVER OF JUSTICE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The GAZETTE contains a notice of what probably is the final award of the Victoria Cross, for our recent military operations. I think the present time, therefore, is a fit occasion to direct attention to a disadvantage which those who served in the Crimea suffered as compared with their Indian brethren. In India, thanks to yourself, everyone recommended for the distinction by his brother officers had the advantage of this recommendation being made public at the time, and as a consequence it was (I believe invariably) ratified by the home authorities. In the case of the Crimeans the Victoria Cross was not instituted when many performed the meritorious acts. They were subsequently recommended by a committee of their brother officers, but this recommendation was not at once published (as was the case in India), and it followed that many so recommended—myself among the number—never heard of the matter again. As you are familiar with the circumstances of both campaigns, I merely direct your attention to the disadvantage under which we Crimeans laboured, and leave the matter in your hands for further elucidation.—I am, &c.

CRIMEAN.

THE PAYMASTERS' WARRANT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I heartily thank you for your just observations relating to the recent Paymasters' Warrant, in connection with which I would observe that the most simple mode of amending the conditions affecting old combatant and other officers (say quartermasters, whose services in the Crimean War you so justly appreciated) would be—the promulgation of a circular granting to those whose past services entitle them, with paymasters of five years' service, to 15*s.* per diem, to rank as honorary captains; and to those of twenty years' service, of which, at least, ten years shall have been as a commissioned officer on full-pay, including not less than five years as paymaster (who, in like manner, as paymasters of ten years' service as such receive 17*s.* 6*d.* a day) the rank of honorary-major.

Thus, the rank and pay would be consistent with each other—past services being recognised for the latter by the warrant of 2nd December, 1857, but ignored for rank by that of 27th January last. Civilian paymasters to remain as at present.—I am, yours, &c.,

ONE INTERESTED.

DESERTION IN THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Our military statistics prove that desertion has increased in the regular Army during the last few years to an alarming extent, and the loss to the nation thereby amounts to a considerable sum; for it is not merely the simple loss occasioned by one deserter, which makes it so serious a matter; but the fact that before he is caught, perhaps he has deserted four or five times, each time selling his clothes, taking the bounty, and joining a new regiment, only to repeat the trick on the first opportunity. Now, of all the causes which induce soldiers to desert from their regiments, I believe there is none more common than the loss of their clothes in the manner I am about to describe; especially in Woolwich, Chatham, Portsmouth, Sheerness, and similar garrison towns. After the canteen is closed, they obtain leave of absence, and stroll into the town, where they enter the various taverns, coffee-shops, &c., where, after drinking with such company as they happen to fall in with, one of the party is challenged to fight; of course his jacket and stock are taken off, and given to some one to hold whilst he goes out and settles his little difference in the old English fashion with his fists; whether he wins or loses the fight, the chances are he loses his jacket and never sees his stock any more; the party who so kindly volunteered to take care of it for him has made off, no one knows where. The man is afraid to return to barracks; he bolts, and probably enlists again within the month in some other regiment.

My attention was first called to this subject by an officer of artillery now on his way to China, and he pointed out the great difficulty of bringing to justice the guilty parties in such cases, as long as the numbers of old clothes' shops, where old uniforms, lace, and accoutrements are bought and sold without inquiry, are allowed to deal in soldiers' kits. Until some stringent regulations are made to check this nefarious traffic in the wardrobe of the nation, desertion in the manner I have described will continue a thing of daily occurrence.

If the Government made it illegal for any one to buy or sell any part of a soldier's uniform, the receivers of stolen property would be floored; for then the mere possession of such an article would carry conviction with it. Or the Government might hold monthly sales whither any soldier having any old article to dispose of, might bring it for sale, and after it had been conspicuously marked, it might be sold; and this mark alone, branded on it by special authority should be deemed sufficient to exempt any purchaser from the penalty attached to the possession of any article of soldiers' attire. This latter would only be a partial remedy, for no doubt the brand would soon be forged, and, therefore, I think it would be far better for Government to take the high hand, and say there shall be no traffic in soldier's kits. They shall be sold or returned every month, and used up in repairs, &c., in the regimental tailors' shops, or other clothing depôts. On muster day, when the Queen's regulations are read to recruits, they should be told that, in case of the loss of their uniform, they should have recourse at once to the Provost-Sergeant, who can now take a detective, and follow up the case,—I am, &c.,

TIB.

THE CAVALRY SERVICE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I wish to call your attention to the great injustice Mr. Herbert's alteration of the prices of these commissions inflicts on the present officers.

The Queen's warrant states that Her Majesty, taking into consideration the expenses attending the Cavalry Service, has been pleased to reduce the prices, and the Commander-in-Chief congratulates the Army on the boon. It appears to me that the first people who should be relieved are those who have so long suffered under the old system; but this is far from being the case, their position is altogether ignored, and a numerous class—the captains—have an extra sum of 50*l.* to pay beyond the former regulation for the rank of major.

I certainly think it would have been but an act of common justice to have restored to those officers, who had paid the old regulation, the difference between that and the new, or at least to have allowed them to reckon such difference when purchasing their next steps. As every officer on selling out receives this money from the reserved fund, the only advantage the Government derives from their present plan (which is much complained of) is the interest of this extra money, and the commission money of any poor fellow who may die in the Service.

I submit, should such considerations influence the War Minister of this great country in acting so unfairly to the Cavalry Service?

The object of the change is of course to open the Service to men of small means; but I venture to say that the attempt will fail, for no poor man can live in the Cavalry on the present scale of pay and allowances.—Yours, &c.

DRAGOON.

At the festival of the Royal Humane Society this week, several of the Society's medals were presented to the members of the two Services. One was given to Lieutenant F. Law, Royal Artillery, who gallantly saved his brother officer from drowning in a lake near Mhow. To Lieutenant Airey, 24th Regiment, who had nobly rescued from drowning private Buckley, of the same regiment. The next case was that of Captain Woodall, of the Royal Elthorne Light Infantry, who had saved the life of Mr. Gibson, the surgeon of the regiment. The next, and perhaps the most interesting, case was that of Mr. J. R. Whitehead, R.N. (aged 17), who had saved from drowning a gentleman, Mr. H. W. Goodered, who was sitting upon the steps of Ryde Pier, and accidentally fell into the water. The young hero was present, and his father returned thanks on his behalf, expressing a hope the society would join him in the aspiration that his son might ever "fear God and honour his Queen." The next case was that of Major Charles Crauford Fraser, who, during the battle of the Raptee, on Dec. 31, 1858, nobly rescued Major Stisted and four men of the 7th Hussars, who were washed on to a sand bank in the middle of the foaming torrent. And the remaining case was that of Captain Snow, of the Royal Marines, who had saved a person attempting suicide from the bridge into the Serpentine River.

THE NAVY.

ADMIRALTY, APRIL 28.

PROMOTIONS AND APPOINTMENTS.—Paymaster C. L. Cartwright, to be additional to the Cumberland; E. D. Herbert, to be additional to the Impregnable; and H. W. Arlidge, to be additional to the Wellesley.

Chief Engineer J. Barber, to the James Watt.

Engineers G. Rol, promoted and appointed Second-Class Assistant-Engineer in the Caradoc; W. W. Webber, promoted and appointed acting Second-Class Assistant-Engineer in the Neptune; and A. Bullions, acting Third-Class Assistant-Engineer, to the Asia, as supernumerary.

APRIL 30.—Lieutenant C. W. Thackeray, to the Wrangler, gun-vessel.

Paymaster J. Whittall, to the Ariadne.

First-Class Assistant-Engineer J. C. Gruchy, to the Terrible.

Third-Class Assistant-Engineer C. H. Pillar, to the Wellington, for temporary charge of the machinery of the Goldfinch; and F. Thornton, to the Fisgard, as supernumerary.

Acting Third-Class Assistant-Engineer R. Findlay, to the Terrible.

MAY 1.—Captains J. A. Paynter, to the Exmouth, vice Stopford, invalided; and W. C. Chamberlain, to the Racoon, vice Paynter.

Lieutenants A. Tupman, to the Forte, additional for disposal; R. L. Turton, and S. Long, to the Edgar.

Assistant-Paymaster J. M. Wortley, to the Victory.

Assistant-Clerks W. F. Woods, to the Euryalus; F. C. M. Sadler, to the Bacchante; J. W. Fetherstone, to the Neptune; and B. F. Meyer, to the Asia.

Acting First-Class Assistant-Engineer G. West, to the Fisgard, for temporary service, for charge of the machinery of the Bustler.

MAY 2.—Master S. Spain to the Cornwallis.

Clerk G. Shield to the Wasp.

Acting Assistant-Surgeons D. A. Alcock to the Victory, for service at Haslar Hospital; and F. F. Flynn to the Impregnable, for service, Plymouth.

Midshipman C. S. Broome to the Algiers.

Engineers G. T. Gibbs promoted to Second-Class Assistant-Engineer in the Asia, as supernumerary; J. R. Cooper, promoted to Second-Class Assistant-Engineer in the Cressy; W. Payne, promoted to Second-Class Assistant-Engineer in the Starling; R. Wallace, promoted to Second-Class Assistant-Engineer in the Supply; G. G. Scholee, promoted to Second-Class Assistant-Engineer in the Virago; T. Wilson, promoted to Second-Class Assistant-Engineer in the Ardent; F. W. Henderson, promoted to the rank of acting Second-Class Assistant-Engineer in the Renard.

MAY 3.—Captains Lord F. H. Kerr to the Impregnable, vice Stewart; and W. H. Stewart, C.B., to the Marlborough, vice Kerr.

Lieutenants C. G. Harvey to the Mersey; T. M. Magnay, H. M. Carre, and E. F. Weld, to the Excellent.

Masters H. G. Raynes to the Edinburgh, J. Penn to the Monarch, R. W. Ward to be additional to the Dauntless, and W. Jeffery to the Saturn for service in the Andromache.

Master's-Assistant A. Carr to the Melpomene.

Acting Second-Master J. D. Wiltshire to be additional to the Blenheim.

Acting Assistant-Surgeon D. R. Alcock to the Terrible.

Midshipmen C. W. Beaumont to the Hero; L. A. Bell, R. W. Davies, and C. M. Turner to the Bacchante.

Acting Third-Class Assistant-Engineer E. W. Pratt, and A. R. Moxham to the Megæra, as supernumeraries.

COAST GUARD OFFICE, APRIL 27.

APPOINTMENTS.—Commander J. B. Ballard, to be an Inspecting Commander of the Coast Guard, Milford Division, vice Glynn, period of service expired.

Commander F. N. K. Masey, period of service as Inspecting Commander, Fleetwood, extended by two years in consequence of gallant and intrepid conduct in saving life from shipwreck.

REMOVALS.—Commander John Norris Norman, from the Harwich Division, to the command of the Division at Swanage, in exchange with Commander Edward M. Shaw, removed to Harwich.

Aboukir, 90, Captain C. F. Schomberg, arrived at Portland late on Friday week evening from the westward.

Alban, paddle steam-vessel, in No. 4 dock at Portsmouth, is being broken up, the defects in her hull having been found of too extensive a nature to admit of repair. She is 33 years old.

Amphion left Malta for Corfu on the 17th.

Anson, 91, screw steam-ship, building at Woolwich, is being rapidly advanced towards completion. Her topsides are being painted, and the caulkers are proceeding with their work. She is ordered to be ready for launching this summer.

Assurance, Commander C. M. Aynsley, proceeded from Malta to Sicily on the 23rd ult.

Boxer, Lieut. T. S. Graham, arrived at Malta on the 21st ult. from Syracuse.

Bulwark, 91, is progressing very fast, and is now in a very forward state. The shipwrights are proceeding very expeditiously in planking the ship. She is to be launched towards the close of the present year.

Cadmus, Captain H. S. Hillyar, C.B., arrived on the 24th ult. at Malta from Beyrout, and would shortly leave for the West Indies.

Chanticleer, 17, corvette. This vessel is progressing very fast. She was laid down only three months ago, and she is in frame, except a portion of her stern.

Conqueror, 101, Captain Sotheby, arrived on Saturday from Plymouth at Portland.

Desperate, 8, was masted under the sheers in Keyham basin on Tuesday.

Doris left Gibraltar on the 17th for the coast of Morocco, as far as Mogadore.

Duncan, 104, has nearly completed coppering in No. 7 dock at Portsmouth.

Euryalus, 51, screw, Capt. Tarleton, C.B., steamed out of Portsmouth harbour yesterday, and, after proceeding round the Nab Light vessel to test her machinery, brought up at Spithead, where she will take in her powder and shell, previous to again proceeding on foreign service. She is reported to be ready for sea to-day.

Flying Fish, 6 screw, Commander Charles W. Hope, has gone into Portsmouth harbour from Spithead to make good a few trifling defects.

Forte, Captain E. W. Turnour, bearing the flag of Rear-Admiral the Hon. S. H. Keppel, K.C.B., embarked His Excellency Sir George Grey, Governor of the Cape of Good Hope, and *suite*, and taking a mail, sailed from Plymouth Sound on Monday afternoon for Table Bay, where the Forte will relieve the Boscawen, flag of Rear-Admiral the Hon. Sir Frederick Grey, K.C.B.

Glasgow, 51. A very large body of artificers are engaged upon this frigate, which promises to be one of the finest in the Navy. The scarcity of oak is felt in all our yards, and in this ship it scantiness is very apparent, as very little of that wood, except for timbers, is used in her construction. Not that this will be felt as a defect, for she is planked far below her water line with Moulmain teak, below which the best fir pine is used. The Moulmain teak is now very much employed in the Navy, and for planking it is an admirable substitute for oak. In some respects it is supposed to be better, for it is not so liable to rot. It is even asserted that in consequence of its containing a large portion of vegetable oil, that it preserves iron from rust, and that bolts of that metal might be used instead of copper for fastenings, at a great saving to the country. Of this we cannot speak positively, but it is well known that teak is very hard and durable, and does not splinter like many other hard and brittle woods.

James Watt. A Malta correspondent writes on the 28th ult., "A few days since, an *emeute*, or, at all events, something of the genus *emeute*, took place on board the James Watt, in consequence of which a court of inquiry has been held, but the result has not as yet been made public. The causes of the disturbance are not as yet known with sufficient accuracy to warrant my stating them. Rumour assigns some censure upon the manner in which the men had behaved at exercising in loosing sails in the morning as the cause; but such reason is not sufficient to account for an unusual exhibition of discontent, rudeness to officers, rolling shot, and breaking mess crockery, the usual exponents of Jack's dissatisfaction. The captain, on learning the state of affairs, at once repaired on board from the flag-ship, and ordered to beat to quarters; the men are represented as not repairing to their quarters in a lively manner."

Megæra, 6, screw, Commander Henderson, was towed alongside the dockyard jetty, Portsmouth, on Thursday to prepare for the reception of troops.

Melpomene, 51, screw-frigate, Captain C. Ewart, is expected at Spithead from Plymouth, when she will embark Vice-Admiral William Fanshawe Martin for the Mediterranean to supersede Vice-Admiral Arthur Fanshawe, who is appointed to relieve Vice-Admiral Sir Barrington Reynolds, K.C.B., Commander-in-Chief at Plymouth.

Nautilus, 6, Lieutenant B. Grant commanding, put to sea from Plymouth Sound on Monday, to exercise the boys in shortening and making sail, and returned to her moorings.

Octavia, 51, screw. The lowering of the afterbody of this frigate was successfully accomplished on Thursday morning in about half-an-hour, in Portsmouth dockyard. She will be lengthened by the stern 13 feet, which, with her additional main body, will give an increase of 73 feet in all.

Pluto, 4, Lieut.-Commander Cortland H. Simpson, arrived at Spithead early on Monday morning from the West Coast of Africa. She sailed from Sierra Leone on the 12th of March, with only 50 horse-power at work, being partially disabled. She had excessively strong gales off the Canary Islands, which compelled her to put into Santa Cruz to coal. Off the mouth of the Tagus she was again caught in a terrific gale, which compelled her to bear up for Lisbon, where she lay until the 13th. Had she not had a port under her lee to run for, it is the opinion of the officers on board that on this occasion she must have been lost. She met with a continuance of gales until the Bay was crossed, from north to north-east. On the 16th she bore up for Vigo, where she remained at anchor until the 19th, and had no sooner sailed thence than she was again compelled to anchor under the land from the violence of the weather, and her small amount of steam-power. She put to sea on the following morning, when another gale compelled them to come to an anchor in Corcubion Bay. She sailed from England in the first instance for the West Coast of Africa on the 3rd of December, 1857, but, striking on a rock on reaching Sierra Leone, she returned to England for repairs, after which she again sailed for the same station on the 13th of July, 1858, since which time she has been employed on different parts of the coast. She has taken two prizes. The Pluto has been remarkably healthy while on the coast, and has lost only one of her crew since leaving England, and he died from consumption. Her crew are a fine sailor-looking set of men. She proceeded to Woolwich to pay off.

Queen Charlotte, 104, in Portsmouth Dockyard, has had her masts and bowsprit taken out on Thursday to re-mast as the gunnery ship.

Racoon. Captain Chamberlain, recently appointed to the Racoon, vice Captain Paynter, took passage on Thursday in the Peninsular and Oriental Company's vessel, to take up his command.

Rinaldo, 17, screw, in the steam-basin at Portsmouth, has taken on board her boilers and the greater portion of her engine gear from under the steam-crane.

Royal Albert, 121, Capt. Lacon, was placed in No. 3 dock at Keyham, on Monday, to be cleaned and repaired; her false keel is slightly damaged aft.

Royal Oak, 91, one of the new line-of-battle screw-steamers ordered to be built at Chatham dockyard, will be at once laid down, and workmen are engaged in preparing the timbers for her.

Shamrock, sailed from Plymouth on Monday, to resume surveying duties.

Terrible, 21, Captain Frederick H. H. Glasse, in Plymouth Sound, is ready to sail for the Mediterranean.

Torch, screw-steamer, is fitting at Chatham dockyard for the first division of the steam reserve.

Trident is undergoing extensive repairs at Woolwich, and is to be brought forward to resume her former station on the African coast.

Urgent arrived at the Cape of Good Hope on the 28th of February. Light winds had been experienced during the passage out. One woman and one child had died on the passage, the woman from the effects of a sunstroke. The Urgent sailed from Queenstown to China on the 12th of January.

Victoria, 121, screw, leaves Portsmouth to-day for trial of her engines and boilers, and on Monday her speed will be tested at the measured mile in Stokes Bay.

Wanderer, 4, screw despatch gun-vessel, built by contract some four years since, and paid off into ordinary in January last, has been ordered to be surveyed at Chatham in order that a report may be made on her condition. She is partially opened, and the result has more than justified the fears entertained—a considerable portion of the timbers being in a very rotten and decayed state, and the workmanship very faulty. It is not known at the dockyard where she was built. The two mortar-vessels, Nos. 30 and 32, in No. 2 dock, built by contract at private establishments during the Russian war, have also been surveyed, and a considerable portion of the planking removed, when many of the timbers were found to be in a very rotten and decayed state, and the workmanship equally bad. Two other mortar-vessels have turned out upon examination to be so rotten that it is a question whether they can ever be rendered serviceable.

The Duke of Somerset held his seventh levee of the season at the Admiralty on Thursday afternoon. The following officers were present: Rear-Admiral Smart; Captains S. S. L. Crofton, M. S. Nolloth, W. R. Rolland, F. Liardet, S. Brock, C.B., E. St. L. Cannon, E. G. Fishbourne, W. G. Lake, N. E. B. Turnour, Hon. George D. Keane, Hon. C. Baillie; Commanders J. M. Jackson, E. Sterling, G. A. Phayre, Hon. W. F. Ward, John Moresby, Robert D. Aldrich, J. E. Bingham; Lieutenants C. T. W. Cerjat, John W. Pike, S. J. Brickwell, C. M. Chapman, John D. Ramsay.

A demonstration took place on Thursday at Portsmouth in honour of the birthday of the King of Sweden and Norway, and as the Swedish corvette Najaden was at anchor at Spithead, the whole of the English squadron, with the garrison guns, fired simultaneously a Royal salute of 21 guns each, and the Norwegian standard was hoisted at the main of all the English ships-of-war, as well as on many flag-staffs on shore.

The Hon. Robert Duncas, Storekeeper-General of the Navy, and Captain Charles Eden, C.B., one of the Lords of the Admiralty, paid an official visit this week to Woolwich Dockyard, and inspected the new arrangements for transmitting the factory stores ordered to be annexed to the Storekeeper's department, and put into operation on the 1st of April, the commencement of the present financial year. They were accompanied by Commodore Drummond and the principal officers of the yard. The visit was likewise extended to a minute inspection of the model screw steam-schooner Ranger, Commander Wratislaw, in a forward state for sea, when some new internal arrangements were suggested and ordered to be adopted for the convenience and accommodation of the officers and the freer ventilation of the berths. They likewise visited the paddlewheel steam-sloop Hecate, ordered to be brought forward for commission, and which is being fitted with a small poop-deck, to be used as a chart-room, in order to facilitate the surveying duties for which she is about to be despatched, in the Pacific.

In consequence of the demise of Vice-Admiral A. Renton Sharpe, C.B., a vacancy occurs on the list of flag-officers in receipt of service pensions; and as the appointments to those vacancies are made from the active list, the following promotions will take place:—Captain Sackett Hope (1840), who is in receipt of the pension for wounds, and who is also in the list of officers on the out-pensions of Greenwich Hospital, becomes Rear-Admiral on reserved half-pay; Captain Robert Fanshawe Stopford (1840) becomes Rear-Admiral of the Blue; and by the promotion of Captain Stopford to flag rank, a good-service pension falls to the patronage of the First Lord of the Admiralty; and Captain Robert Spencer Robinson (1840), a recipient of the good-service pension, and in command of the Wellington, 72, guard-ship of steam ordinary at Devonport, becomes the senior officer for promotion to flag rank.

Admiral Mundy's fleet, consisting of the Hannibal, Renown, James Watt, Agamemnon, Scylla, London, and Assurance, were at Malta on the 21st. Her Majesty's ships Victor Emmanuel and Amphion left Malta for Corfu on the 21st, and the Orion for Plymouth on the same day. At Gibraltar, on the 26th, were Her Majesty's ships Scourge, Lapwing, and Quail.

Lieutenant Alexander Buller has been appointed Flag-Lieutenant to Vice-Admiral W. Fanshawe Martin, Commander-in-Chief on the Mediterranean station.

Mr. Thomas Bailey, second foreman of smiths at Chatham dockyard, has been appointed first foreman at Devonport dockyard. The following superannuations have taken place:—John Long, spinner, 45*l.* 5*s.* 10*d.*, and Samuel Leppingwell, rigger, 41*l.* 14*s.* 8*d.* per annum.

Malvina, hired screw-steamer, belonging to the St. Petersburg Steam Navigation Company, sailed from Portsmouth on Saturday, with the Waterford Militia Artillery on board, for Waterford. The officers and troops on board comprised Captains Gyers, Lymby, and Power; Lieutenants Pawer, Ussher, Greer, Blake, Mountford, Clarke, Sullivan, Harrison, and Swale; Captain and Adjutant Glubb, Paymaster Elliott, Surgeon Gore, Quartermaster Hard, 24 sergeants, 7 drummers, 14 corporals, 227 privates, 37 women, and 62 children; two officers' wives and five officers' children. The Malvina arrived at Waterford on Monday, and proceeded to their barracks preparatory to disembodiment.

A return was printed on Saturday by which it appears that the total number of officers employed in the Navy on the 1st of March last was 1118, and unemployed 2466. Of the employed five were vice-admirals, 16 rear-admirals, 113 captains, 203 commanders, and 781 lieutenants. Among the unemployed were one admiral of the fleet, 21 admirals, 22 vice-admirals, 35 rear-admirals, 35 captains, 241 commanders, 288 lieutenants, 303 reserved flag-officers, 98 retired do., 122 retired captains, 59 reserved captains, 99 retired captains, 217 reserved commanders, 109 retired commanders, 359 reserved lieutenants, 487 retired lieutenants. The per centage of employed officers is stated to be 31½, and of unemployed 68½.

Digitized by Google

We understand that His Excellency the Governor of Malta, Sir T. Gaspard Le Marchant, leaves Malta on the 14th of this month for England, on six weeks' leave of absence, on urgent affairs. His Excellency will be accompanied by his private secretary, Captain W. Brett, and his aide-de-camp, Lieut. Romilly, 23rd Fasiliers. During his absence the government will devolve on Major-General Warren, C.B.

His Royal Highness Prince Alfred, accompanied by Lieut.-Colonel F. Cavendish, arrived at Woolwich by the North Kent Railway at two o'clock on Monday, and immediately proceeded to the dockyard, where he was received by Commodore Superintendent the Hon. J. R. Drummond, C.B. After taking refreshments at the commodore's residence His Royal Highness proceeded to the steam factory department for the purpose of inspecting a vertical boiler, made at Birmingham, from a design of the Earl of Dundonald, and forwarded to Woolwich for experimental purposes. After visiting the numerous factories, His Royal Highness proceeded to view the Ranger, the first of a new class of gunboats now completed, and other vessels in a forward state. The Bustler, steam-vessel, was manned by the crew of the Admiralty steam-yacht Black Eagle, Commander Petley, and at half-past three o'clock His Royal Highness, attended by Colonel Cavendish, Commodore Drummond, Mr. Macdonald, master-attendant of the Fisgard, flag-ship, &c., embarked on board, and subsequently landed at Blackwall pier, from whence the party proceeded to the works of the Thames Iron Ship Building Company, and His Royal Highness was much interested in minutely inspecting the enormous steam-ram vessel now building for the Government at Bow Creek. His Royal Highness and party also visited Messrs. Green's and other establishments.

By direction of the Admiralty an inquiry is now being instituted as to the police arrangements of the whole of the Government dockyards, with the view to the adoption of a more uniform and efficient system. The Woolwich and Deptford yards have for many years been under the surveillance of the Metropolitan Police, and an experienced superintendent of that force is now engaged in a tour of inspection through all the dockyards not within the metropolitan district, for the purpose of preparing a report on the subject named.

PRESERVATION OF LIFE FROM SHIPWRECK.—A meeting of the Royal National Life Boat Institution was held on Thursday week at its house, John Street, Adelphi, Thomas Chapman, Esq., F.R.S., in the chair. Mr. Lewis, the Secretary, having read the minutes of the previous meeting, a reward of 11*l.* was voted to the crew of the Institution's lifeboat stationed at Teignmouth, for putting off early on the morning of Monday week, when it was very dark, and rescuing from the rigging the crew of two men, who were found nearly benumbed with cold, from the sloop Wonder, of that port, which, during heavy weather, had sunk in the course of the night. A few months ago this same valuable lifeboat was instrumental in bringing into port a disabled barge and her exhausted crew. A reward of 6*l.* 10*s.* was likewise granted to the crew of the Lytham lifeboat belonging to the National Institution, for going off during a heavy gale of wind, and rescuing the crew of eight men from the brigantine Nancy of Teignmouth, which, having struck on the dangerous sand called the Horse Bank, immediately afterwards sunk. A reward of 4*l.* 10*s.* was also voted to the Lossiemouth lifeboat, belonging to this Institution, for putting off with the view of rescuing the crew of a pilot boat which had been swamped during a sudden squall in that bay. A reward of 5*l.* was also presented to the crew of the lifeboat at Kessingland, Suffolk, for putting off and rescuing the crew of seven men from the brigantine Little Joe, of North Shields, which, during a gale of wind, was wrecked near that place on the 19th ult. The Ramsgate lifeboat, belonging to the Royal Harbour Commissioners, was reported to have rendered, at the imminent peril of the crew's lives, important services, in conjunction with the Commissioners' steam tug, on the night of Friday 20th ult., to a vessel on the Goodwin Sands. Various other rewards were also voted for gallant exertions in saving life from different wrecks on the coast. On one of them was found a lad, son of a coastguardsman at Helrick, near Dungarvon, who was insensible when picked up. Having been placed on his face in the boat, the method of the Institution, founded on that of the late Dr. Marshall Hall, was immediately resorted to, and after twenty minutes of unceasing treatment, the boy was fortunately restored to conciousness. These excellent rules are distributed everywhere on the coasts of the British Isles, and they ought also to be so on the banks of all our inland rivers. During the past month the Institution had forwarded new lifeboats and transporting carriages to Penzance and Porthcawl, and another was about to be sent to Silloth on the Cumberland coast. The cost of the two last named boats had been presented to the Institution by Miss Burdett Coutts and another benevolent lady. The Society decided on presenting its thanks inscribed on vellum to Miss Dix, an American lady, in acknowledgment of her philanthropic labours in establishing, at her own expense, several lifeboat stations on the coasts of the United States and British possessions in America. It was also a lady, the sister of a sailor, who first presented the cost of a lifeboat to the National Lifeboat Institution. Her humane example has since been followed by many persons. It was reported that the Institution expected to have, by the return of the equinoctial gales, one hundred and three lifeboat stations on various parts of the coasts of the British Isles, in thorough working order. It is to be hoped that the public, by their contributions and endowments, will enable the Society to maintain this noble fleet in a perfectly efficient state. The Charter of Incorparation, granted by the Crown to the National Lifeboat Institution, was produced at the meeting. The Society having thus become one of the established important institutions of the country, it is hoped that it will be enabled, by the permanent support of the public, to pursue successfully its efforts in the cause of humanity. Messrs. Clayton, solicitors, of Lancaster Place, Strand, had generously declined to accept any remuneration for their valuable services in assisting the Institution to obtain the charter. Payments amounting to 597*l.* having been made on various lifeboat establishments, the proceedings closed.

A letter from Hongkong, dated March 15, says:—"The Samson arrived yesterday evening from Cheefoo and Shanghin; the gunboats all safe at the former place on 4th March. It is said the Chinese are assembling 50,000 cavalry at Tientsin. The mail sailed on 15th March."

MANNING THE NAVY.

It must be evident that in war time we must look to the mercantile marine for men, and it is said that unfortunately there is rising up a class of men, who have somewhat degenerated in that love of their country, that spirit of daring enterprise, that led their fathers from victory to victory, and characterised them above all other seamen of the world.

A great change has been gradually produced in our marine. The empire has extended; commerce has extended; free trade has been introduced; and it appears that absolutely nothing has been done for that class to whom England is indebted for all this extended greatness.

The seamen who fought our battles have always been, after every peace, discharged; some with small pensions, most without any, to live or starve as they might.

The seamen who navigated our merchant ships, and ventured their lives in bringing to our ports the wealth, luxuries, and common necessaries of life from all the nations of the earth, have invariably been forgotten in like manner after the completion of their valuable services.

Both classes, whether serving in the Navy or the mercantile marine, were no doubt influenced, in a great measure, in choosing a sea-faring life, by love of daring and arduous enterprise. In leaving their homes, the ordinary duties of domestic society were necessarily interrupted: parents were left, brothers and sisters estranged, or fathers separated from their wives and children; and these adventurous men, cut off from society and living among the dangers of the ocean, acquiring habits peculiar to such a mode of living, were always a distinct class, easily identified from other classes, of generous dispositions, too often verging on the extreme of carelessness and squandering.

At all times the condition of English seamen has been such as to prevent many a thinking parent from sending their sons to sea. Of late years, however, another evil has been brought into practice: scarcity of seamen has obliged ship-owners to receive into their ships men of all nations. We may get a few good men from the Danes, Swedes, Norwegians, Prussians, or Dutch. But since the rescinding of the Navigation Laws, and the introduction of free trade, all those countries have very much extended their commercial and nautical pursuits; consequently the larger proportion of foreign seamen come from the Africans, Malays, Lascars, Chinese, and a degenerate class of Portuguese and Spaniards.

These various descriptions of men are immediately associated with our young sailors, and their morals, if they ever sprang from such parts of the community wherein it might reasonably have been expected that good morals would be more or less inculcated, soon become contaminated.

Do the measures recommended by the Commissioners for manning the Navy ameliorate this sad state of the mercantile marine? Government interference with private speculation and contracts is not generally to be desired; but the nation owes to our seaman a debt of gratitude, and there should be a provision made for all who may be dependent upon his energies, when from shipwreck, or other causes, he may be unable to support them; there should be schools to receive the sons and daughters to whose instruction he is personally unable to attend.

If a sum of not less than 10*s.* for every year served as a seaman, 1*l.* for service as a mate, and 2*l.* for service as a master, were paid annually according to their length of servitude, no doubt most of the difficulties of manning the Navy, now generally admitted to exist, would be removed, and great good would grow therefrom in the moral improvement of our seamen.

The following is a crude estimate of the expense of enrolling 100,000 seamen according to a scheme submitted to the late Board of Admiralty:

30,000 men, whose average period of serving may not exceed six years, at a retaining pension of 10*s.* for each year's service, viz. 3*l.* each . .	£90,000
10,000 petty officers, whose average period of service may not exceed ten years, at a retaining pension of 1*l.* for each year's service as petty officer, and 10*s.* for each year's service as a seaman, say 6*l.* each	60,000
Total for the Navy, in addition to long service pension granted on expiration of service . . .	150,000
Seamen in Merchant employ, say 45,000 seamen voluntarily enrolling in the Naval Reserve, whose average period of service may not exceed six years, at a retaining pension of 10*s.* for each year's service, viz., 3*l.* each	135,000
10,000 Mates of Merchant ships, whose average period of service may not exceed ten years, at a retaining pension of 1*l.* for each year's service as a mate, and 10*s.* for each year's service as a seaman, say 6*l.* each	60,000
5000 Masters of Merchant ships, whose average period of service may not exceed twelve years, at 2*l.* for each year's service as master, 1*l.* as mate, and 10*s.* as seaman, viz., 12*l.* each . .	60,000
Total	£405,000

Exclusive of expenses in training, &c.

The estimate of expense (according to page 18, of the late Commission) for Manning the Navy with 31,000 men was	£598,821

So that the plan above indicated offers a large saving and a great increase of efficiency, supposing it founded on sound principles.

NAVAL MUSEUM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your Correspondent "J. D.," in last week's GAZETTE, has made a most valuable suggestion. The Admiralty Model-Room is literally unknown to the general public; and I don't know how the general public can either hear of its existence, or gain admittance to it, if they did. And yet the Patent Museum at Brompton, and the Model Gallery at the Crystal Palace, are visited with the greatest interest; imperfect though they be in their respective collections. Both these establishments would doubtless be eager to appropriate the Admiralty models, and would make little difficulty as to accommodating them; but unquestionably the claims of the Royal United Service Institution must be regarded as superior in every respect.

In the first place, if the Navy models were arranged in scientific order, they would become useful, indeed necessary, as an adjunct to the Shipbuilding Department of the Admiralty; and they ought, therefore, to be conveniently situated for being visited by the officials and inventors with whom they may be in communication, with regard to improvements in ship-building and marine propulsion. Well, then, the Royal United Service Institution is nearer the Admiralty, Whitehall, than even Somerset House, where the Model-Room now is.

In the next place, I understand there is great want of accommodation at Somerset House for the Admiralty Department there; and the Model-Room itself is so crowded as, in many respects, to contrast most unfavourably with the superior arrangements at Brompton. It is more like a lumber room than a room containing most valuable models. The removal of the Model-Room from Somerset House seems, therefore, to be inevitable.

If I differ in the least with your correspondent, "J. D.," it is in respect of the doubt he throws out as to the want of space in Whitehall Yard for accommodating the Admiralty models. An immense deal has been done in the last few years to improve the whole arrangements of the United Service Museum, which is one of the most interesting collections in London. The Council of Management have been weeding out some parts of the collection as not being quite within the scope of the Institution; and the building is so constructed and so situated as, in my opinion, to be capable of almost indefinite enlargement, till it might eventually extend to Sir Richard Mayne's premises in Scotland Yard, where it might be adorned with a new façade nearly opposite the Admiralty. But I will leave this point for discussion by the Council of the Institution itself. Be assured the valuable idea suggested by your correspondent must come to something. And under whose immediate management would the Admiralty models be placed if transferred to the Royal United Service Institution? Under such distinguished officers as Captain Sir William Wiseman, Bart., Captain E. Gardiner Fishbourne, C.B., Captain Nolloth, of the Royal Navy, with other officers, who form the Committee of the Council especially charged with such matters.

If I might make a suggestion to "J. D.," with reference to his promise to return again to this subject, I would venture to request that he would elaborate completely in detail the promising outline he has sketched of what such a Naval Museum ought to be, and come and read his paper in our lecture theatre. Recollecting what our Museum was when I first became a member, nearly twenty years ago, and looking at it now, I am bold to say the Council and Curator have done the best with what we do possess, to give the institution a claim to be entrusted with the carrying out of "J. D.'s" most valuable suggestion. I think I may also promise him a hearty welcome if he will pay us the compliment of ventilating the subject fully at one of our evening meetings.—I am, sir, yours, &c., A MEMBER R.U.S.I.

MONTHLY PAYMENTS TO THE FLEET.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I observe that you have opened your columns to those who wish to discuss the principles advocated in the report of the Committee on Record Books, &c. I ask therefore for a small space in order that I may point out a few arguments in favour of monthly payments. It is true that the report is confined (in accordance with the Committee's instructions) principally to the book-keeping part of the subject, and, for that very reason, I will confine my remarks to the other branch of the question, viz., whether monthly payments will or will not be an improvement on the present system.

I am an advocate for the proposed change, as tending to civilise the man-of-war's man, and by familiarising him with the use of his money, tending to check his now too frequent abuse of it.

There is one point quite overlooked by those who are averse to change, viz., that those men who are so disposed can and do under the existing regulations obtain a large proportion of their wages at monthly intervals; but in an underhand and demoralising way. The means adopted on the home station are to allot to an agent, who (first deducting a handsome per centage for himself) remits the money back to the allottee. On foreign stations remittance-bills are made use of in addition to the allotment. If, then, a man has it in his power to get hold of his money in this underhand way, it will be far wiser to give it him by law than to tempt him to these irregular practices.

One of your contemporaries anticipates amongst other dreadful results from the proposed change, all sorts of "gambling, thieving," &c. Those who think with him forget that the "gamblers, thieves," &c., can now receive by fair means as much in some cases as 24*s.* per month, and that, by the unfair means I have described, they frequently manage to get considerably more, so that when allowance has been made for the requisite expenditure in clothing, &c., it will be found that the monthly settlement would not afford these "thieves and gamblers" additional money much beyond 10*s.* or 15*s.* I ask your contemporary whether a badly-disposed man is likely to get into much more trouble from possessing 34*s.*, than from possessing but 24*s.*? The value of the additional monthly sum to the steady married man cannot be denied, and it is hard that he should be debarred from his rights for the sake of a hypothetical advantage to the scamps he may be associated with. The saving by Government of the scamp's money for what your correspondent, "Paymaster," calls a good pay-day, only means saving it up for a longer bout of debauchery and drunkenness. Fearing to trespass further on your space,—I am, &c. STEAM.

THE COAST-GUARD SERVICE.—The value of wrecked property saved by this useful and gallant body of men amounts, for the year 1859, to a sum of upwards of 800,000*l.*, and the number of persons rescued by them from a watery grave, during the same period, to no less than 1250. The total charge for the coast-guard force provided for in the Estimates for the past year was 724,953*l.*

SUNDAY IN THE NAVY.

A book, lately published by Lieutenant Alston, R.N., entitled "Seamanship; or, The Associated Duties of the Royal Navy," contains a passage, showing the manner in which Sunday is spent on board many of our ships-of-war.

"Sunday, the blessed day of rest, is too frequently a day of bustling fatiguing duties, and the most undesired of all the seven. From the hour of commencing work in the early morning until the pipe to dinner at last releases you, there is often no cessation. To those on whom the work of the ship devolves Divine Service is no relief, for it is then felt to be part of a relentless routine that has to be gone through, and they are only too glad when what, week after week, seems an interminable repetition, is brought to a close. I know of no remedy for this serious evil short of a total change in the character of the day as it is at present viewed. Instead of looking upon it as the first day of a new week, with your hands clear until the work of the week on the morrow commences, it is generally considered the winding up day of the previous week, when all its accumulated details have to be examined and gone into. On Sunday the paymaster makes up his books, and gives in his report; warrant officers' accounts, and midshipmen's logs are written up and sent in; defaulters' books and defaulters examined; articles of war read; ship's company mustered by open list; and the whole ship-decks, holds, and store-rooms, minutely and rigorously inspected, which is then followed by a lengthened service of prayer and homily. Unless the above necessary duties are transferred to another day—Thursday, for instance—I cannot see how the sacred nature of the Sabbath is to be maintained. In some ships holystoning is omitted on Sunday, and top-gallant yards are crossed on the previous afternoon, and so far so good; but, to be consistent in this, the rigorous Sunday inspection, with its jading, temper-breaking preludes and accompaniments, should be simplified as much as possible. By all means muster at division, but leave the general inspection of the ship for a week-day. A well-regulated ship should always be ready; but the usual Sunday spruceness, obtained at so great a sacrifice, is frequently only a great deception, and by it that which is known by the name of divine service is rendered a soulless and compulsory piece of acting. Under such circumstances, no one for a moment can imagine that men who, from their habits, are totally unaccustomed to any but the briefest contemplation or connected thought on abstract subjects, can give their minds for an hour and a-half to the devotions they are assembled to take a part in. Of course, such a startling impossibility is not entertained by anyone; and we are therefore driven to the conclusion that Divine Service is often only maintained for the mere sake of keeping up appearances, and to be in accordance with the 'Articles of War.'"

COURT-MARTIAL AT DEVONPORT.—A court-martial assembled on board the Impregnable, flag-ship, on Friday, the 13th ult., for the trial of Mr. Alexander C. Yule, late paymaster of the Hydra, on a charge of not rendering his quarterly victualling and clothing accounts for the three quarters ending respectively June 30, September 30, and December 31, 1859. The following officers comprised the court:—Rear-Admiral Sir T. S. Pasley, president; Captains R. S. Robinson, Wellington; W. J. Williams, Royal Adelaide; G. H. Seymour, C.B., Hero; F. H. H. Glasse, C.B., Terrible; D. Curry, Aboukir; A. W. Jerningham, Cambridge; E. S. Sotheby, C.B., Conqueror; C. J. F. Ewart, Melpomene; Mr. W. Eastlake officiating judge-advocate. Prisoner pleaded guilty, and Mr. J. Beer, who assisted him, read a statement, which set forth that although he could not gainsay the fact that he had not sent in his accounts, contradictory to the regulations, yet that this had not been caused by any discrepancy, but was simply the result of physical inability to prepare them. Nearly six years before he had been attacked with epilepsy, from fits of which he still continued to suffer; and this had produced a torpidity of his intellectual faculties. For the last five years, with the exception of three months, he had been employed in active service, but the accounts had been rendered for that period, with the exception of the three quarters alluded to in the charge. His accounts when sent in would prove that he was no defaulter; one quarter's were already before the Admiralty, another quarter's were nearly ready, and, with the assistance he had now obtained the third also would soon be done. It was only because when at sea he was unable to procure such assistance that they had not sooner been rendered. The disease under which he laboured he believed to be hereditary, and he should throw himself upon the clemency of the court. He had been in the service for twenty years, during part of which period he had been called upon to serve in the West Indies, and this, he believed, had accelerated his disease. A number of certificates, giving prisoner a good character for diligence, sobriety, and attention, were then handed in. The last, from the commanding officer of the Hydra, gave a good character for sobriety, but not for diligence. Mr. Beer then called the Rev. John Yule, the prisoner's brother, who stated that he had never seen his brother in a fit, but had no doubt that he suffered from them. In his correspondence with him he had observed a great diminution of mental power; and during a few months that he had been an inmate of witness's house he had shown weakness of mind. He believed his brother to be utterly unfit for the performance of business.—The finding of the court was to the effect that the prisoner having been proved to be unfit for the discharge of his duties, be placed on half-pay, and not be again employed unless pronounced by medical survey fit for active service.

Marshal Randon, in his report to the French Emperor, dated 13th of April, recommends that, in consequence of the great difficulty of obtaining conscripts of the height laid down by the Regulations of 1857, the standard be reduced one centimètre throughout the Service. The Emperor has confirmed this suggestion, and desired it to be carried out in future. The present standard requires Carabineers to be 1 mètre 76 centimètres in height; Dragoons, 1·69; Chasseurs d'Afrique, 1·66; and soldiers of the line, 1·56. Thus, the tallest recruit must be 5 feet 9 inches; the smallest about 5 feet 2 inches.

THE MILITIA.

SOUTH DEVON.—On Monday last this fine body of men, under the command of Lieut.-Colonel Lord Churston, assembled at Mutley, having been called out for 27 days' training. They muster about 390, there being remarkably few absentees. On Monday evening the regiment marched through the town to their quarters at Millbay, and we congratulate their noble commander on the truly martial and most orderly appearance they presented. We are informed that the regiment is composed of finer men, and is altogether in better condition than has been known for many years.—*Plymouth Mail.*

The East Essex Rifle Militia, under the command of Lieut.-Colonel Edward Henry Moore Kelly, assembled at Colchester on Monday for their annual training of 28 days. In consequence of the numbers who have volunteered into the Line, and the migratory character of the men, who are chiefly agricultural labourers, the strength of the regiment is small, the defaulters numbering nearly 200 men.

The West Essex Regiment, under the command of Lieut.-Colonel Ruggles Brise, assembled on Monday at Chelmsford, for a similar period of drill. There was from this regiment also a heavy body of defaulters.

The Ross, Caithness, Sutherland, and Cromarty Rifles, commanded by Lieut.-Colonel Ross, will assemble at Dingwall on the 7th of June for 27 days' training. The regiment will be marched to Fort George and quartered there during the training.

The Royal Aberdeenshire Highlanders are to assemble for 27 days' training on the 4th of June, under the command of Lieut.-Colonel Knight Erskine.

On Monday the Royal London Militia, Colonel Alderman Wilson, assembled for 27 days' training, at the head-quarters of the regiment in the City Road. Colonel Wilson and the officers of the Staff were in attendance early in the morning, and during the day upwards of 700 volunteers answered to their names, and received their uniforms, arms, and accoutrements, and on Tuesday commenced training in the Artillery Ground, Bunhill Row.

The 1st East Middlesex, Lieut.-Colonel Clark, commandant, mustered on Monday morning, at Hampstead, for 27 days' training; also the 2nd Middlesex (Edmonton) Rifle Militia, Colonel Lord Enfield, at Barnet; the 4th South Middlesex, Lieut.-Colonel Scriven, commandant, at Hounslow; the Royal (Queen's Own) Tower Hamlets Militia, Colonel Lord Wilton, at Bethnal Green; the 1st Royal Surrey Militia, Colonel Evelyn Palmer, at Richmond; the 3rd Royal Surrey, Lieut.-Colonel C. B. Challoner, at Kingston-on-Thames—each regiment being called up for 27 days' drill. The total number of volunteers who appeared at the head-quarters on Monday was 8400.

The 3rd, or Royal Westminster, Light Infantry Regiment of Middlesex Militia, under the command of Colonel Viscount Chelsea, assembled at head-quarters on the 30th ult., for 27 days' training and exercise, and mustered upwards of 500.

The Hampshire and Hereford Regiments of Militia assembled at their respective head-quarters on Monday for 27 days' training.

On Tuesday 16 Irish Regiments of Militia mustered at their respective head-quarters, and between this day and the 28th instant, there will be 31 regiments of Irish Militia out training for 56 days each.

The Inerness-shire Highland Light Infantry, under the command of Lieut.-Colonel the Hon. Simon Fraser, will assemble at Inverness on the 1st of June, and proceed to Fort George for 27 days' training.

The following appointments have been made in the North Cork Rifles, the commissions having been signed by Lord Fermoy, Lieutenant of the County. Edmund Roche, Lieut.-Colonel, unattached, to be Major; Ensign Thomas Richard Gabbett, to be Lieutenant; Colour-Sergeant John W. Johnson, to be Quartermaster.

Lieutenant Chambre Baldwin, of the South Cork Light Infantry, has been promoted to a captaincy in the regiment.

The Kilkenny Fusiliers, to the number of 300 men, assembled on Tuesday, and commenced their 27 days' training.

The 5th West York Militia Regiment is to assemble at Knaresborough on the 25th instant for 28 days' drill and training.

The Kent Artillery Regiment of Militia has mustered at Dover for 27 days' training, under the command of Lieut.-Colonel John Farnaby Cator.

The Herefordshire Regiment of Militia has been called out for 30 days' training. The regiment consists of between 500 and 600 men, who have been supplied with the Enfield rifle.

The Royal Monmouthshire Regiment of Militia assembled at Monmouth, on Monday last, for 27 days' training, under the command of Lieut.-Colonel J. F. Vaughan.

Now that the Militia are called out for the annual training it will be of interest to observe what was their strength at the last training, as it is stated in a Parliamentary return. On that occasion the numbers of the disembodied Militia in attendance were 44,340; the absentees were no less than 30,557. Let us hope that it will be otherwise this year. The regiments are now to be called out simultaneously. It is curious to observe a difference in the returns for the three kingdoms. In Scotland the absentees, though numerous enough, were not half so many as the number in attendance; in England the absentees were equal to two-thirds of the number who presented themselves; in Ireland the absentees would really have made almost as large an army as those who were present, for 9037 attended, and 7937 were absent. Of the embodied Militia the effective strength at present is 23,735; the number wanting to complete the force up to its nominal strength, 8831.

The Militia Gazette.

WAR OFFICE, PALL MALL, MAY 1.

Queen's Own Light Infantry Regiment of Tower Hamlets Militia—John Robert Buchanan, Gent., to be Lieutenant, vice Wood, resigned; George Sykes, Esq., to be Surgeon, vice Falconer, resigned; George Cochrane Millar, Esq., to be Assistant-Surgeon, vice Sandford, resigned; April 27.

East Kent Regiment of Militia—Arthur Henry McKenna, Gent., to be Ensign, vice Marjoribanks, resigned; April 27. Ensign Clement Wolseley Fetherstonhaugh to be Lieutenant, vice Tanner, appointed to the 100th Foot; March 29.

1st Regiment of the Royal Surrey Militia—Ensign Henry Astley Harding to be Lieutenant, vice Whitmore, resigned; April 27.

Hertfordshire Militia—Lieutenant Robert Bruce Fellows to be Captain, vice Adolphus Meetkerke, resigned; Assistant-Surgeon Henry Francis Coley to be Surgeon, vice Charles Robert Thomson, resigned; April 28.

Artillery Regiment of Royal Lancashire Militia—James Grant Stephen, Esq., to be Captain, vice Benjamin Remington Williams, promoted; April 21.

5th Regiment of Royal Lancashire Militia—Captain James Greenwood to be Major, vice Alan Chambre, resigned; April 21.

Royal Berks Militia—Harry Charles Norris, Gent., to be Ensign; April 24.

1st Regiment of King's Own Staffordshire Militia—Ensign Robert Hamilton Playfair, to be Lieutenant, vice Blake resigned; April 26.

2nd Royal Lanarkshire Militia—Ensign Albert Owen McDermotte, to be Lieutenant, vice Andrew Smith, resigned; April 9. Ensign Oliver William Simpson Hoare, to be Lieutenant, vice John David Campbell, resigned; April 27.

WAR OFFICE, PALL MALL, MAY 4.

Memorandum—Royal London Militia—Her Majesty's Commissioners of Lieutenancy for the city of London have, in conformity with section 79, forty-second George Third, cap. 90, been pleased to grant the Honorary Rank of Lieutenant to Quartermaster John Birkin; April 13.

Cambridgeshire Militia—Ensign William Henry Baldwin to be Captain, vice Ashley, deceased; April 28.

1st Regiment Royal Surrey Militia—Ensign George Papplewell Walker, to be Lieutenant, vice Taylor, resigned; William Thomas Locke, Gent., to be Ensign; May 2.

2d West Regiment of Yorkshire Yeomanry Cavalry—John Dearden, Esq., late Captain 13th Light Dragoons, to be Cornet, vice Horne, resigned; April 18.

Memorandum—5th Regiment of West York Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held by Major William de Cardonnel Elmsall.

Royal South Lincoln Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held by Lieutenant John Mahon Williams.

Eastern Regiment of Militia—Second Lieut. Joshua Thelusson Rowley to be Captain, vice Gorton, resigned; Jan. 6. Second Lieut. Gerard Thomas Worthington Ferrand to be First Lieutenant, vice Coates, resigned; Dec. 13. Second Lieut. Charles Abercrombie Cooper to be First Lieutenant, vice Wilkinson, resigned; Dec. 27; Second Lieut. Cooper Charles Rankin Brooke to be First Lieutenant, vice Austen, struck off the strength of the Regiment; Jan. 6. Secont Lieut. Arthur Henry Britain to be First Lieutenant, vice Rowley, promoted; April 24.

Royal Midlothian or Edinburgh Yeomanry Cavalry—Lieutenant Robert Hay to be Captain, vice Hope, resigned; May 6.

City of Edinburgh Artillery Militia—First Lieutenant John Jekin Cockburn, to be Captain, vice Hill resigned; Second Lieutenant George William Henry Knight to be First Lieutenant, vice Cockburn, promoted; March 23.

Memorandum—Worcestershire Militia—Her Majesty has been graciously pleased to accept the resignation of Captain Roland Davies.

2d Royal Lanarkshire Militia—Lieutenant Robert Pollock to be Captain, vice William Wilson, resigned; April 27. Douglas Munro Fife, Esq., to be Captain, vice Andrew Frazer, resigned; April 30. David William Ramsay Buchanan, Esq., to be Captain, vice John George Brown, resigned; May 1.

Warwickshire Militia—1st Regiment—Captain Richard Roberts Jee, to be Major, vice Barnard, resigned; March 14. Henry Thorowgood Hunt, late Lieutenant 17th Regiment of Foot, to be Lieutenant, vice Eden, resigned; April 28.

Memorandum—Royal Aberdeenshire Highlanders—Her Majesty has been pleased to accept the following resignations, viz.:—Lieuts. Robert Hamilton Playfair, Robertson Gilchrist Marshall, and Daniel McLeod Fullarton; and Ensign J. J. Stafford Hotchkin; April 25.

2d Regiment of the Royal Surrey Militia—Captain Charles William Calvert, to be Captain, vice White, resigned; May 2.

DISEMBODIMENT OF THE MILITIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You are always ready, as the numerous readers of your ably-conducted journal are aware, to uphold the interests and rights of the Militia Service generally, and also to give space in your paper for remarks tending to expose any unfairness towards men, not only in the Militia, but likewise to soldiers generally. Will you therefore kindly afford me a corner for the few remarks I wish to make? It is generally understood that the Militia are all to be disembodied: at least, Mr. Sidney Herbert, Her Majesty's Secretary of State for War, said such was to be the case before the end of the year.

Now, what will be the effects of this arrangement if carried out with Militia regiments belonging to agricultural counties? The case will stand pretty nearly thus: those regiments will be disembodied when the hay and grain harvests are gathered, and when there will be no work for the labourer to obtain for five or six months to come. It follows, then, that these men, their wives and families, will have to struggle through a long winter as best they can. If we are to be disembodied, let it take place at once, when there is a prospect of plenty of work to be got, and the demand will continue for several months to come. This, sir, is the general feeling of both officers and men; at least, such of the former as have their men's interest at heart; and most of them have.

I am now going to state from recollection an explanation given by Mr. S. Herbert in the House of Commons, why a Militia regiment was *not* disembodied. The regiment I allude to, if I am right, came from the iron district, where, at that particular time, work was exceedingly scarce; which information, if my recollection continues to serve me, was conveyed to Her Majesty's Secretary of State for War by or through the "papa" of the commanding-officer of the regiment at the time, and which regiment either had been, or was about to be, ordered for disembodiment. I believe this regiment is still serving Her Majesty in consequence of that sagacious Paterfamilas. Will or will not a similar good reason exist at the end of the year, equally applicable to regiments belonging to agricultural counties? And will these regiments be kept out, supposing that their case is brought to the notice of Her Majesty's Secretary of State for War by the "papas" or "mamas" of the colonels commanding? The facts of the case with many Militia regiments are very much as follows: some Militia regiments are merely the toys and playthings of the commanding-officer, whose luck has been cast with the Upper Ten-thousand; the efficiency, the interest of the men and officers, and everything else, must bow to the golden image that shines in the favour of the powers that be. If we are to be disembodied, let it be done at once; if to be kept out, tell us so; and in saying this I believe I am expressing the feelings of all but the men in authority. At a future date I shall have a word or two to say respecting the relief of Militia regiments, and the manner in which some of them are quartered, and why; which, if you will insert, you will much oblige

A FARMER'S SON.

Her Majesty has been graciously pleased to give 250*l.* as a prize to be competed for by Volunteers at the July meeting of the National Rifle Association, to be held on Wimbledon Common, and His Royal Highness the Prince Consort has also been pleased to give 100*l.* as a prize to be competed for by all comers of all nations.

VOLUNTEERS.

METROPOLITAN.

THE METROPOLITAN VOLUNTEER CORPS.—The following circular has been issued :—

"7, Albemarle Street, Piccadilly, April 30, 1860.

"SIR,—We are desired to forward you a copy of resolutions, the result of several meetings of the commanding officers of the Volunteer regiments in the metropolitan districts, and to request you to communicate them to the corps under your command. You will observe that the resolutions contemplate the division of the Volunteer Force according to an arrangement which, after much deliberation, has been adopted, as likely to be most generally convenient. This, of course, involves no interference whatever with the separate organisation of each company or regiment; it is confined to general meetings for battalion and brigade drill. As the published lists of Volunteer Corps are imperfect, and subject to frequent alteration, it is possible that errors and omissions will be found in the lists set forth in the resolutions; you are therefore earnestly requested to forward any corrections or additions which it may be in your power to supply. It is proposed that the meeting upon the Queen's birth-day, 18th May, shall be principally for the purpose of mutually introducing the several corps, and accustoming them to act in masses, and that no evolutions requiring an advanced state of organisation shall be attempted. If you require any further information it will be immediately supplied to you, on your addressing a note to the above address, and we are instructed earnestly to solicit your co-operation in promoting an arrangement so essential to the progress and permanence of this great national movement.—We have the honour to be, sir, your very obedient servants,

"RANELAGH, Colonel Commanding South Middlesex V. Rifles, Chairman.

"JOSIAH WILKINSON, Captain Commanding 14th Middlesex V. Rifles, Hon. Sec.

"At a meeting of commanding officers of Volunteer rifle corps in the Metropolitan districts, held at 7, Albemarle Street, on Wednesday, April 18, and continued by adjournments, present: Lieut.-Colonel Viscount Ranelagh, Lieut.-Colonel Marquis of Donegal, Lieut.-Colonel Earl Grosvenor, Lieut.-Colonel Viscount Elcho, Lieut.-Colonel Lord Colville, Major Lord Radstock, Lieut.-Colonel Hon. C. H. Lindsay, Lieut.-Colonel Hicks, Major Brewster, General Dowling, Colonel Fitzmaurice, Major Bigge, Captain Wilbraham Taylor, Captain Hughes, Captain Templer, Captain M'Innes, Hon. Captain Bruce, Captain Wilkinson, Captain Hawkes, Captain Bird, Captain Campbell, Captain Childs, Captain Ebsworth, Captain Sharpe, Captain Glover, Captain Ross, and others.

"The following, amongst other resolutions, were passed :

"'1. That it is very desirable that general meetings of the various Volunteer Corps in London and its vicinity shall take place from time to time, for the purpose of accustoming the members to act together in battalions and brigades.

"'2. That the following arrangements be recommended for the summer of 1860 :—

"'3. That the Volunteer force of the Metropolitan districts be divided into four brigades, and the four brigades shall, for the present, be considered as one division.

"'4. That each brigade shall be divided into not less than three battalions; and that a corps shall not be considered as a battalion unless it consists of four companies.

"'5. That upon divisional field days the command shall be taken in roster by the commanding officers of regiments holding the rank of lieut.-colonel commanding, commencing with the senior officer present.

"'6. That upon brigade field days the command shall be taken by the senior officer of the brigade.

"'7. That the following division into brigades be recommended for adoption. The First Brigade to consist of the Hon. Artillery Company, West Middlesex, Hampstead, Islington, Barnet, Hornsey, Highgate, Harrow, Euston-square, and St. Pancras. Second Brigade—South Middlesex, St. George's, Paddington, Somerset House (civil service), Wimbledon, Battersea, Ealing, Volunteer Guards, and Engineers (Kensington Museum). Third Brigade—Queen's (Westminster), London Scottish, Inns of Court, London Irish, Gray's Inn, and Clerkenwell. Fourth Brigade—London Rifle Brigade, 1st Surrey, Custom House, Southwark, and Bermondsey.

"'8. That the first divisional field-day be held on Her Majesty's birthday, the 18th of May, at six o'clock in the evening, in Hyde Park.' RANELAGH, Chairman."

LONDON RIFLE BRIGADE.—A meeting of the council was held at head-quarters this week. The Lord Mayor, who was in the chair, announced that his Royal Highness the Duke of Cambridge, Commanding-in-Chief, and Honorary Colonel to the brigade, had fixed Saturday (to-day), at 5 p.m., for an inspection of the regiment on the parade ground, Horse Guards. It is expected that the corps, which numbers above 1600 members, will muster as many as 1200 strong at the inspection. Lord Grosvenor, Lieut.-Colonel-Commandant of the Queen's (Westminster) Volunteer Corps, has kindly consented to keep the ground. The council, having previously resolved that the wishes of the brigade generally would be best consulted by promoting according to seniority, now recommended Major Vere Close for nomination to Her Majesty's Court of Lieutenancy as Lieut.-Colonel of the second battalion. Mr. Alderman Challis forwarded a report to the effect that the entire sum subscribed by residents in the Wards of Cripplegate Within and Without towards the Rifle Corps of the City of London amounted to the sum of 508*l.* 9*s.*, that 140 gentlemen had already joined, and that he hoped in a few months this number would have considerably increased.

CHESHIRE.

On Saturday last, one of the most splendid Volunteer demonstrations that has ever taken place in the north of England, or perhaps in the United Kingdom, came off in the Upper Park, at Birkenhead, one of the best *locales* for such an event in any part of the kingdom. Upwards of 2000 Volunteers were present, and from 20,000 to 30,000 spectators, including the "upper ten" of Liverpool, Birkenhead, and the surrounding district. The day was beautifully fine. The demonstration was caused by the presenting of a silver and gold bugle to the 1st Cheshire Rifle Volunteers, by Mrs. Brassey, wife of Mr. Brassey, M.P.; and among those present were Colonel Wilbraham, reviewing officer; Sir C. W. Shakerley, Bart., Captain 5th C.R.Y., aide-de-camp; Major Archdall, Captain Irvine, Captain Barton, John Laird, Esq., Captain Laird, &c. In the absence of Mrs. Brassey, who is in Italy, Mr. Harrison presented the bugle to Captain Caddell, of the 1st Cheshire, in an appropriate speech, which was responded to by Captain Caddell. In the evening, John Laird, Esq., entertained all the officers of the different corps present to a grand banquet, at the Monks Ferry Hotel.

It would appear that the four Liverpool merchants are not the only gentlemen in that town infected with a mania for addressing royalty direct. There is a story now circulated that shortly before the Volunteer levee a certain V. R. captain in Liverpool wrote direct to Prince Albert, suggesting that the levee should be postponed, as the arrangements of his particular corps were not quite completed. The letter created much amusement, both at Court and the War Office. Colonel Phipps, however, was instructed to write a bland official reply, to the effect that as the arrangements for the levee had all been made the wishes of the captain could not be acceded to.

MIDDLESEX.

WEST MIDDLESEX RIFLES.—At a meeting of the council of the above corps on Wednesday last, the following gentlemen were nominated as subalterns: No. 3 Company: Sergeant E. Williams for Lieutenant, and Sergeant W. Phillips for Ensign; No. 4 Company: Sergeant Charles Dear, Lieutenant; Sergeant Frederick Peake, Ensign. These appointments have given general satisfaction to the members, as the commanding-officer and council have fully recognised the principle of selecting the most active and efficient members of the corps to serve as non-commissioned officers; and, on a vacancy occurring for a subaltern, the nomination is made from six names selected by the Company. The Rev. J. E. Cox presented a very handsome silver medal to the council, and signified his intention of presenting a silver medal every year for the best marksman, and a bronze medal for the second best. On Saturday, May 5 (to-day), a general parade will take place at head-quarters at 5 o'clock in the afternoon, prior to a "march out," headed by their Volunteer Band, on which occasion every member must appear in full uniform with shoulder belts and pouches. The members are getting perfect in their skirmishing and other drill, under the tuition of their indefatigable adjutant and the drill instructors; and the members joining are steadily on the increase.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, MAY 1.

Inns of Court Rifle Volunteer Corps—Major William Bagenal Brewster to be Lieutenant Colonel; April 9.

20th Middlesex Rifle Volunteer Corps—Thomas Dixon, Gent., to be Lieutenant; James Pearson, Gent., to be Ensign; April 16.

29th Middlesex Rifle Volunteer Corps—Thomas Ross, jun., to be Captain; Thomas Warne Lemmon, Gent., to be Ensign; March 1.

30th Middlesex Rifle Volunteer Corps—William Henry Scott, Gent., to be Lieutenant; George Tyrrell, Gent., to be Ensign; March 2.

West Middlesex Rifle Volunteer Corps—Roger Fenton, Esq., to be Captain; April 16.

39th Middlesex Rifle Volunteer Corps—Frederic William Hill, Esq., late Lieutenant 10th Regiment, to be Captain; George Carrick Steet, F.R.C.S., to be Honorary Assistant-Surgeon; March 31.

The London Scottish Rifle Volunteer Corps—Memorandum—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Lieutenant James McKissock; Ensign Charles Forbes Shepherd to be Lieutenant, vice McKissock, resigned; April 3.

Herefordshire Rifle Volunteers—1st Company—Thomas Turner, Esq., to be Honorary Assistant-Surgeon.

2d Company—William Symonds Rootes, Esq., M.D., to be Honorary Assistant-Surgeon.

Dumbartonshire Rifle Volunteers—4th Company—Ensign Thomas Roxburgh to be Lieutenant, vice Campbell, resigned; Robert Fletcher, Gent., to be Ensign, vice Roxburgh, promoted; April 23.

18th Aberdeenshire Rifle Volunteers—Thomas Buchan, Esq., to be Captain; Thomas Mair, Gent., to be Lieutenant; Alexander Cowie, Gent., to be Ensign; April 18.

22d Aberdeenshire Rifle Volunteers—James Robinson Allan, Gent., to be Lieutenant; James Munro, Gent., to be Ensign; April 20.

Lanlithgowshire Rifle Volunteers—3d or Bathgate Company—Andrew Gillon, Esq., to be Captain; William McKinlay, Gent., to be Lieutenant; David Simpson, Gent., to be Ensign; April 25.

Fife Artillery Volunteers—1st—William Heriot Maitland Dougal to be Captain; Robert Dalgleish Pryde to be First Lieutenant; Peter Christie to be Second Lieutenant; Jan. 26; George Laing to be Honorary Assistant-Surgeon; April 19.

2d—Harry Walker to be Captain; David Russell to be First Lieutenant; William Moir to be Second Lieutenant; April 13.

3d—John Purvis to be Captain; Stuart Grace to be First Lieutenant; William Young Sellar to be Second Lieutenant; March 6. James Bain to be Second Lieutenant, vice Sellar, resigned; March 22.

4th—William Elder to be Captain; John Grant to be First Lieutenant; William Miller, jun., to be Second Lieutenant; March 3.

5th—John Neil M'Leod to be Captain; John Peter Aytoun to be First Lieutenant; David Laing to be Second Lieutenant; March 22. Dr. James Dewar to be Honorary Assistant-Surgeon; April 19.

6th—Joseph Young to be Lieutenant (1st section); Jan. 16. Joseph Young to be Captain; Robert Nicholson to be First Lieutenant, vice said Joseph Young, promoted; Robert Brownlee to be Second Lieutenant; Feb. 20. Dr. James Williamson to be Assistant-Surgeon; April 23.

7th—William Robertson to be First Lieutenant; Samuel Cochrane to be Second Lieutenant; March 8.

Fife Rifle Volunteers—1st—Erskine Beveridge to be Captain Commandant; Kenneth Mathieson to be Captain; William Mathewson to be Lieutenant; John Landah to be Lieutenant; William Gowan Dobie to be Ensign; George Robertsen to be Ensign; March 6. William Traill, M.D., to be Honorary Assistant-Surgeon; March 19.

2d—David Gillespie to be Captain Commandant; George Hogarth to be Captain; William Pagan to be Lieutenant; John Cunningham Orr to be Lieutenant; Robert Russell to be Ensign; Robert Mitchel to be Ensign; March 6.

3d—Sir Thomas Erskine, Bart., to be Captain; James Clark to be Lieutenant; John Key to be Ensign; Thomas Black to be Honorary Assistant-Surgeon; April 25.

4th—David Briggs to be Captain, Walter Davidson to be Lieutenant, William Robertsen Ketchen to be Ensign; April 20.

5th—Walter Thomas Hilton to be Captain; Sir Charles Metcalf Ochterlonie to be Lieutenant; Thomas Hodge to be Ensign; Oswald Home Bell to be Honorary Assistant-Surgeon; April 23.

7th—James Fleming Bremner to be Captain; Robert Russell Landale to be Lieutenant; James Shepherd to be Ensign; James Young to be Honorary Assistant-Surgeon; April 23.

8th—Roger Sinclair Aytoun to be Captain; Andrew Landale to be Lieutenant; Thomas Goodall to be Ensign; April 20.

13th Gloucestershire Rifle Volunteers—Thomas Swain, Gent., to be Lieutenant; April 27.

8th Hertfordshire Rifle Volunteers—The surname of the Ensign Gazetted on the 27th April, is Jenney and not Jenny as then stated.

Shepton Mallet or 15th Somerset Company of Volunteer Rifle Corps—The Rev. Horace Faithful Gray, Clerk, to be Honorary Chaplain; April 25.

Glastonbury or 19th Somerset Company of Volunteer Rifle Corps—Frederick Lefevre Malton, Gent., to be Honorary Assistant-Surgeon; April 25.

Crewkerne or 20th Somerset Company of Volunteer Rifle Corps—William Mathews, Esq., to be Captain; April 25.

4th Brecknockshire Rifle Volunteers—Walter L. Bellamy, Gent., to be Ensign; April 26.

1st Dorset Artillery Volunteers—Henry Marder, Surgeon, to be Honorary Assistant-Surgeon; April 27.

1st Sutherland Artillery Volunteers—George Loch, Esq., to be Captain; April 26.

12th Norfolk Rifle Volunteers—Francis Samuel Bircham, Gent., to be Ensign; April 26.

15th Norfolk Rifle Volunteers—William Robert Freeman, Gent., to be Lieutenant; Simpson Backhouse, Gent., to be Ensign; April 27.

[The following announcement is substituted for that which appeared in the *Gazette* of 20th April, 1860.]

13th Norfolk Rifle Volunteers—The Right Hon. Charles, Lord Suffield, to be Lieutenant; April 16.

1st Manchester of 6th Lancashire Rifle Volunteers—John Orrell Andrew to be Ensign; April 19.

39th Lancashire Rifle Volunteers—Ellis Jones, Gent., to be Honorary Assistant-Surgeon; April 20.

Glamorganshire Rifle Volunteers—11th Company—Michael Leahy, Esq., to be Honorary Assistant-Surgeon; April 26.

1st Warwickshire Rifle Volunteer Corps—Lieutenant Thomas Henry Gem to be Captain, vice Sanders, promoted; Lieutenant William Burwell Briggs to be Captain, vice Mason, promoted; Ensign Charles Thomas Burt to be Lieutenant, vice Gem, promoted; Ensign William Kimberley, to be Lieutenant vice Everitt, resigned; Arthur Malins, Gent., to be Lieutenant, vice Briggs, promoted; April 26. Henry George Smallwood, Gent., to be Lieutenant; Frederick Major Mole, Gent., to be Lieutenant; George Allcock, Gent., to be Ensign; Henry Buckley, Gent., to be Ensign; Alfred Hill, Gent., M.D., to be Surgeon; Rev. John Cole Miller, D.D., to be Honorary Chaplain; April 27.

3rd Forfarshire Artillery Volunteers—John Sanderson Norrie, Esq., to be First Lieutenant, vice Littlejohn, promoted; James Charles Lindsay, Esq., to be Second Lieutenant, vice Norrie, promoted; April 24.

6th Forfarshire Artillery Volunteers—Henry Gourlay, Esq., to be Captain; James Ramsay, Esq., to be First Lieutenant; James Cargill, Esq., to be Second Lieutenant; April 24.

Berks Rifle Corps—George May, the elder, to be Surgeon of the different Corps; April 24.

1st Berks Rifle Corps—Richard Attenborough, Gent., to be Ensign, vice Simonds, resigned; April 24.

1st Corps of the Hampshire Rifle Volunteers—Colonel Thomas Faunce, late Major in the 13th Regiment, to be Captain Commandant; April 28.

12th Company of the Hampshire Rifle Volunteers—Edward Henry Chawner, Esq., to be Captain; April 28.

5th Corps of the Hampshire Rifle Volunteers—Edward Griffin, Esq., to be Ensign; April 17. This gentleman appeared in last Tuesday's *Gazette* as Lieutenant by mistake instead of Ensign, and was also by mistake called Lieutenant in the Royal Navy. He was never in the Navy. Major George Preston Vallancey, late Madras Army, to be Captain Commandant; March 16. This gentleman appeared in the *Gazette* of the 20th March last, and his name was spelt Vallancy instead of Vallancey (leaving out the e before the y), which has been since corrected at the War Office.

Staffordshire Rifle Volunteer Corps—28th Company—William Beaumont Badnal, Esq., to be Captain; John Russell, Gent., to be Lieutenant; Charles Halcombe, Gent., to be Ensign; April 26.

7th Isle of Wight Rifle Volunteers—William Stewart Graham, Esq., late Captain of her Majesty's 2nd Bengal European Light Cavalry, to be Captain; Maximilian Hodgson Geneste, Gent., to be Lieutenant; John Randall Mann, Gent., to be Ensign; William Carter Hoffmeister, M.D., to be Honorary Assistant-Surgeon; April 27.

Wiltshire Volunteer Rifle Corps—8th Company—William Chafyn Grove Esq., to be Captain.

14th Company—George Frederick Lapworth, Gent., to be Lieutenant; John Woodcock, Gent., to be Ensign.

Bedfordshire Rifle Volunteers—Arthur Macnamara, Esq., to be Captain; William Medland, Gent., to be Lieutenant; William Eames, Gent., to be Ensign; April 24.

5th—John Hatfield Brooks, Major Bengal Light Cavalry, to be Captain; Francis John Thynne, Esq., to be Lieutenant; Henry Platt, Gent., to be Ensign; William Collingwood to be Honorary Assistant Surgeon; April 26.

Roxburghshire Rifle Volunteer Corps—1st Company—James Dodd Gent., to be Ensign; April 4.

Ayrshire Rifle Volunteers—3rd Company—*Robert Dobbie, M.D.* to be Honorary Assistant-Surgeon; April 14.

7th Company—John Macculloch, M.D., to be Honorary Assistant-Surgeon; April 20.

1st Lanarkshire Rifle Volunteers (Glasgow)—Alexander Gordon Brown, Esq., to be Captain of the 79th Company; Hugh Howie, Gent., to be Lieutenant in the 79th Company; George McCall, Gent., to be Ensign of the 79th Company; April 26.

4th Westmorland Rifle Volunteers—George John Miller Ridehalgh, Esq., to be Captain Commandant, vice Mildmay, resigned.

1st Sussex Rifle Volunteer Corps—Valentine Byrone Corrie to be Lieutenant; April 4.

12th Sussex Rifle Volunteer Corps—S. H. Osmond to be Lieutenant; April 23.

[The following Appointment is substituted for that which appeared in the *Gazette* of the 23rd March last.]

14th Sussex Rifle Volunteers—Mark Lemon, jun., to be Ensign; March 14.

WAR OFFICE, PALL MALL, MAY 4.

Tower Hamlets Rifle Volunteers (No. 2)—John Hart Sankey, Gent., to be Lieutenant; April 27.

15th Shropshire Rifle Volunteers—John Hamer, Gent., to be Lieutenant; George Harvey Williams, Gent., to be Ensign; April 28.

Wiltshire Volunteer Rifle Corps—11th Company—George Money Swinhoe, Gent., to be Assistant-Surgeon; the Rev. George Campbell, to be Honorary Chaplain; April 28.

11th Rifle Volunteers—Herman Paul David Meyer, Esq., to be Ensign; April 10.

5th Rifle Volunteers—Hugh Beams, Gent., to be Ensign, vice Anderson, resigned; April 25.

2nd Battalion of the Oxfordshire Rifle Volunteer Corps—Lieutenant-Colonel John Sidney North, M.P., to be Lieutenant-Colonel; May 1.

Cambridge University Rifle Volunteers—Ensign Alfred Edward Northey to be Lieutenant; March 13. Joseph Lyle, Esq., to be Ensign, vice Ingham, promoted; April 28. The Queen has been graciously pleased to accept the resignation of the commission held by Lieutenant Duncan Barroch.

6th Lancashire Artillery Volunteers — First Lieutenant William Coddington to be Captain; Second Lieutenant George Whewell to be First Lieutenant, vice Coddington, promoted; William Bourne, Gent., to be Second Lieutenant; James Withrington, Esq., M.D., to be Surgeon; the Reverend Charles Wright Woodhouse, M.A., to be Honorary Chaplain; April 21.

10th Lancashire Rifle Volunteers—Lieutenant Henry Gregson to be Captain; Ensign Edward Hughes Satterthwaite to be Lieutenant, vice Gregson, promoted; April 26.

23d Lancashire Rifle Volunteers—Captain John Lees to be Captain Commandant; April 26.

3d Manchester or 40th Lancashire Rifle Volunteers — Vernon Cochrane, Gent., to be Ensign; April 21.

51st Lancashire Rifle Volunteers—Samuel Maxwell Morriss to be Lieutenant; April 28.

64th Lancashire Rifle Volunteers—James Gunning Plunkett, Esq., to be Captain; April 25.

66th Lancashire Rifle Volunteers—Joseph Mayor, Esq., to be Captain; April 25.

20th Company of Surrey Rifle Volunteers—William Evans Franks, Esq., to be Captain; William Ruston, Gent., to be Ensign; Alexander Barclay Sharpe, M.D., to be Honorary Assistant-Surgeon; April 27.

14th North Riding of Yorkshire Rifle Volunteer Corps — Thomas Christopher Booth, Esq, to be Captain; John Bainbridge Booth, Esq., to be Lieutenant; John Fryer, Gent., to be Ensign; April 19.

2d Lincolnshire Artillery Volunteers—Francis Phillip Cupiss, Gent., to be Honorary Assistant-Surgeon; April 26.

3d Lincolnshire Rifle Volunteers—The Rev. Frederick Jesson to be Honorary Chaplain; April 24.

5th Lincolnshire Rifle Volunteers—John Compton Lawrance, Esq., to be Captain; Edward Hardwicke, Gent., to be Lieutenant; John Thomas Pawlett, Gent., to be Ensign; William Hardwicke, Gent., to be Honorary Assistant Surgeon; Rev. Joseph Dodsworth, to be Honorary Chaplain; April 23.

14th Lincolnshire Rifle Volunteers—The Queen has been graciously pleased to accept the resignation of the Commission held by Lieutenant John Cooper.

Kent Rifle Volunteers—7th Company—Reverend William Henry Smithers, M. A., to be Honorary Chaplain; Henry Tyser, Gent., to be Honorary Assistant-Surgeon; April 27.

24th Company—Thomas Trusson Collett to be Ensign; March 30.

26th Corps (Battalion)—James Anesll, Gent., to be Ensign, vice Jack; April 27.

4th Brecknockshire Rifle Volunteers—A. Linton Boyle, Gent., to, be Honorary Assistant-Surgeon; April 30.

3d Carmarthenshire Rifle Volunteers—John Jones, Esq., to be Captain; James Nathaniel Morgan, Gent., to be Lieutenant; David Albuoy Price, Gent., to be Ensign.

Worksop or 7th Nottinghamshire Rifle Volunteers—Henry Sweet Hodding, Gent., to be Lieutenant; Frederick Maxwell Bury, Gent., to be Ensign; the Rev. James Appleton to be Honorary Chaplain; Thomas Middleton Williams, Gent., to be Honorary Assistant-Surgeon; April 28.

Worcestershire Rifle Volunteers—No. 1. Company—Lieutenant Hancocks to be Captain, vice Knight, promoted; Ensign Hancock to be Lieutenant, vice Hancocks, promoted; Henry Saunders, Esq., to be Ensign.

No 17 Company—Robert Smith Bartleet, Esq., to be Captain.

4th Lanarkshire Rifle Volunteers (Glasgow, 1st Northern Battalion)—Dr. Simson Buchanan to be Honorary Assistant-Surgeon; April 26. Hugh Rae, Esq., to be Honorary Assistant-Surgeon; April 27.

83d Lanarkshire Rifle Volunteers (Glasgow)—Alexander Ainsworth Abercromby, Esq., to be Captain; Andrew Bannatyne, jun., Gent., to be Lieutenant; Robert Pirrie, Gent., to be Ensign; May 2.

7th Forfarshire Artillery Volunteers—William Petrie Shaw, Esq., to be Captain; John Spittall Miller, Esq, to be First Lieutenant; Alexander Rae, Esq., to be Second Lieutenant; April 30.

1st Warwickshire Rifle Volunteer Corps—Ensign Barnabas Chesshire to be Lieutenant, vice Reeves, promoted; April 28. The following are inserted as being amendments:—The commission of Captain John Benbow Hebbert to bear date the 9th, instead of the 12th April. The following is substituted for what appeared in the *Gazette* of the 17th April:—John Benbow Hebbert, Gent., to be Captain; Lieutenant Charles Reeves to be Captain; Robert Mole, Gent. to be Captain; John Jefferys, Gent., to be Lieutenant; Thomas Partridge Salt, Gent., to be Ensign.

[The following is substituted for that which appeared in the *Gazette* of the 1st May, 1860.]

1st Warwickshire Rifle Volunteer Corps—The Rev. John Cale Miller, D.D., to be Honorary Chaplain; April 25.

On Tuesday evening a grand ball of the various members of the metropolitan Volunteer Corps took place at the Whittington Club, under the patronage of Lord Ranelagh. members of the various Surrey Regiments, the West and South Middlesex, Central London, Queen's, Scottish, and Civil Service attended, and, as a matter of course, nearly all were in uniform. The large room at the club was well lit and decorated, and dancing was prolonged with considerable spirit till a late hour.

The rapid and healthy growth of the Volunteer movement in our land bids fair to restore to us an institution from the decay of which we have long suffered. Play—honest, physical, hard play—has been, of late, far too much neglected by our adult and youthful population, and with the inevitable results. At 30 we are very apt to give up *boating* and *cricketing*, while a tramp over the brown *stubbles after the partridges* and a gallop over the breezy downs with *the hounds*, are luxuries obtainable but for a few months *in the year*, even when they come within the means of a working family man. To the vast majority they are, of course, unattainable, and to such, physical pastime, consequent upon the martial duties we have voluntarily undertaken, has become an admirable substitute for the physical play which we have given up from necessity or neglect.—*Once a Week.*

The Six Feet Volunteer Guards (32nd Middlesex) will muster at head-quarters next Wednesday at 5 p.m., to march to Walham Green, Viscount Ranelagh, Colonel-Commandant of the South Middlesex Volunteers, having invited them to drill with his regiment previously to the field-day, on the 18th instant, of the Metropolitan Volunteer Corps in Hyde Park.

THE VOLUNTEER SALUTE.

TO THE EDITIOR OF THE ARMY AND NAVY GAZETTE.

SIR,—If you are not wearied of the controversy, may I trouble you with a few remarks on what seems to be in England, the vexed question of the salute to Volunteer officers? So far as Scotland is concerned, I believe the question would never have been mooted but for the correspondence in your journal.

And first of all, let me assure you that the question with me is by no means one of personal feeling. For, in the first place, all the men of our battalion, as a matter of course, salute their officers. And, in the second place, I am so little disposed even to place myself in the way of receiving salutes that would be ungrudgingly given, that when in temporary command of the battalion to which I belong, during the marching past, I take care not to place myself at the saluting point.

You say it is ridiculous for a Volunteer officer to expect the privates, who are gentlemen of his own position in society, associated voluntarily together, to salute him. Observe, however, that this association, although voluntary, is terminable only on certain conditions, and not on the individual momentary caprice of the members. The principle of the association is exactly the same in the Volunteer force as in the regular Army. That the association is for a longer period in the one than in the other, or that the terms of voiding the contract are very different, in no wise affects the principle. How supremely ridiculous, then, for Colonel Tomkins of Her Majesty's 199th Buffs, whose father everybody knows was the regimental tailor, to look for any "mark of respect" from Ensign Fitz Doodle, descended, it is equally notorious, from a long line of illustrious Doodles, who descend maternally from the Boodles, both branches finding a common ancestry in the Noodles of that ilk!

But the assertion that generally the privates of Volunteer corps are the social equals of their officers, is, to those who know anything of Volunteer corps, in Scotland at least, simply absurd. In the case of one company in Glasgow, it may now be true that the fathers of the young gentlemen composing it are the social equals of the officers of the company. Certainly it was not true a month ago. Then, so far as England, and especially London, is concerned, are we to understand that the Westminster Volunteers, as a class, are the social equals of Earl Grosvenor; that the London Scottish Volunteers are on a footing of social equality with Lord Elcho and the Marquis of Abercorn; the Marylebone Volunteers with Lord Radstock; the Walham Green Riflemen, with Lord Ranelagh; and the St. George's, with Colonel the Hon. C. H. Lindsay?

Even were the Volunteers the social equals of their officers, they are not their military equals. If they feel respect for their officers, there is no reason why they should not show their respect in a military way. If they do not feel that respect, the sooner they resign, or call upon their officers to do so, the better for both parties.

But if Volunteer privates, because they are a "non-military body," as one of your correspondents so strangely asserts, are not to salute their own officers, then clearly, and *à fortiori*, they ought not to salute the officers of the regular Army. Colonel M'Murdo's claims to a salute rest on precisely the same ground as the claims of the Volunteer officers; but will any one venture to say that that gallant officer will not be received by the "general salute" whenever he inspects a body of Volunteers?

If it is to be understood that Volunteers are not to salute, then let the "present arms" be deleted from all those delightful little manuals specially compiled for their use, and carefully adapted to their supposed meaner capacities. Even Majesty herself cannot expect a military salute from a "non-military body." Should Her Most Gracious Majesty review the Volunteers in Hyde Park, or elsewhere, of course the Volunteers will be instructed to receive her simply as gentlemen, "voluntarily associated." They will, therefore, in addition to the goose, have to practise the crab step; and should be well drilled in the most graceful manner of disposing of their rifles (considering them in the light of walking-sticks), and, uncovered, doing obeisance after the most approved court model.

But after all, what is there in this salute that any gentleman can consider derogatory to himself in performing? Do not our students, many of them immeasurably the social superiors of their professors, invariably salute them? Does not Prince Alfred himself salute his officers, ay, even the *quarter-deck*, on coming up from below? Do not the officers of the regular Army salute four feet by three feet six inches of silk (exclusive of the fringe)? Does not every gentleman salute his friend in passing? Do not the regimental officers of Volunteers salute their field officers?

The salute would be a mark of inferiority only if the officer were not to return it; in which case, all that could be said is, that the Lord-Lieutenant's commission does not profess to convert snobs into gentlemen.

If Volunteer privates refuse to recognise the military status of their officers, they must make up their minds to the same meed of non-recognition on the part of the public at large, including the regular and militia forces. Of course, the more they succeed in lowering the status of the officer, the more they lower that of the private. If Volunteer corps are really "non-military bodies," let them no longer continue to misapply the words company, battalion, regiment, or brigade. Let them henceforward assume the designation of what in that case they really are—rifle clubs. Let them compel their officers to resign their commissions, and declare them to hold office only during the pleasure of the club, or perhaps for a definite period, retiring in rotation, say once a year.

"Cassio, I love thee,
But never more be officer of mine."

I am yours, &c. A LANARKSHIRE OFFICER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I know I am expressing the opinion of a great number of the Volunteer officers, when I say we much regret the manner in which this subject has been brought before the public, as nothing will tend to disparage this truly great movement more than the frivolous discussion of matters referring to military discipline, as all such contingencies are amply provided for by the "Queen's Regulations," and undoubtedly apply as much to Volunteer officers, when on duty, as to any officers in Her Majesty's Service. But this is a matter that may be very safely left to the general good sense and feeling of the private members of the corps, and I am sure no officer would ever wish to enforce that which is, however, his undoubted right. Perhaps I am scarcely competent to pass an opinion on this subject, as in my company the officers and privates invariably salute each other in the manner prescribed by the "Queen's Regulations," both when we assemble and dismiss on parade. Nor can I see why this act of courtesy should be considered derogatory more than "shouldering arms" when ordered; and, as there are many of the crack cavalry regiments in which some of the officers are sons of commercial men and the privates sons or relations of noblemen, the "ultra snobism" of introducing the question of "social position" into this matter may be dismissed without further comment than saying that the mark of respect is paid to the Queen's Commission, and not to the holder of it. As regards the privates of the Regular Army not saluting the Volunteer officers, I think that is scarcely to be wondered at, as it must be extremely difficult for them to distinguish officers from privates, more especially since the privates in one or two regiments have thought proper to adopt the officer's sword, belt, whistle, and chain, and one corps bears an embroidered device on the collar, which at a short distance exactly resembles the officers' badges.

I will close these remarks with a sincere hope that all the possessors of Her Majesty's Commission will sink all such minor detail in their endeavours to sustain and promote this valuable element of "Home Defence," and rest content with the honour of signing themselves

A VOLUNTEER OFFICER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is to be hoped that every Volunteer officer will read and appreciate the sound sense of your excellent article of the 21st ult., on the subject of salutes. As one of that class I am quite ready to receive, nay, disposed to expect, the full honours, to which a devotion to military duties at the cost of professional profits entitles me; but I would beg my Volunteer brethren to bear in mind that we are still civilians and amateurs, and that, as we should not bargain at present for being treated as part of the standing army in some respects, so it is unreasonable to demand to be placed on the same footing in others—salutes amongst the rest.

My chief object in intruding on your space is to assure my brother officers, from experience, that on all proper occasions their position will be amply recognised. I have lately been attached to a Line regiment for drill, and not only was every officer (to all of whom except two I was a perfect stranger) most hospitable and kind in giving me instruction, but every man in the regiment with whom I had to do was equally ready to assist me, and treated me with as much respect as the most fastidious could require. I, of course, appeared in uniform, and was invariably saluted by the men as their own officers were. How could the same thing happen in the streets of London?

I deeply regret this agitation about salutes. I don't think the majority of Volunteers desire it; the question seems to me trivial in itself. Volunteers have higher things to aim at.

Let us be content, as you say, with the success of the movement, and our Queen's approval: and well we may be. Let us return thanks for the sympathy of the country, and for the right hand of fellowship which (to their high honour be it spoken) has been so cordially held out to us by the Army. The more unobtrusively we pursue our duties, the more respect we are sure to obtain, and that not from a "salute by command," but from the free opinions of our fellow-countrymen.—I am, &c. A CAPTAIN R.V.

VOLUNTEER OFFICERS AND PRIVATES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You have given us some very good advice on the subject of our two frequent squabbles, for which I beg to assure you the main body of the Volunteers are duly grateful. Our disputes have not only been caused by pretensions such as you describe on the part of the officers, but they also know very well that in too many instances they have only become Volunteers in order to become officers, and that they have sometimes secured their object by indirect means—to use no stronger phrase—while gentlemen, not only their equals, but in all respects their superiors in years and in social standing, have been left in the ranks, and that too after having mainly been instrumental in getting up the corps now commanded by others.

Then as regards salutes by privates of the regular Army, I can only say, as belonging to a corps with a rather showy uniform, and entitled to wear a sword "off duty," I have been goodnaturedly saluted by common soldiers, though myself but a private Volunteer. But I have also seen stuck-up Volunteer officers passing along, with pretension in every movement, and common soldiers not only not saluting them, but regarding them with a puzzled gaze, as if doubtful whether a voluntary salute would be returned.

If we act upon your advice all this kind of thing will disappear. We shall by-and-bye get rid of our butterfly officers, who only joined the movement for their own dear sakes. We privates consider obedience to orders, and alacrity in obedience, only a part of the training we are willingly undergoing; and we look forward to the grand field-day at Wimbledon, and to the medals then to be awarded, as the only tests yet afforded the Volunteers, to show who among them are the really best men.—*Palmam qui meruit ferat!*—I am yours, &c.

A VOLUNTEER SHARPSHOOTER.

INDIGNATION MEETING OF VOLUNTEER OFFICERS AT LIVERPOOL.

On Thursday afternoon a meeting of the Volunteer officers of Liverpool and the hundred of Wirral (Cheshire) was held at the Cotton Sales-room, for the purpose of considering the recent resolutions relative to the presentation of Volunteer officers at court. From 50 to 80 officers were present; and, on the motion of Mr. George Arkle, Lieut.-Colonel Bourne, of the 4th Division Lancashire Artillery, was called to the chair.

The Chairman said that as a question was about being raised by Mr. Bowyer in parliament relative to the rank of Volunteer officers, it had been thought advisable to hear the opinions of the Volunteer officers of Liverpool on the subject, for he thought that gentlemen who devoted so much of their time and money voluntarily to the service of the public were at least entitled to be placed on the same footing as other military officers, whether in the Line or Militia.

Lieut.-Colonel Wm. Brown (Deputy-Lieutenant of the county, and late M.P. for the Southern Division of Lancashire) then moved the following resolution:—"That, inasmuch as by the 26th section of the General Volunteer Act, under which the officers of Volunteer corps receive their commissions, it is enacted that all officers in corps of Volunteers having commissions from His Majesty, or lieutenants of counties, shall rank with the officers of His Majesty and Militia officers, as the youngest of their respective ranks, we officers of Volunteer corps, in public meeting assembled, having been informed that attempts to interfere with the full meaning of the law have been recently made, and feeling that such proceedings are calculated seriously to diminish the influence which our commissions are intended to confer, earnestly protest against any infringement of our just privileges." He said he thought that considering the slight that was attempted to be put on the Volunteer officers, in refusing their admission to the court levees, &c., on the same footing as other military officers, they were bound to protest against such an insult. At considerable expense they devoted themselves to support the dignity of the crown and the country, and it was most unjustifiable that they should submit to the degradation attempted to be imposed upon them. The resolution was seconded and carried *nem. con.* Captain Bousfield (1st Lancashire) then moved that a copy of the previous resolution be forwarded to the lord-lieutenant of the county, with a request that he would exert his influence to maintain the rights of the Volunteer body as defined by Act of Parliament.

Captain V. A. King (2nd Cheshire) seconded the resolution, which was also carried,

SAILORS' ORPHANS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—On the occasion of getting up a bazaar in Cork for the benefit of orphan girls of sailors, whose fathers lost their lives while serving with the naval brigades at Lucknow, in China, and by shipwreck, and who reside about the harbour of Cork, I found the amount of connection with the Navy in the county and port of Cork far beyond what appears to be generally known, and which may prove very useful in dealing with that port as a naval station hereafter.

The reports of the Patriotic Fund showed that the naval casualties of the Russian war left more widows and orphans in the Cork district than in any port of the United Kingdom, except London, Portsmouth, and Plymouth, more than in all Scotland, and more than in all other parts of Ireland.

The returns extracted from Appendix 8 of the Report are as follows:

London	25 widows...	43 children.
Portsmouth	181 ,, ...	170 ,,
Plymouth	261 ,, ...	388 ,,
Scotland	12 ,, ...	21 ,,
Ireland, including Cork...	36 ,, ...	73 ,,
Cork	26 ,, ...	45 ,,

Chatham and Woolwich come nearest to Cork in the Report.

The Custom House Returns of Cork and Haulbowline show that about 30,000*l.* was paid in the year ending the 1st of April, 1860, from seamen serving in the Fleet, by monthly allotments of from 1*l.* to 2*l.* 5*s.*, to over 1300 women residing all round Cork Harbour, who are the wives, mothers, sisters, and daughters of such seamen; which money is exceedingly well laid out, as shown in the conduct and appearance of these ladies, reflecting great credit on the sailors who allot, and a very great blessing and benefit on those who receive.

When a seaman is cut off, it is often a long time before arrears of wages due can be paid to his representatives. The Bazaar now progressing in Cork is intended to create funds whereby immediate relief will be afforded on the spot to those sufferers connected with naval disasters, and who belong to the county; also to their families, including those belonging to the merchant shipping. The day fixed for opening the Bazaar is Her Majesty the Queen's birthday, the 24th of May next.

The foregoing particulars may prove interesting and useful. Trusting you will give this letter insertion, I am, &c., THOMAS STUART, Captain, R.N.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL
OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

MR. ALBERT SMITH'S MONT BLANC IS NOW OPEN EVERY NIGHT (but Saturday) at Eight o'clock; and TUESDAY and SATURDAY AFTERNOONS at Three o'clock.—Stalls, 3*s.*, (which can be taken at the Box-office, Egyptian Hall, daily from eleven till five); area, 2*s.*; gallery, 1*s.*

"EASTWARD HO!" and "HOME AGAIN!" are at 191, Piccadilly, from Ten till Six, admission Sixpence.

EXHIBITION OF HOLMAN HUNT'S PICTURE OF "THE FINDING OF THE SAVIOUR IN THE TEMPLE," commenced in July, 1854, is now ON VIEW at the GERMAN GALLERY, 168, New Bond Street, W., from Nine till Five. Admission, One Shilling.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly. Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence. The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MAYALL'S PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum*.

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s.* ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS SUPPLIED WITH EVERY REQUISITE.

Bass Drums, 32 inches	£4 4 0
Tenor Drums, 20 inches, transparent heads	2 7 0
Brass Side Drums, 14 inches	1 8 0
Regulation Drums, brazed shell, as supplied to the Army	2 2 0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2 5 0
Oak (polished) Side Drum, 14 inches	1 5 0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0 8 6
D or E flat ditto	0 6 6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1 1 0
No. 2, Light Infantry Model	1 8 0

P. WATTS (late Huck), 174, Fleet Street, London, E.C.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l.* 4*s.* Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l.* 12*s.* Mappins' Travelling Dressing Bag for Ladies, 4*l.* 4*s.* The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Errata: In our last, in the article on "Paymasters," for "eighteen years as a commanding officer with not less than seven years as paymaster" read "fifteen years as a commissioned officer with not is less than seven," &c.—The name of the artist who drew the sketches for Mr. Barker's picture of the Relief of Lucknow was misprinted last week—it should have been "Lundgren."

Army & Navy Gazette.

LONDON, SATURDAY, MAY 5, 1860.

The patient is ill; but the doctors differ, and the invalid is recovering. Prescriptions are tendered from every side, smelt at, and thrown away; whilst the sick man, with a cunning leer from his half-closed eyes, watches the countenance of his advisers with returning hopes as he observes their angry disputant gestures, until by and by, taking courage in proportion to the surrounding clamour, he gently hints to them the propriety of holding their consultation or commission in the ante-room, with the more grounded conviction that they will add another illustration to the old proverb, "When you are in doubt do nothing."

"Had the fleas been unanimous," said an eloquent Hibernian, "they would have pulled me out of bed." Had our naval reformers shut themselves up together for an hour or two any morning in committee room No. 20, they would have made short work of the Admiralty in the evening; but they seem to dread the idea of unanimity as if it were a conspiracy, and in lieu of bringing on a general engagement, confine themselves to that description of warfare characterised in naval history as actions between light squadrons and single ships. Let us hear what these eminent physicians have to say for themselves.

Mr. Bentinck is of opinion that no good will be effected until the Board of Admiralty is rendered permanent. Mr. Lindsay retorts that this is simply a recommendation to extend a bankrupt's lease. Lord Lyndhurst advocates the appointment of a Naval First Lord. The Duke of Somerset, being a civilian, naturally thinks and expresses himself otherwise. Lord Clarence Paget considers that the Naval Coast Volunteers are a force to be depended upon. Lord Colchester says, Don't you wish you may get them when you want them.

Sir J. Elphinstone goes in for reserved admirals and widows; to which it is replied that if there is any margin for reduction in the dead weight, it must be looked for amongst these two classes. Sir H. Leeke thinks that good men rather approve of flogging. Mr. Williams considers the use of the lash as the greatest obstacle to manning the Navy. Lord Hardwicke supports the recommendation of the Manning Commission. Mr. Lindsay writes a long protest against it. Sir J. Pakington speaks for a quarter of an hour to show the benefit of the system of bounty; whilst the Lord Chancellor, in the other House, is boldly asserting Her Majesty's right to resort to impressment. Sir M. Seymour and Admiral Walcott enter at different doors each with their little sorrow; and at last appears Sir Charles Napier, with a budget of grievances and prophecies appalling to contemplate, and sufficient to annihilate any Government, if the House of Commons could only be brought to understand properly what it was all about. Here is a rope of sand; and yet, strange to say, there is some foundation for most of these opposite opinions. Mr. Bentinck is undoubtedly right in supposing that a permanent Board of Admiralty would exercise greater control over their subordinates than one subject to change with the Government of the day; but he must guarantee that the members composing it are not imbued with that sublime contempt for the House of Commons, and indifference to the contents of the public purse, which has been so strikingly exhibited by those successive Boards whose members have not been called upon to defend, by their speeches and votes in public, the advice they tendered in secret. Our only guarantee against excessive expenditure is to be found in their uncertain tenure of office, so long as the Lords of the Admiralty are selected from those who think it a very praiseworthy act to commence by ignoring both the Parliament and the public.

When Mr. Bentinck will find five men in the Royal Navy to look upon the country's purse as their own, Mr. Lindsay will at once withdraw his opposition.

The question between a naval and a civilian First Lord of the Admiralty admits of much argument on both sides. It was said in former days that if a civilian was appointed to fill that high post, he began by promoting his own countrymen; and it was retorted that if a Naval man presided, his first stage was to advance all the officers of his own fleet: unhappily, there was too much truth in both these statements; but, let us hope that such times are past, never to return.

The great objection to the appointment of a Professional First Lord would now arise, alas! from the difficulty of selecting one amongst our Admirals fitted for the situation of Cabinet Minister. Able as they are and have been to carry the Flag of Great Britain through many tough fights, and still more embarrassing imbroglios with diplomatic agencies abroad, there is not at this moment one whom the united suffrage of the Service would indicate as their leader, nor one whose previous career and habits of business would authorise the Government in making him such an offer. There is but little foreshadowing in the distance. The outline of the talented Secretary to the Admiralty is the only one discernible: and in him the budding hopes of all Naval well-wishers are concentrated.

The evils that follow the appointment of even the most talented civilian to the post of First Lord are simply conveyed in the expression, that he knows nothing about his business; and yet, knowing nothing, he is called upon, day after day, to select officers to fill situations of the highest trust, and this without any previous knowledge of their antecedents, except what he can glean from a biography.

It is evident that such appointments must be made at random. We may be fortunate enough to turn up an able man in some corner of the world, but we are always in fear of some disagreeable dispatch arriving from another. In times of peace we can afford to set off one against another, but in war, and especially at the commencement, when the heaviest blows are struck, the discrimination of a civilian would be sorely taxed. We need not go back many years, nor dilate upon the round men in square holes; but the lesson then learned should not be forgotten. It is doubtful whether the nation will again accept as an apology for failures, the plea of "we did our best," capped with a confession of ignorance; what is now simply confusion would be speedily turned into chaos, and the mind of the civilian First Lord would be as much confused as that of the midshipman who, when asked if he could state what celebrated action took place in the Bay of Salamis, replied without hesitation, that it was the place where Pontius Pilate defeated Julius Cæsar, and made himself master of the whole kingdom of Greece!

It is to be regretted that there is not a Committee of Taste empowered to sit in judgment upon statues, busts, models, and other works of the chisel, before they are set up for public approbation. Such a body, having the power to refuse permission to zealous busybodies to stick up their guys, would exercise a powerful influence upon the public. They would at least exercise some sort of supervision, and prevent the exhibition of much bad taste in our provincial towns, where are to be found occasionally some very monstrous caricatures of the human form divine. It would be, however, foreign to our present purpose to travel out of the locality of Portsmouth to search for these graven images, that represent the likeness of nothing "in heaven above or in the earth beneath." Having a glass-house of our own, we will not fling our stones at others, but begin with our own blemishes at once. Here, then, on the beach at Southsea, we have a couple of distortions—for they are worse than mere caricatures—of two of England's worthiest heroes, Nelson and Wellington; men who, if they had lived in Greece, would have been immortalised by a Phidias or a Praxiteles, and worshipped as demi-gods. But on Southsea Beach these two great men are gibbeted in stone, and are the laughing-stock of all foreigners and the inconsiderate, besides being objects of commiseration to all true admirers of greatness and lovers of their country. Boys pelt at them; everybody has something to say derisively of these twisted, humpbacked, knockneed, bandylegged scarecrows. They are a positive eyesore. They are vulgar, coarse excrescences, disfiguring a locality teeming with great historical associations. Only fancy that Nelson, at whose name every English heart throbs with emotion, should be by the bad taste of others gibbeted and crucified on the very spot on the beach where he embarked to go on board the Victory to fight and die at Trafalgar. With equal bad taste too he is placed almost on the very spot where Felton, the assassin of the Duke of Buckingham, was hung in chains. This last act might have been unavoidable, but it is no excuse for the wretched abortion

Digitized by Google

called after his glorious name, and which ought to be an ornament to admire and venerate, instead of an object to scoff and jeer at.

Now, why should any man, or set of men, have the power thus to gibbet greatness, and turn the mighty ones of the earth into objects of ridicule? And yet men with good intentions, but vile taste, have achieved with these gothic gewgaws what nothing else on earth that we know of could have done; viz., converted the outward and visible signs of two of the greatest heroes of any age into fitting objects for a sneer or a jibe. We owe to these great men a homage—a fealty; and the true teaching of a public statue ought to be respect and reverence, and not mockery and shouts of laughter.

We have heard that for some time past a private subscription has been talked of to reward any one, no matter who, that flings down these effigies and breaks them into fragments. But as yet the thing has to be done. An attempt of this sort was nevertheless very nearly successful a few nights ago, when some seamen belonging to one of the ships of war at Spithead, landed at midnight on the beach, and with a most praiseworthy and patriotic sense of duty, got a rope round the disgusting misrepresentative of our immortal naval hero, and were about to hurl it indignantly from the pedestal, when unluckily the coast-guard interrupted them. Another five minutes and they would have succeeded, and would have fairly been entitled to the thanks of every man in the kingdom. As it is they have done good service, for the figure is damaged, and may lead others on to complete what they have begun. It may seem strange that these seamen could have obtained a boat and leave from their ship at midnight, but this only proves how much the destruction of these frightful caricatures is desired. It would have been impossible for the men to have broken through the discipline of a ship of war, unless their intentions had met with the approbation of their officers, some of whom, it is stated, accompanied the patriotic tars upon their expedition. May they meet with better luck next time. Perhaps they may be spared the trouble, for it is rumoured that the authorities (who are they?), feeling the force of public indignation, are about to remove these deformities from the public eye. We hope the report is correct.

There is no cure for a job when it is once perpetrated; but a timely appeal to the public sometimes exercises a wholesome influence in the way of prevention. In the hope that what we are about to say may not be without some effect in this respect, we shall tell as simply as possible the nature of a transaction to which we understand the Commander-in-Chief and the Secretary of State for War are about to give their sanction in the name of Her Majesty. Lieut.-Colonel Poulett Somerset, commanding the 2nd battalion of the 7th Fusiliers, is minded to exchange into the cavalry, and we believe the authorities have signified their willingness to assent to his becoming commanding officer of a regiment of horse. Now the discipline, drill, and tactics of a cavalry corps is so dissimilar to that of an infantry regiment, that the first thing Lieut.-Colonel Poulett Somerset (who has always been in the infantry, with the exception of a few months at the outset of his military career some twenty years ago) will have to do on joining his new regiment is, along with his newest cornet and his youngest recruit, to learn the elementary portions of his duty as a cavalry soldier. He will have to attend the regimental riding-school for at least a year pretty constantly, he must learn the sword-drill, acquire a knowledge of stable-duties, make some acquaintance with the regulations about forage, &c., &c. In fact, he goes to an entirely new line of business, and whatever experience he has gained as an infantry officer will profit him as much in his new capacity as a knowledge of Eastern languages would a city accountant. So distinct are the duties of the two services that hitherto the rule has been not to allow any exchange between cavalry and infantry officers above the rank of captain. Even this is a latitude of almost too liberal a character; for it is not a very edifying sight to behold the new captain who has come from the infantry making all manner of mistakes, exhibiting an utter helplessness, showing a want of acquaintance with the very A B C of his duties before the subalterns, non-commissioned officers and men of his own troop. How much more injurious will be the moral effect of placing in a similarly ridiculous position the commanding officer of a regiment—the man who is supposed to be able to teach every one his duty! The restriction which has hitherto been established is, however, about to be violated; and in a week or two we shall, we fear, see Lieut.-Colonel Poulett Somerset gazetted to the command of one of Her Majesty's regiments of cavalry of the line, to teach them their duty and maintain them in that high state of efficiency which the country now-a-days is taught to expect.

Now, who is Lieut.-Colonel Poulett Somerset, in whose behalf one of the wisest and most necessary regulations of the Service is about to be violated? The public will naturally say he has done some daring act, or rendered some valuable service (he is a C. B.), or that he possesses some special qualification which takes his case out of the ordinary run. We shall tell them all we know of him. We do not desire to speak of him in any but his public capacity, and beyond saying he is a member of the great ducal family whose name he bears, and that he represents the family county in parliament, we shall only speak of his military career. A captain and lieutenant-colonel in the Coldstream Guards, he was appointed aide-de-camp to Lord Raglan on the organisation of the British expedition to the East, and in that capacity he went through the Crimean campaign up to the death of that lamented nobleman. He returned to England, and sold out of the Coldstream Guards while the Coldstream Guards were serving before the enemy. This was in 1855. In the autumn of 1857, when there was a great demand for men, and offers of raising battalions were made from many quarters, it was determined (in obedience, we are bound to say, to public clamour) to allow three ex-field-officers of the army to raise and command second battalions for the 5th, 6th, and 7th Regiments of Foot. Lieut.-Col. Poulett Somerset had been, as we have said, a captain in the Coldstreams, held the Army rank of lieut.-colonel, and consequently came at all events within the letter of the regulation. To him was assigned the task of raising the 2nd battalion of the 7th Fusiliers, upon conditions in a pecuniary sense very favourable to him. He did so, and has since commanded that regiment when his parliamentary duties permitted. If, as we fear we have but too truly stated, he is now about to be transferred to the command of a cavalry regiment, without having gone through more than the briefest probation in the duties which will be required of him, it will be a bold, direct, and undeniable negation of the interests of the Service.

The Indian Army still settles down with a dead weight on the inventive and constructive genius of the India Board and of the Government. It is believed that a plan has been to some extent matured for the amalgamation of the Armies; and that the difficult, and, as it would seem in the eyes of the ruling powers, the grandest question—that of patronage—has been settled by giving a large portion of it to the Indian Viceroy, who will henceforth be all but Imperial in dignity and prerogative. Whatever the plan may be, it must be submitted to Parliament, notwithstanding Lord Palmerston's constitutional doctrine, that it is the executive and not the deliberative function of our Government which should decide such matters. The Staff patronage will, it is said, be distinct from that of the Army. We look forward with great curiosity to the day—which ought not to be distant—when Sir Charles Wood shall announce the details of his amalgamation process. Already, some Indian officers are settling their probable status and position. One of the most distinguished of them is setting an example, which it would be well for officers in both Armies to follow Released from the fatigues of an arduous campaign and continuous service in the field, Colonel Norman has obtained permission to pass his time in England for some months in the bosom of H.M.'s 32nd Regiment in Dover, in order that he may make himself thoroughly acquainted with the internal economy of a Queen's Regiment in England. When it is remembered that Colonel Norman was Adjutant-General of the Army in India, his zeal and desire for professional knowledge cannot fail to be properly appreciated.

The Commission which is sitting in France on the National Defences is paying particular attention to the question of fortifying the embouchures of the French rivers. From what side are they to be assailed? Is England going to make war upon France, or do our neighbours apprehend that they may be exposed to the visits of our fleets, in a contest which must be forced upon us? At all events, the Commission is understood to have examined sites, and plans, and witnesses, relative to the question above mentioned; whilst one secret Commission has been engaged principally in considering questions connected with the internal transport of troops to the coast, or elsewhere.

There is a statement that Earl Grey is preparing a plan by which the construction of the governing departments of the Army will be much altered, if not improved, and that he will lay it before the Commission, when he gives his evidence next Tuesday. The relations of the War Office and Horse-Guards will be referred to an ancient model, and the steps which the noble Earl recommends us to take will be backward, rather than forward—*omnia vestigia retrorsum*. No one can doubt Earl Grey's great knowledge of the British Army, and, if the report be correct, we shall at all events have something worthy of consideration when the matter comes on for discussion.

In reviewing the South Middlesex Volunteer regiment last week, Colonel M'Murdo indulged in praise of the corps, which must have been the more acceptable to them because it was discriminating. He told them that they had made fair progress, and that if they continued to pay the same attention to their duties they would doubtless soon be an efficient corps. We are glad that Colonel M'Murdo has adopted this tone, instead of indulging in the fulsome and really insulting adulation which so often prevails at inspections of Militia and Volunteer regiments. They are told that they ought to be brigaded with the Line; that they are equal to any crack corps of the regular Army, and that they are fit to go anywhere. In renouncing a tone so distasteful to good sense—as it is almost invariably opposed to truth—Colonel M'Murdo has given a healthful indication of the way in which he is likely to discharge the important duties confided to him. The Volunteers are all men of intelligence; they have gone to work earnestly, and with a remarkable absence of that coxcombry which is associated with an amateur soldier; they do not want to be petted and treated like children with verbal lollypops; and we are glad to find that the officer who is principally responsible to Government for their general efficiency and approach to soldierlike condition, seems likely to deal with them as a body of intelligent gentlemen.

The following appointments of superintending officers on the Recruiting Staff have just taken place: Lieutenant Hodgson, 12th Regiment, to Newcastle-on-Tyne; Lieutenant Eyre, 48th Regiment, to Preston; Lieutenant Knight, 90th Light Infantry, from Athlone to Birmingham; Lieutenant Grant, 35th Regiment, to Reading; Lieutenant Massy, 5th Fusiliers, to Athlone; Lieutenant Warren, 12th Regiment, to Boyle; and Lieutenant Oldham, 51st Light Infantry, to Clonmel.

A correspondent asks us "whether the Carabiniers are light or heavy dragoons?" The present organisation of the Cavalry, exclusive of the three household regiments, consists of three classes. The first—the tallest, and, we may presume, the heaviest—includes the 4th and 5th Dragoon Guards, the 1st Royal Dragoons, and the Scots Greys. The second is made up of the 1st, 2nd, 3rd, and 7th Dragoon Guards, the Inniskilling Dragoons, and the 5th, 9th, 12th, 16th, and 17th Lancers. The third, and least in size, comprises the Carabiniers, the 3rd, 4th, 13th, and 14th Light Dragoons, and the 7th, 8th, 10th, 11th, 15th, and 18th Hussars. If there be light dragoons in the British Army, therefore, the Carabiniers are light.

The Colonelcies of the 27th and 56th Regiments yet remain unfilled. Of the officers occupying the position on the list from which a selection might be expected to be made, Generals Grey, Stanhope, Hay, Porter, Rawdon, Breton, Angerstein, Eden, and Dixon, have not seen any war service. Lord De Ros labours under the same disadvantage, and is besides a cavalry officer. Generals Beckwith, Marten, and Maclean, are also from the cavalry. Lord Rokeby (a Waterloo officer) fills a staff appointment, which, it is understood, he is not willing to resign for the colonelcy of a regiment. General Ball has three clasps and some honourable scars to show as memorials of his Peninsular service; and General Monins was at Waterloo with the 52nd.

A pamphlet has been issued from the War Office and circulated amongst the Medical Officers of the Army, "On the Organisation of the Practical Army Medical School, and Rules for the Examination of Assistant-Surgeons, previous to promotion." These Rules are intended to give effect to the recommendations of the Royal Commission on the sanitary state of the Army, and were included in the Warrant of October 17, 1859. Since that Warrant was issued, the Government of India has adopted a similar standard of qualifications for admitting candidates to the Indian Medical Service, including the special instruction to be given at the Army Medical School, and the same form of examining Assistant-Surgeons for promotion in the Indian Army. In consequence of this the Physician to the Council of India has been added to the senate, and certain changes and modifications of the Warrant have been adopted to assimilate the Regulations in both services.

The officers of the Bengal Army are now employed in the following manner:—202 on furlough, 56 on civil and political employ, 21 on the military staff, 104 serving with regular regiments, 22 doing duty with Her Majesty's European regiments, 7 doing duty with other corps of the Bengal Army, 59 on duty with discharged soldiers proceeding to England, 15 with police corps, 10 with Commissariat and stud, 24 with public works, surveys, &c., 264 doing duty, miscellaneous 10, giving a total of 794. The number of officers wanting to complete the establishment on the 1st of October, 1859, was 131.

THE GUN-BOATS.

The revelations of the *Times* respecting the gun-boats have created a profound sensation. People are astounded at the magnitude of the evil, involving, as it does, not merely the loss of our "Mosquito fleet," from which so much was expected, but the loss of a certain amount of national reputation. Nothing but the most searching investigation will satisfy the public, and we hope that the contracting parties may be able to exonerate themselves from blame. We might, perhaps, have been content to wait for the publication of Lord Naas's return of the cost of each boat—the cause of its decay and the cost of its repair—before making any remarks of our own, had not various statements appeared in some of our contemporaries, professing to state the truth, and blaming the *Times* for its remarks. But a personal inspection of the rotten vessels at Haslar has convinced us that any further silence on our part would be unjust towards the public. In the course of a lengthened examination of the gun-boats a few days ago, we made the following remarks upon the spot, which we here produce. The first boat we came to was the Caroline, built by Messrs. Green; the major part of the rotten timber and planks taken from this vessel had been removed from the shed, but the timbers left were sufficient to show how very rotten she must have been. All repairs in this vessel are at present suspended, as a special inquiry is to be held upon her. The timbers left bear evidence of having been used when full of sap, and the outside of those remaining are mere pulp, or just that sort of powdery fibre that boys call "touchwood." The timbers on her starboard side are perfectly disgraceful. In addition to the rotten state of her timbers, it must be added that her frame is very slight, even compared with the other gun-boats. It was remarked by some one, that they are not of the proper contract size. To add to her weakness, the copper bolts were found defective. A local paper says as many as 100 were taken out of her, from 5 to 8 inches long; they ought to have been 18 inches, to have reached from the outside of the plank, through the rib, and to allow for clinching. From one plank alone five of these defective bolts were taken. So that what with rotten timber and scamping building, the Caroline, as she appears just now, is a disgrace to any naval yard. Who could have superintended the construction of this vessel on the part of the Government? Whoever he may be, that which he has to say in explanation, will form the subject, we hope, of a strict scrutiny. It must also be borne in mind that this is not a mere question of building a vessel in a hurry, but of putting unsound green wood in a ship in which men were to peril their lives and the nation's honour. And if the contracting parties who put into these gunboats timber that was not even squared, but in one instance retaining the form of the tree, can reconcile such conduct to their notions of honesty, the sooner public indignation is directed towards them the better.

There really seems to be no reason why the Caroline should be in the rotten state she is, for she never has had any gun plates fixed, and consequently could not have been in commission. And yet right amidships, stem and stern, there is nothing but sap and rottenness. The Caroline was launched in May, 1856, and hauled up under the shed at Haslar, the 31st March, 1857; consequently, she could only have been afloat about a year. Now, if this vessel, with all the care bestowed upon her is in the rotten state we have attempted to describe, what may we not expect to see when the twenty gun-boats in Portsmouth Harbour, which have been exposed to sun and wind and rain for the last three years come to be overhauled? But their condition will soon be known; for the Fancy and the Angler, two of them, have been brought down to Haslar, and will be speedily ripped open for examination.

The next vessel that attracted our attention was the Cherokee, in which all the Caroline's sap, rottenness, and mouldy-fungus were repeated. This vessel was launched April, 1856, and hauled up under the sheds at Haslar, February 27th, 1857. Alongside of the Caroline there is a capital boat, as good as new, quite sound, and fit for service. We found that she was built at Bristol, and we mention the builder's name with pleasure, Mr. Paterson. To use a nautical phrase, well known all over the world, "She was ship-shape and Bristol fashion." Our eye now caught another rotten skeleton, named the Mackerel, built by Pitcher of Northfleet. This vessel is perhaps as bad as any in the "Mosquito fleet;" and although her timbers are stouter than those of the Caroline, yet they are very shaky and rotten. Some of her timbers show sap all round. If we were disposed to give an opinion which side of this vessel was the most rotten, we should give the preference to the starboard. A great part of her planking had been removed after stripping her sides, as though the authorities were ashamed of its being seen, so that no opinion can be formed of its condition, but a portion that still remains fastened to her ribs shows that the inside of the planks contained sap when placed against the timbers. The outside showed fair, but rottenness was within.

The Albacora, built by White of Cowes, is in a bad condition; her planking is removed, and her stem is about to be replaced with a new one. The Highlander's work is said to have been creditably done, but the materials were bad. She also is under repair. The Swan's planks were laid with the sap inside, so that when the shipwrights commenced caulking her, they discovered that the oakum would not hold, but was driven right through. She is under repair. We were unable to obtain the names of the builders of these two last-named gunboats, which we regret, as we should have been happy to publish them to relieve any natural anxiety they may feel respecting their handiwork.

On running down the enormous length of the sheds, the eye is struck with the neat and trim appearance of many of the gunboats, and the stranger is apt to exclaim: "Well, thank Heaven, all the public money has not been wasted." He soon finds, however, that the new-looking vessels are those the Government has been silently repairing for months past. Take the Pheasant, for instance, also built by Pitcher of Blackwall. This vessel is now in good condition, and why? Because she has had 1400*l.* expended upon her. But if we had seen her a few months ago we should have seen her as bad as the Mackerel. Her bow, we were informed in the yard, is entirely new, and she suffered from the same disease as her sister ship, the Mackerel, sap and rottenness.

It would be very possible and, indeed, very easy to extend our researches; but enough for the present. Some of the builders of these rotten craft endeavour to wriggle out of the dilemma by saying that if the boats had been coppered, they would have been protected from the currents of air beneath them, as they stand upon the blocks under the sheds. But this miserable subterfuge is denied them, for all the boats at Haslar are pretty much alike; and if there is any difference, those that have been coppered are the worst. But the coppering has nothing to do with the question, which is—What excuse have the respectable firms that contracted for these boats to offer in reply to the accusation made against them, of building gun-boats with wood full of sap? This question must be answered; and, in the meantime we wait with some anxiety for Lord Naas's return, which will inform us what sum the country paid for these specimens of naval architecture. No wonder that our flotilla was sunk by the guns even of the Chinese, if it was composed of such gun-boats as these?

AN AUSTRIAN MILITARY MAGAZINE.*

We have before us the first number of an Austrian military magazine, which is to be continued monthly, and is edited by a Commissary-General of the Austrian Army, V. Streffleur. It is published at Vienna in the Imperial Royal printing establishment, and is, in fact, a semi-official military publication of the Austrian Government. The double-headed eagle of Austria and the motto, "*viribus unitis*," are on the title-page.

The object of this magazine is to form a central organ for everything connected with military science; and it will strive less to spread abstract than practical views of general interest. The subjects it intends more especially to devote itself to are six in number.

I. The Theory of Military Science.—Under this head the editor comprises:—War in general, infantry, cavalry and artillery tactics, higher tactics, strategy, guerilla warfare, the special duties of infantry, cavalry, and artillery, including the use of the weapons, general-staff, engineers, pioneers, service of adjutants, scientific education and teaching, exercises, organisation, recruiting, equipment, hospitals, marine, laws respecting blockade, war treaties, &c.; topographical drawings, geography, &c., in so far as they are connected with military science.

II. Description of the Present.—This includes the actual state of the Austrian army, of foreign armies, topographical sketches, and descriptions of different countries.

III. Historical.—History of the art of war, the history of war in general, the history of individual wars and campaigns, descriptions of battles and sieges, narratives of lesser events, biographies and necrology.

IV. Reviews of military works, extracts from military periodicals, announcement of books, maps, and plans.

V. Materials for Individual Activity.—Themes for military exercises with outlines. Description of localities for exercise in drawing plans, &c.; programme for manœuvres, practice, &c. &c.

VI. Army—News.—News of the day, promotions, changes, &c. The Austrian government having placed all the imperial archives at the disposal of the editor for materials, he promises interesting details respecting the campaigns of 1805, 1809, 1813, 1848, and 1849, and also respecting the recent campaigns in Italy.

Such is the programme of Commissary-General V. Streuffler.

The present number contains:

I. An article headed "On the Spirit of the Austrian Army," which may have been written by Francis Joseph himself—but is not signed.

II. "Narrative of the Siege of Fort Maghera (Venice) 1849." By Baron Leopold Von Rzikowsky, von Dobrzisch, Austrian Major-General, with a plan.

III. "How to form Infantry in Battle-Line."

IV. "Storming of the Broletto at Milan, 18th March, 1848."

V. "Austrian Rifled Cannon."

VI. "The Special Calling of the Austrian Army is the Point of View of History and Civilisation."—By the Editor, V. Streffleur.

The rest of the magazine consists of notices of military works, &c., &c.

* *Oesterreichische Militärische Zeitschrift, redigirt und herausgegeben von V. Streffleur, k.k. General-Kriegs-Commissär.*

THE NAVAL RESERVE.

In both Houses of Parliament, on Tuesday evening, important discussions upon this subject took place, of which we subjoin a summary. In the House of Lords, Lord Lyndhurst called the attention of the House to the state of the naval reserve, and asked Her Majesty's Ministers for an account of its present condition and probable future progress. He prefaced his question by commenting upon the ignorance which existed in England on the state of the Navy, and proceeded to point out the enormous efforts made by France to create a navy since 1849, when a Commission for the reorganisation of the French navy was issued. The success attending these efforts had been so great that France was now in possession of an admirable steam navy. The avowed object of that Commission and that navy was to attack this country, and one of the questions considered by it was how a French navy, with a considerable military force on board, might invade England. What had been done in the meantime by the Government of this country? Alarmed by the growing naval power of France, the Government had been at length aroused, and had, at a great expense, succeeded in forming a navy equal, but not more than equal, to that of France. We had last year 29 sail of the line, and France had the same number, but the French were superior in frigates. We might now, perhaps, exceed the French naval steam force by a few ships; but, if we were superior, it was only in a small degree. But equality in numbers with the French navy was in reality inequality, because, while their navy was concentrated, ours was scattered in order to protect our distant possessions. To be equal with France we ought to have double the number of steam-vessels of France, especially as the alleged superiority of our seamen was now considerably modified by the alterations in navigation. But the question arose how were these ships to be manned. The French navy was supplied by the "conscription maritime," so as to occasion no difficulty in despatching a ship at once to sea, in addition to which the French Government encouraged by bounties the large northern fisheries, from which, in case of war, they would at once be able to draw a supply of 40,000 men. The force acquired by this country was a Channel fleet equal to that of France, a home fleet in case of disaster, a Mediterranean fleet, and a fleet of observation. But we were incapable of manning such fleets, and this inability was perfectly understood by France. He traced the various difficulties which had been always experienced in this country and the expedients resorted to down to the attempts to man the Baltic fleet—a measure of such difficulty that foreign sailors and landsmen had to be taken on board. These difficulties still existed, as he believed that nothing had been done since that time to remedy the evil. What, then, was to be done? That was not for him, but for the Admiralty, to decide; but he would remind the Government that under the new system of warfare a blow could be struck in a moment, and to strike the first blow would be almost decisive of the war. Adverting to the recommendations of the Royal Commission which had sat upon the subject of the Navy, he examined those recommendations in detail, and highly blamed the Government for not having carried them out in a more prompt and effective manner. Their report had been made in February, 1859, and was one which demanded the most speedy attention, but he believed that not a single man had been raised until the 1st of January last, and, instead of the 30,000 men recommended by the committee, only 800 men, according to Lord C. Paget, had been raised in three months, so that it would take ten years at that rate to raise the 30,000 men. The causes of failure he believed had been various, but among them he considered that the complication of the regulations and the smallness of the bounty might be looked upon as chief. Why, the 6*l.* bounty for the whole 30,000 men would only amount to 180,000*l.* out of 12,000,000*l.* of Naval Estimates! This saving of money in men and spending it on machinery and material was like making a watch and leaving out the mainspring. It was a penny-wise and pound-foolish economy. The conclusion he came to was that our naval affairs were in a deplorable condition, and the question suggested itself whether this was due to the Board of Admiralty, the constitution, continual changes, and non-naval chiefs of which he severely criticised. Alluding to the present tendency of our financial policy, to abolish indirect taxation and to diminish the Army and Navy Estimates, he pointed out the folly of following such a course, and asked if it were wise to reduce our Navy, while the French navy was being increased year by year, purely upon the supposition of always maintaining the friendship of the Emperor of the French, and of establishing by commercial means a peaceful feeling between France and this country. He concluded by animadverting in strong terms on the meddling measure of Lord John Russell, which was setting class against class at a time when it was never more necessary that all classes should be united.

Digitized by Google

The Duke of Somerset admitted that the subject was of great public importance, and, in consequence, he was the more eager to refute the impression made by Lord Lyndhurst's speech that the present Government had reduced the naval force of the country. During the last eight months, more men had been employed in the dockyards, exclusive of the factories, than had ever been employed at any previous period in the history of this country. We had now, exclusive of blockships and sailing vessels, 50 ships of the line afloat, 30 frigates, 17 corvettes, 88 sloops, many of large power; 26 small vessels, 24 gun-vessels of a peculiar class, and 350 gunboats. The French had 53 ships of the line, and had six or eight more building; 38 frigates, and 12 building, and about 140 sloops. With regard to our naval reserve, the Coastguard now numbered 6862 men, and, although it had been suggested to add at once 12,000 more, he thought it would be a great mistake to fill up by new men a service which sailors of the Navy regarded as their own ultimate destination. The Naval Coast Volunteers numbered 7000, and they were in the highest efficiency. As to the Royal Naval Reserve, only 1000 men had been at present enrolled; but as yet the scheme had hardly come into operation. The actual naval reserve at the present moment was 14,850 men, whose services are immediately available in any danger. In regard to the regulations which Lord Lyndhurst had ridiculed, he explained that they applied to different classes, but that all which affected the common seaman were printed upon a single sheet of paper. It was true that the numbers enrolled in the Royal Naval Reserve were not so many as might be desired; still, he believed that a spirit was rising among the men highly favourable to the Service, and this spirit would be still more favourable when they once understood that they were not to be sent out of the country on every petty war, but only to be called upon in case any great European war should arise. There was one point which he would touch upon, and which was one of great importance in considering the question of naval reserves—he meant training up boys for the service of the Navy. This had been done by the present Government, and had been attended with the greatest success. He briefly alluded to the remarks of Lord Lyndhurst on the constitution of the Board of Admiralty, and pointed out, in reply, that failures had generally been the result of the appointment of naval men to the post of First Lord of the Admiralty. He deprecated anything like party spirit in discussing such a national question as the efficiency of the Navy, and hoped that, however they might differ upon other questions, they would be united on this.

Lord Hardwicke expressed his regret that so long an interval had elapsed before active measures were taken for carrying into effect the recommendations of the Royal Commission as to the formation of the naval reserve; at the same time, he was glad to find, from the exceedingly clear, frank, and candid speech of the Duke of Somerset, that the Government had become impressed with the necessity of activity. He concluded his speech with some remarks upon the necessity of impressment in manning the Navy in cases of great need.

Lord Colchester said that, although he perfectly admitted the capabilities of civilians to fill the post of First Lord of the Admiralty, he thought it would be as well that the impression should not go forth to the Navy that naval men were unfit for that post. He concluded by impressing on their lordships the necessity of having a measure passed to empower Government to impress seamen in case of an European war.

The Duke of Somerset, in reply to Lord Stanley of Alderley, stated that the Marines would be increased by an addition of 1000 men during the present year. It had been proposed to increase the Marines still more, but it was deemed inexpedient to make the total increase all at once. The 6000 men on shore recommended by the Royal Commission to be held ready for embarkation in case of emergency were already enlisted. In regard to impressment, he thought it would be only under circumstances of the direst emergencies that the Government would be justified in recommending such a course to Her Majesty.

Lord Shrewsbury made a few remarks.

The Lord Chancellor briefly stated that there was no doubt that, although the custom had fallen into disuse, the law in regard to impressment was as much in force as ever.

In the House of Commons Sir C. Napier moved an address to Her Majesty, expressing the regret of the House that, instead of a reserve of 70,000 men, contemplated by the Manning Commission, there exist only 6362 coast-guard men, 1900 district ships' companies, 1400 revenue men, and 600 cruisers' men, and 5000 or 6000 coast volunteers not to be depended upon; and praying Her Majesty to give directions that the coast-guard should be completed to 12,000 seamen, as recommended by the Commission, ready to be placed in efficient ships at the several ports, instead of the present block-ships, thus constituting a reserve of ten sail of the line, ready for any emergency; that the number of naval volunteers, now under 1000, should be completed as soon as possible, and the other recommendations of the Commission complied with. In the course of a long speech he threw out many hints for improvements of the Navy, and for rendering it popular, accusing the Admiralty, among other shortcomings, of tardiness in adopting his suggestions.

The motion was seconded by Sir J. Elphinstone.

Lord C. Paget, premising that, in his opinion, the bringing matters of detail connected with the Navy so frequently before the House was very unadvisable, and not for the advantage of the Service, asked the House not to agree to the motion, noticing the invidious manner in which the coast volunteers were spoken of in it, and maintained that they were to be "depended upon." He went over the principal topics in the motion and in the speech of Sir C. Napier, whose figures, he said, were inaccurate, observing that the enrolment of the naval volunteers, in spite of various obstacles, was proceeding satisfactorily, and that all the important recommendations of the Manning Commission had been carried out as far as practicable. One of the most important related to boys for the Navy, and the number, which in 1857 was 1898, in 1859 was 5147, and now the number of boys educating for the Navy was 8535, who would become first-rate seamen, and this was considered to be an ample supply. Lord Clarence entered into various details relating to matters bearing on the present condition of the Navy, and complained of the motion as implying a direct censure on the Admiralty, who were doing their best for the public Service.

Sir J. Pakington was glad that the motion had been made, as it was important to know what exertions the Admiralty were making to obtain a sufficient reserve force for the Navy, and as it had elicited an answer which he had heard with great satisfaction. He hoped it was the intention of the Admiralty to carry out all the recommendations of the Royal Commission.

The discussion was continued by Sir M. Seymour, Mr. Corry, Sir G. Pechell, Admiral Walcott, and other members, and it ended in the motion being withdrawn.

FRANCE AND SAVOY.

Some journals have treated the question of the annexation of Savoy and of the County of Nice in a political point of view. For us it must be, principally, a question of military topography.

Let us cast a rapid glance on the map of Western Italy, and give a general view of the real strength of the two annexed provinces.

The power which possesses the Duchy of Savoy has always been considered the guardian of the Alps; the power which possesses the County of Nice has always been considered to hold the key of Central Italy.

In acquiring possession of Savoy, and of Nice, the French empire becomes then, in a topographical point of view, the guardian and the porter of the Alps, if we may thus express ourselves.

The annexation completed, Savoy and Nice in our hands, no invasion of our territory can be made from the eastern side by an irruption from the summit of the Alps, all the passes of which, since 1815, belong to Sardinia. The Var can no longer be approached without a fight. In a word, the military frontier of France, from Lake Leman to the mouth of the Var, is protected against a sudden invasion.

By the possession of the western slopes of the Alps, France enjoys advantages identical to those enjoyed by her neighbour, the kingdom of Sardinia, by the possession of the eastern slopes. This great system of mountains no longer protects one of the States to the detriment of the other. The French have the right to say: "*nous sommes chez nous comme les Sardes sont chez eux.*"

It is therefore a topographical and military advantage, purely defensive, but henceforth reciprocal, which we obtain by the annexation of Savoy and of Nice to our territory. Nothing less, nothing more; for the possession of those two little provinces neither offers to us an increase of territorial power, nor an increase of population of any importance. It is no appreciable increase either to our budget or to our army.

The kingdom of Sardinia, as it existed before the campaign of 1859, had a superficial surface of 75,000 square kilometres, with a total population of about 5,000,000 souls. Now superficial surface and population have nearly doubled,—thanks to our victories and to our generous disinterestedness. The Sardinian kingdom, before 1815, was split into ten jurisdictions (*intendances*). The duchy of Savoy formed the sixth jurisdiction (*intendance*); the county of Nice formed the seventh.

These two jurisdictions represented the eighth part of the territory, and the seventh part of the population of the Sardinian kingdom.

The duchy of Savoy comprises 19 towns, 36 townlets (*bourgs*), 600 villages, and about 550,000 inhabitants.

The county of Nice comprises 6 towns, 16 townlets (*bourgs*), 160 villages, and 200,000 inhabitants.

Savoy is a country of mountains, more or less elevated; the towns are far between and compact; the soil is, generally speaking, barren: in many parts it is not cultivated at all. What we say of Savoy is equally applicable to the county of Nice. However, the county, thanks to the strangers attracted by its town and its fine climate, thanks to its port, is richer than the duchy, all proportions considered. To a state like France, which counts nearly 40,000,000 of inhabitants, an immense territorial wealth, the finest army in the world, the annexation of Savoy and Nice is but a link in a diamond necklace; it adds no value to the jewels.

Savoy furnishes the Sardinian army with a brigade of infantry of two regiments, the so-called Savoy Brigade; and, without wishing to underrate the other troops of the King Victor-Emmanuel, we may add that the Savoy Brigade is that which enjoys the best established and most deservedly-acquired reputation of bravery, discipline, and of all that constitutes military efficiency.

The county of Nice has a regiment bearing its name, "Nice Cavalry," in the Sardinian army; it is number one in the list of that branch of the service, and has always maintained its position in the face of an enemy. The soldiers of the Savoy Brigade and those of the Nice Cavalry are worthy to figure in a French army; but their number is too insignificant to be looked upon as a real effective acquisition.

Chambéry, a town with 16,000 to 17,000 inhabitants is the capital of the duchy. It possesses the best infantry barracks in the kingdom of Sardinia, store-houses for the artillery and engineers, and a military hospital.

The towns and garrison posts of the duchy of Savoy are Annecy, Fort Leseillon, which commands one of the passes of the Alps, Pont de Bauvoisin, Saint Julien, Thonon, Bonneville, Albertville, Saint Jean de Maurienne, and Moutiers. There is, moreover, a good defensive barracks on the plateau of Mont Cenis, and another one at Lons-le-Bourg, at the foot of the mountain.

The towns and garrison posts of the county of Nice are: Nice, a first-class seaport, near the military roadstead of Villefranche, with which it is connected. Nice has two infantry barracks, a military hospital, barracks for the engineers, and artillery and store-houses for both those branches of the service. The other towns and posts ars Monaco, the Vintimille forts, Saint-Rémi, and Oncille.

This brief sketch will make it understood, that the sole advantage obtained by France is, that one of her portals, which had remained open since 1815, has now been closed by the soldiers of Magenta and Solferino.

We have taken the above article from the *Moniteur de l'Armée*. After all France has done very well even in the words of our contemporary.

THE PRESENT BOARD OF ADMIRALTY AND THE NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Naval officers of the present day, however much they may differ in opinion on things in general, are unanimous on one point, and that is, the incompetency of the Board of Admiralty in their dealings with naval matters.

Wherever inquiries may be directed, whether at Whitehall, the dockyards, the offices of the Commanders-in-Chief at the various outports, or on board any of the ships of the Channel Fleet, it is still the same story of blunders, orders countermanded, circulars withdrawn, and regulations issued that have either to be modified or altogether cancelled; and confusion and disaffection reign throughout the Service.

Is this to be wondered at, when we look at the composition of the Board of Admiralty? The first lord as well as the junior lay lord, has undoubtedly a considerable advantage over the naval members of the Board, viz., in the way of education; for when we consider the early age at which the latter must have entered the Service, and remember the style of education that is generally acquired in a midshipman's berth, it would be expecting too much of their lordships to suppose that their general knowledge can now be of a very superior order, or that they could possibly have acquired any of those business habits so necessary to fit them for the position they at present hold.

The class-prejudices of the naval lords render them averse to any change or improvement in the condition of naval officers, and prevents their taking a comprehensive and statesmanlike view of the general requirements of the Service; and whenever any small concession is made to any particular class, it is only after years of agitation. No benefit ever emanates from the Admiralty but is forced from them either by the pressure of public opinion or constant begging on the part of some unfortunates whose grievances have at length become unbearable.

Sir John Pakington was the first to break through the Admiralty system, and during the short period he held office a more liberal spirit was shown in dealing with the Service than was ever before known; and in his endeavours to make the Navy popular and efficient (spite of every opposition on the part of his naval colleagues) he did much to raise the *esprit de corps* of the officers.

Among the officers of the Navy, generally, a very strong feeling prevails. They know and feel that although their utmost exertions may be put forth for the discharge of their duties, they can never hope for a fair reward. They are ever doomed to remain underpaid and undervalued until circumstances shall force the whole question of naval administration on the consideration of the House of Commons.

Daily we hear of mutinous outbreaks among the seamen, although they have been petted and their pay increased to a point they never expected to attain some few years since; but still they are disaffected. And can we wonder at it when they see their officers are not supported in a proper manner by the authorities in the discharge of their duties.

Not one single class of officers are satisfied with their position, and very few care to remain longer in the Service than necessity obliges. Captains are disgusted at the unsatisfactory drudgery they are subjected to in licking a raw ship's company into shape unbacked by a sufficient number of executive officers; commanders find that they must toil on for years without hope of promotion; and lieutenants have to perform the duty of midshipmen, and serve till worn out, without a rise in pay or position.

Medical officers are disappointed at finding they continue in the same anomalous position, as regards their naval rank, as they were in before their warrant was issued; and paymasters, overburdened with work, are deliberately insulted by a proviso on the subject of their inadequate scale of half-pay, while they have no hope of any progressive increase to their full pay, in consequence of the continuance of the unjust and absurd system under which they are classed.

Then too the masters and engineers are dissatisfied that many of their grievances were not redressed when their case was under consideration, after the very fair promises made by the present Admiralty through their secretary, who, it is suspected, is no great friend to the masters, or to any of civilian classes of the Navy.

But all this will continue while the Board of Admiralty remains constituted as at present. And we may tremble for the consequences should we find ourselves involved in a war with France; for from the incapacity of our naval administrators, added to the present disorganisation and disaffection so prevalent throughout the Navy, we can expect nothing but defeat and disgrace; whereas, under a fair and reasonable system, we should find that new life and unlimited zeal would be instilled into the officers, which could not fail to have a beneficial effect on the men.

I fear to trespass further on your space; and trusting that, by the insertion of the above in your valuable GAZETTE, attention may be called to the lamentable state of matters in that Service on which the very existence of the country depends.—I am, &c., AN OBSERVER.

THE SHEERNESS COMMAND.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Having begun life in the Navy I still feel no little interest in all that concerns the best interests of that noble profession; and I, in common no doubt with many others, hailed with delight the advent of your paper, the ARMY AND NAVY GAZETTE. Now I trouble you with this in reference to the Sheerness command, which will soon be vacant, because I see in one of your contemporaries there are four officers named for the appointment—three who have had commands as admirals, and one who has not. Sir Houston Stewart's flag has hardly been down, and he has barely returned from the West India command; but he is named for the post, among the other candidates. I will not go into the claims of the other officers named, though there is but one of them who has always roughed it and faced the bad climates as a captain.—I am, &c., F. M.

[Sir Houston Stewart is an officer whose services can be ill-dispensed with in the present condition of the Navy—ED.]

MOUNTED RIFLEMEN AND YEOMANRY CAVALRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Much has been written of late about mounted riflemen, volunteer cavalry, irregular cavalry, and yeomanry cavaly, in connection with the Rifle Volunteers. That all infantry should be supported by a proportionate number of cavalry and artillery is a military axiom: and I believe the proportion of cavalry is one to six of infantry, therefore 15,000 cavalry are sufficient for 90,000 infantry. As yet, the Rifle Volunteer infantry do not exceed 60,000 men. There are 15,000 yeomanry cavalry now embodied, and have been for many years; it is not necessary, therefore, to raise any more irregular cavalry for the support of the Volunteer Rifle infantry, until they have added considerably to their numbers, which I hope and believe they will steadily do.

In considering the uses to which our irregular cavalry should be put, I fear our gallant Indian officers are apt to overlook the difference between the country in which they so effectively handled that force, and the enclosed and highly-cultivated land of England, where it would be difficult to find space sufficient for an effective charge, even of a squadron of cavalry; and as the same difficulty would equally apply to the cavalry of an invading enemy, the probability of two opposing squadrons ever meeting is so remote, that it would be wrong to spend much time in practising field movements.

It is evident that, whether in aid of the civil power, or before an enemy, cavalry in this country cannot be used in more extended fronts than that of one troop or a division; and as, whenever cavalry have charged cavalry, with any extent of front, it has been found that success depended more on the boldness with which the charge was made than on any previous drill, we may rely much on the material we have to work upon in the men composing the Yeomanry of England.

The beau-ideal of a light cavalry man is most graphically set forth by one writer, who describes him as a man accustomed to fox-hunting, mounted as such men generally are in this country, furnished with a plain hunting saddle and bridle, a shooting jacket, and probably a jockey cap, a breech-loading carbine, rifled, and a light sharp sword. His duties being to turn out when called upon, join the infantry force to which he is attached, and then proceed to ride "across country" to the front, for the purpose of reconnoitring the enemy, and returning with such information as he can obtain. Should an advance be the result of such information, he is to ally himself with his next hand man, and they are together to proceed to the front in loose skirmishing order,—one man dismounted very imperfectly performing the duty of a foot soldier,—whilst his friend is left to hold two frightened horses with one hand, "and make the best fight he can with the other," but on no account to abandon his dismounted comrade, notwithstanding he himself is forming an excellent target for the enemy's rifles.

The day's proceedings having terminated satisfactorily (or otherwise), as no provision has been made by the trooper against weather or hunger, either in his own case or that of his horse, it is presumed they are both returned to their homes and friends to be recruited for the next day. Such would be, no doubt, the beau-ideal of a light cavalry man and his duties; but, unfortunately, it is simply impossible; a very little serious consideration must convince any person that, even playing at campaigning cannot be done in "a plain hunting saddle and a shooting jacket." Let us see what would be the real practical proceedings under either of the supposed cases, of aid to the civil power, or when opposed to a foreign enemy.

A trooper is warned to turn-out (as is now the regulation in Yeomanry Cavalry regiments) by the troop trumpeter, or by the non-commissioned officer of his squad; he immediately repairs to the alarm-post of his troop, and is from thence led by his officers to the point indicated by the general, or other commanding officer, where they will either join the regiment to which they belong, or be detained to act independently, as the case may require; but in perfect ignorance of the cause of turn-out, its duration, their ultimate destination, or duties.

Under such circumstances, what would be the obvious duty of the officers and men? Certainly to be prepared against all contingincies of weather, hunger, delay, exposure at night, and fighting; and that can only be done effectually by each man carrying a horseman's cloak, a change of clothes; corn-bag, haversack, tools for cleaning arms and appointments; a carbine, sword, and ammunition; and for the protection of his life, if taken prisoner, he will require a more decided uniform than a shooting-jacket and a hunting-cap.

All the articles here enumerated, and some others, cannot be carried on "a plain hunting-saddle;" and it will be found that the present light cavalry saddle is not more than is requisite in convenience and strength; although perhaps, it will be yet further lightened and better adapted to the horse's back.

No general officer would be justified in counting upon the services of any cavalry that were less fully appointed than as above described.

Mounted riflemen are supposed to be foot-soldiers supplied with horses, and the advantage hoped for is the power of locomotion. In some countries, such as South Africa, where the extent of country is great, and the mode of fighting partakes entirely of the guerilla, this power of locomotion may outweigh the disadvantages of so composite an animal, in whom you possess neither a good infantry man nor a dragoon. His fire, delivered from the saddle is ineffective—one of our best cavalry officers having declared that no fire from a horse's back can be depended upon—and if he dismounts he is hampered with his horse, which, even if sufficiently trained (which our irregular cavalry never will be) to admit of the man taking deliberate aim with his arm through the bridle, will prevent his advancing over a hedge, dashing into a thicket, or covering himself quickly without abandoning the steed, which is very unlikely to stand quietly and await its rider's return.

A mounted rifleman is therefore not a good foot-soldier; and it is not difficult to show that he is a worse dragoon. His dress, to enable him to ride properly, is just what it should not be for a foot-soldier; he must wear boots and straps, he must carry a rifle and a bayonet in addition to his cavalry sword—the sword-bayonet being perfectly useless on horseback, and the dragoon's sword equally so on foot, where indeed it would be a serious incumbrance—besides which, these men would frequently be alone, the most ineffective position in which a horse-soldier can be placed.

Nor is it by any means clearly shown what these mounted riflemen could act in this country, better, or even so well, as the dismounted rifleman. If locomotion is the only advantage, and it is considered so desirable, would it not be better to provide light waggons with 4 horses each, to carry 12 or 14 riflemen, and let that conveyance take them as near to the desired position as possible and be at all times sufficiently near for these foot-men to fall back upon?

There are few places in this country where the lanes and roads are not sufficiently numerous to admit of such an arrangement being effectually carried out.

The present question therefore is how, for the future, to drill and employ the existing Yeomanry Cavalry for their double duties as irregular cavalry, and as an aid to the civil power, in which latter capacity they have hitherto exclusively acted, rendering much service by their existence alone, which has had the effect of preventing many premeditated outbreaks.

The Yeomanry Cavalry of this country number between 14,000 and 15,000 men, formed into 34 regiments, commanded by colonels and lieut.-colonels commandant, five corps commanded by majors, and eight independent corps and troops commanded by captains, the whole occupying 34 counties. They are armed with the short Victoria carbine and a cavalry sword; some have one or two field-pieces attached to them. Of late it has become the fashion to convert one or more troops into mounted rifles, and one or two whole regiments are undergoing this change.

Many of the corps date from the latter end of last century, all have been in existence for several years, and much active service in aid of the civil power has been experienced by some of them. The whole force is raised and maintained under the powers of an act of parliament passed in the year 1804, 44 Geo. III., c. 54, but altered and amended by 4 subsequent acts, the last of which is the 7 Geo. IV. c. 58, year 1826, all which acts also apply to any Volunteer Cavalry, Artillery, or Rifles which may be raised in Great Britain.

The Yeomanry Cavalry are clothed and armed by they country, and also paid when called out in aid of the civil power or for the purpose of exercise and inspection, but the Act requires that the men should be drilled at least 12 days in every year whether they are ordered out for inspection or not.

The cost of clothing this force, and of every contingent expense connected with the proper maintenance of a corps of cavalry is defrayed by the annual payment of 3*l*. for every effective man, to the commandant of the corps, exclusive of officers. The pay, ammunition, and a few ordnance issues amount to another 3*l*. per annum. The total cost being about 80,000*l*. a year, not a very extravagant charge against the country for 15,000 mounted men at all times available for service either in aid of the civil power or against an enemy. It need hardly be stated that the pecuniary assistance rendered by the officers is very considerable.

The duty of the officer sent by Government to inspect a corps of Yeomanry is to satisfy himself that the strength of the corps is such as was stated in the last return, to see that the clothing and appointments are good and sufficient, that the adjutants, and troop-sergeant-majors understand their work, and finally to ascertain to what extent the corps have benefited by their instruction. On the reports of these officers the Government form their estimate of the efficiency of this branch of the Service.

The organisation of this force is pretty much the same throughout. The law directs by whom it shall be placed under arms. The number required, their destination, and the duration of the service depends upon the lord-lieutenant, or the local magistrates; and there is no greater error, amongst the many which exist to the detriment of this branch of the service, than to suppose it requires an undue time to collect a body of Yeomanry Cavalry for service; the contrary being the fact, so much so that there is a proverb amongst them that "the strongest musters are for dinner, except for a fight:" 380 men from one regiment have been concentrated on one point in 20 hours from the date of the order, and that without any previous idea that their services would be required, or the assistance of railways, some of the troops having 30 miles to march.

Fifteen thousand mounted men well officered, clothed, armed, and organised, are in existence. The question is how for the future to drill and employ them. As regular cavalry they cannot be used: let us see to what uses they can be put.

As an aid to the civil power no material alteration is necessary—their very existence is in this respect of the utmost service.

As irregular cavalry in the hands of a general officer before an enemy, they can be made fit for escort duty to protect ammunition, stores, or prisoners, and for distant general reconnoitring parties, form outlying pickets, videttes, orderlies, and guides; or, in connexion with the Rifle Volunteers, they would protect the inhabitants from, and assist in harassing, the enemy's foraging parties.

As an immediate support to Rifle Volunteers, they would act as reconnoiterers or advanced skirmishers, to fall in on closing with the enemy. On a general advance, they would be thrown forward in a body to secure and hold some known bridge, ford, or ravine, until the main body came up; and on a retreat, cover the rear by the same and other means. For these latter services it would be necessary to arm the men with good rifled carbines; but the sword must ever be considered the arm of the dragoon.

For any employment, it is evident a soldier ought to be well versed in the used of the weapons which are put into his hands. In this respect the Yeoman has more to learn than the Rifle Volunteer; for he must handle his carbine well, mounted, or on foot; he should be very perfect in the use of his sword, besides which he has to teach and manage his horse. These are duties not learnt in a day—nevertheless with the present organisation of the Yeomanry there is no reason why every man should not be versed in them, and that without being "called out for drill and inspection." The drill necessary is personal, and may be carried on at troop quarters and in plain clothes, as often in the week as other occupations will permit. Without this personal drill at troop quarters it never will be learned; and I would here take the liberty of advising the Yeoman in this respect to imitate the praiseworthy exertions of his brother-in-arms, the Rifle Volunteer.

Mounted drill is for a different purpose. One writer strongly recommends that the antiquated instructions of the Yeomanry should not be continued, and hints that a few days' instruction for such irregular cavalry as he purposes would be quite sufficient. Without what is called troop mounted drill it would be impossible to move or handle cavalry under any circumstances; it is not too much to say that a body of mounted men could not be marched through an ordinary street without great confusion, and were the town much crowded with other troops they would shortly come to a dead lock, or be dispersed. Cavalry must learn to fall in, to answer to their names, and be told, as troops or in squadrons, to dress and wheel by threes. On the line of march, under the most favourable circumstances, they would frequently be obliged to increase and diminish their front, incline right and left for passing carts; and to prevent or make sudden attacks, or allign themselves with another body, formations to the front, flanks, and rear, are indispensable. No body of cavalry could be out half a day without experiencing the necessity of the men and horses being well acquainted with mounted troop drill; nor can it be rendered more simple, to be efficient. than it is at present laid down in the instructions for Yeomanry Cavalry.

With men thoroughly versed in troop mounted drill, field movements are entirely dependent upon the officers' acquaintance with their duties; but it is so unlikely that field movements ever can be required in this country beyond the simple parade movements, that it becomes a question if the time of the officers and men now expended upon them would not be better occupied in perfecting themselves in those detached operations which must inevitably constitute their occupation before an enemy.

The amount and method of Yeomanry drill should not any longer be left to the choice of the commanders of corps. One uniform system should be fixed upon by competent persons; and an inspector-general of Yeomanry Cavalry should be appointed to see that it alone is practised, and that it is properly and sufficiently carried out both by men and officers—so that by degrees this large force of irregular cavalry may be safely counted upon as an efficient aid in case of necessity. Whatever number of irregular cavalry volunteers, or mounted rifle volunteers may be raised, and however they may be employed, they must undergo a certain amount of troop mounted drill; and as they must be selected from the same class of men, they must ultimately resolve into mounted yeomen under another name; in fact, be what now exists in sufficient numbers—"Yeomanry Cavalry."

The Yeomanry Cavalry as now constituted have a great advantage over Rifle Volunteers in point of discipline, in as much as the former are officered by a class decidedly superior in station and education, a troop usually consisting of the tenants of the gentleman commanding it, and others the tenants of his immediate neighbours, not improbably field-officers of the same regiment. There exists therefore a natural respect and deference for the officers, without which it is very difficult to obtain anything approaching to military discipline. Another advantage which exists in selecting yeomen for this service is their acquaintance with horses, their ability to tend and groom them themselves, as also to clean their arms and appointments when on service; for in this country the Indian method of camp-followers cannot be tolerated, nor indeed would it be possible.

The present system of small arm instruction differs so much from the old system, and brings the recruit so forward previous to his expending any ammunition, that the difficulty and delay in procuring safe and proper ranges for ball practice need not in any degree retard the personal drill of every man and officer in the Service—an operation that must be at once set about in perfect earnest; nor does it require any fresh organisation for its commencement. The new sword-exercise is out and issued to each corps. Let that be perfectly learned; the carbine drill, as altered for breech loaders, can in the meantime be issued and practised to a great extent with the present short Victoria carbine now in the hands of the Yeomanry, to be perfected on the issue of the new arm.

A very mistaken feeling is apt to pervade the members of this Service that, if the Government would take some steps to re-arm and re-organize them they would necessarily become efficient. That some modification of the present system, and a better recognition of this branch of the service would have a great moral effect, is not to be denied; but no act of the country or of the Government can form a substitute for the personal exertion of every member enrolled.

Personal drill is the mainspring of this Service, and without it nothing satisfactory can be attained; with it the irregular cavalry of this country may shortly be rendered serviceable and creditable, as it already possesses in a sufficient degree every element required to form a soldier. Let officers and men at once unite in increased exertions on this vital point. Parliament and the country will most readily second their exertions in any manner which is proved to be advantageous.

Any cavalry who have the most remote chance of being opposed by regular cavalry, ought to have the support of artillery capable of keeping pace with their most rapid movements, in the proportion of two guns to every two hundred and fifty cavalry: and now that Whitworth's three-pounder gun is so reduced in weight as to be worked by two horses, this complement of guns should be doubled. Whether the Government may see fit to supply these guns when the occasion arises, from the regular artillery force, or at once to issue guns for the Yeomanry to horse and practice with, is a matter for their consideration, and it matters little which course is adopted, provided they are forthcoming when required.

Butts and ranges for ball practice is a subject which must be taken up seriously by the country; it is not consistent with safety to the public that rifles of such ranges as are now placed in the hands of recruits should be practised with, excepting on ground which by nature, art, and the vigilance of the officers commanding the practising parties is rendered perfectly free from danger. I am, &c. AN IRREGULAR.

THE ARMIES OF THE CONTINENT.

PRUSSIA.

The committee appointed to take into consideration the proposed reforms in the Prussian army have concluded their sittings. M. de Vincke, the Chairman, spoke against the introduction of three years' effective service instead of two; in other respects the reforms, which originated with the Prince Regent, are likely to pass.

On the opening of the Chambers, on the 12th of January last, the Prince Regent, whilst announcing the intended reforms, observed: "It is not our intention to break with the inheritance of a great epoch. The Prussian army will still be in the future 'the Prussian people in arms.' The actual organisation of the Prussian army dates as far back as 1814. Since then nearly all the military powers have introduced considerable and important ameliorations into their respective armies. The geographical position of Prussia is, to say the least, disadvantageous. Situated between Russia, Austria, and France, that is to say between the three most powerful states of the continent, the Prussian territory is wanting in continuity; it has an enormous extent of frontier, with no good natural defences.

The actual organisation of the Prussian army is based upon the principle that every citizen is bound to serve in the defence of his country. Now this principle no longer exists in reality. In 1820, from a population of 11,000,000 souls, 40,000 recruits were annually levied for the military service. In 1858, from a population of 18,000,000, the same number of recruits only was raised. It is now proposed to increase the annual levy to 63,000 men.

The second reform proposed is a complete reorganisation of the militia or *landwehr*. It is proposed to incorporate the three youngest classes of the landwehr, that is to say, the young men between 25 and 27 years of age, with the active army, of which they will form the reserve; the rest of the landwehr will be more especially directed to defensive service. The cavalry of the landwehr is to be abolished; but the regiments of the permanent army will be increased.

According to the new organisation the Prussian army will comprise, as hitherto, two distinct sections—the permanent army and the landwehr. The projected reforms bear chiefly upon the reciprocal relationship of those two great military bodies, and on the length of time of service.

Obligation to serve commences at the age of 17 years, instead of 20 as hitherto, and terminates at 49. The time of actual service, however in the line and landwehr does not exceed 19 years, that is to say, from the 20th year to the 39th. Beyond that period the men are simply liable to be called out with the *landsturm*, the general rising of all men capable of bearing arms, when the land is invaded by a foreign foe. There is, therefore, no real change in total time of service. Only on the old system the soldier belonged for a term of 5 years to the regular army, and during 14 years to the landwehr. In future, the service will be 8 years in the former, and 11 in the latter. The length of actual service varies according to the different branches of the army; it is fixed for the infantry, artillery, and engineers, at 3 years (instead of 2 years); for the cavalry 4 years (instead of 3 years). For the other 8 years the soldier of the line belongs to the reserve.

The question of length of effective service has often been discussed in Prussia. In 1833, for the infantry, it was reduced from 3 years to 2. But it soon appeared that 2 years did not suffice to form a good soldier, and 3 years' service was again introduced. As regards the cavalry, it is nearly the same. As the cavalry consists chiefly of picked men, their number is consequently relatively limited. The new Prussian organisation increases the number of cavalry regiments, and as this increase cannot be raised from the ordinary contingent, the time of service is prolonged. There are other reasons of a military nature in support of this measure. As the Prussian cavalry, even after the projected increase will still be numerically inferior to that of the other great powers, that inferiority must be made up by a careful instruction of the cavalry soldier.

As regards the militia (or landwehr) it will undergo great changes. Hitherto it was subdivided into two levies, of which the first comprised the men on furlough from the line up to the age of 32, and the second those from 32 to 39. That division is now to cease. The three youngest classes of the first levy are to be incorporated in the permanent army, and the landwehr will henceforth form one section only, and will consist of the disbanded soldiers between the ages of 29 and 39. Moreover, the yeomanry (landwehr-cavalry) will be entirely abolished, but the cavalry of the line increased one half.

According to the new organisation, the duty of the militia will be to support and reinforce the permanent army. The proposed plan even goes beyond. According to the law of 1814, it was only called upon to defend the country within the frontier; the new law enacts that, if necessary, the militia can be employed beyond the frontier. This new enactment originated on account of the objections that were raised when the Prussian army was mobilised in 1859. A great portion of the public, who were opposed to the mobilisation, maintained that, as the Prussian territory was not invaded nor threatened, it was illegal to call out the militia. Despite this new enactment, the duties of the militia will be considerably lessened: for, according to the new organisation, the permanent army of Prussia, including the reserves, is to be brought up to the figure of 500,000 men, that is to say 2¼ per cent. of the population. It is clear that, without exceptive financial and other efforts, the country could not provide a greater number of soldiers; hence it ensues that the militia will very seldom be called out, and then chiefly employed in garrison duty.

Let us resume the proposed changes.

All the cavalry of the landwehr (yeomanry) is suppressed, and the *cadres* of all the foot militia considerably reduced. On the other hand, the regular army will be increased in the infantry by 9 battalions of fusiliers, 4 regiments of the guards, and 32 regiments of the line; the battalions of chasseurs will be strengthened. The cavalry will receive an increase of 2 regiments of the guards, and of 16 regiments of the line. The artillery will also be considerably increased. The engineers will be increased by 9 companies of pioneers. The military train will also be proportionately increased.

The Prussian army will then consist as follows:

INFANTRY.—9 regiments of guards and 72 of the line, or 81 regiments or 243 battalions; 1 battalion of instruction, 10 battalions of chasseurs and rifles, a school of rifle practice, and 116 battalions of militia (landwehr), with *cadres* on a small peace footing.

CAVALRY.—8 regiments of guards and 48 of the line (56 regiments or 224 squadrons); a riding school.

ARTILLERY.—9 regiments, each of which will comprise 9 foot batteries, 3 horse batteries, 4 fortress companies, 1 company of workmen; in all, 108 field batteries. In addition the artillery will count two combined sections of fortress artillery, one of five, the other of four companies; finally, one section of artificers.

ENGINEERS.—9 battalions of pioneers of four companies each; two reserve companies.

The military train will consist of nine battalions each, of two sections.

The total strength of the Prussian army will thus be brought up to the figure of 500,000 men, of which number 200,000 will always be under arms. The increase is great, for on the old system the regular army on a war footing was little more than 225,000 men, with the militia as a reserve in case of actual hostilities.

It will take some considerable time before these reforms are effected, from financial as well as other reasons: but the Prince Regent has resolved to see them gradually carried out. The Minister of Finances has estimated the annual increase of expense for the army at 9,500,000 dollars. To this must be added, for pensions, and other branches of the services, about 4,000,000 dollars, and for extraordinary expenses from 4,000,000 to 5,000,000 dollars. In other words, the estimates for the army usually fixed at from 30,000,000 to 32,000,000 dollars would be increased to 48,000,000 or 50,000,000 dollars;* more than one-third of the revenues of Prussia. Consequently, considerable opposition has manifested itself in the Chambers, as well as in the public. The addition made to the income-tax at the last mobilisation of the army is to be maintained. The whole project will, however, shortly be discussed in the Prussian Chambers.

* About 7,480,000*l.*

RIFLE TRIALS AT HYTHE.

The Council of the National Rifle Association having invited all the rifle-makers in England to a competition of small bores at Hythe on the 1st of May, the invitation was responded to by Mr. Whitworth and by a deputation of Birmingham gunmakers, headed by their chairman, Mr. Goodman. The United Gunmakers declined to enter their rifles for the trial under the name of any particular maker, but sent ten rifles, representing the best that could be turned out by the trade, in the hope that some one of the ten might be found superior to the Whitworth. The London makers appear to have declined the contest altogether. It is a significant fact, that all the rifles sent to contend with those of Mr. Whitworth had the bore and turn which he has adopted, so that at the very outset it was tacitly admitted that in its bore and turn the Whitworth system is right. The council of the Association were represented at Hythe by Lord Spencer, Lord Elcho, Lord Vernon, General Hay, Mr. T. Fairbairn, and the secretary, Mr. St. John Mildmay. The programme of the trials was drawn up on Tuesday, and in spite of the high winds which prevailed, some score shots were fired from the rival rifles, each firing alternately at the same target at a range of 800 yards. The experiments were begun at too late an hour of the day to admit of their being long continued. The results, as far as they went on the first day, were greatly in favour of the Whitworth. On the following day, in spite of the wind, which was blowing a complete gale, the trials, under the judicious arrangement of General Hay and his well-organised staff, were proceeded with. The United Gunmakers insisted that all the shooting should be from the machine-rest, as that was the most satisfactory mode of testing the guns, without depending on the marksman's skill. They had not, however, provided a rest of their own, but made use of one constructed by Mr. Whitworth for the Hythe School of Musketry. Mr. Whitworth brought with him a similar rest, and both were placed side by side in the first instance at 800 yards from the target. The superiority of the Whitworth rifle was manifest from the first, and the United Gunmakers, after trying two of their best rifles, found it hopeless to continue the contest, and withdrew their rifles from further competition. The mean deviation of 40 shots of the Whitworth rifles was 21·36 inches; of 40 shots of the gunmakers' rifles 70·80 inches, at 800 yards. It should be stated that the wind continued to blow down the range with the greatest violence throughout the trials, and, in fact, about half of the 40 shots of the United Gunmakers failed to hit the target, which was 18 feet square. All the Whitworth shots hit, as the Whitworth projectile, owing doubtless to its greater velocity and lower trajectory, was much less affected by the wind. With the view of rendering the comparison more complete, the best of the rifles of the United Gunmakers, 39 inches long, was fired against a Whitworth, 33 inches long, at a range of 1100 yards, and the result, as was in fact anticipated, more fully confirmed the superiority of the Whitworth rifle. It can hardly be said, considering the results which have been obtained from these trials, that the council of the National Rifle Association committed an error in judgment, when they proposed that the Whitworth rifle should be used at the national rifle meeting in July by those who intended to compete at the longest ranges.

Mr. Bradshaw has published a "Handbook to the Bombay Presidency and the North-Western Provinces of India," which contains a map of the presidency and surrounding territories, and embraces descriptions of all the territories, the architectural plan observed at each town and territory, the territorial districts, military and civil authorities; attractions, temples, caves, and excursions; telegraph stations, rates, and tariff; railway stations, fares by railway and other conveyances—by river, dawk, &c., post-office regulations, bazaars, &c.; Etymology, superficial contents, physical characteristics, mountains, rivers, zoology, commerce, manners, revenue, religions, history, antiquity, and customs of the natives; canals, and distances from town to town; instructions how to travel over every portion of the country, weights and measures, coins.

MILITARY TRANSPORT BY SEA,

A lecture was delivered yesterday afternoon at the United Service Institution by Mr. Alexander Wood, on the very important subject of the transport of troops by sea. The lecturer, who has the advantage of great practical experience in several branches of the public service, pointed out with great force the evils and wasteful expenditure entailed by the present system of sending reliefs to India and the colonies. He showed that the recommendation of the commissioners for re-organising the Anglo-Indian Army, that the period of service should be twelve years, was wholly impracticable, inasmuch as the official return stated that the losses by casualties and from other causes, among the troops in India, was 10 per cent. annually. So that in ten years that army would require a complete renewal. The point was even carried still further, and it was shown that the period of active service was practically limited to eight years, as two years out of the ten for which the troops were enlisted, were passed in learning the drill, and making the voyages to and from India. The remedy proposed was a limitation of the period of service in India to five years. He anticipated any objections which which might be urged to his plan on the ground of the great mortality which took place among newly arrived troops, by declaring his opinion that improved arrangements for the comfort and increased attention to the sanitory condition of the men on the voyage out would diminish the predisposing causes of disease. Not content with taking up this position he quoted the opinions of various medical men resident in India, to prove that the mortality among our troops was not so great in the first as in the second five years of service there, and that consequently a system of quinquennial reliefs would tend to lessen the present rate of mortality. No objection could be urged against his plan on the ground of increased expenses of transport, for by a well organised system the cost of sending out and bringing home the troops so frequently as once in five years, would be less than was incurred under the present unsatisfactory system of Indian and colonial reliefs. He referred to the experience of the East India Company, who, by chartering ships to take out and bring back troops, and permitting them to carry cargoes, were enabled to get the forces conveyed at a low rate. During the period from 1852 to 1856, the Queen's troops in India were, in round numbers, 28,000, and the average annual charge for transport was 123,000*l.* If the plan of relieving British troops at the expiration of five years, had been adopted, 5600 men, or one-fifth, would have been required to be sent out each year, and, after allowance for casualties, three-fifths, or 3360, would have been brought home. He estimated the cost would not be more than 25*l.* per head, so that the entire charges for this outward and homeward transport would have been but 112,000*l.* or 11,000*l.* less than was actually paid by the East India Company. If his (Mr. Wood's) system were applied to the Army, at present 80,000 strong, instead of 28,000, as in the period referred to, a saving would be effected to the country of not less that 30,000*l.* This pecuniary gain would not, however, represent the entire value of the plan; for what was ever of more importance than the money, the mortality would be very greatly reduced. The health of our troops in India, even regarded in a money point of view, was a subject of extreme importance, and one which, apart from higher considerations of humanity, should induce the Government to consider whether some scheme, such as he had proposed, might not be adopted with benefit to the Army, and with great advantage to the country. The system advocated by the lecturer may be summed up in the adoption of a more frequent system of reliefs for the sake of the health of the Army; and a mode of chartering, which would admit of the vessels which took out regiments, bringing back troops who had served their time. This alteration would enable the change advocated to be carried out at a considerable saving of the public expenditure. The lecture was listened to most attentiveiy by a number of members of both Houses of Parliament, who were present, together with several distinguished members of the Army and Navy. A vote of thanks, unanimously accorded, followed the close of the address.

THE ARMY OF THE POPE.

General de Lamoricière has accepted the chief command of the Pontifical army. The general has had frequent interviews with the Pope, and has expressed his opinion that the army contains excellent elements for forming efficient troops. At Ancona, General Lamoricière inspected the troops and examined the state of the fortifications. A correspondent of the *Débats* gives the following as a pretty correct statement of the Papal forces, taken from official sources:—

MARCH 1, 1860.

General Staff	18
Etat-major de place	50
Intendance militaire	13
Officiers d'administration	30
Regiment of artillery	930
Bataillon sedentaire	1000
Corps of Engineers	40

NATIVE INFANTRY.

1st Battalion of Chasseurs	850
2nd Battalion of Chasseurs	730
1st Regiment	1750
2nd Regiment	1110

FOREIGN INFANTRY.

1st Battalion of Chasseurs	470
2nd Battalion of Chasseurs	1054
1st Regiment	2431
2nd Regiment	1645
Cavalry	170

GENDARMERIE ON FEB. 1.

Legion of Rome	2200
Legion of the Legations	770
Legion of the Marches	1050

THE SIKH SOLDIERY.

(*Continued from p.* 159.)

The Sikh is naturally an idle, rough soldier. An irregular soldier *par excellence*. Our strict discipline is an abomination unto him. Glory and plunder to his mind are terms synonymous and inseparable. No fighting too hard, no labour too great, no service impossible, provided it promise a fair chance of plunder. Nor are these men Utopian in this matter. A few old brass pots, or a faded silk scarf, a pair of bangles, or a bright pyjamas, will repay any Sikh for eight hours' hard fighting; but deny to that man his bundle of rags, and you make him your enemy. Some men worship fire, others a stone; but the god of this nation is *loot*, and his power is infinite. Let the war with China be proclaimed in his name, and you shall see every Sikh between the age of sixteen and sixty years of age on his way to Pekin. From the time these men came in contact with Lord Clyde's forces at Futteghur, it was noticed that the exodus from the Punjab began to abate, and the manufacture of converts at Umritzer ceased. The reason was simple, plunder was forbidden—punished. Our Sikh soldiers buried their god in tears, and wrote to their countrymen to stop at home.

But although opposed to our practical ideas of military excellence, and we suspect that only a small part of the present large Sikh force will submit to them, there is no doubt these men may be brought under a rigid discipline, and acquire the bearing and efficiency of thorough soldiers. They have a good deal of the solidity and *aplomb* of British Infantry upon parade, but make bad light soldiers. We have seen our best drilled Sepoy regiments, and they could no more compare upon a parade-ground with Braser's Sikhs than Hodson's Horse would with any one of our late Irregular Cavalry Corps. The Sikh is an indifferent horseman, and never looks at home upon his steed. This is admitted by themselves. Recruited,—we here speak of the Sikh people,—from the lowest ranks of the Hindoo family, they have neither the experience, habits, nor tactics which make innate horsemen. How far it may be taught them, remains to be proved. We took the measure of the Sikhs, as Infantry and Cavalry soldiers between 1845 and 1849, and the latter were found wanting. The experience of 1857 only teaches us that, led by English officers, Sikh sowars are more than a match for Tait's or Holmes's irregulars, without officers to guide them. Place them upon equal terms, and we opine that the Rajpoot and Puthan is more than a match for the Sikh horseman. As an Infantry soldier, excluding the Goorkah, the Sikh is physically and politically the best, since, whilst he boasts more muscle and less caste than any other race in India, he yet has sufficient caste or religious status to keep him from sinking in the eyes of the governed to the level of a pariah sepoy.

Idle, independent, martial, and deeply imbued with a nationality, for which we look in vain among the other peoples of Hindustan (the tie that binds Mahomedans together is purely religious), the Sikh is at once a good ally, and a dangerous friend. The keener the weapon, the nicer the edge of the sword by which we rule India, the greater our danger should that weapon ever be turned against ourselves; and we have no right to lose sight of such a contingency. A force, looking to our position in the East, that is of no danger must necessarily be one of little service to us. We must choose between two evils. Either the old effete Poorbeeah sepoy, of no use to us out of India, and now no longer required for India, impotent for good or evil; or a rough soldier, from whom, with careful management, we may draw essential service to the parent state, by turning into other channels (China, the Cape, West Indies, Ceylon, Mauritius, and Australia, for instance) the turbid, restless blood of Hindustan, whether it be Sikh or other. The latter course, we are of opinion, now that the occupation of India by an adequate force of British troops has been decided upon, we can pursue, not only in safety, but with marked advantage, since by this means alone can we meet the extra call made upon our resources at home, by the despatch to India of 80,000 men. The character of our future Native Army rests entirely with ourselves. We can have any description of men, in any number, and for any service. The supply is, and ever must be in India, ten times greater than the demand.. Insist upon this, and the prejudices of *caste* that hitherto have damned the soldier of India will join the shades of Futtyism, infanticide, and other prejudices of the past. *We require recruits for service abroad.* Be this understood between Cape Comorin and Peshawur, and from fifty millions of men we shall have no difficulty in raising a really serviceable native force, or this, or nothing. The late Sepoy Army was an expensive mistake. We cannot again afford to pay and watch such a force, and we must do both, or expose ourselves to the risk of another 1857. If we are to have sepoys (and we cannot do without them), it should be to a great extent for employment out of India. Brahmins may feel shocked, and Rajpoots throw up their hands, but they will end by making very good general service sepoys, or we much mistake these gentlemen. Besides, we can do without them. In northern India alone among the Jats, Sikhs, Goorkahs, Belochee, and other hill tribes, we shall find more material than we have occasion for at present.

A force such as we would see perfected in India is not, we have already hinted, without its danger. Mercenary soldiers in the worst sense, and utter heathens, bound to their rulers by no ties of blood or faith, it is more than folly to trust such men. The amount of confidence we may safely repose in them will be found, not in their oaths and promises, but in their power and ability to shake off our yoke. True it is that the more efficient, the better soldiers, we make these mercenaries, the worse for ourselves should they ever turn against us as did the sepoys yesterday. Admitting this, we have the audacity to prefer a good soldier, under any circumstances, to a bad one. If we must be shot by one of our black warriors of the Buggaboo Rifles, at least spare us the shame of dying by the hand of a sneaking, cowardly rascal, with a high caste and nothing else to recommend him. The native soldiers we employ out of India could, by no chance, give us ground for uneasiness, and the force in India should be as small as compatible with the exigencies of the state; but whether in China, or serving at Bangalore, let us have soldiers in the place of the quasi-gentle, won't-do-anything-but-cut-your-throat sepoys of 1856.

(*To be continued.*)

DISTRICT INSPECTORS OF MUSKETRY FOR INDIA.

Camp Lahore, Feb. 21.—H.E. the Governor-General is pleased to authorise the appointment of district inspectors of musketry for the European troops in India, both of the line and of H.M.'s Indian forces, under the following arrangements:—

In the presidency of Bengal there will be—

1 chief inspector, with a staff salary of Rs. 400 per month.

4 district inspectors, with a staff salary each of Rs. 250 per month.

In the Madras presidency, including Pegu, 2 district inspectors, with a staff salary each of Rs. 250 per month.

In the Bombay presidency, including Scinde, 2 district inspectors, with a staff salary each of Rs. 250 per month.

The chief inspector in Bengal will be attached to army head-quarters, and all musketry returns in the presidency will be forwarded to him for submission to the Commander-in-Chief and subsequent transmission to the home authorities.

The seniors of the two musketry inspectors in Madras and Bombay will be attached to the Army head-quarters of those presidencies, and while performing the duties of their own divisions, will also receive reports from the other one, which will be sent home, as in the case of Bengal.

For the performance of the above duties, the senior inspectors at Madras and Bombay will receive an extra allowance of Rs. 50 per mensem each.

The inspectors when on tour of inspection will travel by post at the public expense at the usual rates, to be passed on contingent bills.

The distribution of the districts in the Bengal presidency will be as follows:—

1st District. To include the European troops stationed at Calcutta, Barrackpore, Dum-Dum, Raneegunge, Berhampore, Dacca, Hazareebagh, Benares, Dinapore, Dehree, Ghazeepore, Goruckpore, Azimghur.

2nd District.—To include the European troops stationed at Allahabad, Ooraee, Cawnpore, Futtehgurh, Lucknow, Roy Bareilly, Fyzabad, Gondah, Sectapore, Shahjehanpore, Bareilly, Moradabad.

3rd District.—To include the European troops at Saugor, Jubbulpore, Nagode, Nowgong, Gwalior, Jhansie, Agra, Muttra, Meerut, Delhi, Umballa, Jullunder, Ferozepore.

4th District.—To include the European troops at Umritsur, Lahore, Mooltan, Sealkote, Rawul Pindee, Nowshera, Attock, Campbellpore, Peshawur.

The distribution of the districts in the Madras and Bombay presidencies will be determined on by the governments of those presidencies in communication with the Commanders-in-Chief.

The office establishment of the district inspectors of musketry will be settled hereafter.

This will be found a move in the right direction; and if the selection of district inspectors is confined to good working men, it will prove of the utmost advantage; and the musketry returns of this year, when they reach home, will show that something of the sort was urgently called for, as it is certain that the figures of merit in the practice of the soldiers in India will fall far short of those of their home brethren.

Many causes will doubtless be advanced to account for this; but the true cause may safely be placed to the fact that there was no one in India to arrange the details for ensuring the efficient manner of carrying out the instruction in a proper manner or in proper time.

Thus, although the Commander-in-Chief issued some stringent general orders relative to musketry instruction tolerably early in the past year, and that these orders were duly reiterated by generals and brigadiers, each holding his subordinate responsible that the instruction should go on all right all over India, the instruction nevertheless did not go on right, simply because when commanding officers of regiments, finding the season for practice had come, in many places wanted to commence it, there had been no practice ground established, or no butts raised, or no targets to be had. Owing to some one of these impediments the practice did not commence until long after the cold weather set in, and had to go on in many stations as late as the end of March, which everyone knows is long past the time when Europeans can brave the heat of the day with impunity. Many regiments also complain of the wretched description of ammunition supplied for this year's practice, and in one regiment where I saw it tried, it was too bad to allow the men the slightest chance of making good practice.

Mr. Thackeray proposes an "Order of Britannia."—Why is there not an Order of Britannia for British seamen? In the Merchant and the Royal Navy alike, occur almost daily instances and occasions for the display of science, skill, bravery, fortitude in trying circumstances, resource in danger. In the First Number of our *Magazine*, a friend contributed a most touching story of the M'Clintock expedition, in the dangers and dreadful glories of which he shared; and the writer was a merchant captain. How many more are there (and, for the honour of England, may there be many like him!)—gallant, accomplished, high-spirited, enterprising masters of their noble profession! Can our Fountain of Honour not be brought to such men? It plays upon captains and colonels in seemly profusion. It pours forth not illiberal rewards upon doctors and judges. It sprinkles mayors and aldermen. It bedews a painter now and again. It has spirted a baronetcy upon two, and bestowed a coronet upon one noble man of letters. Diplomatists take their Bath in it as of right; and it flings out a profusion of glittering stars upon the nobility of the three kingdoms. Cannot Britannia find a ribbon for her sailors? The Navy, royal or mercantile, is a *Service*. The command of a ship, or the conduct of her, implies danger, honour, science, skill, subordination, good faith. It may be a victory, such as that of the Sarah Sands; it may be discovery, such as that of the Fox; it may be heroic disaster, such as that of the Birkenhead; and in such events merchant seamen, as well as royal seamen, take their share. Why is there not, then, an Order of Britannia? One day a young officer of the Euryalus may win it; and, having just read the memoirs of Lord Dundonald, I know who ought to have the first Grand Cross.—*Cornhill Magazine*, for May.

THE NAVAL RESERVE.

(From the *Times*.)

In a quiet corner of the West India Docks lies the Brilliant, 26, a frigate of the old school. There is no place for such a vessel in the navy now-a-days, so she, with others of her class, have been temporarily fitted with heavy guns, and turned into training-ships for our Naval Volunteers. Just now the subject of our Naval Reserve has very properly attracted much attention, and, as usual, the utmost diversity of opinion obtains. For those who wish to judge for themselves, and judge impartially, we would recommend a visit to some of the training-ships which are now stationed in most of our seaports, and in which all day the guns are run in and run out, trained ahead and astern, and even fired now and then as the Volunteers progress in their drill. Those who go on board expecting to see the neat dicipline and uniformity of dress which prevail on board a regular man-of-war, will be disappointed. Gold lace and quarter-deck routine is wisely kept as much in the background as possible. On this point the injunctions to the officers in command are strict "to bear in mind the difference between the rules and practices of the Royal Navy and those of the merchant service, and to endeavour, while enforcing order and regularity, to do so in such a way as may best conciliate the feelings of the merchant seamen." Thus the men, being all merchant seamen, come in what dress they like; and as long as they go through their 28 days' drill in the course of the year, doing duty at whatever periods are most convenient to themselves; they earn their 10*l.*, and can go about their business till the twelvemonth has expired, when they take 28 days more in the same manner. Those on board the Brilliant are all in the West India trade, and as a matter of course prefer to take their 28 days' drill at once. Those in the coasting and home trades take four drills of seven days each, whenever they choose, in the intervals between their regular voyages. On board the Brilliant, as in all the other vessels, the men come on board at 9·30 in the morning, when they are mustered and told off to their guns in time to commence at 10 o'clock. From this till 12 they work at the guns, when they are allowed two hours to dinner, falling in again at 2, and drilling till 4·30, when they dismiss and go home, having, of course, all the rest of the day to themselves. These hours are easy enough, yet, short as they are, from the men liking the exercise (especially the broad sword), they contrive to make astonishing proficiency when the time of their drill is taken into consideration. On Thursday on board the Brilliant, from the time the word was given to fall in till they had fired three rounds from each gun at 400, 600, and 800 yards' elevation, was only four minutes—a most creditable result when it is recollected that some of the men had only been a week at quarters, and none had fully completed their 28 days.

The advantages which are held out to induce the able seamen to join this reserve are apparently so great that one requires to investigate carefully the causes which have led the mass of the able seamen, up almost to the present time, to regard the whole plan with a feeling which, if not quite dislike, was at least one of considerable suspicion. Each man during drill receives a guinea a-week pay, in addition to the 6*l.* yearly, paid every quarter, half-year, or year, as he may please. During actual service in the Navy (if they are ever called upon) they receive the same pay as continuous service men, or about 9*s.* a month more than other able seamen. They are entitled to receive the same bedding, clothing, and mess traps on joining as those that ship for continuous service; and after enrolment in the Volunteers for fifteen years, whether called out or not, they can claim their discharge and their pension forthwith. With such inducements it was not unnaturally thought that the men would flock to be enrolled in hundreds. Yet, though some three months have elapsed since the scheme was promulgated, very little more than 1000 able seamen have been entered. These, however, it must be admitted, are all picked men, and as the weekly number of enrolments now shows a steady increase, there seems very little doubt but that before the year expires at least between 3,000 and 4,000 will be on the lists. The proportion of petty officers and able seamen to ordinary seamen and boys employed in the Navy is about one-third, and scarcely any of the best manned vessels now in the Channel fleet muster more than 250 able seamen among their blue-jackets.

According to this computation, then, already the reserve can furnish crews for four sail-of-the-line, and there is no reason why this number should not be at least quadrupled, under proper management, as we have said, even before the year is out. The first fear of the seamen, that immediately after entering the reserve they would be sent out to China and other foreign stations, is now fast wearing out, and, except at one or two little ports in the north, has almost disappeared. One cause of dissatisfaction, however, still remains, and that is, that the seamen do not receive their quarter's bounty on entering the reserve, but only when they have completed the three months, and this rule is adhered to, though in the great majority of instances, no drill is demanded at all during the first quarter. No class of the community is more accessible to the inducements of ready money payment than sailors, and none, as a general rule, are so little influenced by prospective advantages. Therefore, when to the suspicion of being sent abroad is added the drawback of having to wait three months before they get their bounty, a very superior and provident class of seamen (always a minority) will not join the reserve at all. There is not the least doubt but that if the men received their bounty in proportion as they completed a quarter or six months' drill, it would be easy to raise a reserve of 8,000 or even 10,000 men within a very short space of time. Another cause which acts as a great check in the men joining is, to use the mildest term, the spirit of dissatisfaction, which it is now useless attempting to conceal, unfortunately prevails among the seamen of the Royal Navy on the question of leave ashore. Leave, in fact, is a mere term now, which means everything or nothing, according to the humour of the captain or port admiral in whose jurisdiction the ship may chance to anchor. There is a rule for every possible emergency in the Service but one, and that is "leave" ashore. A squadron comes into harbour and one captain gives a whole watch 48 hours' leave, while the captain of the next ship only gives 12 or 15 per

Digitized by Google

cent. of his watch 24 hours' leave. Some then grumble; some do worse, and are heavily punished, while the captains or admirals who have given rise to the whole fracas point triumphantly to the "spirit of insubordination" as an excuse for further severities. Every well-conducted sailor should have as much right to a certain amount of leave ashore as he has to his grog, and until some decisive rule is laid down on this point we must always fear a repetition of the scenes which occurred on board the Princess Royal, and lately in the Edgar, and to nave the Naval service more or less discontented within and unpopular without.

One most important feature in favour of the Naval Reserve is that some of the seamen's unions in the north have through their delegates now warmly taken up its cause, and are forward in advocating its claims upon the support of the men. Such aid on the part of the most provident and careful body of seamen in the country, is of course most important, and will soon yield good results. Masters of vessels also give a decided preference to reserve men, as naturally the most steady and best trained; and this also is slowly, though surely, producing its effect. If the Government were only bold enough and liberal enough to take one step more, and pay the able seamen in the Navy at the same rate which they now receive in the merchant service, we should hear of no more difficulties as to want of seamen. This increase would add only 140,000*l.* a year to the estimates—a small sum for so great a good.

COOKING FOR THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Absence from home has prevented my seeing till to-day your number of the 14th ult., but my attention was at once arrested by Captain Grant's letter on this subject; and as I think he has unconsciously conveyed an erroneous impression and done scant justice to a deserving public servant, I am induced thus late in the day to supplement his statement by another.

It is quite true, as he says, that "no part of our military administration has been more neglected than that which appertains to the preparation of the soldiers' daily food." The ignorance of the men, the imperfection of their utensils, the wasteful folly of the whole system, have been seen and exposed long before Captain Grant, in 1855, turned his attention to the subject. But it is not true, as he would have you infer, that the successive Governments who have been in office since then have done nothing in the way of improvement; least of all is it true that our present zealous Secretary for War, who is so pre-eminently the right man in the right place, has ignored the subject. Captain Grant forgets to state that his correspondent General Peel himself appointed a commission, with Mr. Sidney Herbert at its head, to inquire into the whole question of barrack economy; he does not tell you that that commission has been at work collecting facts and making experiments ever since, and that one object of their labours was to settle the merits of Captain Grant's own stove. Nor does he state, though he well knows, that in many barracks besides these he mentions improved apparatus have been introduced, and are now at work; and, though he hints that "other parties have been encouraged at the public expense," I am myself inclined, from all I have seen of Government liberality, to doubt the fact till I see it proved.

No; let justice be done to all, and let not our War Secretary be blamed if he is cautious in recognising and laying before the House of Commons an enormous claim to compensation, which would equal the amount offered for the discovery of poor Franklin and his companions, and which would have been earned, as some think, merely by the persevering use of "social position and interest."

If Captain Grant will send you for publication the report of the Barrack Improvement Commissioners; or better still, if some member will move for its presentation to Parliament, the public will see what has been done and what is doing, and be enabled to judge of the comparative merits of Captain Grant and other inventors.—I am, &c., ALIQUIS.

NAVAL MUSEUM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The public will be very much obliged to you if you will agitate till the important object suggested by your correspondent "J. D." is attained.

It is monstrous that a country like this, investing so many millions annually in constructing ships both for war and mercantile purposes, should be without a naval architectural museum. Almost the most important branch of science, whether viewed politically or economically is that one for the advancement of which the least is done. The proper place for such is no doubt the Royal United Service Institution.

It would be central, would be near the Admiralty; and while easily accessible to the general purposes of the country, would be the means of conferring important instruction to the numerous body of naval officers and others interested in the subject of naval architecture—members of that corporation. Nor can there be any difficulty as to accommodation; as the removal of the specimens of natural history, which is taking place, would afford ample room for the present, and further accommodation could be added without much expense.—I am, &c., A CAPTAIN, R.N.

THE FRANKLIN RELICS.—Fourteen stereoscopic slides, taken by Lieut. Cheyne, R.N., of the collection of relics at the United Service Institution, by permission of Lady Franklin, Sir L. M'Clintock, and of the Council, form one of the most durable and interesting memorials of the lost voyager and his companions which can probably be suggested. In the relics is one of the most touching stories in the world, and these photographs repeat it in all its sadness. The execution of these slides seems very good.

A handsome testimonial, in the shape of a massive silver goblet, was presented to Sergeant-Major C. Wyatt, Army Hospital Corps, in the non-commissioned officers' mess-room, Chatham barracks, on Saturday last, by Sergeant-Major Conlin, as a token of the esteem felt for that non-commissioned officer on the occasion of his quitting the service. The testimonial bears the following inscription:—"Presented to Sergeant-Major Chs. Wyatt, Army Hospital Corps, by the non-commissioned officers of Chatham garrison, as a token of their respect and esteem.—Chatham, April 28, 1860."

SOLDIERS' RATIONS.

The importance of this subject will in time force itself on the attention of the authorities; although much good has been done of late by varying the mode of cooking the soldier's ration, not the slightest trouble has been taken to see whether its quality is good or bad. According to the time honoured faith which has prevailed in the Army ever since England owned a soldier, no one thinks of satisfying himself on that head. The soldier's beef and mutton may be tainted, coarse, or stringy, his bread half-baked and adulterated, no one seems to know or care. If we inquire, we are told "that the soldier's groceries are purchased by himself, therefore they must be good; at least, if the contrary is the case, he is the greater fool to permit himself to be imposed on. The meat and bread are examined daily, and condemned when bad!" Stunning argument! The fact that the really unwholesome food is rejected does not alter the case one whit. Bad is the best, and now and then it is of such an objectionable quality, that the most careless observer could not pass it over unnoticed. How can it be otherwise? Let us repeat an oft-told tale. The Government advertises for tenders, we will say for bread. Down comes a gentleman who does nothing else but take Army contracts; it is his regular trade, for he has generally from four to half-a-dozen regiments on hand. This individual stipulates to supply the troops with a certain quality of bread, "best seconds." But does he? No; he sublets the tender, which is often transferred to a third party, until some petty baker takes it in hand, and at a rate which he cannot possibly supply an article of the value guaranteed by Number one. The result is highly adulterated flour, and bread wretchedly baked and prepared. At Aldershot there is a Government bakery, and the bread is wholesome. Why not have one in each of our large garrison towns?

In this manner abuses could be got at. What more miserable alternative is there than that by which the Commissariat is empowered to have samples of bread analysed; and who knows the workings of the Government contracts, but are aware of the "wheels within wheels" which complicate every nerve and sinew of these contracts? It is a weary business to unravel the abuses of the present modes of procuring the soldiers' rations; he who imposes on himself the task will have hard work to get at the truth among the chaos of contending interests. Let us not be accused of frivolity or a desire to exaggerate and distort sober truth. If we transport the reader's imagination to the precincts of any barrack in Great Britain, there he will find the same sort of shops, the same wares, all for the soldiers. There is the eternal beer-shop, where the soldier spends his savings and gets his "ale" and "grog" something cheaper than anywhere else, where dancing and merriment are kept up to the last. What an amount of "belly aches" come from behind that counter! We pass by this establishment, for there is no remedy. Next door is the "Grocery stores"—petty little shops. The owner has vended tea, sugar, coffee, &c., to every regiment in the Service—from custom he feels it his peculiar privilege to supply the Military. Take any of these articles, analyse them, and search out their qualities, and you will find them (to use no better expression) execrable. The 4½*d.* the soldier pays him for a pound of sugar would purchase an article good and wholesome. A quid of tobacco or a clear understanding with those who cater for "the company," and the seller can furnish any quality he chooses. The British soldier is made up of queer incongruities; if he objects to established customs, he is set down as a troublesome discontented fellow, and although ever ready to complain of his food when he is eating it, he is at other times just as much prepared to sacrifice the common good to save himself trouble or add to his purse or personal comforts. There are those who think that the older the soldier gets, and the higher he rises in the Service, the less he considers the weal of the comrades he has left behind him.

We do not advocate the very best quality of food for the soldier, only let it be good and wholesome. Let the money now being expended (not one farthing more), be laid out to the best advantage. Trust not for this even to those who eat the victuals. When practicable, the Government should bake its own bread, and commanding officers be impowered to purchase the groceries for their men, to be issued by their quatermasters as required. Contracts are always subject to be grossly abused; but if we must still have recourse to them, let measures be adopted to guard against fraud and adulteration. That can easily be done by appointing Government officers who understand thoroughly how to obtain good and wholsome food, and can analyse and detect impurities; to whom commanding officers can apply for advice in the choice of provisions for their men. By such like measures will the health and comfort of the soldier, and consequently the best interests of the Service be secured.

ROYAL GUN FACTORY STRIKE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The account of the strike among the smiths and artificers belonging to the Royal Gun Factories at Woolwich in your paper of last week, scarcely conveys to the public a correct notion of what actually occurred. In the paragraph I refer to, it is stated, "A large number of smiths and artificers belonging to the Royal Gun Factories at Woolwich assembled in front of the office of Mr. J. Anderson, the superintendent, on Wednesday, and demanded a higher rate of pay. In consequence of a refusal to comply with their desire to be discharged, as there was no scarcity of work elsewhere, and a better remuneration for their labour. They thereupon demanded their wages and left the service." Now the fact was, the men who have been required to work by night as well as by day have been in the habit of receiving what is called time-and-a-half pay for night-work, *i.e.*, 12 hours night-work counted as 18 hours day-work, or half as much more; the same as the men are usually paid for overtime work; and when this rate of pay was arbitrarily reduced to the same as that for day-work, the men complained that they were not fairly treated, and refused to comply with the new terms. The consequence is that many of the best men left the service. By explaining the exact nature of this so-called strike, so that the public may be enabled to judge of the motives which have actuated the men, you will set them right with the world, and oblige

ONE WHO WAS ONCE IN THE ARSENAL.

LATEST INTELLIGENCE.

In the House of Lords, last night, the Earl of Lucan directed the attention of their lordships to the existing organization of the Infantry. Recent circumstances had created a feeling in the country as to the necessity of maintaining a sufficient and effective army for the security of the country. The noble Lord entered into a minute examination of the present system of regimental depôts, and expressed an opinion that every regiment should have a second battalion in depôt.

Earl de Grey and Ripon thought the subject was of too purely technical a character for discussion in that assembly. The noble Earl would have taken a more practical course if he had brought his views under the consideration of the military authorities. Had they been rejected by them, he could then with propriety have appealed to their lordships. It would not conduce to the advantage of the public service to discuss the subject at the present moment, and therefore he would decline to enter further into the question.

The Duke of Cambridge took the same view of the matter as Earl de Grey and Ripon. His own personal experience in Ireland led him to an opposite conclusion from that arrived at by the Earl of Lucan with respect to the expediency of second battalions. After controverting some of the statements of the noble earl in points of detail, His Royal Highness quoted the opinion of Sir C. Wetherall, that the Army never worked more smoothly than at the present moment.

The Duke of Rutland, after passing a eulogium on the patriotism of the Volunteeers, expressed a hope that no attempt would be made to substitute them for the regular military force.

In the House of Commons, Lord J. Russell stated, in answer to a question from Mr. Baillie, that there was no foundation for the report that orders had been sent out to China to stop the naval and military operations there.

Sir De L. Evans called attention to a General Order, recently promulgated, requiring officers of certain corps to discontinue the use of peaks to their forage caps, and to substitute in future gold lace stripes in lieu of the present cloth stripes on their undress trowsers; and to a recent order from the Lord Chamberlain's office, to the effect that the rank of Volunteer officers who may attend Her Majesty's levees is no longer to be recognised. He wished to know the cause of these changes.

Mr. Sidney Herbert thought the gallant general ought to have applied to the Adjutant-General for information relative to the great cap and trowsers revolution to which he had adverted. All he could say on the subject was that he believed the alteration in the caps had been made to suit the convenience of the wearers, and that in the trowsers on economical grounds; for whereas officers hitherto had been obliged to have four pairs of trowsers, two with gold stripes, and two with cloth stripes, now they could do with two pairs of the former kind. As to the second question put by the gallant general, it must be obvious that the regulations which the Queen thought fit to prescribe relative to the reception of company at her Court, ought not to be made the subject of comment in that House.

Colonel Sykes asked the Secretary of State for India whether he purposes taking the judgment of the Council of India upon the report of the Military Committee upon the re-organisation of the Indian Army; and whether he would lay the result upon the table of the House, with the other papers promised, and at what time.

Sir C. Wood said he hoped to be able to lay the papers on the table next week.

On the motion of Sir F. Smith a return was ordered of the names of all the temporary clerks employed in the War Department, showing the date of appointment, age of each individual, place where now employed, amount of salary, and probable minimum period of further employment.

A telegram received from Marseilles yesterday says, "It is reported here, on the authority of letters received from Bombay to the 11th ult., that orders had been given in Bombay and Madras to suspend the despatch of troops to China, hopes being entertained of an amicable arrangement of the pending difficulties. Khan Bahadoor had been hung. The disturbances among the indigo planters appeared to be subsiding."

Inspector-General J. R. Taylor, C.B., having relinquished the charge of the medical department at Chatham, Major-General Eyre has issued the following garrison order to the troops under his command:—"Deputy Inspector-General of Hospitals Dr. Hume having arrived at this station to relieve Inspector-General of Hospitals, J. R. Taylor, the former officer will accordingly take charge of the department from this date, and all business connected with the medical department of the district will be transacted through him. The Major-General cannot allow the Inspector-General to leave this command without expressing his very great regret at losing him, and his sense of the admirable manner in which he has conducted the onerous duties of the department, and the high state of perfection in whice he leaves it. —C. E. E. Gordon, Major of Brigade." Inspector-General Taylor will embark for the Cape of Good Hope immediately, to take charge of the newly-established sanatorium for the China troops.

THESE SEAMEN.—We trust our lives to these seamen, and how nobly they fulfil their trust! They are, under heaven, as a providence for us. Whilst we sleep, their untiring watchfulness keeps guard over us. All night through that bell sounds at its season, and tells how our sentinels defend us. It rang when the Amazon was on fire, and chimed its heroic signal of duty, and courage, and honour. Think of the dangers these seamen undergo for us; the hourly peril and watch, the familiar storm, the dreadful iceberg, the long winter nights when the decks are as glass, and the sailor has to climb through icicles to bend the stiff sail on the yard. Think of their courage and their kindness in cold, in tempest, in hunger, in wreck! "The women and children to the boats," says the captain of the Birkenhead, and, with the troops formed on deck, and the crew obedient to the word of glorious command, the immortal ship goes down.—*Cornhill Magazine*, for May.

Obituary.

We have to announce the demise of Vice-Admiral Alexander Renton Sharpe, C.B., who died on Tuesday at his residence at Stockwell. The gallant deceased was midshipman in the Kent in the expedition to the Helder in 1799, and of the Hercules, at Cape François and Siege of Curaçoa in 1804; lieutenant of the Topaze, in action with two French frigates near Corfu in 1809, and commanded the Scout at the destruction of three French armed ships and some batteries in Sagone Bay in 1811. The late admiral was in 1815 nominated a Commander of the Order of the Bath, in recognition of his services afloat. His commissions bore date as follows:—Lieutenant, Dec. 8, 1806; commander, March 5, 1809; captain, Jan. 22, 1813; rear-admiral, June 1, 1848; and vice-admiral, July 30, 1857.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ARTHUR—April 30, at 32, Glocester Square, Hyde Park, the Lady Elizabeth Arthur, of a son.

BELFIELD—April 25, at Glocester Crescent North, the wife of Captain E. Belfield, of a daughter.

CRAIG—April 30, at Armagh, Ireland, the wife of Andrew Craig, Esq., Captain Armagh Regiment, of a daughter.

DEMPSTER—At Cork, 37, Caroline Terrace, Middle Glanmir Road, the wife of J. Carroll Dempster, Surgeon 20th Depôt Battalion, of a daughter.

EADON—April 27, at Carlisle, the wife of Captain Eadon, 3rd West York Light Infantry, of a daughter.

HARDINGE—April 29, at 11, Queen's Terrace, Queen's Gate, Viscountess Hardinge, of a daughter.

MCDOUGALL—May 3, at Blackheath, the wife of G. F. McDougall, Esq., R.N., Admiralty Surveyor, Ceylon, of a son.

MONTAGU—April 29, at Sheerness, the wife of Lieut.-Colonel Montagu, Royal Engineers, of a son.

MULLER—March 10, at Secunderabad, the wife of Captain Muller, the Royal Regiment, of a son.

VANRENEN—April 29, at Southampton, the wife of Captain D. C. Vanrenen, H.M.'s Bengal Artillery, of a son.

WEATHERLEY—March 8, at Meerut, Bengal, the wife of F. A. Weatherley, Esq., of H.M.'s 6th Regiment Carabineers, of a son.

MARRIAGES.

BASTARD—FERGUSON—April 28, at St. George's, Hanover Square, by the Hon. and Very Rev. the Dean of Norwich, assisted by the Rev. Richard Sambourne, rector of Ashreigney, N. Devon, the Hon. Fleetwood John Pellew, second surviving son of the late Right Hon. Pownall Bastard, second Viscount Exmouth, of Canonteign, Devon, to Emily Sarah, youngest daughter of the late Thomas Ferguson, Esq., of Greenville, county Down, Ireland, and of Ryde, Isle of Wight.

DONNE—PARSONS—April 26, at Grey Abbey, by the Rev. W. H. Brett, F. C. Donne, Esq., H.M.'s 3rd Bombay European Regiment, youngest son of W. B. Donne, of Mattishall Hall, Norfolk, Esq., Deputy-Lieutenant for that county, to Annie, second daughter of Wm. Parsons, Esq., J. P., of Grey Abbey, county Down, Ireland.

GORDON—JOHNSON—April 30, at Hannington, Wilts, by the Rev. F. C. Johnson, vicar of White Lackington, Somerset, uncle of the bride, assisted by the Rev. J. B. Smeaton, vicar of Hannington, Alexander Ansdell Gordon, Esq., 7th Madras Cavalry, son of the late Major A. Gordon, to Lucy Catharine, youngest child of Captain Frederick Johnson, late of the 54th Regiment.

MAITLAND—KEMP—April 28, at St. Saviour's Church, Clifton Gardens, by the Rev. T. Hopkins, M.A., incumbent, assisted by the Rev. W. P. Wright, M.A., Chaplain to the Forces, and Chaplain to H.R.H. the Duke of Cambridge, Captain Alfred Howell Maitland, to Louise Adelaide Horneman, eldest daughter of Thomas Reginald Kemp, of Carlton Villas, Maida Vale, Esq.

SALMON—ELLIOTT—April 28, at Alverstoke Church, by the Rev. W. G. Tucker, Chaplain of the Royal Hospital, Haslar, James Salmon, Esq., Deputy-Inspector-General of Hospitals and Fleets, to Louisa, daughter of the late Lieutenant Nelson Elliott, R.N., and niece of John Russell, Esq., agent of Haslar Hospital.

WELDON—TREHERNE—April 21, at the parish church, Aldershot, by the Rev. James Dennett, William Henry Weldon, of the 18th Hussars, and late of the Inniskilling Dragoons, to Georgina, eldest daughter of M. Treherne, of Gate House, in the county of Sussex.

DEATHS.

BISHOP—April 29, at Fochabers, N.B., Captain H. G. Bishop, Madras Artillery, aged 35.

CAMPBELL—April 29, Colin Alexander Campbell, 40 years rector of Widdington, Essex, fourth son of the late General Colin Campbell, and uncle to the present Baronet, Sir Edward Fitzgerald Campbell, aged 67.

CANNON—April 28, at Manchester, aged 22 months, Charles Osborne, only son of Captain Cannon, 96th Regiment.

CAZALET—March 5, at Kamptee, of cholera, Captain Charles Henry Cazalet, 29th Regiment Madras Native Infantry.

COAPE—May 1, at Hanover Lodge, Shirley, near Southampton, Arthur William Coape, late of the 12th Royal Lancers, only son of the late Captain Coape, of the 85th Regiment, aged 27.

DASHWOOD—April 29, at Canterbury, Caroline, widow of Lieutenant-Colonel Charles Dashwood, C.B., formerly of the 3rd Foot Guards, fourth daughter of Admiral Sir Robert Barlow, G.C.B.

DRIBERG—April 30, at Boulogne-sur-Mer, Major William Driberg, late Ceylon Rifle Regiment, aged 64.

IRVING—April 24, aged 12, James Brougham, youngest son of the late Captain Martin Irving, of Stobar's Hall, Westmoreland, J.P., and Deputy-Lieutenant for that county.

JACKSON—May 1, at the Barracks, Athlone, A. T. Jackson, M.D., Staff-Surgeon-Major.

PASMORE—April 29, at Charles Fort, county Cork, Edward Bethune Tweedie, the infant son of Lieutenant Pasmore, R.L.A.

PINHEY—April 28, at Karsfield, near Exeter, Robert Pinhey, Esq., F.R.C.S., late Surgeon-General of the Bombay Army, aged 66.

STUART—April 22, after a long period of suffering, which he bore with much patience, William Stuart, Esq., 1st Lieutenant R.M., last surviving son of the Rev. J. Stuart, Carrickfergus, aged 72.

WHITE—April 25, at Lyons, Louisa Mary, wife of Colonel Henry Dalrymple White, C.B., aged 25.

WOOD—May 2, at No. 10, Cleveland Terrace, Hyde Park, Fanny Anne, the beloved wife of Lieut.-Colonel James Wood, and the eldest child of the Ven. Archdeacon Burney, D.D., rector of Wickham Bishops, Essex.

CANCELLING OF THE ORDER FOR ATTENDANCE AT HINDOOSTANEE LECTURES. — "Adjutant-General's office, H.M. British forces in India, Simla, Feb. 17, 1860.—Headquarters, Camp Khunna, Jan. 26.—Examination Native Languages.—The G. O. dated Oct 23, 1857, directing the daily attendance of officers, when practicable, at Hindoostanee lectures, and calling for periodical reports of progress (see *Indian Mail*, No. 434, March 26), is cancelled. The C. in C. believes that the officers of H.M.'s service are fully aware of the value of a proficiency in the native languages; and it has been gratifying to him to observe that more than thirty officers have passed at recent examinations. The C. in C. has further to publish for general information that H.R.H. the General C. in C. has notified his concurrence with the recent announcement of the Government of India, that a knowledge of the native language, as certified by examination, will be considered an indispensable qualification for responsible employment in this country, whether the personal staff of general officers, the general staff of the army, or in other appointments."

W. R. LOOKER & Co., 12, Pall Mall East, London, S.W.

MESSRS. ADDISON AND CO., ARMY AGENTS,
11, WATERLOO PLACE, PALL MALL, S.W.

Officers' bills discounted. Reversions purchased.
Life insurances effected free of charge.
Wines and all mess supplies furnished.
Every description of army business transacted.

CUNNINGHAM'S PATENT SELF-REEFING TOPSAILS, &c.

Copy of a letter from Captain J. M. OUTRIDGE, of the Champion of the Seas, 1946 tons register, belonging to Messrs. J. BAINES & Co., dated Liverpool, April 14, 1860.

"To H. D. P. Cunningham, Esq., R.N.

"I have great pleasure in reporting to you upon the admirable working of your patent topsails, on board the Champion of the Seas, under my command. I can reduce sail with half the crew required on the ordinary plan, and in much less time. I have heard it said that your topsails are not suitable for such large ships as the Champion of the Seas; but, my experience of their working, proves this to be a great mistake. My main topsail-yard is upwards of eighty feet long, and weight of it five tons; a very (I think) satisfactory proof they are suitable for any vessel now afloat. The officer of the watch can always take the mizentopsail into a close reef himself."

Office, 12, London Street, Fenchurch Street, London, E.C.

N.B. The Champion of the Seas has been fitted about four years.

DIVING APPARATUS.

C. E. HEINKE, SUBMARINE ENGINEER, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

BY SPECIAL APPOINTMENT TO H.R.H PRINCE ALBERT.

ROBERT DARK, Sole Inventor and Original Manufacturer of the TUBULAR INDIA-RUBBER GLOVES, improved LEG GUARDS, and WICKET-KEEPING GAUNTLETS, (vide Bell's Life and "Denison's Cricket Companion," 1844), which are warranted to be made of the best materials and workmanship; as are also his celebrated CRICKET BALLS. The above may be had of the Proprietors of Cricket Grounds; of the respectable Shopkeepers and Fancy Warehouses that sell Cricketing articles in all towns in the United Kingdom; and of the Foreign Agents at Calcutta, Madras, Bombay, Quebec, New York, Adelaide, Sydney, Melbourne, &c. The Trade supplied in the usual way by sending their cards.—N.B. The M.C.C. "Laws of Cricket."

DARK'S CRICKET BALLS.—The Prize Medal and honourable mention Class XXIX., No. 198, of the late Great Exhibition, has been awarded to ROBERT DARK for his Cricket Balls, Tubular India-rubber Gloves, Leg-Guards, Gauntlets, &c. The lovers of this truly national game are respectfully informed that R. D. has manufactured several hundred dozens of Cricket Balls, from carefully selected materials, and of the best workmanship. He, therefore, feels confident that they will give perfect satisfaction in the cricket field, as they are the only balls used by the Marylebone Club for many years in all their Grand Matches at Lord's, and now in play at Oxford, Cambridge, Eton, Harrow, and Winchester Colleges. A list of prices forwarded.—ROBERT DARK, Tennis Court, Lord's Cricket Ground, Marylebone, London. If for the trade, send your card.

RELICS OF SIR JOHN FRANKLIN'S EXPEDITION.

STEREOSCOPIC PHOTOGRAPHS OF THE FRANKLIN RELICS. By Lieutenant CHEYNE, R.N.—A BOX, containing 14 STEREOSCOPIC SLIDES of the Relics of Sir John Franklin's Expedition, including the Record of the Death of Sir John Franklin, a Portrait of Sir Leopold M'Clintock, and the yacht *Fox*, with Descriptive Catalogue, price One Guinea. Orders, with remittances, will be supplied on application to J. P. CHEYNE, Lieutenant R.N., 42, Duncan Terrace, Islington, N. Post-Office orders to be made payable at Chief District-Office, Lower Street, Islington, N. Also, larger size, the Franklin Record, Portrait of Sir Leopold M'Clintock, View of the yacht *Fox*, and List of Officers and Men, with ages and place of birth, serving in Sir John Franklin's lost Expedition.

Lieutenant Cheyne, of the Royal Navy, has made and published a series of fourteen stereoscopic slides, representing the relics of the Franklin Expedition. The descriptive book is inscribed to Lady Franklin, and accepted by her in a note which testifies to the fact that Lieutenant Cheyne is an experienced Arctic voyager, as well as a capital amateur photographer. The slides reproduce and render visible, in the exact vividness and particularity of life, the man, the ship, the means of discovery, with the whole detail of the things discovered. In following the toils of this noble enterprise—toils followed with hushed breath and a yearning heart wherever the English language is spoken and manly courage and womanly devotion admired—the reader in Canada, at the Cape, at Sydney, at Calcutta, to whom an actual glimpse of the Franklin relics is among impossible dreams and desires, may now travel, by help of these stereoscopes, over the scenery of this perilous expedition with a realising sense of its grandeur and desolation, its dramatic incidents, and its new discoveries.

Here he may see, not in the pale reflex of words, but in the very form and substance, those two yet loaded guns which read so strange a lesson of the perishing frailty of the strong and cunning hand—may trace the moral which spoke so hopefully and falsely of the expedition as "All Well"—may gaze on the circle and field-glass, the rusty iron, and torn fragments of clothes, which suggest a whole epic of heroic suffering and endurance, just as the print of a man's foot in the sand told Crusoe of the world of unexpected peril and of hope which lay about him. All these things, simple in themselves, yet bring the situation of the scene to life in a vivid manner.

FRANKLIN RELICS.—Photography was never better employed than in making copies of the Franklin relics, so deeply interesting as those now stored in the United Service Museum. Lieutenant Cheyne, R.N., an arctic officer of great merit, who has served in no less than three expeditions, has kindly undertaken the task; and for a small sum any one may now possess themselves of fourteen admirable slides for the stereoscope, which will bring before him these treasures in vivid reality. The concluding one of the series is the portrait of the gallant finder, Captain Sir F. L. M'Clintock. The reader in Canada, at the Cape, at Sydney, or at Calcutta, to whom an actual glimpse of the Franklin relics is among impossible dreams and desires, may now travel, by help of a stereoscope and Lieutenant Cheyne's slides, over the scenery of this perilous expedition with a realising sense of its grandeur and desolation, its dramatic incidents, and its new discoveries.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS,
(and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

TEETH.—MR. ESKELL, SURGEON DENTIST, 314, Regent Street, W. (facing the Polytechnic), supplies his PATENTED INCORRODIBLE TEETH, which can be matched so closely in shape and colour to those left in the mouth, and are formed so exactly to nature, that the closest observer cannot detect the difference, and in all cases they restore perfect articulation and mastication. These teeth are fixed from one to a complete set upon Mr. Eskell's never-failing and painless principle of Self-adhesion, without extracting any teeth or stumps, or giving any pain whatever; and, being incorrodible they possess the superior advantage of never changing colour nor decaying. Mr. Eskell's celebrated Osteoplastic Enamel, post free for thirty stamps, for Stopping Decayed Teeth, is a preparation which never changes colour nor affects the colour of the tooth, and is free from any injurious properties either as regards the teeth or general health. Its application is easily performed, and without giving the slightest pain. Deficiencies of palate effectually remedied. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation, free. Charges strictly moderate.—314, Regent Street, W. (opposite the Polytechnic), London.—Established 1847.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

A BOON TO NERVOUS SUFFERERS.

THE NEW MEDICAL GUIDE for gratuitous circulation. A NERVOUS SUFFERER having been effectually cured of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, by following the instructions given in the MEDICAL GUIDE, he considers it his duty, in gratitude to the author, and for the benefit of others, to publish the means used. He will, therefore, send post free, on receipt of a directed envelope, and two stamps, a copy of the book, containing every information required

"Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind."—*British Critic.*

Address, JAMES WALLACE, Esq., Wilford House, Burton Crescent, Tavistock Square, London. W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, oven by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 to 8 Evening.

Our readers have only to send their address to A. N. PERRIER, 77, Regent Street, London, W., and they will receive free by post, the 105th Edition of

THE "INVALID'S OWN GUIDE," or Natural Restorer, without Medicine or expense, of perfect digestion, strong nerves, sound lungs, and refreshing sleep, to the most enfeebled, effectually removing indigestion (dyspepsia), nausea and sickness even during pregnancy, debility, nervousness, palpitation, cough, asthma, incipient consumption, dropsy, constipation, flatulency, diarrhœa, dysentery, biliousness, fevers, sore throats, catarrhs, colds, noises in the ears, rheumatism, gout, impurities, eruptions, hysteria, neuralgia, irritability, sleeplessness, acidity, palpitation, heartburn, headache, despondency, cramp, spasms, sinking, fits, bronchitis; also children's complaints. Accompanied with numerous successful cures which had resisted all medical treatment and been abandoned as hopeless.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener*, and *Field*. In boxes, 1*s.*, 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

LAWRANCE PHILLIPS' MILITARY OUTFITTING WAREHOUSE,

London, 28, West Strand, W.C.

UNIFORMS FOR THE ARMY AND NAVY.—An estimate for the outfit of any officer in H.M. Service post free.

VOLUNTEER CORPS.—Contracts entered into for the equipment of entire regiments. Single suits supplied.

PORTABLE FURNITURE.—An Illustrated Catalogue, with design, size, and price of every requisite for the barrack-room forwarded on application.

CONDY'S PATENT FLUID, OR NATURAL DISINFECTANT,

Not only deodorises but disinfects perfectly, and DESTROYS FOR EVER the cause of infection. Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease, and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

Patronised and reported upon by the Board of Health and all the most eminent medical men of the day most satisfactorily.

Sold in Quart Bottles, 4*s.*; Pints, 2*s.*; Half-pints, 1*s.*; and in bulk, 10*s.* per Gallon. Sold by all first-class Chemists.

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious Vinegar, ensure purity, and effect a saving of 50 per cent. See Report of Dr. Letheby, City Officer of Health; Dr. Hassall, of *The Lancet* Commission, and others. Sold by the Trade, in bottles, labelled and capsuled. Wholesale

63, King William Street, London Bridge, E.C.

Sample for Six Quarts, to any Railway, for 3*s.* 6*d.*, P. O. O. or Stamps.

SAUCES.—Connoisseurs have pronounced LEA & PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.

Sold by CROSSE & BLACKWELL, London, and all respectable Oilmen and Grocers.

Sole Manufacturers—LEA & PERRINS, Worcester.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND

Are at all times to be obtained of

PHILLIPS AND COMPANY, TEA MERCHANTS, 8, King William Street, City, London, E.C.

Black or Green Tea, 2*s.* 8*d.*, 2*s.* 10*d.*, 3*s.*, 3*s.* 4*d.*, to 4*s.*

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,

AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.

Sold by all Chandlers, Grocers, &c., &c.

WOTHERSPOON & Co., Glasgow and London.

GAY & SONS' DRESSING-CASES are the best and most reasonable.

113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, May 5, 1860.

THE appointment of another Royal Commission on naval affairs compels us seriously to ask, What is the Board of Admiralty? What is its constitution? What are its functions? Is it not itself a Royal Commission, consisting of no less than six Lords Commissioners, with two secretaries and a large staff of subordinates; and are not its very functions under the cognisance and control of the various naval departments at Whitehall, Somerset House, and the Royal Dockyards? Why, then, do the Lords Commissioners of the Admiralty continually require their functions to be delegated to others? Why this endless and fruitless round of Committees and Royal Commissions? Metal upon metal is very bad heraldry. So, depend upon it, Royal Commissions to do the work of existing departments of Government, and especially of other Royal Commissions, is wretched administration. Why does not the Board of Admiralty itself do all that the new Commission may be expected to accomplish? What would be said, were it gravely proposed in Parliament to ask for a Royal Commission to inquire into, and report upon, the best mode of regulating *emigration* to the colonies, or upon the proper treatment of the insane? Would the existing Commissioners for Emigration, or the Commissioners in Lunacy, tolerate such a stigma upon their own proper office; or rather, before it came to that, must not the *mismanagement* or neglect of their duties have already become intolerable? That the Admiralty, or any other department, should occasionally nominate a committee to inquire into special matters of a technical kind, when any difficulty or dead-lock occurs to prevent business going on smoothly, is all very well. A Royal Commission on the Manning of the Navy may also have been even necessary, intimately mixed up as that subject is with our mercantile marine, and other matters clearly out of the ordinary jurisdiction of the Board of Admiralty. The late Committee on Dockyard Expenditure may have even been justifiable, after the challenges thrown out by the Press to conduct the naval establishments like private ship-building yards. But why this new Commission? Surely the want of economy in the Dockyards is sufficiently proved, as well as the extent of their mismanagement.

The late Committee went into almost every possible question of mere economy in the Dockyards, even to the relative expense of making putty at different ports; and if they did not examine the Surveyor of the Navy himself, at least they went low enough for their evidence, taking even the opinions of painters and second leading-men of millwrights' shops, as to the best means of promoting economy and efficiency in the Dockyards. If they also failed to do full justice to the more important question of the quality of the Dockyard work, the defect has since been abundantly supplied. Every Dockyard official was invited to criticise their report, and say all that could be said in favour of the present state of things, or for or against the Committee's various propositions. So, not only has Sir Baldwin Walker been thus called as a witness, as well as the Storekeeper-General and all the Dockyard superintendents, shipwrights, and storekeepers, but a still more important witness has tendered his voluntary evidence, and by it has thrown an inextinguishable light upon the dark chaos of contradictions contained in the Blue Books.

The Duke of Somerset has informed us that the Board of Admiralty had assigned to the Surveyor of the Navy the duty of visiting the dockyards; but "at the same time" omitted to give him any authority over the works! This authority, in fact, was left solely in the hands of the superintendents of the yards; but, unfortunately, they were "naval officers selected more on account of their rank and professional character, than with regard to their qualifications for conducting these costly establishments;" and the natural consequence followed,—continued mismanagement.

The Lords of the Admiralty observed this,—and what did they do? Give the Surveyor the requisite power to perform his duties, and take the control of the works out of the hands of the incompetent superintendents? Not at all. Their Lordships themselves, "being selected chiefly on account of their rank and political character," some of them as naval officers thus qualified, and some of them mere civilians, took upon themselves the task of endeavouring, when they could spare the time for a little amateur work, or "in the intervals of their other duties, to remedy the defects of shipbuilding, and to regulate the management of the dockyards"! Hence Lord Minto's famous fleet of sheet-iron steamers, which afterwards became targets for Captain Chads; and hence those agreeable perennial trips, from yard to yard, in the Admiralty yacht, the result of which has never been even a Blue Book on dockyard economy. The wine, however, on board the Black Eagle has always been reported as very good; and if the Surveyor made no quiet visitations by himself, in the way of business (such as the newspapers report he has commenced to do in the last week), he generally managed to accompany their Lordships on these annual tours, and helped them to do whatever they may have endeavoured to accomplish on these state occasions.

But this did not produce great results. The Navy was still behind in steam, and behind in screws; and so, after a time, "a Comptroller of steam-machinery was appointed," but "the arrangement was even then incomplete." The Duke does not tell us the nature of the fresh blunder. He only says, "this appointment tended rather to impede than to advance the progress of steam-machinery;" but it is fresh in everybody's recollection, who has watched and grieved over Admiralty mismanagement, that steam-vessels and steam-engines were built and constructed totally unsuited to one another, under the supervision of these two heads of departments respectively.

Now, we have no hesitation in saying that the new Royal Commission can add nothing of consequence to these facts. The evidence is already full and damning enough. There is only one remedy. We know not if Sir Baldwin Walker could build a ship, but, whether he could or not, one thing is very clear, he ought not—no man ought—to be entrusted with such enormous power; he ought not to have had laid upon him such enormous labour. It is folly to reply that he is assisted by a staff at Whitehall, and master-shipwrights at every yard. He is still the Head—the "Controller" of all; and the duty is infinitely more than he can possibly perform with any efficiency. The first witness the Royal Commission should call is Sir Baldwin Walker; and they should ask him if he feels capable, not only of effectually controlling the enormous regular works at the Royal yards, and the gun-boats or steam-rams constructing in private establishments under contract, but also of considering all scientific questions of the construction of vessels with respect to sailing qualities, steadiness in the water, and modes of propulsion; and, if he answers "Yes," then no one will doubt his special incompetency for his office. If, on the other hand, he answers "No," as he needs must, if he has the slightest idea what should be required of the comptroller of the shipbuilding of the greatest maritime power in the world; then the Commissioners need go no further for evidence, but proceed to recommend the common-sense remedy, which long since might have been applied by the other Royal Commissioners, who are paid and appointed to execute the office of Lord High Admiral of the United Kingdom.

We feel there is no presumption in anticipating what must be the main point in the Report of the New Commissioners. We do not mean that they will recommend merely "the appointment of a Deputy-comptroller, which has been for some time under the Consideration of the Board of Admiralty." A man Friday is a useful appendage to a person in certain circumstances. But we do not profess to understand the practical difference between a "deputy" and the other "assistants" already attached to the Comptroller's department. An additional "assistant" to Sir Baldwin Walker will not meet the case. There ought to be a permanent Board of Construction and Control for the Navy of England. Sir Baldwin Walker ought at least to have three coadjutors, of equal power and position, and one of them at least ought to be a practical ship-builder; all ought to have special high and scientific attainments, as well as general capacity for business. As a Board, they would consider and decide upon all improvements in ship-building, and secure for England the advantage of the newest inventions. As charged severally with the general superintendence of the economy and management of one or more of the Royal Dockyards, we should soon find improvements introduced in details by an honourable rivalry, like what we see effected through competition in private establishments.

One thing certainly remains for the Royal Commission to inquire into—How far have successive and fleeting Boards of Admiralty interfered, for good or for evil, with the permanent heads of the Admiralty Departments? We heard a good deal, some time ago, of fruitless "submissions" made by the Surveyor as to the construction of line-of-battle ships, which the Board would not give heed to. Let us take the last discovery of gross waste of public money from manifest neglect. Whose fault is it that the building of the gun-boats was not efficiently superintended? Did anyone ever once quietly go down to the building yards to see what was going on? Apparently not. But we are not speaking of the Surveyor's department alone. Our stock of timber for ship-building is wofully deficient. Whose fault is that—the Board's or Storekeeper-General's? When did it begin, and (if the blame is thrown upon Joseph Hume or on Parliament) did the Storekeeper-General of the Navy allow his stock to be exhausted without once raising a warning voice? We do not want to inquire into the constitution of the Board of Admiralty, as some of our contemporaries are suggesting. We know it is a fluctuating Board of Royal Commissioners. Sir James Graham abolished the permanent Navy Boards, because they were obstructive, he said, and often withstood the political board. Now, we wish to know if it is not high time to cut the ropes of red-tape when we see the Surveyor being strangled, with his right hand disabled in warding off the fitful knock-down blows of First Lords, and with his left hand cutting them up successfully; but with this inevitable result after all—that the heavy weights return to the charge, all disfigured as they are, making another and another rush, and every time, it may be, knocking the experienced and plucky little champion clean off his legs? But perhaps this picture is somewhat ideal. Well, we want to know whether we have had any such champion at the Admiralty or not,—but not with the view of giving countenance to such unequal matches for the future.

THE SAILORS' HOME.—The twenty-fifth annual meeting of the directors and friends of the Sailors' Home was held in the museum of the institution, Well Street, London Docks, on Thursday afternoon; Admiral William Bowles, C.B., the president, in the chair. The report stated that the position of the British sailor was never so much cared for as at the present time. The directors felt the importance of keeping up the naval defences of the country, and for that purpose had given every facility to the Government officers employed in entering men for the fleet and the naval reserve. Since the last anniversary 8225 persons (2436 being old boarders) had been received at the Home, and although the applications had been more numerous than they could accommodate, arrangements were being promptly made to meet these difficulties, and give to them the benefits that had now been extended to 112,598 sailors. The directors had received during the past year the large sum of 69,104*l.* from the sailors for safe custody, and 30,002*l.* of that money had been forwarded to reach them in safety on their arrival at home, or had been sent to their relations and friends in their hour of need. The report, which was of a very satisfactory nature, was then adopted. A vote of thanks to the chairman closed the proceedings.

THE ARMY.

1st (the King's) Dragoon Guards. The embarkation of the two squadrons (328 of all ranks) of H.M.'s 1st Dragoon Guards for China has been suspended, under telegraphic orders received at Madras from Calcutta, and their destination is now uncertain.

3rd Dragoon Guards. Captain T. J. Francis, 3rd Dragoon Guards, is appointed military secretary to the lieutenant-general commanding the forces at Bombay (Sir Hugh Rose), and directed to make over the command of the remount depôt, Kirkee, to Cornet T. Dawson, who will in addition continue to perform his present duties.

7th Dragoon Guards. Captain Blinkhorn left Bombay for England on the 12th of April in the ship Earl of Belcarras. He is about to retire from the service. Captain Lamb arrived home by the last Bombay mail.

4th Light Dragoons. Last week, the cavalry and infantry regiments, stationed in the Manchester and Salford barracks, had a field day, both meeting at the exercise ground, Old Trafford. The 4th Light Dragoons and the 96th arrived at the ground about nine o'clock in the morning. Lieut.-General Pennefather, commandant of the northern district, distributed four medals for meritorious service to four old soldiers of the 4th Light Dragoons. The regiments were then put through the usual evolutions, after which they returned to the Hulme and Salford barracks.

14th Light Dragoons. Lieutenant Beamish, and Cornet the Hon. F. Amherst arrived home by the last Bombay mail.

18th Hussars. A correspondent writes—"I was rather struck by the announcement that a lieutenant had been brought in from the 12th Lancers to fill up the death vacancy in the 18th Hussars. On referring to Hart's Army List, I found that the senior cornet in the latter regiment had rather more than two years' service, whilst the man who had been brought in over him, though he certainly has got three years' service, has purchased neither of his steps, and obtained his cornetcy after only one year's service. I believe that this is the second death vacancy which has occurred in this regiment during the last sixteen months, neither of which have gone in the regiment."

Royal Artillery.—In accordance with general regimental orders the following officers of Royal Artillery have been raised to increased pay:—Lieut.-Colonels: J. M. Adye, 13th brigade, vice Smythe, removed to the supernumerary list; F. A. Campbell, on the supernumerary list; G. B. Shakespeare, 9th brigade, vice Fitzmayer. Lieutenants: T. C. Martelli, 5th brigade; J. C. Murray, 8th brigade; A. J. Rait, 13th brigade; H. M. Moorsom, 12th brigade; G. J. Burgman, 15th brigade; C. E. H. Symons, 7th brigade; H. G. Haslar, 4th brigade; H. L. Gwyn, 13th brigade; C. E. Elwyn, 8th brigade; H. M. Robertson, 12th brigade; J. M. Traill, 11th brigade; W. A. Roberts, 8th brigade; E. M. G. Cobbold, 7th brigade; W. A. Gordon, 7th brigade; D. N. Taylor, 10th brigade; F. Beresford, 14th brigade; T. M. Hazlerigg, 13th brigade; J. F. Sandeman, 5th brigade; V. Wells, 7th brigade; R. P. Saunders, 3rd brigade; W. T. Scott, 2nd brigade; R. S. M. Mackenzie, 9th brigade; F. G. Gyll, 1st brigade; S. H. Toogood, 4th brigade; E. Baring, 6th brigade; H. N. Jones, 2nd brigade; H. Bond, 1st brigade; A. F. Pickard, 4th brigade; Burnett, 8th brigade; Desborough, 12th brigade; Gye, 4th brigade; Hamilton, 8th brigade; A. J. Shuttleworth, 5th brigade; A. L. C. Smithett 2nd brigade; J. R. J. Bramley, 1st brigade; A. W. F. Campbell, 14th brigade; L. H. Noyes, 3rd brigade; G. W. C. Rothe, 4th brigade; B. Tupper, 4th brigade; H. H. Goodeve, 4th brigade; G. Best, 9th brigade; C. W. Bellairs, 4th brigade; A. M. Prior 5th brigade, J. Sladen, 6th brigade; S. P. Oliver, 3rd brigade; C. S. Harvey, 8th brigade; R. H. Robertson, 10th brigade; A. J. Cullen, 1st brigade; and J. T. M'Loraman, 2nd brigade.

A number of non-commissioned officers of Royal Artillery have left Woolwich garrison for Portsmouth, to be attached to the new (15th) brigade.

The following lieutenants of Royal Artillery, recently appointed to the Coast Brigade, are ordered to proceed from Woolwich to their respective stations during the present week, viz., Lieutenants Montgomery for Pembroke, Marshall for Liverpool, Blades for Liverpool, and Ramsey for Hull.

Royal Engineers.—The half-yearly inspection of the corps of Royal and Indian Engineers took place on Tuesday morning at Brompton Barracks, by Major-General Eyre, commanding the district.

Orders have been received at the head-quarters of the Royal Engineer establishment, Chatham, for detachments to be held in readiness to proceed to Nova Scotia, Bermuda, and the Mauritius.

Grenadier Guards. The 3rd battalion will move in June from Dublin to the Curragh, for two or three months' field exercise.

2nd Regiment. The 1st battalion has left the Cape for China in H.M.S. Urgent.

4th King's Own Regiment. Ensign R. U. Bayley died at Ahmedabad on the 29th of March.

6th Regiment. The two companies quartered at Buxar for the last year, have joined head-quarters at Barrackpore.

10th Regiment. The 1st battalion moves from Plymouth to Aldershot.

11th Regiment.—The 1st battalion, stationed at Portsmouth, will be presented with new colours by Major-Gen. Lord W. Paulet, C.B., commanding the south-west district, on Southsea Common, about the 1st of June.

20th Regiment, 1st battalion. The Indian Mail reports the death of Lieutenant F. G. Horn at Gondah. The 2nd battalion in Dublin will move to the Curragh shortly for a couple of months' exercise. Captain H. E. Quin is reappointed to the Public Works department as a probationary assistant-engineer, and posted to the Punjab.

22nd Regiment. A division of the 1st battalion 22nd Regiment, consisting of 273 men, including non-commissioned officers, arrived in Cork from Dublin on Saturday, and are to proceed to Malta by the Megæra transport, which arrived in Queenstown on Wednesday, with draughts from several other regiments on board. The division is under the command of Major Sir G. A. Robinson, and the other officers are Captains Winthrop, O'Malley, and Goff; Lieutenants Gilling, Tucker, Bishop; Ensigns Fenton and Hughes; and Assistant-Surgeon Adrien.

26th Regiment was inspected by Major-General Bloomfield at Dublin last Monday. The regiment is in excellent order, and it will proceed for field exercise to the Curragh during the summer months.

35th Regiment. A determined act of suicide was committed on Monday afternoon by a private of this regiment, named John Hefferan, 12th company, stationed at Chatham Barracks, who during the absence of his comrades blew out his brains in the barrack-room with his Enfield rifle, which he fired with his foot by means of a piece of string fastened to the trigger. An inquest was held, when the jury returned a verdict that the deceased destroyed himself in a fit of temporary insanity.

55th Regiment. This regiment, which is in an admirable state of efficiency will shortly move to Plymouth from the Curragh, relieving the 1st battalion, 10th Regiment.

60th Regiment. The 4th battalion expect to move from Waterford to Dublin, replacing the 1st battalion, 22nd Regiment.

95th Regiment. Lieut.-Colonel the Honourable E. C. H. Massey, 95th Regiment, Lieutenant Waterfall, and Assistant-Surgeon Clarke, of this corps, reported their arrival in London last week from Bombay, on leave of absence on private affairs.

The Army Scripture-Readers' Society.—The annual meeting of this society was held on Wednesday in St. James's Hall, Sir John Lawrence in the chair. The chairman, in opening the business of the meeting, read several extracts from correspondence with soldiers in India, testifying the desire of the latter to procure the services of Scripture-Readers. The report was divided into the three heads of "Operations at Home," "Operations in India," and "Operations in other Colonies," and consisted of numerous extracts compiled from the communications of the various Scripture-Readers in the employment of the society, all of whom bore testimony to the useful results of their labours. The report also intimated that a large increase has been made not only in the funds of the society, but also in the number of their agents. At this time last year there were only 29 of the latter; now there are 50. The income of the society for the past year has amounted to 8693*l.*, and its expenditure to 6724*l.*, leaving a balance in favour of the society of about 1969*l.* The adoption of the report was moved by the Chaplain-General, who alluded to the unsectarian character of the society's operations, and the desire of its agents in acting unobtrusively to avoid all controversy. The resolution was seconded by General Buckley, M.P., and carrried unanimously. The second resolution, testifying to the beneficial influence of the society's operations as evidenced not only in the barracks and in the camp, but also in the villages to which the soldiers return after their discharge, was moved by the Bishop of Carlisle. His lordship remarked that, not having any relative connected with the Army, he came forward as an independent witness in favour of the society. He alluded to the different ideas entertained at the present time regarding soldiers from what were entertained at a less recent period, as well as to the increased self-respect which now existed among the soldiers themselves. The resolution was seconded by Major the Hon. H. L. Powys, and carried unanimously. The proceedings terminated in a vote of thanks to the chairman, moved by Major-General Lawrence, C.B., and carried unanimously. The proceedings were resumed in the evening at Exeter Hall.

The subjoined Circular Memorandum addressed to the Army at home and abroad, has been issued:—

"Horse Guards, May 2, 1860.

"Considerable inconvenience having been experienced on the re-enlistment of soldiers, in consequence of the sheet containing the record of their services having been in many cases, removed from the register on the men's discharge, and erroneously transmitted with his discharge documents, instead of the service being completed, as it should be, in the original record of service on the third page of the attestation, His Royal Highness the General Commanding-in-Chief desires that this irregular practice may be discontinued, and the 'Explanatory Directions' in paragraphs 511 to 514, page 152, of the 'Royal Warrants and War Office Regulations,' dated 1st July, 1848, be strictly complied with. The same embarrassment and trouble have been caused by defaulter sheets (ordered, except in the case of invalids, to be preserved for two years after the soldier's discharge) having been also erroneously transmitted with the discharge documents of others than invalids, and this practice is to be discontinued.—By command, James Yorke Scarlett, Adjutant-General."

The following Circular Memorandum, addressed to the Army at home and abroad, has also been promulgated:—

"Horse Guards, May 3, 1860.

"His Royal Highness the General Commanding-in-Chief desires that the following mode of conducting the correspondence connected with the army school system and the barrack libraries — the general superintendence of which, as announced in the War Office Circular of the 10th of March last, is transferred to the Council of Military Education —may be strictly adhered to by all concerned, viz.:—

"All recommendations for the training of soldiers at the Normal School at Chelsea, and all communications relating to the promotion, transfer, furloughs, and discharge of trained schoolmasters, and generally all questions affecting their discipline, are to be addressed to the Adjutant-General of the Forces, who will, after conferring with the Council of Military Education, notify the General Commanding-in-Chief's orders thereon.

"Correspondence regarding school regulations, the periodical returns and reports of the school, the appointment and promotion of civilian schoolmasters, and the training, &c., of schoolmistresses, with applications for new books and games for reading-rooms, the supply of apparatus for the illustration of lectures for the entertainment and instruction of the troops, and the half-yearly and quarterly reports of the state of libraries, may go direct to the Secretary to the Council of Education. Other questions regarding barrack libraries will, as heretofore, be addressed to the Adjutant-General of the Forces.—By Command, James Yorke Scarlett, Adjutant-General."

The total number of men of all ranks in depôt battalions belonging to regiments serving in India is 15,907, viz.:—471 officers, 707 non-commissioned officers, 228 drummers, and 14,501 rank and file; in depôts belonging to regiments in the colonies 9411, viz.: officers, 309; non-commissioned officers, 472; drummers, 148; and rank and file, 8482; in depôts belonging to regiments serving in the United Kingdom, 3354, viz.: 138 officers, 247 non-commissioned officers, 72 drummers, and 2807 rank and file.

The Rev. M. R. Scott, one of the garrison chaplains at Woolwich, is ordered to be stationed at Walmer, on his appointment as chaplain to the forces.

Staff-Assistant H. B. Franklin has been ordered to proceed from Fort Pitt hospital to Devonport, to join the 10th Regiment.

SHORNCLIFFE CAMP.

The company of the 47th Regiment which was left here on the regiment marching for Dover, has received notice to hold itself in readiness to join head-quarters in a few days. A divisional parade of the whole of the troops in camp was ordered on Tuesday, but countermanded on that morning from the inclemency of the weather, for the purpose of witnessing the presentation of a gratuity and medal, for long service and good conduct, to Farrier-Major David Ransome, 4th battalion, Military Train. This non-commissioned officer has been upwards of 21 years in the service, and his conduct during that long period has been universally good. The half-yearly inspection, by General Mansel, of the division under his command at Shorncliffe, commenced on Friday (yesterday), when the 4th battalion of the Military Train was minutely inspected by the gallant general. The next for inspection are the batteries of the Royal Artillery now at Shorncliffe, followed by the Antrim Artillery. The new reading-rooms are now almost completed and when finished will reflect great credit on the authorities for the very substantial manner in which they are built. The number in course of erection are five, about 45 feet long each by 25 feet broad, a large fireplace at each end, and well lit by large windows; arrangements are made for complete ventilation, and also to allow of a stream of warmed air to be admitted in cold weather by an opening passing behind each fireplace so as to admit of the fire heating the air, which is thence conveyed into the rooms; the plan is novel and inexpensive, and will be found exceedingly comfortable in cold weather. It is absolutely necessary for the comfort of the officers assembling at the different mess-rooms, that some arrangements should be made for holding general and district courts-martial in other than the officers' mess-rooms. Complaint is made, and justly, that by the frequent occurrence of these courts, the officers are put to very considerable inconvenience by the mess-rooms being made into impromptu court-houses. Sometimes the court sits for more than a day; *and the consequence is*, that officers are driven to have their meals in the best manner they can, or perhaps go without them; whilst damage is done to the furniture and carpets with which the officers are compelled for the sake of comfort to provide the mess-room. At this camp it happens that there can be no occasion for using the mess-rooms at all for that purpose, as at the brigade office there is a large room, occupied by a clerk or two, which could be easily fitted up, or even if this was found inconvenient, the cost of a room or of a suite of rooms—one for holding the court, another a place for prisoners, and a third for witnesses—would obviate the very disagreeable practice at present, whereby all the witnesses are compelled to hang about outside the mess-room where the court is held let the weather be what it may. It may scarcely be added that a word from General Mansel would do much to obtain this boon from the War Department.

The Army Gazette.

WAR OFFICE, PALL MALL, May 8.

27th Regiment of Foot—Major-General John Geddes, from the 46th Foot, to be Colonel, vice Lieutenant-General Edward Flemin, C.B., deceased; April 24.

46th Regiment of Foot—Major-General Thomas Gerrard Ball to be Colonel, vice Major-General Geddes, transferred to the 27th Regiment; April 24.

56th Regiment of Foot—Major-General Henry William Breton to be Colonel, vice Lieutenant-General John Home Home, deceased; April 23.

4th Light Dragoons—Captain the Hon. Charles James Keith-Falconer to be Major, by purchase, vice Brown, promoted; Lieutenant William Chaine, jun., to be Captain, by purchase, vice Keith-Falconer; Cornet James Edward Bradshaw to be Lieutenant, by purchase, vice Chaine; May 8.

ST. JAMES'S PALACE, May 5.

The Queen has been pleased, on the nomination of the Right Hon. Lord Foley, to appoint William Wise, Esq., one of her Majesty's Honourable Corps of Gentlemen at Arms, vice William Domville, Esq., resigned.

WAR OFFICE, PALL MALL, May 9.

The Queen has been pleased to give orders for the appointment of Colonel Alfred Hastings Horsford, C.B., to be an Ordinary Member of the Military Division of the Second Class, or Knights Commanders, of the Most Honourable Order of the Bath.

WAR OFFICE, PALL MALL, May 11.

3rd Regiment of Foot—Major-General the Hon. Charles Grey to be Colonel, vice Lieutenant-General Berkeley Drummond, deceased; May 4.

32nd Regiment of Foot—Major-General Sir John Eardley Wilmot Inglis, K.C.B., to be Colonel, vice General Sir Willoughby Cotton, G.C.B., deceased; May 5.

8th Regiment of Light Dragoons—Captain Edward Phillips, to be Major, by purchase, vice Brevet Lieut.-Colonel George Chetwode, who retires; Lieutenant the Honourable Everard Stourton, to be Captain, by purchase, vice Phillips; Cornet and Adjutant Michael Clarke, to Lieutenant, by purchase, vice the Honourable Everard Stourton; May 11.

Military Train—Kitner Augustus Arthur Brasier-Creagh, Gent., to be Ensign, without purchase, vice Munro, promoted; May 11. Charles Robert Crawford, Gent., to be Ensign, without purchase, vice Stone, promoted; May 12.

4th Regiment of Foot—Ensign Francis Robert Sandys to be Adjutant, vice Law, promoted; March 17.

6th Foot—Quartermaster William Maloney, from the 80th Foot, to be Quartermaster, vice Patrick Sheeran, who exchanges; March 10.

16th Foot—Lieutenant Alexander Gibson to be Captain by pur-

chase, vice Barchard, who retires; Ensign Pierce Mc Cann to be Lieutenant, by purchase, vice Gibson; May 11.

18th Foot—Ensign Walter Carroll has been permitted to resign his Commission; May 11.

65th Foot—Brevet-Major William Pym Young to be Major, by purchase, vice Brevet-Colonel James Patience, who retires; Lieutenant Andrew Nicholson Magrath to be Captain, by purchase, vice Young; Ensign Edward Vernon White to be Lieutenant, by purchase, vice Magrath; May 11.

69th Foot—James Charles Henry Mansfield, Gent., to be Ensign, by purchase, vice Beames, promoted; May 11.

70th Foot—Lieutenant Garden Duff, from the 79th Foot, to be Lieutenant, vice Christopher Garsia, who exchanges; March 8.

79th Foot—Lieutenant Christopher Garsia, from the 70th Foot, to be Lieutenant, vice Garden Duff, who exchanges; March 8.

80th Foot—Quartermaster Patrick Sheeran, from the 6th Foot, to be Quartermaster, vice William Maloney, who exchanges; March 10.

91st Regiment—Lieutenant Thomas Erskine Arthur Hall, to be Captain, by purchase, vice Macqueen, who retires; Ensign Horace Ralph Spearman, to be Lieutenant, by purchase, vice Hall; May 11.

3rd West India Regiment—Ensign William Thomas Croft, to be Lieutenant, by purchase, vice Dugmore, promoted; May 11.

UNATTACHED.

Major and Brevet-Colonel Ernest C. Wilford, Assistant Commandant of the School of Musketry at Hythe, to be Lieutenant-Colonel, without purchase; April 25.

Captain and Brevet-Colonel Edward Selby Smyth, 2nd Foot, late Deputy-Quartermaster-General at the Cape of Good Hope, to be Major, without purchase; April 1.

Lieutenant James Young, from the 79th Foot, to be Captain, without purchase; May 11.

HOSPITAL STAFF.

Surgeon Charles Alexander Gordon, M.D., C.B., from the 10th Foot, to be Deputy Inspector-General of Hospitals; May 11.

Surgeon-Major John Charles Cameron, M.D., who retires on half-pay, to have the honorary rank of Deputy Inspector-General of Hospitals, in accordance with the Royal Warrant of the 1st Oct. 1858; May 11.

Surgeon-Major Richard Coffin Elliot, C.B., from the Royal Artillery, to be Surgeon-Major, vice Cameron, retired upon half-pay; May 11.

Surgeon Robert Villiers George has been permitted to resign his Commission; May 11.

The undermentioned Acting Assistant-Surgeons have ceased to do duty, there being no longer occasion for their services:—Harvey Rowe, Theodore Gross, M.D., Percy Lee, Joseph Thomas Mitchell, William Warman Coleman, John Benbow, M.D., John Craven; May 11.

BREVET.

Captain Charles Osborne Creagh, of the 86th Foot, to be a Major in the Army; May 11.

The local rank of Lieut.-General in China, granted to Major-General Sir William Mansfield, K.C.B., in the *Gazette*, Dec. 20, has been cancelled.

The Commission as Brevet Lieut.-Colonel granted to Major John Edward Hughes, 47 Madras Native Infantry, in the *Gazette* of Oct. 7, has been antedated to July 20, 1858.

The undermentioned promotions to take place consequent on the decease of

General Sir Willoughby Cotton, G.C.B., Colonel of the 32nd Foot, on May 4; and

Lieut.-General Berkeley Drummond, Colonel of the 3rd Foot, on May 3:

Lieut.-General Sir James Henry Reynett, Colonel of the 48th Foot, to be General, May 5.

Major-General Thomas Reed, C.B., Colonel of the 44th Foot, to be Lieut.-General; May 4.

Major-General Henry, Viscount Melville, K.C.B., Colonel of the 100th Foot, to be Lieut.-General; May 5.

Brevet-Colonel Francis Hugh George Seymour, Lieut.-Colonel upon half-pay Unattached, to have the rank of Major-General; May 4.

Brevet-Colonel William Anson M'Cleverty, from half-pay, as Lieut.-Colonel Unattached, serving on the Staff of the Army in the East Indies with the temporary rank of Major-General, to be Major-General; May 4.

Brevet-Colonel Lewis Duncan Williams, from half-pay, as Lieut.-Colonel Unattached, to be Major-General; May 5.

Lieut.-Colonel Charles F. Fordyce, C.B., half-pay Unattached, Assistant-Quartermaster-General in Novia Scotia, to be Colonel; May 4.

Captain and Lieut.-Colonel Henry Hume, C.B., Grenadier Guards, to be Colonel; May 5.

Brevet-Major Charles William Thompson, 58th Foot, to be Lieut.-Colonel; May 4.

Brevet-Major Charles Shipley Teale, half-pay Unattached, Staff Officer of Pensioners, to be Lieut.-Colonel; May 5.

Captain Henry William Bacé, half-pay Unattached, Staff Officer of Pensioners, to be Major; May 4.

Captain Oliver Nicolls Chatterton, half-pay Rifle Brigade, Staff Officer of Pensioners, to be Major; May 5.

Memorandum—The exchange between Lieutenant William Richard Corballis, of the 16th Light Dragoons, and Lieut. Henry Clement Wilkinson, of the 17th Foot, has been antedated to the 29th March, 1860.

SCHOOL OF MUSKETRY, HYTHE. — The detachments which have been at Hythe for some time past, including drafts from the Guards, 1st and 2nd West Indian Regiments, the Irish Constabulary, numbers of regiments of Militia, embodied and disembodied, a detail of which appeared in this journal when they joined, have completed their course of instruction, and are now hourly waiting the route to leave Hythe. It is much to the credit of the detachment of the Guards that the 2nd section of this detachment obtained 50·10 points in the course just gone through, being the highest average figure of merit of non-commissioned officers and men obtained in the course just concluded; with the detachment is Sergeant-Major Edwards, who, it will be remembered, was chairman of the Guards' dinner at the termination of the Crimean War. It may be gratifying to a number of his friends to know he has been appointed adjutant to the Warwickshire Rifle Volunteers. It is an *on dit* that His Royal Highness the Prince of Wales kindly forwarded to the gallant sergeant-major the sum of 50*l.* in part payment of his outfit.

Want of non-commissioned officers' mess-room. It will hardly be credited that at this establishment there is no non-commissioned officers' mess-room. This is a manifest violation of Her Majesty's Regulations: see "Interior Management and Economy of a Regiment," section 82, "The commanding officer is also to form a sergeants' mess, as the means of supporting their consequence and respectability. There are few situations where this beneficial arrangement cannot be carried into effect; but where local circumstances may render it impracticable, the reasons which may have prevented its adoption are to be explained at the half-yearly inspection." This, it may be urged, cannot apply to Hythe, which is not a regiment, and consequently this rule does not apply. This, however, could be done thus: directly a sergeant arrives at Hythe, let his subscription to his own mess-fund cease; and let him commence payment to a permanent mess-fund at Hythe; there are always a number of unmarried instructors who would be but too happy to join and remain permanent members. The first outlay might be met by a payment from Government similar to that of 25*l.* paid in aid of officers' messes in regiments. General Hay need only be applied to upon this matter to give it his support. It may be premature to speak so confidently of General Hay giving his support, but it is hazarded from the well-known desire of the gallant general at all times to promote the comfort of those under his command.

COLONEL POULETT SOMERSET AND THE ARMY AND NAVY GAZETTE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Having this day read in your paper of the 5th inst. an article, stating that I am about to exchange from the 7th Fusiliers to the command of a cavalry regiment, I take the earliest opportunity of most distinctly denying that any arrangement of the sort has been made by me, nor have I the permission of His Royal Highness the Commander-in-Chief to take any such step. I trust, therefore, that, from your known character for justice, you will kindly insert this my contradiction in your next number of the ARMY AND NAVY GAZETTE.—I am, sir, yours, &c.,

132, Piccadilly, May 9. POULETT SOMERSET.

CASE FOR THE VICTORIA CROSS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Observing in the last Saturday issue of your paper a letter addressed to the Editor, referring to the gallant conduct of Sergeant-Major Wood in the desperate assault upon the Chinese forts at the Peiho, and recommending him to the consideration of the authorities for the Victoria Cross, will you permit another "Lover of Justice" to call attention, through the medium of your invaluable columns, to another case of personal heroism performed on the same glorious though disastrous occasion? I allude to that of Lieutenant and Acting-Adjutant Harry Lewis Evans, of the Royal Marines (now, by seniority, Captain Evans), who, being amongst the foremost in the advance to the forts, and one of the last in retiring to the boats, returned three times in the face of a murderous fire, and on each occasion brought back with him a wounded [or disabled man, thus rescuing three valuable lives at the imminent peril of his own. In a letter, describing the events of this unfortunate expedition, published in the *Times*, signed "An Eye-Witness," this gallant conduct of Lieutenant Harry Evans is spoken of in terms of the highest eulogium; and in an article in *The Friend of China*, published at Canton soon after the event, the heroic bravery and daring of this distinguished young officer is also alluded to in terms of glowing praise. A private letter from an officer of high rank at Canton to a relative, referring to the same subject, says, speaking of Lieutenant Evans's conduct, "Many a man has got the Victoria Cross for a great deal less." Do you not think with me, sir, that he ought to get it?—I am, yours, &c. C. M.

COOKING FOR THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your journal of last week a letter appeared under the above heading, signed "Aliquis," [which throws some discredit upon my statement on Army Cooking; and as there appears to be a little official colouring about this anonymous production, I will answer it.

First it states that, "The wasteful folly of the whole system has been seen and exposed long before Captain Grant in 1855 turned his attention to the subject."

Now, if this be true, why was such a wretched system of cooking adopted at Aldershot on the first formation of that encampment? It was so inefficient and worthless that it became necessary to condemn it; since which, my system of cooking has been in constant operation throughout the entire encampment to the present time, during a period of five years. The writer refers me to a report from the "Barrack Improvement Commissioners," but I have neither seen their report nor heard of their improvements.

An extract from some official report was sent to me from the War Department, which contained some remarks upon my cooking apparatus; but if this extract is taken from the report alluded to, the public service will not benefit much by it; for I never read a document which contained so many absurd and incorrect statements, or one which displayed greater ignorance of the subject; and as the present Army Estimates stand charged with 50,000*l.* for "Barrack and Hospital Commission," the Secretary for War may probably think a little ventilation on this subject desirable.

Mr. "Aliquis" further remarks, "Let not our War Secretary be blamed if he is cautious in recognising and laying before the House of Commons an enormous claim to compensation." Now, if he will take the trouble to consider the principle upon which I have proposed to base my claim to compensation, he will find that it depends entirely upon the amount of saving which my system may effect in the public expenditure, the words being, "That I should receive twelvemonths' saving upon two-thirds of our military force, or such sum as may be considered a fair equivalent." Therefore, if "Aliquis" considers my claim for a portion of that saving (for a limited period only) to be so "enormous," how much more enormous must the perpetuity of that saving be to the country? The truth is, that I have been guilty of a success where professionals failed, for which I must be content to pay the penalty. JOHN GRANT, Captain, late R.A.

SOLDIERS' RATIONS.

TO THE EDITIOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I am glad to see that you have taken up the question of the soldiers' rations; the time has arrived when it should be brought under the notice of those who have the power of altering it. Whilst the meat and bread depend on the judgment of the quartermaster-sergeant, and the contracts made as they now are, very little improvement will take place.

The Right Hon. the Secretary for War stated in his place in the House of Commons, on bringing forward the Army Estimates, that at Aldershot the meat was 20 per cent., and the bread 25 per cent., more nutritious than that obtained in London; those who have paid attention to the subject know the truth of that remark. The bread supplied during the last few weeks to the west-end barracks contains 50 per cent. of rice, which, though not unwholesome, does not contain the same amount of nourishment as wheaten bread. Why should not the same system as that in use at Aldershot be adopted in London, Woolwich, Chatham, and other large garrison towns? the men at first grumbled at the commissariat coffee, sugar, &c., stimulated by interested parties; the sergeants can no longer get their perquisites from the grocer; the profit upon vegetables alone will not allow so large a sum. In addition to the improvement in the men's rations, it would effect a saving to the country according to some careful calculations of half a million pounds sterling per annum, in addition to an effective staff ready in case of war, through whom such an enormous waste of money as that which occurred in the Crimea would be avoided.

You are so well known as the soldier's friend, it is therefore not asking too much for you to look in the cook-house of the London barracks a little before nine o'clock in the morning, and see the meat before it is placed in the boilers, and then compare it with the meat at Aldershot. I have heard it said that the soldier should have inferior meat; if the large contractors who supply them did not take it, who would? It would not sell in the London market. My reply is, if inferior meat did not find a sale in London none would be sent: the public in general would be the gainer. What has been the result at Aldershot since the system has been introduced? It is well known that formerly it was difficult to get a good joint of meat at Aldershot. At present the reverse takes place; it is difficult to get a bad one.

If you think the insertion of these observations would tend to change the present system, you will confer a benefit on the soldier, and oblige yours, &c. HIC ET UBIQUE.

A FEW WORDS ON THE ARMSTRONG GUN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The extract from a French periodical, which you published in one of your late issues, touching the new rifled cannon, is the best embodiment of the opinions of many unprejudiced officers which I have as yet seen, and I therefore crave your permission to offer a few additional comments on the subject.

We know what the French rifled cannon is; but we have been so completely carried away by the novelty and apparent superiority of our own new ideas, that no field pieces (so far as I know) have ever been made to test its merits. A 32-pounder muzzle-loading iron gun, rifled by a Mr. Jeffreys, and shooting iron cylindrical shot, coated with lead, is the nearest approach I can think of. The practice from this gun was excellent; but so little interest did it excite at Shoeburyness, that Mr. J. might almost as well have shot at the moon.

So far as accuracy is concerned, Armstrong's gun shoots to perfection. At 3000 yards, with a field-piece, you may go through a 6-foot target to a certainty. If you miss, blame the gunner, not the gun. There is nothing more to be desired in range; for over an undulating and unknown country, there is not one man out of ten whose sight and judgment at that distance can be depended on.

Nevertheless there are serious blots in this celebrated rifled cannon. First and foremost, it cannot be used without water, and plenty of water too. The Minister for War lately mentioned in the House that this difficulty had been overcome. With all respect, I beg to say he is in error. The greaseling wad has improved matters, and that is all.

In consequence, the sponging is excessive, and takes long to accomplish, far longer than a field-gun could afford in action. It must be thoroughly well done with water or it is of no use at all, from the difficulty of inserting the bristles of the sponge into the grooving where the fouling lodges. Can you always depend on water in the field of battle? I think not.

But what I believe will be a fatal objection to these guns in action, is the exposure of the great breech-screw when loading. The male and female threads of this screw fit with beautiful precision; when untwisted in loading, the male threads are exposed to all the dust and grit which horses, men, shot, and other contingencies in action, will surely cause. If it hitches in screwing up again, no power on earth will move it; and the gun must be abandoned or dragged out of action. I saw a breech-screw once so misbehave, without any apparent provocation, and when comfortably shedded at Shoebury, all the artificers failed to stir it; so it was sent to Newcastle to be expanded by heat; but alas! we cannot carry our Newcastles on a campaign.

If the Armstrong gun is destined to come into universal use, you must improve your quality of gunners. Men who cannot read or write, utterly without education, picked up anywhere, will no longer do. It is no easy matter for even a partially educated man to understand the laying and elevating of these field pieces; and it takes a considerable apprenticeship before the mechanism of the gun, carriage, screws, and bed, is mastered.

Compared with the old field-gun, the whole affair is complicated, and will require unremitting attention from officers and men. Injury to one part, neglect or rust, is fatal to the whole machine. It would take a good deal of rough usage to injure the old 9-pounder so as to render it unserviceable; but the Armstrong must be kept in cotton, and would not in my opinion stand the rough and tumble of a stiff campaign.

This, however, applies to field-pieces only; for heavy guns on board ship the disadvantages vanish; there, dust and grit can be reduced to a minimum, and water is ever plentiful. This is the field for Sir William. I long to see a frigate fitted out with his heavy ones. Woe betide her adversary in the fearful day of battle!

But, regarding his fixed guns, with all respect for his talent, I, with many other officers, have my serious doubts. I have long thought that we shall eventually settle down to a simple muzzle-loader, rifled as nearly as possible after the French plan; shooting it may be neither quite so far, nor quite so accurately, as the Armstrong, but compensating in simplicity of construction and ability to stand rough work: while a few Armstrong's will follow an army, and, as guns of precision, act with terrible effect at long bowls from positions where all chances of injury to themselves are fairly removed. I am, &c. JUDEX.

Early in the autumn a monument in honour of the late Sir Henry Havelock will be publicly inaugurated at Sunderland. His Royal Highness the General Commanding-in-Chief will be invited on the occasion, and hopes are entertained that Lord Clyde will also be present.

It appears from a Parliamentary return that the entire expenditure at Aldershot, up to February last, in the purchase of land, erection of barracks, and supply of water amounted to 1,291,531*l.*

THE NAVY.

ADMIRALTY, MAY 7.

APPOINTMENTS AND PROMOTIONS.—Rear-Admiral of the Blue Sir T. Maitland, C.B., to be Commander-in-Chief in the Pacific, vice Rear-Admiral Baynes, whose period of service has expired.

Paymasters J. W. Ozzard, to be secretary to Sir T. Maitland; and J. G. G. Simmonds, to the Bacchante.

Assistant-Paymaster C. T. Dawson, to be secretary's clerk in the Bacchante.

Assistant-Clerk W. Autridge to the Bacchante.

Acting-Assistant-Surgeon Dr. T. Milne, to the Victory, for service at Haslar Hospital.

Second-class Assistant-Engineers T. J. Sweeny, to the Ranger; S. Windley, to the Rhadamanthus.

Acting Third-class Assistant-Engineers E. Gossage, to the Fisgard, as supernumerary; and H. F. Strugnell, to the Asia, as supernumerary.

MAY 8.—Lieutenant H. A. Trollope, to be flag-lieutenant to Rear-Admiral Sir T. Maitland, as Commander-in-Chief in the Pacific.

Master J. W. Read, to be additional to the Fisgard.

Assistant-Paymaster T. J. Chanter, to the Impregnable, as supernumerary.

MAY 9.—Lieutenants A. J. Kennedy, to the Excellent; C. Lyon, to the Diadem; and E. S. Mangan, to the Perseverance.

Engineer J. Gee, promoted to the rank of First-Class Assistant-Engineer in the Fisgard, as supernumerary.

Assistant-Clerk A. G. Roberts, to the Mersey.

COAST GUARD OFFICE.

APPOINTMENTS.—Mr. Richard W. Ward, Master, to the command of the Langston Harbour Station, Southsea Division.

Mr. James D. Willshire, acting Second Master, to the command of the Rickham Station, Salcombe Division.

Asia. A court-martial assembled on board Her Majesty's ship Victory in Portsmouth harbour in the early part of this week, under the presidency of Rear-Admiral Superintendent Hon. G. Grey, for the trial of Lieutenant Patrickson, serving on board Her Majesty's ship Asia, steam guard-ship of ordinary at that port, on a charge of drunkenness, preferred against him by his commanding officer. The trial of the prisoner was adjourned on Tuesday last owing to the sudden illness of the prisoner, he having been attacked with a fit. On the court re-assembling on Thursday morning the prisoner pleaded "Guilty" to the charge, and threw himself on the mercy of the court. Mr. Hoskins, solicitor, who attended as the prisoner's "friend," made a few observations to the court in mitigation of punishment, and handed in several excellent testimonials, which the prisoner had received from officers under whom he had formerly served. The court was then cleared; and on its being re-opened the finding was read by the Deputy Judge-Advocate, which declared the charge proved against the prisoner, and sentenced him to be dismissed Her Majesty's ship Asia, and to be placed at the bottom of the list of lieutenants.

Algiers, 91, screw, Captain George D. O'Callaghan, will go out of *Portsmouth Harbour* to Spithead to-day, to rejoin the first division of the Channel fleet at Spithead, on the completion of her repairs and refit.

Bacchante, 51, has hoisted the flag of Rear-Admiral Sir T. Maitland, C.B. (white at the mizen), at Portsmouth. Sir Thomas gets three weeks' leave of absence. Bacchante will not be ready for sea until the first week in June, when she sails for the Pacific to relieve the Ganges, 84, sailing ship, flag of Rear-Admiral Robert L. Baynes, C.B., commissioned in June, 1857.

Badger, gun-boat, has been found to be so defective, that her crew has been turned over to the Rainbow, gun-boat, which will sail in a few days for Ireland, as a tender to the Ajax, guard-ship.

Bombay, 84, which left Devonport on Monday last, is expected to arrive at Woolwich, when she will be taken into dock to be converted into a screw steamer.

Cæsar was at Naples by the latest accounts.

Cormorant, screw gun-vessel, 200-horse power, arrived at Woolwich, on Thursday night, to be inspected. This vessel has been built by contract at Blackwall.

Dee, steam store-vessel, Master-Commanding Pullen, arrived at Woolwich on Thursday from Portsmouth, having on board Vice-Admiral Sir Houston Stewart, K.C.B., Lady Stewart and family, who were received at the Commodore-Superintendent's residence.

Doris, Captain Heathcote, was at Mogador on the 21st of April.

Euryalus, 51, Captain John W. Tarleton, bound to Madeira and the Cape of Good Hope, which put into Plymouth Sound on Sunday morning with machinery damaged, has been supplied with a piston slide from the engines of the St. George, and on Monday morning made an experimental trip outside the breakwater, and returned about noon. She is again ready for sea. At half-past 12, His Royal Highness Prince Alfred left the Euryalus in the gunboat Clinker, which conveyed him to the Devonport Dockyard, where the prince had luncheon with Rear-Admiral Superintendent Sir Thomas Pasley, after which it was intended that he should inspect the arsenal and the steamworks at Keyham yard, and then proceed to Mount Edgcumbe.

Exmouth was at Corfu by the latest accounts.

Hero. The Hero paid down on Tuesday. She is still in dock; a flaw in the welding of a piece of her shaft has been discovered. The piece has been taken out, and another is being forged. It is understood that the 10th July is the day fixed for His Royal Highness the Prince of Wales to embark for Canada.

Lapwing is at Gibralter.

Liffy was at Corfu at the end of April.

Majestic. The *Liverpool Albion* says:—"When Sayers was leaving Her Majesty's ship Majestic, the sailors asked permissson of their commander to man the rigging, which they did, loudly cheering the Champion. Captain Mends' object in inviting Sayers was to gratify the earnest desires of his men, and he availed himself of the occasion to read a most excellent moral on the virtues of courage and endurance. Captain Luckraft, of Her Majesty's ship Hastings, during Sayers' visit on board that ship, expressed a wish that he had ten thousand such men."

Medusa, steam-vessel, Commander Bowden, from the West Coast of Africa, has been inspected at Woolwich by officers of the factory department, and is found to be in excellent condition. During her cruise on the slave preventive service, in company with the Pluto, she succeeded in capturing two rich prizes—one of which had a large amount of specie on board for the purchase of slaves. The crew will share about 20*l.* and the petty officers about 60*l.* each in the shape of prize-money, which will be paid immediately, as the prizes have been condemned by a legally constituted Admiralty Court.

Melpomene, 51, Captain Charles Ewart, is expected to sail on Saturday or Sunday with Vice-Admiral Martin, for the Mediterranean.

Mohawk was at Tangiers by the most recent accounts.

Orion left Malta for England on the 19th of April.

Philomel, new class gun-boat, built by the Messrs. White, of Cowes, has commenced receiving her machinery of 80-horse power, by Messrs. Napier, of Glasgow, in the steam-basin at Portsmouth.

Plover, 5, screw gun-vessel, which is being fitted at Chatham for the first-class steam reserve, has proceeded on a trial trip as far as the Mouse, for the purpose of testing her machinery. During the run the engines were found to work smoothly, with little vibration, the vessel making 10½ knots against a strong wind. After the trial the Plover returned to Chatham to complete fitting. The Plover is sister ship to the Torch, also fitting at Chatham for the steam reserve.

Pluto. The crew are entitled to a large amount of prize-money, that vessel having chased and captured a slaver having on board 883 Africans. She will be paid-off to-day.

Quail is at Gibraltar.

Queen, 86, Captain Charles F. Hillyar, got under weigh on Tuesday morning from Spithead, and in attempting to pass in shore of Melpomene, she unfortunately tailed upon the edge of the Spit. Signal was made for assistance, and Sprightly, Echo, and Comet went out of harbour to render aid, but in the interim steam was got up on board the Queen, and a hawser taken on board the Melpomene, and, as the tide was rising, she was hove off without difficulty or sustaining any damage. She sailed for the Mediterranean about 11 a.m.

Ranger, Commander Wratislaw, having received the whole of her stores and crew, steamed down the river on Thursday to Greenhithe to adjust compasses, previous to leaving for the slave preventive service on the West Coast of Africa. The Ranger is the first completed vessel of a new class, 14 of which are now building for the Government at various private yards.

Redwing, gun-vessel, under the command of Lieutenant Jones Parry, and tender to the Cambridge gunnery ship at Plymouth, has been practising with Armstrong's gun in the Solent and Portsmouth harbour. Captain Jerningham, of the Cambridge, was on board during the trials. The gun was tested against some plates sent by Napier, which appeared to resist the shot rather successfully. We have heard that unless some new description of carriage is invented for Armstrong's gun, that small ships and gun-boats of the present build will not be found strong enough to resist the tremendous recoil; another defect of this weapon seems to be its dirtiness.

Scourge is at Gibraltar.

Victor Emmanuel was at Corfu last month.

Victoria, 121. Her Majesty some time back having expressed an opinion that the nose on the figure-head of this ship was rather too large, Mr. Hellyer has been engaged for this last few days to reduce it.

Victoria and Albert has been lashed alongside the sheer jetty of Portsmouth Dockyard, for the purpose of receiving her new shaft. The staff of the steam factory are at work upon her day and night, and her repairs, &c., are expected to be completed in about a week's time.

Victory. On Friday a court-martial assembled on board Her Majesty's ship Victory, in Portsmouth harbour, to try Lieutenant Thomas Simeon, of Her Majesty's ship Perseverance, on the following charges:—1. For having, on or about the 16th of February, 1860, been guilty of neglect of duty, while officer of the watch at sea, by playing at quoits on the lee side of the poop, and for having been guilty of falsehood or gross prevarication by saying that he was not playing at quoits. 2. For having, on or about the 19th of February, been off deck in his watch to the neglect of his duty, and in disobedience of the special orders of Commander Power, his commanding officer. 3. That on or about the 19th of February he was guilty of falsehood in telling Commander Power that he had not shut the commander's cabin door, when he had done so. The members of the court comprised:—Rear-Admiral Hon. G. Grey, President; Captains R. Harris, R. S. Hewlett, C.B., T. Wilson, J. U. Strange, R. Coote, J. Katon, E. W. Vansittart, D. M. Mackenzie, and Mr. W. J. Hellyar, Deputy Judge-Advocate. The defence was read by the prisoner's friend, Mr. Hoskins, in which the attention of the court was called to the fact of his having been recently tried and acquitted on charges preferred against him by Commander Power, and he emphatically denied having been guilty of any act of falsehood in his replies to Commander Power. The defence was of some length, and at its conclusion a number of certificates of service were handed in by the prisoner, and read by the Deputy Judge-Advocate. The prisoner called no witnesses. The sentence of the court was read by the Deputy Judge-Advocate, to the effect that the court, after maturely and deliberately weighing the evidence for the prosecution and defence, and also what the prisoner had to say in his defence, found that the first charge had been partly proved, inasmuch as the prisoner had been guilty of neglecting his duty in throwing quoits when officer of the watch; but the Court acquitted him of any intentional falsehood or prevarication. The second charge was proved, and the third charge not proved. The sentence of the Court was that the prisoner be dismissed Her Majesty's ship Perseverance, and be placed at the bottom of the lieutenants' list.

Vigilant, 4, having been thoroughly renovated in No. 5 dock at Portsmouth, will be floated out on the 21st inst.

Wanderer, 4, one of the vessels inspected at Woolwich, and found to be rotten, is ordered to be sent to Sheerness to be repaired, but the general opinion is that she is in such a defective state that she is not worth the expense of repairing.

PROMOTIONS IN CHATHAM DOCKYARD.—The following have taken place in Chatham dockyard by order of the Lords of the Admiralty:—C. Glenn, Leading Man of Shipwrights, to be Acting Measurer; G. Fowler to be Acting Writer to Timber Inspector; W. Potter to be Acting Writer to the Master Shipwright; H. Hands, Acting Inspector, to be Modeller; J. Logan to be Second-Class Draughtsman; H. Rich, Acting Measurer, to be Leading Man of Shipwrights; J. Tomlins, Joiner, to be Leading Man vice E. Adams, superannuated; and W. Robson, Joiner, to be Leading man, vice W. Driver, superannuated.

The Duke of Somerset held a levee at the Admiralty on Thursday, when the following officers paid their respects to his grace:—Vice-Admiral Sir G. Lambert, K.C.B., Rear-Admiral Charles Crowdy; Captains E. Ommaney, W. M. Dowell, J. P. Luce, E. P. Halstead, A. W. A. Hood, A. H. Gardener, J. O. Johnson, Chandos S. S. Stanhope, E. A. Inglefield, and T. S. Thompson; Commanders J. H. Cave, J. de C. A. Agnew, J. W. Webb, J. R. Alexander, E. Madden, and Colin C. A. Kane; Lieutenants E. W. L. Ray, A. B. Mehen, and Boxer; Dr. J. Gallagher, Mr. J. Hardie, and the Rev. P. G. Hill, R.A.

On Thursday night Captain G. Goldsmith, C.B., superintendent of Woolwich Dockyard, gave a grand ball at his official residence in the dockyard, on which occasion upwards of 100 of the *élite* of the garrison, with all the heads of departments, were present.

A numerous party of shipwrights at Chatham have commenced breaking up the mortar-boats Nos. 30 and 32, both of which were inspected and found to be unfit for further service. Now that the outer planking of the vessels have been removed, the real state of the timbers can be clearly seen. Both vessels, although only built by contract about five years ago, are so rotten that a great portion of the timber may be picked to pieces with the finger. A survey has been held on two more of the mortar-boats, Nos. 31 and 48, in order to ascertain their condition; but after they had been partially opened they were found to be so rotten and decayed that they were closed up and floated off the slip on which they had been hauled up for inspection. It is believed they will be ordered to be taken to pieces.

The public will hear with much regret that Lord Dundonald is now lying seriously ill. His Lordship has nearly completed the remarkable narrative of his life—a matter of considerable anxiety to himself, and of great gratification to the public.

The First Lord has bestowed the service pension, vacant by the death of Vice-Admiral Sharpe, on Admiral Sir John Louis, Bart.

Assistant-Surgeon John Allen confirmed in the Liffey, and Patrick Keelan confirmed in the Industry.

ROYAL NAVAL FEMALE SCHOOL.—The twentieth annual meeting of the friends of this institution took place on Saturday the 5th inst. in the lecture room of the United Service Institution. In the unavoidable absence of the respected president, Earl Manvers, Rear-Admiral Lord Colchester was called to the chair. The annual report stated that there were 87 pupils belonging to the school, of whom 56 (at 12*l.* per annum) were elected by the subscribers, five were nominated by the commissioners of the Royal Patriotic Fund, and paying 10*l.* per annum each, and 26 placed in the school by the committee (without any reference to the contributors), and who pay 40*l.* per annum. The funds, if not in a very flourishing condition, were reported as in a healthy state, the annual subscriptions amounting to nearly 1400*l.* The new house and grounds are entirely paid for, still leaving an invested capital of upwards of 8000*l.* consols. Two legacies of 1000*l.* and 500*l.* respectively were reported; and in one of these cases the Institution is named as a "residuary legatee." Several communications of an interesting character from the parents of children leaving the school were embodied in the report, and these letters spoke satisfactorily and gratefully of the benefits conferred on their children. The ordinary resolutions were moved and seconded by Admirals the Earl of Shrewsbury and Talbot, C.B.; Sir George Seymour, K.C.B.; Sir George Lambert, K.C.B.; Sir George Back; J. A. Warre, Esq., M.P.; the Revs. J. C. Connolly and N. Proctor; Captain Charles Shea, H.C.S.; Captains Rashleigh Rodd, R.N.; and B. J. Sulivan, R.N., C.B. After the routine business had been concluded, a resolution was carried by acclamation, thanking the Hon. Secretary, Captain the Hon. Fras. Maude, R.N., for his kind and valuable services; and on the motion of the Earl of Shrewsbury and Talbot, seconded by Sir George Seymour, it was unanimously resolved that the thanks of the meeting be given to Miss Clifton, the lady governess, "for the efficient and zealous performance of the important duties of her office."

The Navy Gazette.

ADMIRALTY, MAY 11.

Admiral of the White, Sir John Louis Bart., has been appointed to receive a pension of 150*l.* a year, as provided by Her Majesty's Order in Council of 25th June, 1851, vacant by the death, on the 1st instant, of Vice-Admiral Alexander Renton Sharpe, C.B., and the name of Admiral Sir John Louis has been removed to the Reserved Half-Pay List accordingly; and in consequence of this removal, the following promotions, to date from the 2nd instant, have this day taken place:—

Admiral of the Blue Sir Edward Chetham Strode, K.C.B., K.C.H., to be Admiral of the White.

Vice-Admiral of the Red Sir Henry Prescott, K.C.B., to be Admiral of the Blue.

Vice-Admiral of the White Sir Charles Sullivan, Bart., to be Vice-Admiral of the Red.

Vice-Admiral of the Blue the Hon. Henry John Rous to be Vice-Admiral of the White.

Rear-Admiral the Right Hon. Charles, Lord Colchester; and Rear-Admiral William Keats, on the Reserved Half Pay List, to be Vice-Admirals on the same List.

Rear-Admiral of the Red Sir Henry John Leeke, K.C.B., K.H., to be Vice-Admiral of the Blue.

Rear-Admiral of the White Thomas Wren Carter, C.B., to be Rear-Admiral of the Red.

Rear-Admiral of the Blue John Jervis Tucker to be Rear-Admiral of the White.

Captain Sackett Hope to be Rear-Admiral on the Reserved Half-Pay List.

Captain Robert Fanshawe Stopford to be Rear-Admiral of the Blue.

Digitized by Google

NAVAL COURT-MARTIAL AT THE CAPE.

A Naval Court-martial, appointed by Admiral Grey, Commander-in-Chief, to investigate cases of complaint against several officers in Her Majesty's Service, on the Cape station, commenced its sittings on the 9th of March, at Simon's Bay. The court was composed of Captain Powell, C.B., Boscawen (president); Captain Craufurd, Sidon; Captain de Horsey, Brisk; Captain Gordon, Hermes; and Captain Veitch, Boscawen. Lieutenant H. R. Jones officiated as judge-advocate.

Lieutenant Henry Berkeley, of H.M.S. Lynx, was tried on charges which extended over a period of thirteen months, and were as follows:

1st. For conduct unbecoming the character of an officer, in that he did, on or about the 12th day of May, 1859, strike and seize by the throat John Farmer, able seaman of H. M.'s steamer Lynx, and on or about the 19th December, 1859, did strike Robert Vallack, able seaman, of the said steam-vessel.

2nd. That he made use of profane oaths, cursings, and execrations, "in derogation of God's honour and the corruption of good manners."

3rd. That he caused Francis Williams, ship's steward's boy, to be flogged on the breech with a riding whip, without any warrant having been made out or read before the infliction of the punishment.

4th. That he caused James Holt, able seaman, to be called down from aloft and immediately put in irons, and further caused him to be kept in irons on the boiler for fourteen days and eight nights.

5th. That he ill-treated the Kroomen on board the Lynx, especially in causing, on or about the 28th day of November, 1859, Sam Lewis, Krooman, to be gagged and lashed down to the deck; in kicking Edward Davis, Krooman, using bad language towards him, causing a rope to be put in his mouth, and causing him to be lashed to the mainmast and kept there all night; and in striking or throwing something at Jack Pann, whereby he was wounded in the head.

Another (sixth) charge was brought by order of the Admiral, who instructed the court to examine the quarterly returns of punishments on board the Lynx, as these appeared to be in some cases excessive, and in others irregularly inflicted, and not in accordance with Admiralty circular, No. 131, which requires that warrants should be made out and read.

The evidence was exceedingly voluminous, and occupied several days in the hearing. It was not until the 17th March that the proceedings were closed. After deliberating for five hours and a half the Court gave the following decision. First charge, not proven. Second charge, not proven. Third charge, not proven. Fourth charge, not proven. Fifth charge, first and second parts not proven; third part (viz., striking Jack Purser, Krooboy) proven. Sixth—Punishment of Templeman and Preston, not excessive. Punishment of Robert Vallack, irregular; and John Farmer (3*l.* straggling fine), irregular. John Farmer and H. Tansome punished without warrant. Punishment of Henry Leeson not excessive, though irregular. The sentence of the court was, "That Lieutenant Henry Berkeley be reprimanded, and admonished to be more careful in future."

On the following day the court entered upon the trial of W. O. M. Spong, paymaster of Her Majesty's steamer Lyra, for irregularities in accounts and drunkenness. This case was not concluded at the departure of the mail. Two other charges, one against Dr. Hunter, of the Lynx, for drunkenness, and another against an engineer of the Brisk for a similar offence, will afterwards be investigated.

MEDITERRANEAN MOVEMENTS.

MALTA, May 5. The most prominent topic here for the last few days has been the murder of one of the Maltese mounted police, named Felice Dalli. The cause of the unfortunate man's death was a gun-shot wound, inflicted by one of two men, whom Dalli and a comrade detected in the act of committing a robbery. Three men (Maltese) are at present in custody, charged with being participators in the crime.

The weather in this island has been more than usually changeable of late, and some rain has fallen—a great boon; not only useful in cooling the air, but in conquering the dust for a time, as after continued dry weather the streets in and about Valetta become almost impassable, owing to the clouds of dust flying about in all directions.

The naval movements during the past week have been more numerous than important, with the exception of the James Watt's leaving harbour on the evening of the 1st inst., destination not as yet made public. The surveying vessel Firefly also left on the same day for Greece and Coast of Syria. The Cadmus left on Tuesday for the West Indies, the Chaplain, the Rev. Henry Jones (1837) having been previously invalided. The Agamemnon, Cressy, and Neptune, went out into the offing on the 3rd inst., and are there now awaiting the Hannibal, to join them this morning, when they will form a small squadron, and after a short cruise return to Malta. The distribution of the Mediterranean fleet is nearly as follows:—At Malta—Hibernia, Marlborough, Hannibal, Renown. At Jean d'Acre—London, Scylla, and Assurance. In the Offing—Agamemnon, Cressy, and Neptune. Corfu—Victor Emmanuel, Exmouth, and Alacrity. Gibraltar—Doris, Mohawk, Lapwing, and Quail. The Cæsar is at Naples, the Racoon at Leghorn, the Amphion is on the Coast of Sicily, the Recruit and Growler are up the Danube, and the Scourge is either at Tangier or has rejoined the Gibraltar squadron. A Russian screw line-of-battle ship, Gangaud (bearing the flag of Rear-Admiral Nordman) came into Malta on Thursday, and anchored in Bighi Bay, the usual salutes, visits of courtesy, &c., between the Admirals were duly observed, and the Gangaud this morning "shifted billet," and is now moored close on the Hannibal's quarter. The garrison amateur theatricals came off last night, under the patronage of the Governor Sir G. Le Marchant, and before a well filled house. The performances were Tom Taylor's comedy of "Still Waters Run Deep," and "Bombastes Furioso."

It is asserted that Marshal M'Mahon will take the command of the camp of Chalons at the beginning of June next.

THE MILITIA.

The 3rd Regiment Royal Surrey Militia assembled for 27 days' training, at the head-quarters, Kingston-on-Thames, under the command of Lieut.-Colonel C. B. Challoner, on Monday, the 30th of April; 24 officers, the permanent staff, and upwards of 450 rank and file were present with the regiment. The regiment is armed with the Enfield rifle.

ROYAL SOUTH GLOUCESTER MILITIA.—This regiment, under the command of Lieut.-Colonel Commandant H. W. Newman, assembled for training and exercise on the 30th of April. The muster this year has been very good; the regiment stands on parade 582 of all ranks, there being only 45 absentees, a portion of whom can be accounted for. The regiment since last training has been supplied with the new pattern Enfield rifle, and already considerable progress has been made both in battalion and musketry drill, and the conduct of the men in billets has been very favourably spoken of by the inhabitants.

The South Notts Regiment of Yeomanry Cavalry, under the command of Lieut.-Colonel Robert Holden, assembled at Nottingham on the 7th of May for five days' training and exercise. The regiment consists of five squadrons, numbering 78 sabres each.

WEST ESSEX MILITIA—This regiment has had a very full muster. It had been stated that there were a large number of absentees at the training. The contrary appears to have been the case, as no more than 25 of the effective strength were away from training. The corps has lately received a large number of recruits.

THE HAMPSHIRE MILITIA ARTILLERY have commenced their course of summer practice with 32-pounders from Paten Battery; they made very fair practice at a small floating target, at about 1600 yards, with round shot. This regiment is in the highest state of discipline and most efficient as Artillerymen. They are well up to the work of mounting and dismounting heavy ordnance, and have had considerable practice in disembarking heavy guns and stores from on board ship. The recruiting is still going on satisfactorily, and many men whose time has expired have been re-enrolled.

THE LANCASHIRE MILITIA ARTILLERY have received orders for disembodiment in June, being one of the four mentioned by the Secretary for War some time ago. It seems almost a pity to reduce these regiments after so much money has been expended upon them for practice, &c., as the money paid by Government for this purpose has amounted to a very considerable sum.

4TH (DUKE OF LANCASTER'S OWN) ROYAL LANCASHIRE LIGHT INFANTRY.—This regiment is at present at Warrington for training under the command of Lieut.-Colonel J. Inland Blackburne, and numbers nearly 1000 men. An excellent range for rifle practice has been obtained at Orford Park, within two miles of the town, where the men have been occupied since Monday last. We believe this and the "Sherwood Foresters" are the only Militia Regiments to whom ammunition for ball firing has been issued.

1ST ROYAL SURREY MILITIA assembled at Richmond on the 30th ult., for 27 days' training. The regiment is under the command of Lieut.-Col. Evelyn. It musters 500 men, and is rapidly progressing in drill and musketry instruction.

RUTLAND MILITIA, under the command of Captain the Hon. Henry Noel, assembled at Oakham on Wednesday, for 27 days' training and exercise.

MAYO.—Lieut.-General the Earl of Lucan has appointed R. Rutledge, Esq., to be Lieutenant-Colonel, South Mayo Royal Rifles, vice Lieut.-Colonel Palmer deceased. Lieutenant Alfred Knox to be Captain, North Mayo Regiment of Militia, vice Captain Henry Wm. Knox, deceased.

The Royal North Gloucestershire Regiment of Militla assembled at Cirencester last week for training. The force consists of 24 officers and nearly 500 men, who have been supplied with the long Enfield rifle.

The 2nd Regiment of Royal Middlesex Militia has assembled at Barnet for the usual period of training.

The Somerset County Militia (2nd Regiment) has been called out. It consists of 736 men.

The Hampshire Militia, under the command of Lieut.-Col. Stretton, assembled last week at Winchester. The force consists of about 400 men.

The 2nd Regiment of Derby Militia (the Chetsworth Rifles) will assemble at Chesterfield on Thursday, the 24th inst., for their annual training.

The Chester Militia assembled on Monday last at Chester for 28 days' training.

The 5th West York Regiment is to assemble at Knaresborough for 27 days' training, on Monday the 4th of June, and not on the 25th inst., as previously stated.

The East Norfolk Militia, which has been assembled during the last three weeks at Great Yarmouth for the usual periodical training and exercise, has been again disembodied.

Major-General Douglas has reviewed the East Norfolk Militia at Southtown, Great Yarmouth. The regiment, which musters between 500 and 600 rank and file, presented a creditable appearance.

The East Essex Militia, under the command of Lieut.-Colonel Edward Henry Moore Kelly, assembled at Colchester last week. A considerable number of men have enlisted in the Line, and there are consequently some defaulters.

The First Devonshire Regiment of Militia assembled last week for 28 days' training at St. Thomas's barracks, Exeter, under the command of Lieut.-Colonel Ferguson Davie, M.P. The total number of the force is 547, and the men are reported to have a very soldier-like appearance.

The 2nd Regiment of Royal Surrey Militia assembled at Guilford last week for 28 days' training. The force consists of 36 sergeants, 33 corporals, 10 drummers, and 294 privates, besides the commissioned officers. When the muster-roll was called it was found that there were only 19 absentees. The men assemble daily for practice in the cricket-ground near the railway station. The regiment is under the command of Colonel the Earl of Lovelace.

The Royal Bucks Regiment of Militia assembled last week at High Wycombe for 28 days' training. The force consists of about 800 men.

The Royal Monmouthshire Regiment of Militia assembled at Monmouth last week for 27 days' training, under the command of Lieut.-Colonel J. F. Vaughan.

The Hertfordshire Regiment of Militia marched into Hertford last week under the command of Colonel the Marquis of Salisbury. The regiment consists of 23 sergeants, 11 corporals, and 382 privates.

The Royal Cornwall and Devon Miners Regiment of Militia assembled last week at Truro for 27 days' training, under the command of Colonel Sir John Colman Rashleigh. About 180 men, nearly the full complement of the regiment, answered when the muster-roll was called.

The 1st Worcestershire Regiment of Militia are undergoing an active drill of six hours a-day. Four companies have been on duty for six days, and they will forthwith be succeeded by four other companies. The companies under drill have been inspected by Lord Lyttelton, the Lord-Lieutenant of the county, and a most favourable report of their progress has been made.

The Leicestershire Militia assembled for training on the 27th ult. The muster roll of all ranks is 898, 77 privates only being absent.

Colonel Marriott, the officer commanding the Royal Artillery in the northern district, inspected the Northumberland Artillery Militia in Tynemouth-garrison on Friday and Saturday last. On Saturday the regiment was exercised with the great guns, forming the modern defence of the Castle and the port of Tyne.

The 1st Cheshire Regiment of Militia has to assemble at Chester Castle.

The South Devon Militia assembled for 27 days' training on the 30th of April at their [depôt at Mutley, one mile distant on the north, and marched into Plymouth fully equipped, about 5 o'clock in the afternoon, under the command of the Colonel-Commandant Lord Churston. The regiment occupies Millbay Barracks, the officers are in billets, and the mess establishment is in a hired house, which is furnished by the South Devon Militia, the complete appointments being the property of the regiment. The drills, including a course of musketry, have been entered upon with vigour. Lord Churston is on parade throughout every drill.

1ST LANCASHIRE MILITIA.—On Monday the 1st Duke of Lancaster's Own Militia was inspected at Lancaster by General Douglas, Inspecting Field-Officer of Militia. The regiment assembled under the command of Colonel Talbot Clifton. The adjutant, Captain Thornhill, then put the corps through the manual and platoon exercise, and, considering the short period during which the men had assembled, it was astonishing to witness the celerity and precision with which all was done. The inspection was most minute, and at the conclusion the corps was formed in quarter-distance column, when General Douglas addressed Colonel Clifton and the regiment, and in the warmest terms congratulated the former and complimented the latter on the state of efficiency to which the 1st Royal Lancashire Militia had attained.

The Militia Gazette.

WAR OFFICE, PALL MALL, MAY 8.

Royal Sussex Regiment of Militia—William Frederick Perry, Esq., to be Paymaster, from 14th February; Feb. 24.

1st or Royal East Middlesex Regiment of Militia—Memorandum—The Queen has been graciously pleased to accept the resignation of the Commission held in this regiment by Ensign Charles George Norris; accepted April 16.

Warwickshire Militia—1st Regiment—Herbert Harrington Roberts, Gent., to be Ensign, Vice Henry John Yeatman, promoted; May 3.

[The following is submitted for what appeared in the *Gazette* of May 4, as to Lieutenant Hunt.]

Henry Thorowgood Hunt, late Ensign 17th Regiment of Foot, to be Lieutenant, vice Eden, resigned; April 28.

Prince Albert's Own Leicestershire Yeomanry Cavalry—Her Majesty has been pleased to accept the resignations of Captain William Earle Welby, Lieut. Hugh Stratford, and Cornet the Hon. Gerard James Noel, of the Commissions they hold in the above regiment.

A REGATTA AT THE ANTIPODES.—The following circular has been sent to all the yacht clubs of the United Kingdom. Will any spirited yachtsmen go?—"Sydney Yacht Club. Extract from minutes of the 17th January, 1860. George Thornton, Esq., Vice-Commodore, in the chair. Proposed by J. J. Josephson, Esq., seconded by M. F. Josephson, Esq., and carried unanimously:—That a 300*l.* prize be offered for all deep-keeled yachts (time for tonnage), to be sailed for in 1861. The entrance for the race to be 10*l.* 10*s.*, and that the entrances be made a sweepstakes, to be given as a second prize; the minimum tonnage to be ten tons (that is, all boats under that tonnage to rate as such). Resolved unanimously:—That the above race be sailed on the 26th January, 1861, and that a copy of the above resolutions be forwarded to all yacht clubs in the world.—Benjn. Bunbury, Honorary Secretary."

VOLUNTEERS.

METROPOLITAN.

Civil Service Volunteer Rifle Corps. — His Royal Highness the Prince of Wales has been pleased to accept the Honorary Colonelcy of the Civil Service Rifle Corps. Her Majesty the Queen and his Royal Highness the Prince Consort have been graciously pleased to consider a corps formed of the civil servants of the Crown as an exceptional case, and to approve His Royal Highness the Prince of Wales becoming the Honorary Colonel.

Customs Volunteers.—On the 3rd inst. the above corps (H.M. Customs) visited the practice-ground of the South Middlesex Volunteers, at Walham Green, headed by the splendid band of the Scots Fusilier Guards. Major Grey took the command. Arms were piled on the sward, which Lord Ranelagh and the Honourable Major Vereker, with spades in hand, in shirt sleeves and "wide-awakes," were assiduously attending to, while various parties were drilling and firing. Due attention was paid to refreshment. The practice ground (or rather Volunteer barrack) is really a very splendid affair. It is about the size of the Honourable Artillery Company's in Finsbury, but totally covered over with green sod. At one end is an immense target-shield, about 60 feet high, and nearly the breadth of the ground, well supported with flying buttresses outside, while inside is a mound to catch stray bullets, and against which the targets are fixed. At the other end are the buildings containing messrooms, canteens, &c. After spending an hour or more most agreeably, the Customs' Volunteers, amid the cheers of their companions in arms, marched off to Battersea Bridge. On boarding the steamer a large concourse cheered them off for the Custom House, where they arrived about ten o'clock. On Friday the 18th, the Queen's birthday, this corps is to march out for the country with other companies of their brigade (the 4th Metropolitan Volunteer Brigade), as the order is countermanded for the inspection in Hyde Park, owing to the intention of the Queen to review all the Volunteers of the United Kingdom who can attend in Hyde Park in June or July.

The London Rifle Volunteers. — On Saturday His Royal Highness the Duke of Cambridge, Honorary Colonel, inspected this corps on the parade of the Horse Guards. The brigade mustered strong; the appearance of the men was extremely satisfactory, and their movements were steady and accurate beyond what might have been expected. The double quick past the duke was in the best manner; there was no curving of the line by the undue pressure of the flanks; and it was obvious that the corp had paid great attention to their dressings. The band, too, was very effective. The mob was disorderly enough, and gave a good deal of trouble to the chain of sentries who kept the ground. A scattered few of regular cavalry were the most successful in preserving order; but of these one unhappy Life-Guardsman was evidently not well up in his riding-house drill, for at every demi-volte of his horse he left as much space between himself and his saddle as would have permitted a six-pounder shot to pass freely without doing any injury. A young hussar attracted the yells of the crowd by making his horse lift at right angles with the line of spectators, instead of parallel to it. The Westminster Volunteers, who had undertaken to keep the ground, had a very arduous time of it in endeavouring to discharge that duty.

The London Irish.—At a meeting of the sub-committee of finance of this corps, held on Saturday, after the transaction of other business, a long list of donations and subscriptions was read by the honorary secretary, including Viscount Palmerston, 20*l.*; the Marquis of Londonderry 10*l.* (additional for band); the Earl of Lanesborough, 10*l.*; the Marquis of Donegal, 20*l.* (aditional for band); the Earl of Clare, 10*l.*: the Earl of Listowel, 10*l.*; the Earl of Clanwilliam, 5*l.*; the Countess of Kenmare, 2*l.* (for the band); Sir W. Martins, 25*l.*; Mr. C. M'Garel, 12*l.* 12*s.*; Mr. R. Torrens, M.P., 15*l.*; Earl Fortescue, 10*l.*; Mr. T. W. Kough (Jones & Co's.), 10*l.* 10*s.*; Mr. Usborne, 10*l.* 10*s.*; Mr. Bond, 2*l.* 2*s.*; Mr. Hannon, 1*l.* 11*s.* 6*d.*; Mr. Ryan, 1*l.* 11*s.* 6*d.*; Mr. S. Roberts, 1*l.* 11*s.* 6*d.*, &c. The effective strength of the corps is daily increasing, and an additional place of drill has been taken near to the Stepney railway station, for the convenience of the East-end company. It is intended to hold a general meeting of the corps on Monday next, by which time a further augmentation of the members of the corps is expected. At a meeting of the council, held yesterday, the Marquis of Donegal in the chair, the secretary stated that he had received the following donations and subscriptions:—Sir Samuel Martin (Baron of the Exchequer), 10*l.*; Sir Hugh Cairns, M.P., 10*l.* 10*s*; Mr. James Hans Hamilton, M.P., 5*l.*; Captain George Gray, Royal Antrim Artillery, 5*l.*; the Earl of Kilmoray, 50*l.* It is arranged that the corps are to march this day (Saturday) from Hungerford Hall through Parliament Street, Birdcage Walk, St. James's, Eaton Place, to Chelsea, and back by Brompton, Knightsbridge, to the place of starting.

The Inns of Court Volunteer Rifles.—Thursday was appointed for a march out of this gallant regiment to Sheen Common and Richmond; and, notwithstanding the exceedingly inauspicious morning, a steady mild rain falling till about 12 o'clock, each company mustered very strong on parade in front of King's Bench Walk, in review order, at a quarter past 12 p.m., under the command of the gallant colonel of the regiment, Colonel Brewster. At half-past 12 o'clock from 300 to 500 men mustered, and, each company having been proved, formed four deep and marched over Blackfriars Bridge to the Waterloo Station, where a train took them to Mortlake station, where the band of the Richmond Volunteer Rifles was stationed to receive them. The regiment went through various manœuvres in Richmond Park in the presence of a number of spectators. On arriving at Waterloo Station, at 7 o'clock, the companies were again formed four deep, and marched to the Temple and dispersed.

St. Pancras and North Middlesex.—This brigade is progressing very efficiently in its drill, so far as 400 men can drill with but 200 rifles at their disposal. It is hoped, however, that they will have the full complement before the 18th. The corps intend to have a march this evening, headed by the band of the 1st Life Guards, permission having been granted by Colonel Parker for that purpose. The general body leave head-quarters, St. Pancras Vestry Hall, at seven o'clock, and on reaching the Cross-roads, at the junction of Camden and Kentish Towns, near the Red Cap, they will be joined by the third (Messrs. Collard and Collard's) and other companies of the brigade. It is understood that the corps will then march to Hampstead. Members are enrolling, and numbers waiting to do so, as soon as the application to the lord-lieutenant is granted.

Paddington.—The majority of the members of this corps having now got into uniform, General Downing, their captain-commandant, intends marching them out in the course of the week.

The Highgate Rifles.—Captain Wilkinson has brought his little "mountain band," as he takes pleasure in calling the 14th Middlesex, into a high state of discipline, and, it is believed, although not the largest in number, they will not be the least efficient in the evolutions required of them on the occasion of the approaching grand field-day in Hyde Park.

DURHAM.

Stockton-on-Tees.—The Government have sent rifles to the 1st Durham Rifle Corps, to the amount of 130. They have been placed in the temporary armoury, at present in the Mechanics' Institute.

HAMPSHIRE.

5th Hants Rifles.—Major G. P. Vallancy, the Captain-Commandant of the corps, has issued an address to the non-volunteers of the Borough of Portsmouth, in which he states "that the corps is now organised, and numbers two hundred members fully equipped, and so far trained as to be fit to be paraded for military inspection. The efficiency of the regiment has been attained with but little labour or expense to each member. The primary drill being over, the future rifle practice will be a pleasure and practical amusement. Five pounds have paid all expenses of uniform and accoutrements. The present number it is hoped is but the nucleus of what the corps is expected to become, which is expected to amount to 500 effective members. The principal object of the address is to induce those who have not enrolled to come forward at once and join the corps. Its members are upon the increase, but there are still some hundreds of young men who, it is to be presumed, are waiting to see the system established. These are urged to come forward without further delay and join their seniors, who have not hesitated to shoulder the rifle when the call was made, and who have demonstrated to Europe that England will always be found ready."

Portsmouth Artillery Volunteers.—The services of the above corps have been accepted by Her Majesty under the title of the 2nd Hampshire Artillery Volunteers. At a meeting of the committee, held on Monday, it was resolved "That in order to extend the sphere of the corps, and make this national and patriotic Volunteer movement as general as possible in this borough, one or more companies be formed of artisans and working-men, on a basis similar to that in Edinburgh and other towns. That the uniform and all accoutrements for each gunner shall not exceed 3*l.* 10*s.*, which sum, together with the yearly subscription of 7*s.* 6*d.*, may be paid by deposit of 10*s.* and a weekly subscription of 1*s.* 6*d.*" The uniform is to be blue and red, and a scaled pattern suit will be ready in a few days, and can then be ordered by the members. Major Hall has obtained the use of the bastions as the drill instruction ground for the present; and members are requested to attend at the times stated in their circulars. The officer appointed to superintend the gunnery instruction has notified that it will be carried on at Southsea Castle, and adjacent auxiliary batteries. This Volunteer Artillery corps has been established only six weeks, and numbers 118 effective members and 32 honorary. It is hoped that this number will speedily increase.

LANCASHIRE.

Before marching out for their usual afternoon drill on Saturday last the members of the 3rd Regiment of Manchester Volunteer Rifles adopted unanimously as the motto of the regiment "Defence, not Defiance." The words had been suggested by Private J. B. Marsh, of the 5th (press) company; and Major Henry, who was in command, called Mr. Marsh to the front, and complimented him on behalf of the regiment on the creation of so appropriate a motto.

MIDDLESEX.

West Middlesex Rifles.—About 300 members of the above corps assembled at head-quarters on Saturday last, at 5 p.m., and marched under the command of their Lieut.-Colonel, Lord Radstock, to the practice ground at Wormwood Scrubbs, headed by their Volunteer band. In passing through Gloucester Place the advance guard were agreeably surprised to perceive the approach of Her Majesty. A murmur passed down the ranks, "The Queen;" Lord Radstock immediately gave the word of command, to "halt;" "front;" "present arms." The band struck up the National Anthem; and the whole body fell into a line two deep, and presented arms. Her Majesty in passing smiled graciously and bowed repeatedly in acknowledgment of the salute. His Royal Highness the Prince Consort had passed down the Marylebone Road a moment before, but on hearing the band he wheeled round and galloped back in time to view the last three companies as they passed. The corps then proceeded on their way through Portman Square to Oxford Street, and down the Bayswater Road to Shepherd's Bush, and from thence to the practice ground, where they were put through a variety of battalion movements, and were finally marched back through Bayswater and Paddington to head-quarters, arriving about half-past 9, and notwithstanding the march of upwards of ten miles, every man was in his place at the finish, and after giving three hearty cheers for the Queen they were dismissed. A very beautiful medal has been struck in silver and bronze, at the expense of the Rev. Mr. Cox, who has been appointed the chaplain to the corps, to be presented to the best marksman when the rifle practice commences, which is expected to be shortly, the butt at Wormwood Scrubbs being nearly completed.

SURREY.

7th Surrey Rifles.—At a meeting of this battalion held at the Sessions House, Newington, on Friday week, attended by more than 200 members, over which Mr. Gresham, High Bailiff of Southwark (in the absence of the President, Mr. Johnson,) presided, two very important matters were fully discussed, viz., increasing the numerical strength of the corps and reducing the cost of uniform. Major Beresford (Commandant) pointed out that numbers, and the strictest economy must ever be essential to the success of a Volunteer force, and that every facility should be given to those possessed of but limited means to enrol themselves, and it was then upon the major's proposition resolved,—That there should be but one dress, viz., a tunic, the cost of which, including accoutrements and cap, would not exceed 5*l.* The Major then addressed the members on the importance of strict and constant attention to the drills, and informed the meeting that the 7th Surreys were to form part of the fourth brigade with the London Rifle Brigade and other corps, an announcement which gave universal satisfaction. The greatest unanimity prevailed, and after the usual vote of thanks the meeting terminated with three cheers for the commandant.

YORKSHIRE.

Beverley.—Sergeant Clark, of the 41st Regiment, has been several months in this place drilling the rifle corps. Last week he was ordered to Sheffield; and the corps wishing to mark their sense of the sergeant's services and of his civil and obliging manners, presented him with a testimonial on his leaving the town.

Pickering.—On Tuesday, the 8th inst., the corps for this division of the North Riding met in the large news-room at Pickering, for the purpose of taking the oath of allegiance to Her Majesty the Queen. J. A. Ligard, Esq., and J. Hill, Esq., the officers of the corps, having read their commissions to the members present, then proceeded to administer to them the usual oath of allegiance. The dress of the corps will be the same as the rest of the corps in the North Riding, the Lord-Lieutenant not allowing any variation. Since the enrolment of the corps a subscription has been opened, headed by Captain Ligard with 20*l.*, and J. Hill, Esq., 5*l.* The annual subscription of the members will be 10*s.*, with 10*s.* as an admission fee. The Enfield rifle, to be supplied by Government, will be used.

Second East York Artillery Volunteers (Filey and Hunmanby).—This corps had a field-day at Hunmanby on Monday last, when the whole company, with only a single exception, turned out for drill. The usual evolutions were gone through, and the company was then halted, and three sides of a square formed, when Admiral Mitford addressed a few hearty words to the officers and men, congratulating them on the progress made, which he said appeared to him to be very great, considering they had not yet been two months under their drill instructor. He had provided an opponent for them at the hall, in the shape of a dinner, which he hoped they would attack and demolish as vigorously as though it were an enemy. The company was then put through some further evolutions, and marched to Hull, where the officers and men were sumptuously entertained by Admiral and Mrs. Mitford. The guns arrived the same evening, and we understand it is the intention to proceed at once vigorously with the gun-drill.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, May 8.

The Victoria Rifles—Andrew Steinmetz, Gent., to be Ensign; March 14.

South Middlesex Rifle Volunteer Corps—Francis Ricardo, jun., Gent., to be Ensign; March 16. Edward James Hawker, Gent., to be Lieutenant; Henry Godwin, Gent., to be Ensign; Arthur John Sich, Gent., to be Ensign; April 20.

10th West Riding of Yorkshire Rifle Volunteers (Huddersfield)—Captain Commandant Henry Frederick Beaumont to be Major; May 2.

28th West Riding of Yorkshire Rifle Volunteers (Goole)—John Egremont, Esq., to be Captain; John Humble Rockett, Gent., to be Lieutenant; Robert Storr Best, Gent., to be Ensign; John Johnstone, M.D., to be Honorary Assistant-Surgeon; May 2.

Memorandum.—The 1st (York), 16th (Harrowgate), 17th (Knaresborough), and 27th (Ripon) Corps of West Riding of Yorkshire Rifle Volunteers have been united in a battalion for administrative purposes, with a Staff of 1 Major and 1 Adjutant. The Battalion is numbered as the 1st in the said West Riding, but each of the corps composing it will retain its present number and designation in the County Force.

1st Cumberland Rifle Volunteers—The Rev. James Taskor to be Honorary Chaplain; April 30.

2nd Cumberland Rifle Volunteers—David Hill Thomas, Gent., to be Lieutenant; William Jackson, Gent., to be Ensign; May 3.

Crewkerne, or 20th Somerset Company of Volunteer Rifle Corps—The Rev. Alexander Ramsay, Clerk, to be Honorary Chaplain; George Slade Jolliffe, Gent., to be Honorary Assistant-Surgeon; May 8.

Kent Rifle Volunteers—32d Company—Robert Courage, Gent., to be Lieutenant; Thomas Jackson, jun., Gent. to be Ensign; May 4.

35th Corps (Subdivision)—John Board, Gent., to be Lieutenant; Charles Robert Thompson, Gent., to be Ensign; May 7.

1st Battalion of Dorsetshire Rifle Volunteers—Captain George Pleydell Mansel to be Lieutenant-Colonel; Major Richard Steward to be Major; May 9.

8th Company of Dorsetshire Rifle Volunteers—Lieutenant Robert Craufurd Farquharson to be Captain, vice Mansel, promoted; Ensign Francis Tregonwell Johns to be Lieutenant, vice Farquharson, promoted; William Henry Atkinson, Gent., to be Ensign, vice Johns, promoted; The Reverend John Robert Leigh, M.A., to be Honorary Chaplain; May 9.

2d Denbighshire Rifle Volunteers—Richard Blackwood Price, late Lieut.-Colonel Royal Artillery, to be Captain; May 7.

15th Cornwall Rifle Volunteers—Samuel Hosken to be Lieutenant; Charles Trewithick to be Ensign; May 2.

3rd Cardigan Rifle Volunteer Corps—Colonel Henry Foquet, to be Ensign; the Reverend Rhys Jones Lloyd, M.A., to be Honorary Chaplain; John Phillips, Esq., to be Honorary Assist-Surg.; May 8.

4th Cardigan Rifle Volunteer Corps—Richard David Jenkins, Esq., to be Lieutenant; Thomas Davies, Esq., to be Ensign; May 8.

7th Durham Rifle Volunteers—William Henry Bramwell, Gent., to be Ensign; April 2. Edwin Tyler, Gent., to be Assistant-Surgeon; the Rev. Alan Greenwell to be Honorary Chaplain; May 3.

9th Durham Rifle Volunteers—Joseph Cowen, Esq., to be Captain-Commandant; May 3.

1st Durham Rifle Volunteers—Henry Foxton Craggs, Gent., to be Ensign, vice Jackson, resigned; John Farquharson, Gent., to be Assistant-Surgeon; May 4.

Roxburghshire Rifle Volunteers—2nd Company—James Johnstone, Gent., to be Lieutenant; John Munro, Gent, to be Ensign.

6th Perthshire Rifle Volunteers—William Mitchell, Esq., to be Lieutenant; Laurence Pullar, Gent., to be Ensign; May 3.

7th Perthshire Rifle Volunteers—Mungo Murray, Esq., to be Captain; David Buttur, Esq., to be Lieutenant; Stewart Thomas Mitchell Hood, Gent., to be Ensign; May 5.

8th Perthshire Rifle Volunteers—Sir William Keith Murray, Bart. to be Captain; John Gibson, Esq., to be Lieutenant; Alexander Graham, Gent., to be Ensign; Matthew Railie Gairdner, Esq., M.D., to be Honorary Asssistant Surgeon; the Rev. John Cunningham to be Honorary Chaplain; May 5.

3d Buckinghamshire Rifle Volunteers—The Hon. Percy Barrington to be Lieutenant; Robert Allan Fitzgerald, Gent., to be Ensign.

4th Buckinghamshire Rifle Volunteers—The Hon. Florence George Irby to be Captain.

Glamorganshire Rifle Volunteers—9th Company—William Price Struve, Esq., to be Captain, vice Llewellyn, resigned; Francis Martin Russel, Gent., to be Lieutenant; May 5.

3d Berwickshire Rifle Volunteers—David Poppelwhell, Esq., to be Lieutenant; David H. Somerville, Esq., to be Ensign.

2d Argyllshire Rifle Volunteers—John MacArthur, Esq., to be Captain; Henry Joseph Brodie Dunn Smith, Gent., to be Lieutenant; John Buchanan, Gent., to be Ensign; May 4.

3rd Aberdeenshire Artillery Volunteers—George Thomson, Esq., to be Captain; John Catto to be First Lieutenent; George William Thomson to be Second Lieutenant; May 2.

Worcestershire Volunteer Rifle Corps—17th Company—William Baulton, Gent., to be Lieutenant; Victor Milward, Gent., to be Ensign.

7th Derbyshire Rifle Volunteers—Thomas Joseph Lyth, Esq., to be Honorary Surgeon; May 9.

[The following notice is substituted for that which appeared on the 9th March last.]

1st Westmorland Rifle Volunteers—William Moore, Esq., to be Captain Commandant; Feb. 28.

12th Norfolk Rifle Volunteers—John McMahon Wilder to be Lieutenant; May 3.

THE ARTILLERY VOLUNTEERS AT LIVERPOOL.—We understand that an investigation has been going on for the last few days relative to the conduct of some of the officers of one of the corps of Artillery Volunteers. It is said that a dispute having arisen between the colonel and his officers, the latter went to parade without their swords, and otherwise were guilty of conduct which in military phrase is described as being "unbecoming officers and gentlemen." The colonel wrote to the War-Office on the subject, and a military man has been sent down to make a preliminaty investigation. Should the charges be found to be as serious as is reported, a court-martial is likely to follow; but if the charges be not proved, the difficulty will likely be arranged by mutual concessions, it being understood out of doors that the charges are not all on one side.—*Liverpool Mercury.*

The question of the rank of Volunteer Officers at Court was brought before the House of Commons this week by Mr. Bowyer, who asked the Secretary of State for War whether a regulation had recently been made that officers of Volunteers were not to have their military rank at court, and if so, whether Her Majesty's Government would reconsider the subject, and allow to such officers their military rank at court.—Mr. S. Herbert had stated the other night, in answer to a similar question, that no such order had been promulgated. He had since seen a report of a meeting at Liverpool, at which it was stated as a great grievance, that officers of Volunteer corps were not allowed to go to court in their uniform. He could give an unqualified contradiction to that statement. Every one present at the last levee must have noticed a considerable number of Volunteer officers present in their uniform.

THE VOLUNTEER SALUTE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The question respecting saluting officers cannot be settled while corps—such as your correspondent, "A Volunteer Sharpshooter," belongs to—allow their privates and non-commissioned officers to sport swords and dress as commissioned officers. To give you an instance of the extent to which this foolish display is carried, on Saturday last, one of these said swell corps postponed their march (advertised to take place on that day) to enable their privates and non-commissioned officers (the latter when at drill have silver lace stripes) to appear on the parade in St. James's Park in what they call their dress uniform—swords as worn by commissioned officers, and without stripes. Can one expect, as long as this is permitted, that privates, either of the line, or Volunteers will salute?—I am, sir, &c.,

A QUEEN'S (WESTMINSTER) RIFLE VOLUNTEER.

VOLUNTEERS ON GUARD.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I suppose that the publication in your paper of the following occurrence will prevent its repetition. I am a captain in Her Majesty's regulars, at present on leave in England. Wishing to see as much of the Volunteer movement as I can during my leave, I generally attend any parade, &c. On Wednesday I rode to Lord Holland's Park to see the Brigade drill. On arrival I found an officer's guard on the gate. I presented myself to the officer, stating who I was, &c., and requested admittance; he not only refused me, but did so in a most discourteous manner: he belonged to the South Middlesex Volunteers. The piece of ground, as you are doubtless aware, is some ten acres, and 5000 men could be drilled in it with ease; there were not more than a 1000 or so present, so that crowding the troops could not be an excuse for excluding officers in Her Majesty's Army. The fact was, that this young Volunteer had got a little power into his hand, and liked to use (abuse?) it. I feel sure if this fact is brought to the notice of officers commanding Volunteer corps through your paper, it will be looked to. I noticed one or two other military men refused admittance, to their disgust, whereas any acquaintance of the Volunteers was admitted at once. Of course I was in mufti, as it is not the custom to wear uniform on leave, neither is it the wish of the Commander-in-Chief that it should be done.

I am, &c. CENTURION.

[ADVERTISEMENT.]—MAPPINS' RIFLEMAN'S KNIFE, 12s. each.—"No Volunteer should be without one: invaluable for campaigning."—Manufactured by MAPPIN BROTHERS, Queen's Cutlery Works, Sheffield, and 67 and 68, King William Street, London Bridge, E.C.

A VOLUNTEERS' FIELD DAY.

There was a grand muster of the Volunteers on Wednesday evening in Holland Park, which, both for the numbers present and the complicated nature of the evolutions gone through, was the best field day which the new levies have yet attempted. The second brigade, or at least that portion of it which consists of the Westminster, South Middlesex, West Middlesex, and St. George's Regiments, and detachments from the Volunteer Guards and Volunteer Engineers, to the number in all of about 2000 men, assembled and went through their movements in the presence of a distinguished assemblage of noblemen and ladies and gentlemen, who were admitted to the Park by tickets. Half-past 5 o'clock was, we believe, the hour appointed for the regiments to be on the ground, and the review was fixed to commence at a quarter to 6. But there was a considerable departure from those arrangements in the matter of time, for whatever other military virtues may be cultivated by the Volunteers, punctuality, it certainly would appear, is not yet among the number. Instead of the review commencing at a quarter to 6, it was quite 7 before all the corps were on the ground—the only one that was punctual to the appointed time being the Queen's (Westminster). We can easily understand that there is a difficulty in getting all the companies together so soon after business hours, but when one regiment does it there seems no good reason why the others could not manage it also. The Westminsters were very nearly an hour on the ground before any other corps, except the Volunteer Engineers, made their appearance. At a little after six o'clock Her Majesty, accompanied by the Princess Alice, drove up the avenue to Holland-house in a carriage and four, and there is very little doubt that the Royal visit was made in the expectation of seeing the whole brigade assembled. As it was, however, only the Westminsters were on the ground.

Immediately on the arrival of the royal *cortége*, Earl Grosvenor, the Colonel of the Westminsters, marched up his regiment in open column of companies, and wheeling into line, the whole corps advanced in admirable order, and Her Majesty received a royal salute. The whole manœuvre was really well done; and both that and the evolutions afterwards performed on the ground show that the Westminsters have been more than ordinarily attentive to their drill. Her Majesty then quitted the avenue. Soon afterwards a detachment of the Engineers made their appearance, followed by the St. George's Volunteers, under Colonel Lindsay; a company of the Volunteer Guards; the South Middlesex Volunteers, under Colonel Lord Ranelagh; and the West Middlesex, under Colonel Lord Radstock. The brigade was then formed in open columns of companies, and began by marching round the park at slow and quick time. In their movements the South Middlesex and Westminsters were remarked for their extreme steadiness and regularity, marching better than any other corps in the Park. The Volunteer Guards marched the best of any, but there was only one company on the ground, so that no fair comparison can be drawn between its movements and the drill of corps between 500 and 600 strong. The brigade afterwards formed in close column of companies and in quarter-distance column, deploying into line again with admirable quickness and precision. While in line the force extended completely from one end of Holland Park to the other, and in this formation advancing at quick march tests the steadiness with which regiments are drilled as severely as any movement can. On this occasion it was performed with wonderful steadiness and good order,—so much so, indeed, as to excite the surprise and admiration of every visitor on the ground. The evolutions were continued till dusk, when the regiments marched back to the parade grounds from which they had started for the Park. Some of these were at a considerable distance from Kensington, so that with the evolutions none of the corps on the ground received less than four or five hours' hard drill. Certainly the whole display was most creditable to all the regiments which took part in it, and if this review is a fair example of the progress which all the metropolitan regiments have already made, the grand review before Her Majesty, in the course of another month or so, ought to be able to stand the test of the most jealous criticism. Holland Park is admirably adapted for such parades, as within the enclosure, of course, no crowd of spectators is admitted. Had it been attempted in Hyde Park there would have been such a concourse, that, for every man told off for drill, at least two must have been allowed to keep the ground clear. Elsewhere will be found a letter, in which the writer complains of what seems to be an injudicious discourtesy on the part of the gentlemen acting as sentries.

SIR D. MACDOUGALL AND THE VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I beg leave, through you, to assure my Liverpool Volunteer friends who lately held an "indignation meeting" (and whose offer of service through me was the immediate cause of the late War Minister's issuing the circular that authorised the enrolment of Volunteers), that there could not possibly be any truth in the rumour that Volunteer officers were not considered to be as much entitled to be presented to their Sovereign, and to attend Her Majesty's Levees, as those of the regular and militia forces.

All the responsible advisers of the Crown should know that our country is not secure against invasion without our having a large patriotic Volunteer force to act as valuable and efficient auxiliaries to the regular Army, unless the latter were increased in an enormous degree, and at a cost that might possibly not be maintained by Parliament. It would therefore be an act of insanity on the part of a minister to assume the responsibility of advising a measure of a character so insulting as not only to check, but undoubtedly entirely to destroy, the Volunteer movement that has been so warmly encouraged by our most gracious Queen.

From what I have heard I believe that the absurd rumour in question proceeded from some silly talk of a presumptuous and insolent subordinate about Court. The manner in which the London Volunteer Brigade moved on Saturday before His Royal Highness the General Commanding-in-Chief, shows how rapidly men of intelligence can receive military instruction sufficient to utilise them in an important degree as defenders of their country. Their marching in open

Digitized by Google

and close column; their formation of column; their cohesive deployment into line; their advancing and retiring in line; and their steadiness, all assure me that a few days of continuous instruction would suffice to render them perfectly fit to move in brigade with troops of the line.

But this must not lead us to place too great reliance on Volunteers, as the security of the country requires that we should invariably have for the protection of the heart of the empire, upwards of one hundred thousand well disciplined and really efficient bayonets, sabres, and artillery men permanently embodied, as a nucleus of iron round which our patriotic Volunteers might rally in the event of invasion.

Those two forces, together with a militia raised by ballot (a measure that should be instantly adopted), would ensure the completeness of our internal defences against the whole world combined in arms against us.

In the event of the adoption of ballot for the militia, and of Volunteers being exempted from it, we should soon have five hundred thousand Volunteers enrolled.

I cannot conclude without remarking, with reference to the present state of Europe, on the injudicious determination of the Government to disembody the militia artillery. Some of the regiments of that force are composed of men of superior physique and intelligence; and I consider them to be as serviceable in that arm as any other troops in the world. If now disembodied, it will be difficult for corps ever again to gather together one-third of their present strength. The country has incurred a large expenditure in providing ammunition to perfect them in artillery practice; and at the moment when many of those corps have attained the highest state of efficiency, they have received notice of disembodiment, and that immediately after the issue of their new clothing, and of a large allowance of shot and shell, ammunition and ball-cartridge, for the year's practice! Those men may be suddenly, and perhaps very shortly, required to be again called out—but "will they come when they are called?"—I am, sir, &c., D. MACDOUGALL.

The following arrangements have been made for the peformance of the military bands on Woolwich common during the summer months at three o'clock on each afternoon:—Royal Artillery Band, Monday and Wednesday; Royal Marine Band, Tuesday and Friday; Norfolk Artillery Militia Band, Thursday and Saturday.

The Army Estimates are to be submitted for discussion the week after next.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL
OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6s. 6d. per quarter, or 26s. per annum, payable in advance; and the postage—uniformly 1d. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

MR. ALBERT SMITH'S MONT BLANC IS NOW OPEN EVERY NIGHT (but Saturday) at Eight o'clock; and TUESDAY and SATURDAY AFTERNOONS at Three o'clock.—Stalls, 3s., (which can be taken at the Box-office, Egyptian Hall, daily from eleven till five); area, 2s.; gallery, 1s.

"EASTWARD HO!" and "HOME AGAIN!"—These two interesting Pictures, painted by HENRY O'NEIL, Esq., A.R.A. (representing the Departure of Troops for War and their subsequent Return), are now being EXHIBITED TOGETHER, for the first time in London, at 191, Piccadilly, from Ten till Six daily, admission Sixpence.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Sir Colin Campbell.—This great Picture, by T. J. BARKER, from Drawings and Pictures taken expressly at Lucknow, by Egron Lundgren, is NOW ON VIEW at the Lucknow Gallery (Messrs. THOS. AGNEW & SONS), 5, Waterloo Place, Pall Mall, from Ten to Six o'clock.

EXHIBITION OF HOLMAN HUNT'S PICTURE OF "THE FINDING OF THE SAVIOUR IN THE TEMPLE," commenced in July, 1854, is now ON VIEW at the GERMAN GALLERY, 168, New Bond Street, W., from Nine till Five. Admission, One Shilling.

VICTORIA CROSS GALLERY, Egyptian Hall, Piccadilly. Daily from Ten till Seven. Admission One Shilling. Catalogue Sixpence. The Descriptive Catalogue of the whole of last year's pictures, with numerous additions, all painted by L. W. Desanges, Esq., will be forwarded by post on receipt of Seven Postage Stamps by the Secretary, Mr. JAS. ROWE, Victoria Cross Gallery.

MAYALL'S PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum*.

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21s. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

RIFLE VOLUNTEER AND DRUM AND FIFE BANDS
SUPPLIED WITH EVERY REQUISITE.

	£	s	d
Bass Drums, 32 inches	4	4	0
Tenor Drums, 20 inches, transparent heads	2	7	0
Brass Side Drums, 14 inches	1	8	0
Regulation Drums, brazed shell, as supplied to the Army	2	2	0
Watts's Rod Drum (a new head can be fitted to this Drum in a few minutes)	2	5	0
Oak (polished) Side Drum, 14 inches	1	5	0

All the Drums in the above list have best vellum heads, at both ends, and a pair of Sticks suitable to each particular Drum is included in the prices above named.

MILITARY FIFES.

B or C cocoa-wood, three German silver ferrules, and five keys of the same	0	8	6
D or E flat ditto	0	6	6

WATTS'S ROYAL RIFLE BUGLES.

No. 1, Ordnance Model, with cord, &c., complete (copper)	1	1	0
No. 2, Light Infantry Model	1	8	0

P. WATTS (late Hack), 174, Fleet Street, London, E.C.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

ERRATUM.—MOUNTED RIFLEMEN.—In our last, p. 298, for "officered by a class decidedly superior in station and education, a troop," &c., read, "officered by a class decidedly superior in station and education *to their own men*, a troop," &c.

Army & Navy Gazette.

LONDON, SATURDAY, MAY 12, 1860.

The French journals report that France is busy fortifying the mouths of her rivers, and the exposed points of her coast. Canals are being deepened so as to afford water communication between the different ports, by which vessels of light draught, such as would compose an invading flotilla, may pass from one to the other without proceeding to sea, and every provision is making for a maritime war. We look round in vain for the power that provokes these preparations. It cannot be Switzerland; for though the clouds in that quarter daily grow darker, and the relations of the two Governments more embittered, the countrymen of Tell never go down to the sea in ships. Neither can any affront to the French sea-board be possibly expected from Germany, which, though boasting two or three frigates, is almost as land-locked as Switzerland. Russia, of course, must be equally free from suspicion, being bound to France by a friendly compact, as well as by numerous amenities; and, moreover, the Czar is at this moment too much attracted to the banks of the Pruth to foster designs against Cherbourg. We need search no further for the foe which France sees looming in the distance; for the facts admit of but one conclusion. The only power to meet her on the sea is England; and all these mighty preparations, the fortifications, the accumulation of gunboats, and the arrangements for communication between port and port, cry to us with one voice—to stand on our guard and to prepare, as our allies are doing.

It is satisfactory to know that we are not wholly neglecting this warning. In the days of sailing-ships, and of our unapproachable supremacy at sea, there might be little risk in leaving our shores vulnerable at every point; but it would indeed be perilous to do this when the Channel bears a French fleet propelled by steam. Hence there will be no disposition to cavil at any reasonable amount of fortification the authorities may propose. Though the nation's confidence in its wooden walls is unabated, we must yet provide against any sudden attack on our arsenals and dockyards, our harbours and the mouths of our rivers, by a fair use of masonry and earthworks, which will serve as an effective defence, without locking up our little army. How far the Government plan will accomplish such an object, we shall soon be called upon to discuss, and, meanwhile, the maritime element of our defences claims a hasty glance.

Neither our canals nor railways have been constructed with strategic objects, which the French Government have always kept in view, if they have not made them the first consideration; but it is obvious that railways may be made as important accessories in the defence of England as of France. Their utility even in maritime operations was recently illustrated. It was determined to take the Hastings from Liverpool and substitute the Majestic, while the crew of the former vessel were to come up to Sheerness by rail to man the latter, and carry her round to her destination. The men left Liverpool at eight o'clock at night, and, proceeding to Sheerness, mustered on board the Majestic, which was ready for sea in the afternoon. Naval Coast Volunteers, the Coast Guard, and Marines may thus be concentrated, on a summons by the electric telegraph, at any point that may be threatened. It was in reference to our manifest dependence on these bodies for such service that we last week objected to their being reckoned upon as a naval reserve. Their proper post, and the place where they will be most wanted, is our coasts. With the new tactics to be introduced by steam, the manœuvres of an enemy may put our fleet on the wrong tack; or, covered by a dark night, give it the slip; and our long range of sea-board, which leaves us so open to a raid, will always claim a guard of seafaring men. The Coast Guard is under 7000, including boys; the Naval Coast Volunteers just exceed that number; the Marines on shore amount to 6170; and 1381 civilians, who are attached to the Coast Guard, and appear to be of an amphibious character, make up a total force of about 21,600. This is obviously inadequate for any effective scheme of defence; and, indeed, the Royal Commission recommended, in their report, that the Coast Guard should be increased to 12,000, and the Marines on shore to the same number. It is satisfactory to know that both bodies are in course of augmentation, and there must now be less difficulty in increasing the Coast Guard, since there is no longer a want of seamen for the Navy. The custom of recruiting the Coast Guard from the cream of the Navy, by encouraging the entry of our best seamen, is, indeed, open to some objection. The able seaman of seven years' service should be taught to look for his reward afloat, not in a berth on shore. The scope of the Coast Volunteers may be judiciously extended; and a suggestion made in the late debate, that the authorities should induce lightermen and watermen to enrol themselves in this body, and undergo training, indicates the best direction for expansion. On the whole, we have reason for congratulation at the state of preparation on our coasts, and the resources still to be made available. The Admiralty is acting with vigour in this matter; and the Secretary has announced that the recommendations of the Royal Commission will be fully carried out, and everything done to secure to England her naval power.

In point of dimensions, the British Army is the dwarf of the military establishments of Europe; but, when measured by its moral stature, it stands amidst the armies of other powers like David surrounded by Goliahs. Putting aside our Indian legions, little Belgium maintains a larger force. "But where are the soldiers who fight your battles?" asked the Emperor Nicholas of Wellington, at a review of 5000 men in Hyde Park. The great Duke was a little embarrassed by the question, and, after his death, England was obliged to answer it on the heights of the Alma. Any foreigner, indeed, on first coming over from the Continent, where every fourth man is in uniform, might conceive the same impression of our military impotence as the Czar; and the time may not be distant when England may again be called upon to prove it delusive. But, as regards numbers, we must always remain open to the reproach. The character of our institutions, the requirements of our commerce, and the industrial habits of the population, all our traditions and interests, alike prohibit the maintenance of a large standing force in time of peace; and despite of all that has lately been urged by high authorities on this subject, it may be taken for granted that the peace establishment of the Army has now reached the utmost limit it will be allowed to attain.

This being the case, much importance attaches to the recent debate in the House of Lords relative to the organisation of our infantry. Organisation, always the fount of strength, to us is everything; for we must supply the place of numbers by aptitude and efficiency. The structure of our little force must be such that, like our Constitution, it will be equal to every strain, and rise to every emergency. In these advanced days of military science, England can hardly risk her usual break-down at the beginning of any new struggle with a great European power. Everything warns her to be ready; the experiences of the last few years have put her into training; and after the liberality displayed by Parliament, and the spirit evinced by the people, the onus of any deficiency will certainly lie with the "system."

Is the present organisation of our infantry the best we can devise? We cannot but think that Lord Lucan, who has seen something of its working, is justified at least in putting this question to the country. However objectionable it may seem, public discussion will best throw light on the defects of the system, and strengthen the authorities in any changes they may introduce. That some are required most military men will admit; at the same time few will indorse the sweeping strictures of Lord Lucan. The Duke of Cambridge proved that the old regimental depôts were all but lifeless, and doubtless they were only designed by the Duke of Wellington as a make-shift, which was all the small establishment of the day would afford. The consolidated depôts, on the contrary, whether regarded as a training-school or a reserve, have, on the whole, proved effective. Instead of only half the men attending parade, as at the regimental depôts, the troops muster in nearly their full strength, and in the highest state of efficiency. It is impossible to see them in motion without recognising the excellence of their training and their fitness for any service. Thus our

Digitized by Google

regiments, wherever they may be stationed, are fed by draughts, not of recruits, but of soldiers. But it is not enough to provide rank and file: this, indeed, is the bulk of an army, its flesh and muscle; but more is needed to give vitality. For this animating power we look to the officers, who by successive steps of rank circulate through the mass, infusing it with their own character and qualities. Now, it is certain that the consolidated depôts, as at present formed, are not so well adapted to at least the moral development of our officers as to the training of the soldier. All that Lord Lucan urged on this point is undoubtedly true. It is no uncommon thing for a depôt mess to be composed entirely of young men, whom no senior officer is present to control, or who only experience such a restraint once or twice a week, when the married superior, an attendant on compulsion, makes the earliest possible retreat. The party are then left to all the excesses of dissipation and play, which young men in such a situation, in the first heat and first liberty of youth, are too prone to indulge in; and the consequence is that, while many are embarrassed for life, not a few are ruined before they join their regiment. The order of the Commander-in-Chief that Ensigns shall join the service companies at once, in the case of regiments at home, will mitigate the evil, though not to any extent; and it would be well to consider whether the remedy might not be carried further, by requiring senior officers at depôts, since we cannot impose the condition of celibacy, to attend the mess regularly, having their additional outlay covered by an allowance.

Lord Lucan's proposal to extend the organisation of the infantry by means of second battalions would, from the facilities presented, undoubtedly be our readiest course in the event of an increase of numbers; but nothing is to be gained by such a step at the present moment, when the Army is at its full standing strength, and, according to the testimony of its Chief, working more smoothly than at any previous time.

"Venetian secrecy" did not save Venice. Mysticism is valueless now-a-days, except when it is exercised in actual operations in the field. A general cannot be too secret in his plans; his councils cannot be too close when engaged in campaigning. But even then there are disadvantages in secrecy. Battles have been lost because the plans of the general in *command* were not known to their subordinates. Soimonoff was killed in a ravine, and 10,000 Russians were paralysed at Inkermann. Read fell on the Tchernaya, and with him tumbled to the ground all the fabric of the Russian manœuvres. But do what we can, it is impossible for any State in Europe to keep any great secret relating to the means of carrying on or maintaining war from its neighbours. There is scarcely a Government department of any great power which has not in its bureaux plans of the citadels, roads, fortified places, and military features of every country in Europe. For a small outlay a foreigner can purchase in Leadenhall Street or the Minories excellent charts of all our waters, and learn every inch of the way from the Foreland to London Bridge, or from Holyhead to Liverpool Dockhead. We know all about the French gun and the *frégate blindée*. The *Times* has enlightened the world on the construction of the Armstrong gun. There is no weapon the mechanism of which is unknown to us; and we are liberal in our information respecting the mode of working and manufacture of any of our own weapons which evince peculiar excellence, so that our possible enemies may imitate them if they become as convinced of their superiority as we are. But the force of custom is very strong. The curious foreigner, or the incurious native, is denied admittance by sentry or policeman to fortifications and arsenals which are open to inspection by means of drawings, descriptions, and plans to be had for a few shillings. Courtesy transmits from one Government to another models and drawings of strong places which are shut to those whose eyes, if opened to the widest, could never make the owners a bit wiser. General Pumpernickel is escorted by the whole staff through all our defensive ports, one after the other, in the interesting tour he is making on private business; Marshal Tonnerre spends several delightful days, with the full concurrence of the authorities, at Portsmouth, Chatham, and Woolwich, and dines with the generals and admirals; whilst Sous-Lieutenant Robinet, who has come over in the Excursion train, is ignominiously rejected at the dockyard gates. Constantine, Grand Duke and High Admiral, warn from the batteries of Cronstadt, inspects with eagle eye every inch of parapet and caronade, store and magazine, along our coast. The Hamburg cigar-maker, who only seeks to injure his fellow-creatures by substituting ingenious vegetable fabrics for their tobacco, and has no eye for "lines," weak or strong points, is rigidly excluded. We let in Princes, who may by any turn of political intrigue become our foes in the field, to view the mysteries of Woolwich, at the same time we shut out the Commandant of the garrison, Sir R. Dacres, the general of our artillery in the Crimea, lest he should know how the Armstrong gun is made. But all our precautions, however senseless they may be, are equally inefficient. Our object in writing these few lines is to beg of the authorities, if they place any faith in their system of secrecy, to make it more rigid than it is. At present it is worth nothing. The fact which points our moral and adorns this small article is simply this—and we solicit the guardians and those who watch the watchmen to pay heed to it,—a few days ago an officer of the United States Army, belonging to their Military Academy at Westpoint, went down to Woolwich, and calmly walked into the arsenal and onward without impediment. He visited all the establishments, strolled into the Armstrong gun-factory, examined the mechanism of the piece, leisurely noted everything that was worthy of being seen, and then made his exit without any interruption till he was just out, when some one remonstrated with him on finding he had no proper authority for his researches. We are prepared, on this officer's authority, to state his name, his rank, and his address, to anyone who is interested in the matter. One thing we can answer for—he has a perfect knowledge of the whole of the principles and details of the manufacture of the Armstrong gun, and he thinks "We'll improve it very much in the States."

In our last number we stated our fear that the military authorities were about to give their sanction to a breach of the regulations which prevent officers above the rank of captain exchanging between Cavalry and Infantry regiments, by allowing Lieut.-Colonel Poulett Somerset to leave his present corps, the 2nd battalion of the 7th Fusiliers, for the command of a regiment of Cavalry. At the outset of our remarks we ventured to express a hope that the fact of giving publicity to irregular proceedings of this kind might sometimes have a wholesome effect in the way of prevention. We do not presume to say in the present instance that our interposition has influenced the result; but we have the satisfaction of saying that the rules of the Service will be observed, and that the contemplated exchange will not take place.

Colonel Poulett Somerset has addressed to us a letter, in which he denies that "any arrangement of the sort has been made by him, or that he has the permission of His Royal Highness the Commander-in-Chief to take any such step." We most willingly give insertion to Colonel Somerset's letter, and it will be found in another portion of our impression of to-day. We can only remark that we do not find anything in it materially contradicting our statement of last week. Though we may not have indicated with precise accuracy the stage at which the contemplated arrangement had arrived, when we used the words "we believe the authorities have signified their willingness to assent," yet our article was substantially correct, and we humbly conceive it fairly described the nature of a transaction which we deprecated as prejudicial to the efficiency of the Service, and which we regarded solely in reference to the interests of the Army at large.

The gun-boat frauds are, in their way, as gigantic and as disreputable as Pullinger's. In some respects, more so. There is certainly a suspicious hushing-up of the Union Bank frauds, as the *Times* has pointed out; but, in the meantime, they only affect the character of one man as regards honesty, though the whole management is culpable as regards the want of anything like supervision. But, in the gun-boat frauds, while the management and control of the Admiralty Board and Surveyor's Department are as much at fault as the Union Bank, a still more serious matter presents itself.

Even if the Admiralty is woefully defective in superintending power, one is not prepared to learn that a number of ship-building firms, belonging to England, are ready to take advantage of such a state of things to cheat the English public, and risk the lives of our seamen and the safety of the country, in order to put larger profits into their pockets.

Of course this matter must be thoroughly sifted, without fear, and without favour or hushing up; and we have no wish to anticipate the result of the inevitable investigation. It is due alike to the honest men and the rogues. We may say, however, on the best authority, that great misapprehension of some of the real facts have somehow got abroad. The Admiralty did not neglect to have the gun-boats which were built by contract, inspected during the progress of their construction. A dockyard officer was detached and paid extra for superintending, or pretending to superintend, the building of every gun-boat. If bribery and corruption, as well as fraud and incompetency, have been at work, the public must know it. At present we shall say no more on this disgraceful business.

If, however, we do not wish to appear wise beforehand in this matter, we must also deprecate the behindhand wisdom of some who have written upon the subject. In the *Times* of Thursday last a letter appeared on the virtues of salt-water washings for preserving timber! The writer argued that the boats should not have been hauled up high and dry, but left in tidal water. Now, every one must recollect how Sir Charles Wood was called to account about his gun-boat slips, and how thoroughly the matter was then discussed; and no one then propounded this theory of wet and dry nursing for these vessels. Besides, everybody ought to know, who ventures to write upon such subjects, that the wooden piers of bridges always decay and give way first, precisely wheret hey are alternately wet and dry, while the timber above water altogether, and also that always immersed, would last for ever. May not this wet and dry system have something to do with the greater wear and tear of ships in ordinary than in sea-going ships?

Anyhow, this apologist for green timber and trade frauds does not explain how some of the boats are sound and some of them rotten, while all were equally hauled up at Haslar and elsewhere. Of the 200 gun-boats, built at 5000*l.* a-piece, costing one million sterling, we wish to know how many are useless? how much money has been fraudulently obtained for building them? We fear the frauds, in the aggregate, are at least double those of Pullinger! We think the guilty parties are even worse than a mere robber of "trash." They have also stolen money and done their best to ruin the reputation of England, and lay its honour in the dust.

We believe that the arrangements respecting the re-organisation of the Indian Army will be officially made public in a few days, and that a Military Commission will be appointed to settle the details of the amalgamation.

The Commission upon the transport of troops, and the establishment of quick communication between the military posts and dockyards has resumed its sittings.

The following appointments to divisional commands in India have been made: Major-General Cunyngham, C.B., to Scinde, vice Brigadier Hale, transferred to Poona, on the assumption of the chief command at Bombay by Sir Hugh Rose; Major-General Spencer to Mysore, vice Sir John Inglis. Major-General Windham is coming home, on six months' leave of absence.

No day has yet been fixed for the great Volunteer Review in Hyde Park by Her Majesty, but we believe it will take place about the latter end of June or the early part of July.

The four vacant regiments have been disposed of—Major-General Ball going to the 46th, vice General Geddes, transferred to the 27th; Major-General Breton obtaining the 56th, Major-General the Hon. C. Grey the 3rd Buffs, and Sir John Inglis his old corps, the 32nd. Generals Ball and Inglis have seen service in the field, for which their new appointments are an appropriate reward. General Breton has seen a good deal of colonial service, although he has not been in the field. General Grey's is a Court appointment, for which there can be no justification, as long as military service is regarded as a claim to military reward.

We are sorry to hear by recent accounts from Calcutta that there appear to be some grave deficiencies in the way of hospital accommodation for the many sick troops proceeding through the presidency. The mortality on board the ships conveying out the wives and children of soldiers, which we have before had occasion to notice, seems unfortunately not to have terminated with the voyage out, for during the march up country many deaths occurred, and a great deal of sickness prevailed. This is by no means to be laid at the door of the medical staff, who appear to have acted with a zeal and energy not emulated by some of the higher powers. We shall probably again have to refer to some of the details which have just reached us upon this unpleasant subject.

We have much pleasure in stating that the Second Class of the Bath has been conferred on Colonel Horsford. Seldom has an honour been more honourably earned, and seldom has one been conferred which will be more cordially ratified by all who were associated with this gallant officer in the operations in which he played such a distinguished part. His old comrades of the Rifle Brigade, as well as all who knew his soldierly qualities, will hear with gratification of the reward which Sir Alfred Horsford has received from his Sovereign.

The authorities in command at Chatham have decided on placing several hundred of the troops in that garrison under canvas during the present summer, the experience of former years having shown that the men encamped are far more healthy, and the per-centage of sick much less than when the troops are living and sleeping in their close and crowded barrack-rooms.

MANNING THE NAVY.

(From a Correspondent.)

No scheme for a "Reserve" can, we believe, be successful which does not adopt, as its first principle, the necessity of attaching the seamen to their country. What does the Government give as an equivalent for the sailor's liability at any time to be taken to fight the battles of his country?

That the press could be enforced at the present day is much to be doubted; but, even if it could, the evidence which the country has had that during the late war the desertions equalled the forced entries, shows how valueless the power is.

That the country has a right to the services of every subject no sailor can deny; but the ballot for the militia never obliged the subject to leave his native land; and the ballot for sailors would be an injustice, except there be a limitation as to the distance to which they could be taken, which if just would render a force so raised valueless excepting for defence.

How far does the proposed "Naval Volunteer Reserve" go towards settling the question and providing a force of itself to abolish all future idea of impressment? It is limited to 30,000, a portion of whom will only be in the country at a time. Is that a sufficient force when joined to our existing Navy to enable our Fleet with every chance of success to meet the combined navies of the world? If not, it is an error, for it is not a large enough measure to meet every possible contingency which may arise.

The country, since the time of William III., has been working the Royal Navy and Merchant Service as distinct bodies, far from harmonising and bringing the two to work into each other when required. No step has been taken to work the marine of England as a great whole. What is the present state of the Navy? A force of 60,000 or 70,000 is obtained, and nothing is provided to fall back upon, not even half-trained men. A bounty is required to bring such seamen forward as can be got; and a Reserve of 30,000, with limitations and restrictions, is proposed, keeping it apart from the mass of the mercantile marine; thus raising a separate force, and still tending to keep the Services apart.

The whole sailors of England are the country's, if the country will make them so. Let a reserve be open to all up to the age of forty (real A. B.'s the only point insisted on), a compulsory Seaman Fund established for both Navy and Merchant Seamen, with the present proposed system of reserve, pay, and pension; there will then be a perfect registration. Let there be a right on the part of Government annually to take 2000 apprentices, whose time has expired, to serve for three years in the Royal Navy, to be chosen either by ballot or volunteering—it would soon be the latter—to keep up a well-trained reserve, of which the nucleus would be already created. Abolish the press-gang. Ere long, under such a system as is here sketched out, the greatest punishment will be dismissal from the Navy, and our nationality will be as anxiously assumed as it is at present frequently disowned.

FRENCH NAVY.

The cuirassed frigate "Normandie" occupies much attention, and is so far completed that she will soon be armed at Cherbourg, when she will proceed with her sister ship "Gloire," built at Cherbourg, to join the squadron of evolutions.

The corvette "Bayonnaise" has sailed from Cherbourg, for the Pacific.

The steam-corvette "Cassini" arrived at Sydney, March 5, and left two days afterwards for New Caledonia.

The "Somme" has quitted Réunion for Mauritius.

The "Algesiras," flag of Rear-Admiral Paris, the "Alexandre," "Imperial," and "Redoubtable," left Toulon on the 7th, to join the French Fleet off the Hyères.

The *Moniteur de la Flotte* denies officially that there is any truth in the report that the gun-boats, "Dragonne" and "Peiho," have been sunk by the Chinese forts of Koang-Fo.

It is probable that the valley of Taggia will serve as the boundary between France and Italy; but that St. Remo, and probably Vintimiglia will remain Italian.

The *Journal des Mines* states that the Emperor has approved of M. Pascal's invention of hot air marine engines so highly, that he has ordered the construction of several gun-boats with machinery on that principle, and has permitted the "Reine Hortense" to be fitted with the new engine. If the principle be successful, economy will not be its greatest merit, though it is calculated that the saving in coal would amount to 2,000,000*l.* annually in the French Navy.

The French in the Red Sea.—The French professional papers confirm the statement in the *Times*, that a steamer has arrived at Réunion with materiel for establishing a port on the coast of Abyssinia, which will soon be followed by a frigate. Their destination is Adoolis; but the French naval paper states that the Isle of Dissée will be "la première position occupée par la France dans la Mer Rouge." It is unfortunate that just in this juncture death should have deprived us of the services of Mr. Plowden, our able and energetic consul at one of the principal stations in Abyssinia.

The "Guerrière" has been launched at Brest with great success.

It is stated that the effectives of vice-admirals of France will be raised to 11, and of rear-admirals to 24.

ARTISAN VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—You have noticed in your paper what you are kind enough to call a very creditable attempt made by a number of artisans in the district parish of St. Luke's, Berwick Street, to form a rifle corps. Will you allow me, as my name is mentioned in connection with it, to correct a false impression that notice has left in many minds. I say many minds, for your words have been widely circulated in other papers with the printed prefix, "No working men need apply."

I do not believe the result of their offer to the authorities will justify this moral. The facts are these:—

As long as four months ago several of my parishioners met in one of my school-rooms to organise a Rifle Corps. The speeches were patriotic and sensible. It was proposed that the dress should be cheap though uniform, and that the officers should be gentlemen who had borne Her Majesty's commission in the Army. Well, the thing grew; some 150 soon joined. My friends marched about in the school-room three evenings every week; the windows were dotted with the flattened noses of an admiring public. In time we procured the printed forms of application to the lord-lieutenant. These we filled up, as we had reason to know, correctly, and sent in; we waited for an answer. Meanwhile Lord Elcho, hearing that the men called themselves "Scottish artisans," asked them to join his corps, making great concessions. Many went, mostly Scotchmen, and with them the title Scottish artisans. The remainder, knowing that their application to the lord-lieutenant had not been finally negatived, asked me to become their correspondent till they obtained an officer to represent them. To this I assented. I laid their case before Lord Salisbury; an answer has not yet been received. I cannot tell what there is in their application to merit any discouragement. It comes from the district parish of St. Luke's, which contains between nine and ten thousand inhabitants.

As very many of these are superior artisans, they would probably form the bulk of the corps. They are not men ever likely to enlist into the Militia or Line. They cannot join any existing Volunteer body without special favour. They therefore ask for permission to form a cheap corps, believing that the price of the uniform is not so important as the worth of the man inside it. Of course, they would gladly receive the donations of the public, but prefer being helped *as a corps*, and thus have the conditions of union such, that a well-to-do working-man might join without a pecuniary exception being made in his individual behalf.

My profession makes it strange for me to find myself, even for a time, the correspondent of a would-be rifle corps; but, I am glad to aid my working-men friends in the matter; and surely it is not unfit for a clergyman to help, however humbly, in rendering a great national movement more true and real.

The first time we met in my school-room an artisan pointed to a text on the wall, and said, "Sir, that is a good omen." It was this: "Whatsoever thy hand findeth to do, do it with all thy might."—I am, &c.

Harry Jones,
Incumbent of St. Luke's.

Royal Geographical Society.—An evening meeting will be held on Monday next, at which the following papers are to be read: "On a possible passage to the North Pole," by Mr. Alderman Hopkins. "Proposed Telegraphic Communication with America, *vid* the Faroes, Iceland, and Greenland," by Col. Shaffner, U.S.

The Association for Improving the Condition of the Wives and Families of Soldiers and Sailors held its annual meeting at Willis's Rooms on 21st ult., for the purpose of receiving the report of the committee, and transacting the ordinary business of the society. His Royal Highness the Duke of Cambridge took the chair, and there were present the Earl of Shaftesbury, Sir John Lawrence, the Bishop of Oxford, General Sir Richard Dacres, and other friends of the charity. In opening the proceedings of the day, His Royal Highness said that the association was formed during the Russian War, and it originated in a feeling of sympathy for the great distress and suffering which in many instances befel the wives and families of the brave men in both Services, who were engaged in that arduous conflict. He rejoiced to know that the society had contributed largely to the relief of that distress and the alleviation of those sufferings. Although the war in the Crimea, which called forth this association, had happily long ceased to exist, still it would be a matter of deep regret if the society itself should be discontinued, as there was a large field in which it might labour with great benefit. The campaign in India, which rapidly followed the Russian war, had made considerable calls upon the funds of the society, and he was happy to find that great good had resulted from its operations in that direction. His Royal Highness concluded by expressing a fervent hope that the public would give to the association that support which it, in his opinion, in every respect, deserved. Captain Jackson, the secretary, then read the report, which gave a detailed statement of the services rendered by the association during the past year. Resolutions, pledging the secretary to support the society were then moved and supported by the Earl of Shaftesbury, the Bishop of Oxford, and other speakers, and were unanimously agreed to.

Messrs. Mappin have made an implement called the "Rifleman's Knife," which will be found useful by Volunteers and sportsmen. In addition to two good blades and smaller apparatus, the knife contains a powerful nipple-wrench and a strong turn-screw, and all who have dealt with fire-arms know how serviceable and how needful are these little instruments in the field.

THE MANCHESTER SCHOOL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In common with I hope many hundreds of my countrymen I read the Army and Navy Gazette regularly. I am neither a soldier nor a sailor, but I have a strong interest in both of the national services; and I believe that your labours will materially assist in making these services what they ought to be—the first in the world in point of efficiency and equipment, as they are the first in the matter of bravery and enduring. But I have a little fault to find with you. In one of your articles of the 21st ult. you refer to Manchester in a manner which I think is rather derogatory to Cottonopolis. You have been extracting the moral from the fight between Sayers and Heenan, and after having summed up the philosophic meaning of the fight, you ask, "Will Manchester consider these things?"* You put the question in a way which plainly says, "Will these pig-headed, cotton-spinning people, who care for nothing but making money, who think life has no higher or grander, or indeed any other aim than that of cotton-spinning, learn to estimate human nature properly, to leave off dreaming of peace where there is no peace?" These are not exactly your words, but your argument implies this much, and I think you do us an injustice. I believe that even the most rabid members of what is called the "Manchester School," do not deserve this censure. If, sir, you had witnessed the interest which the exhibition to which you refer had created in the city, you would have deemed it more likely that we should have rushed into the extreme of pugnacity, than into that of quiet submission to insult. The whole city was inflamed with the contest; nothing else was talked of on 'Change during that day and the next; and take notice too, that it was not the brutal part of the contest that was admired, but the *moral* of it. It was the spirit of emulation, of fortitude, of nationality, that found such a response here; and I am satisfied that there is a deeper feeling of honour, of fairness, of manly resolution in this city, than in almost any other place in the kingdom. Why, sir, we have one of the most numerous and most efficient Volunteer rifle corps here. That does not look like a quiet acquiescence in the principles of the extreme peace party. Depend upon it, sir, when that hour of danger comes, to which you constantly refer, and I believe most fairly and properly, you will not find the members of the Manchester party either laggards or traitors in their country's service. All that can be said against the bulk of the trading community of Manchester is, that they have endeavoured to lessen the vitality of war as a "trade." They do but follow out the suggestions of the great dramatist, when he says that war is a game which, were the subjects wise, kings would not play at. We may have too much faith in our ledgers here; but we are neither slow to expose the wrong, nor tardy in defending the right. When the struggle comes you will not find us unwilling to take part in it; all we ask for is, that the same principles which govern men of business in their intercourse with each other, should be introduced into the affairs which regulate the negotiations of cabinets.—Yours, &c.,

A Manchester Man.

Sir James Outram.—We read in the last *Bombay Gazette* the announcement copied from the *Englishman* of the 23rd ultimo into the *Gazette* of Monday week, to the effect that Sir James Outram's failing health had compelled him to take a passage to Singapore in the Lancefield, which was to leave Calcutta on the 26th, has occasioned much distress to the gallant baronet's numerous friends in Bombay; and we have therefore much pleasure in assuring them that our contemporary's estimate of his health is erroneous. We have been favoured with the following extract from one of Sir James's letters, dated 26th March:—"I think I told you that I had been in the doctor's hands for a few days for an attack of bronchitis. They wanted me to go to sea for a two or three weeks' trip; but that would have been so inconvenient, both on public and private grounds, that I could not agree to do so. And I am glad of it, for I am now entirely rid of my cough." A Calcutta correspondent, in allusion to the reported illness of Sir James Outram, thus writes:—"To the heart of a lion, the sympathetic soul of a woman, the eye of an eagle, he adds the physical endurance of a team of dray horses. For hard continuous work he has never had his equal on this side of India, unless perhaps in the persons of Lords Canning and Dalhousie. From twelve to sixteen hours a day is, I believe, his average diurnal contribution to the service of the State at his desk and in Council. Yet, like all men who get through an immensity of work, he is never in a hurry, and rarely 'too busy' to give interviews to such as desire to communicate with him personally on public affairs. Such is the stuff of those soldier-statesmen by whom India was won and has been preserved. Twenty years hence it will be seen whether adequate successors to them are supplied in the persons of the 'pale students' who carry off the prizes at our competitive examinations."

The Report of the Commissioners on the Defences of the Country will be laid before Parliament in the course of a few days.

It will be perceived from the subjoined general order that the five years' staff order is not to be carried into effect in India:—"General Order by his Excellency the Governor-General of India. Camp Doenanuggur, March 19, 1860. Under instructions from the Right Honourable the Secretary of State for India, his Excellency the Governor-General is pleased to announce for general information, that the orders requiring staff appointments to be vacated after five years' tenure are not intended to apply to officers serving with irregular or local corps, who, though detached from their own regiments, are nevertheless performing regimental duties. Under the same authority the operations of the rule requiring the vacation of appointments is altogether suspended until further orders.—R. J. H. Birch, Major-General; Secretary to the Government of India, with the Governor-General."

* Our sensible correspondent may easily imagine the remarks to which he refers were applied to "Manchester" as an abstract school of politico-economical teaching, in which the masters and pupils of the "Peace Party" sit, and learn, and lecture; and not to "Manchester" as a city containing a thoroughly English population with a strong love of their country and its institutions, and no disinclination at all to a fair fight, if needs be.—[Ed.]

LIGHT INFANTRY DRILL.

The following important Circular Memorandum, addressed to the Infantry Regiments, has just been issued :—

"Horse Guards, May 1.

"The general principles of light infantry movements, as well as the movements of a company or battalion, when acting as light infantry, are laid down in the 'Field Exercises,' and the right application of these movements in the field may be studied with advantage in various works by authors of much practical experience ; but, in addition to these important points, His Royal Highness the General Commanding-in-Chief deems it essential that the attention of commanding officers should be directed to the necessity of constantly exercising the individual intelligence and judgment of the men under their command when acting as light infantry.

"The improved range and accuracy of fire of the arms now in general use, render it doubly important that every soldier should, when skirmishing, be prepared to take such advantage of ground and cover as will enable him, with the least exposure of his own person, to inflict the greatest amount of injury on his opponents.

"With this view, commanding officers are enjoined to lose no opportunity of profiting by all suitable ground in the vicinity of their quarters for the instruction of young soldiers in this important part of their duty; and they should bear in mind that the character of a regiment, as to its proficiency in light infantry movements, depends mainly on the individual intelligence, skill, and activity, displayed by the men themselves.

"It will be found advantageous, where the ground admits, to detach one or more companies, with their supports, to a distance of about 1000 yards in front of and facing the battalion drawn up in line, when they will extend and advance in skirmishing order towards the battalion, being occasionally halted, in order that the officers, by examining the back-sight of the rifles, may ascertain that they have been adjusted for the proper distances.

"The officers of the companies in line will point out to the men of their companies any error that may be committed by the skirmishers in their advance, and the advantages to be derived from such cover as the ground may present, from running rapidly from point to point, &c. ; the line being in the position of the enemy, the men will soon learn what errors, as regards unnecessary exposure, should be avoided.

"Each company, in its turn, should be exercised as skirmishers, and be occasionally relieved, advancing and retreating, and the advantage of the new line of skirmishers being completely concealed in the latter movement should be pointed out.

"Officers in command of supports, bearing in mind the improved range and accuracy of fire-arms, should also be careful in the selection of their ground, as the fire of the enemy's skirmishers is sure to be directed on any exposed solid body. Supports and reserves, if not under cover, should always lie down when halted.

"The attention of the skirmishers should be especially called to the following points :—;

"*Skirmishers*, when under fire, must take advantage of all cover. The men of a file should always work together ; both men should never be unloaded at the same time ; they should always, when practicable, load under cover, before moving to the front when advancing, and after falling back when retiring.

"*Young soldiers* (particularly when first opening fire) are apt to waste their ammunition ; its value, therefore, cannot be too carefully impressed on their minds, and they should be made to understand that the principal advantage of their rifle—viz., accuracy of fire—is lost if, in moving from spot to spot, they do not consider well the distance they are from the object they are about to fire at, and are not careful to adjust the back-sight accordingly.

"The files must be careful not to get in front of each other. When small objects, such as trees or rocks, afford cover for a few files only, the men must not crowd behind them in numbers, as they will be safer in the open. Here they should load and fire lying, and move rapidly when the advance or retreat renders a change of position necessary, throwing themselves at once on the ground.

"Bugle sounds should be avoided as much as possible ; the men should be practised at 'passing the word,' and made to understand signals.

"The men should be taught that good cover may be obtained from the slightest rise or fall of ground,—more especially when engaged at long ranges—a slight furrow, a few stones or small bushes, will often afford cover in the absence of trees, rocks, walls, banks, &c.

"Skirmishers should be taught to judge rapidly for themselves of the nature of the ground on which they are acting, and of the best mode of occupying it. In defending a line of heights, the edge of a wood, or any ditches, walls, &c., they should follow the windings of the cover, instead of remaining in line, taking care to leave no considerable gaps, and not to collect in groups.

"A line of skirmishers may be exercised with advantage in passing obstacles, such as ponds, farm buildings, &c., the men opposite these obstacles doubling in rear of the files on the right and left ; but running out to their proper places as soon as the obstacles are passed.

"Before quitting one position each file should decide on the next they intend to occupy, which they should make for in double time ; when at close quarters one man of a file should cover the advance or retreat of his comrade while running from point to point, the men protecting each other in turn while exposed.

"The fire of skirmishers may often be better employed against the enemy's files on their right and left than against those in their immediate front, who are more likely to be completely covered.

"It is impossible for the officers to place each file of their companies ; the men must be made to understand that they are responsible for the cover each file may select.

"They should keep in sight the files on their right and left, and, when the ground permits, should resume the general line of dressing, and their proper distance, making use of their own intelligence, without waiting for special directions.

"The dressing of a line of skirmishers is a matter of no importance, as long as the connection between files is kept up. In advancing or retiring those files having cover should remain in their position until those on their right and left have passed them by 15 or 20 paces. In advancing, files should run on to cover, when the general line is within 50 paces of it, holding it as above. The fire of one protected skirmisher is of more value than that of five when exposed.

"Whenever opportunities offer, commanding officers should instruct their men in the mode of making rifle pits, and placing sand bags, sods, &c., on a wall or parapet, to fire through ; also in the duties of covering-parties in sieges, how to keep down the fire of batteries, the advantages of the different modes of firing—kneeling, lying, &c. ; in short, no pains should be spared to make each man a thorough and efficient light infantry soldier.

"Another important point to which the General Commanding-in-Chief would take the opportunity of directing the attention of commanding officers both of regiments and brigades, is the practice of time march—*i.e.*, they should direct companies or wings, or battalions, to occupy a distant position to which several roads lead, some of greater length and easier to march over than others. The heads of these columns should arrive simultaneously in position and the time of departure be regulated accordingly.

"Small bodies of troops may accomplish longer marches even over bad roads than deeper columns can accomplish over better roads. Practice will soon enable officers to ascertain these points, and to calculate almost to a certainty the time required under every circumstance.

"By command,
"J. YORKE SCARLETT, Adjutant-General."

It is very needful not to lose sight of the fact that the above excellent memorandum is intended for the guidance of infantry when acting as skirmishers, or in extended order as light infantry. Battles can never be won by skirmishers, or by infantry in skirmishing order, no matter what may be the range and accuracy of projectiles. Any one who has witnessed the disorder on the line of march of the best-drilled soldiery, and the helplessness of ill-drilled regiments, will appreciate, as all officers must, the imperative necessity of maintaining the company and battalion drill, without which regiments cannot move in the field at all, and would become a mere mob. Indeed the increased range of rifles and artillery is an argument for rendering all company and battalion drill more strict and often repeated than ever, whilst each man is trained to act with self-reliance and intelligence when skirmishing. All our regiments in effect are taught light infantry drill now-a-days ; but bad as the old animated Prussian target of a regiment deploying from column into line would be, a rabblement of unconnected skirmishers without any supports or common object in attack or retreat would be worse. One great difficulty, henceforth, will be the handling of supports and reserves so as to keep them out of fire. If too far off the whole mass of skirmishers may be rolled up by a quick sweeping charge of cavalry from either flank. If within range it would be difficult to prevent their being shaken by the artillery, for a general can rarely find ground to conceal either his infantry or his horse.

Another difficulty among many will be the supply of ammunition to the advanced troops. There is a great talk of profitless expenditure of ammunition, but the greatest waste we know of it would be in the case of two lines of well-covered skirmishers firing at each other, or at the puffs of smoke from each other's rifles, at 800 or 900 yards. The amusement would be endless if the pouches could be kept full—the damage nothing, and the result nothing. Armies must march, and manœuvre, and encamp, in solid bodies ; and the soldier who begins the day as a light infantry skirmisher, will have to close it, if he is to conquer in the fight, as one of a charging battalion with bayonets in front, or in the shock of serried masses which terminates the struggles of every battle-field.

Our light infantry drill cannot be too carefully conducted, and the Duke's very admirable Memorandum will be of the highest value, if officers enter into the spirit of it and really develop the intelligence of their men. The soldier who finds himself in face of an enemy on a level plain may feel very uncomfortable if he cannot skirmish from behind a bank or a tree ; but on the whole perhaps the *morale* of the soldier is not so much deteriorated by skirmishing from cover as may be supposed. Trenches are far worse—"Unnecessary exposure" as the Duke of Cambridge points out, "should be avoided ;" but men must be taught too that when exposure is necessary, it must be submitted to. The object of the Circular in effect is to enjoin greater attention to well-known principles in the drill of our troops ; and Sir James Scarlett's language is so clear and explicit, that his meaning in embodying the Commander-in-Chief's views cannot be misunderstood.

At the Royal United Service Institution yesterday a lecture was delivered by Colonel R. A. Shafto Adair, A.D.C. to the Queen, on "the Defence of Portsmouth and the adjacent districts."

The *Moniteur* of last Saturday publishes a decree fixing the individual payment for exemption from military service at 2300f., and the bounty on re-engagement for seven years' service at 2000f.

ARMY REFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The present system may almost be said to owe its origin to the mistakes made in the Crimean war, and to the crusade which has since been carried on by the press against the supposed idleness, incompetency and extravagance of our officers.

It would be an idle attempt to deny that there were, or even that there always will be, a few questionable characters in so large a body ; but this crusade seems to have been carried on with great virulence, because many of those men had ample private means, and were accustomed, when they had got through their drill, and learnt their duty, to lead a tolerably easy and independent life in time of peace.

If reform means a change, there is a change, and a very considerable one here. There is no fear now of either officer or soldier getting rusty for want of something to do, as the present system seems to be to invent work for them, both by experiments in every possible change of routine and duty —by a miserable concession to every grumble raised by the press—and by a lamentable attempt to become a bad copy of a foreign model.

Although it may be necessary for our allies to find incessant work for their soldiers (to keep them out of mischief being a very important consideration with them), we have yet to learn that such a course of discipline is indispensable to the well-being and efficiency of the British Army. No wonder, then, that the effects of such a system should be felt in an army composed of volunteers, and it will be well for England if the identity of that Army is not entirely destroyed by it.

The first difficulty has arisen among the officers of the Cavalry, who were about the most independent class in the Service. An immense number of them, men who both knew their work and had done it nobly in the field, have retreated from the toils of an endless sham fight, and left not a few vacant saddles behind them.

There is a sad contrast between the puny recruits of the present day, and the old soldiers of eight or ten years' service. It would seem as if the cavalry officer and the British Grenadier were dying out gradually, and that recruits are only to be obtained from the very lowest classes. I have heard men, returning ill and faint from the recent Indian campaign, say, sadly, "that every place is the same at home, and that, if they cannot either claim or buy their discharge, they will always volunteer for foreign service."

Surely, there must be something radically wrong in the system to produce such a state of things as this ; and I need scarcely point to what the first instalment of the 14th Dragoons have done, after being sent to a solitary and dismal barrack (about the nearest approach to a camp that could be found, as an acknowledgment of their hard fought services) for a proof of the feeling existing, and existing more especially in that branch of the Service.

The reason for their leaving is simply that they have to toil incessantly at their profession—to work like recruits, at endless field days, constant riding-school and foot parades. These tried and well-drilled soldiers are not made in a day, and must necessarily be a loss to the country. If obliged to work hard, they think it worth while to try to better themselves elsewhere ; and their superiors have also made the discovery that labour-study and capital can be invested more profitably than in the purchase and holding of a commission. We have an increase of nearly 2,000,000*l.* in the Army Estimates ! May I ask if there is anything to shown for it ? Is the Army better drilled or more efficient in general for the work it has gone through in the last four years ? Have the numerous changes improved the position of either officer or soldier in any particular ? And is there any return to the country for the money expended in camps ?

The press may glory in the fact of all idlers being driven out of the Service. It cannot deny that fine gentlemen and stalwart idlers have supported the prestige of the British arms for ages. But it has never taken any notice of the fact that the soldier must at least be indulged with a liberal inducement, if required to labour hard in peace, as well as to face hardship and death in time of war. I am, &c.,

OBSERVER.

[We publish the above letter, as it is an honest grumble from a soldier who has seen service. It may represent the feelings of some considerable portion of his class. If so, we would beg these officers to remember that our Army may be called upon in a month for active service in the field against the first professional soldiers in the world ; that our system was sorely tried in the Crimea—and that under such circumstances we are afraid the nation will exact the attention to duty, and drill, and parade, &c., of which our excellent correspondent complains.]

LANDING IN THE CRIMEA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—How are the two following passages from M. St Arnaud's letters reconcileable with the statement in Colonel Ady's work, of the "Curious Incidents" that took place on board the Ville de Paris, p. 30, during the voyage to the Crimea ?

"A bord la Ville de Paris dix lieues nord du Cape Tarkan, 11 Sept., 1854.

"Mon opinion n'a pas changé, et je suis toujours pour un débarquement de nos forces à la Katcha. Les Anglais ne l'ont pas jugé possible. J'ai cédé.

Old Fort, Crimea, 16 Septembre.

"La diversion que j'ai fait faire à la Katcha a démontré à tout le monde que j'avais raison et que c'était là qu'il fallait débarquer. Je ne puis pas trop sentir aux Anglais que j'avais raison."

Several Volunteer Rifle Corps have assumed the *red* facing. This has hitherto been considered as the distinctive mark of a Royal regiment, granted by the Crown for some special service. Not having seen any of these corps gazetted as Royal, by what authority or permission has this distinction been permitted ?

G.

Another vexatious interruption is reported in the submarine cable to Alexandria. This time the cable is broken between Aden and Kooria Mooria. There was no communication between Aden and Bombay from the 3rd to the 12th of April.

MONTHLY PAYMENTS TO THE FLEET.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your correspondent, who takes the formidable *nom de plume* of "Steam," writes thoroughly in character with his signature. He advocates monthly payments in the fleet entirely on a go-a-head principle.

At present, he says, "those men who are so disposed can, and do, under the existing regulations, obtain a large proportion of their wages at monthly intervals." This is perfectly true; and, in my former letter, I pointed it out, and showed that the result was not that the "scamps," but the "good" and "very good" men of the Edgar had their money stolen from them, while they could not get leave to go ashore. "Steam" ignores these facts; and expresses his anxiety to accustom our seamen to the use of their money in small sums, to prevent the abuse of it in "longer bouts of drunkenness and debauchery, which," he says, "are the only results of a good pay-day." Men now can get as much as 24*s.* a month regularly, which they abuse. "Therefore," says "Steam," "give them 34*s.*, to familiarise them with the use of money and check its abuse." Nothing new. "*Similia similibus curantur*," or, "A hair of the dog that bit you!"

As regards the underhand ways in which our sailors, "Steam" says, get irregular supplies through agents, who charge a handsome per-centage, certainly, the per-centage must be handsome, to make it worth while for any agent thus to deal with the difference between 24*s.* and 34*s.*; and "Steam" forgets to say whether it is the "steady men" or the "scamps" that patronise these agents. On this point the report of the Committee on the Record Book system is very like "Steam's" letter, and the evidence on the subject is somewhat vapoury in both. It would be something to save the agent's per-centage to these men; but what would be done with the saving?

If "Steam" will favour you with any answer to the facts quoted, as regards the Edgar's men, or will venture to controvert the other fact I alleged, that good men now do actually leave frequently-paid ships to get into sea-going ships, merely in order to have a "good pay day," I'll join issue with him. In the meantime I will answer the question asked by him. A badly-disposed man would be likely to get into proportionately additional trouble from possessing 34*s.* instead of 24*s.*; but that is not all. The evil of paying men money which they cannot want, and cannot use properly, while afloat or absent from their families, is not merely that the badly disposed will get into trouble in consequence, but that the good men are tempted to spend it, or gamble it, or are liable to have it stolen.

I deprecate, and, what is more, I assert the Service generally deprecate, a regular fizzing and fussing once in every month on board Her Majesty's ships at sea and in harbour, such as would result from these monthly payments, to say nothing of the letting off the steam afterwards, between every payment, till each 34*s.* was got rid of. If this were objectionable in piping times of peace, how much more so, now that the blast of war is so very probable, that its sound would scarcely startle us more than at present does the steam of a railway whistle?—Yours, &c. A. PAYMASTER, R.N.

NAVAL MEDICAL SUPPLEMENTAL FUND.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As the subject of the abolition or maintenance of the Naval Medical Supplemental Fund now engages a considerable share of the attention of the medical officers of the Navy, I am anxious to put before them a just and impartial view of the case, more especially as it affects the interests of upwards of two hundred widows, annuitants on the Society, who have submitted patiently to a reduction of one-third of their annuities, for the last fifteen years, in the full hope that the pledges given them of a reversion to the annuity of 40*l.* insured for them by their husbands, would, in due time, be restored.

In this matter the interests of the insured members are also deeply involved, and as the principle of "having due regard to vested rights" is acknowledged by all concerned, the importance of a calm and mature consideration of the subject must be apparent to every one.

Under these circumstances, if you will kindly give insertion to the following statement, you will greatly oblige

MEDICUS, R.N.

1st. The Naval Medical Supplemental Fund has an Act of Parliament rendering it lawful to reduce the widows annuities, for the next nine years, to 26*l.* 13*s.* 4*d.* And as it is now proposed to wind up and abolish the society, it will be absolutely necessary, "having due regard to vested rights' to make provision for the annuitants, who may be alive after the expiration of the Act, to receive 40*l.* per annum. It is quite impossible to carry the effect of a ten years' Act over a life-time, and no lawyer will advise that the society can settle the claims of the widows, by purchasing life annuities at 26*l.* 13*s.* 4*d.* The utmost they could advise would be the purchasing of annuities of 26*l.* 13*s.* 4*d.* over the years of the Act, to be increased to the survivors to 40*l.*, according to their undoubted rights. Such conclusion may fairly be come to by looking at the order in council authorising 40*l.* and the Act which holds that order in temporary abeyance; but there are other elements to be considered.

1st. The Fund cannot be wound up but by Act of Parliament, consequently the Act to wind up would override the protective ten years' Act, because it would have to provide an equitable amount (or annuity) to be paid to the widows, with reference to the state of the Fund, and also the liabilities of contributors.

2nd. The consideration of the above opens up the whole question of winding up. We have the fact of nearly all the widows having memorialised against winding up, therefore it can never be supposed that the bill would be passed through Parliament unopposed.

A good case must be made out; to this end it will be necessary to be prepared with answers to the following queries:

1st. Are you insolvent, or unable to meet your liabilities?

The widows will argue that you are not, inasmuch as you have obtained an Act of Parliament rendering it legal to tender them 26*l.* 13*s.* 4*d.* in lieu of 40*l.* for the next nine years, which they have submitted to without protest, although the actuary reported three years ago that you could afford to pay a larger sum.

2nd. If not insolvent, why do you pray the Parliament for a dissolution?

If no better answer can be given to this than that five-sixths of the corps have expressed a decided objection to fulfil the agreement they made when they entered the service, viz., "to contribute to the support of this fund," the argument would not be entertained for one moment by a committee of the House of Commons.

THE PAYMASTERS' WARRANT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Having attentively perused the article in your issue of the 28th ult., respecting the injustice experienced under the operation of the Royal Warrant of 27th January, 1860, by officers who have served in other commissioned grades before appointment as paymaster, I trust you will pardon me for attempting to point out what I consider a more equitable method of doing justice to this class of officers than that suggested by the article referred to.

Let their service in other commissioned grades before appointment as paymaster be allowed to reckon, while serving, as equivalent to paymaster's service towards the attainment of honorary rank in the same manner as such service is by the Royal Warrant of 2nd December, 1857, permitted to reckon towards half-pay on retirement, viz.:—

"Five years on full pay in other commissioned rank shall reckon as equivalent to two years' service as paymaster.

"Ten years on full pay in other commissioned rank shall reckon as equivalent to five years' service as paymaster."

This meed of justice would confer an important benefit on many an old paymaster who has done good service in the field, and who from the effects of colonial service or injury in action, has been induced to relinquish his position as a combatant officer to undertake duties requiring less physical exertion, although involving greater responsibility. It would also have the effect of placing such officers more on an equality with paymasters appointed from civilians.—Yours &c.

OLD SOLDIER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the ARMY AND NAVY GAZETTE of the 28th ult. there appeared an article upon the late warrant for paymasters, in which a comparison is drawn between John Smith, Esq., and Lieutenant Brown, both appointed paymasters. In these particular cases, doubtless the remedy suggested by you would be both fair and just; but there is a third class which you do not appear to have taken into account, and who are those who have served, for instance, say twenty-three years, eighteen of which as non-commissioned officers before being commissioned, and who within a very short period afterwards have succeeded to the paymasterships of their corps. Now, your remedy would be a positive injury to this class of paymaster, as having nearly all their commissioned service in the latter rank; and as service in the ranks goes for nothing in the estimation of the framers of those warrants, although good service has been done by the individuals both in and out of the field of battle, therefore being slightly moved by the same motive (selfishness) as your correspondents who have suggested a longer period of service as commissioned officer and a shorter one as paymaster to be the qualification for the honorary rank, I suggest that the warrant before alluded to be allowed to remain as it is, and that special cases receive special consideration.—Yours, &c. O. M.

SIR C. NAPIER—MESS EXPENSES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your last week's Correspondent "G. O.," says: "I once received a letter from the late Sir Charles Napier, in which he assured me that when he joined the 52nd Regiment as an ensign, he could not on 5*s.* 3*d.* a day afford to drink wine at all; and, he added, my then commanding-officer, the celebrated Sir John Moore, being asked whether he considered a man temperate who only drank his 'first-thirds' at or after dinner, replied, 'No; he may be a moderate, but he is not a temperate man.'"

Now, sir, if Sir Charles really wrote that letter, his assurance was most remarkable; for he never belonged to the 52nd Regiment; never joined any regiment as ensign; never served on 5*s.* 3*d.* a day; never served in any regiment commanded by Sir John Moore; and was actually a captain when the pay of ensign was raised from 4*s.* 8*d.* to 5*s.* 3*d.* a day.

It is a sad thing to have the shades of two great men called up, the one to state circumstantially that which never happened, and the other to talk teetotal twaddle. Your Correspondent may rely on it that the letter was a hoax.

I am, &c., AN OLD 52ND.

THE CHINA EXPEDITION.

The statistics of the strength of the British expedition to China were given in the House of Commons by Mr. Sidney Herbert a few evenings since. From India he said there were five regiments of European infantry, and probably two additional British regiments, amounting in the whole to 7,484 men. The five regiments would include 5,500 men, and the two additional regiments 1,984 men. There would also be five regiments of irregular native infantry, consisting of about 4,600 men; one regiment of native cavalry, consisting of 400 men; two companies of Madras sappers, consisting together of 200 men; making in all 4,600 men. So that the British force, consisting of 7,484, together with the native force of 4,600 men, would make a total of 12,084 men. There were likewise going to India four battalions of Royal Artillery, numbering 814 men; one company of Royal Engineers, numbering 124 men; and two squadrons of Dragoon Guards, of 328 men; making together a total of 1266 men. These added to the former amount of 12,084 men would make a total of 13,350 men. One regiment, however, of the native forces had been stopped, and they had heard by the last mail that it was possible other regiments might be stopped. Only the day before yesterday they had heard of one regiment being detained in consequence of counter-orders. He would add now the numbers of the troops which had been despatched from England. They consisted of one battalion of Military Train numbering 289 men; two battalions of Royal Artillery (Armstrong guns), numbering 444 men; the 2nd Regiment of Foot, from the Cape, numbering 845 men; making together 1578 men. These, added to the number stated before, made a total of 14,928 men. From that must be deducted for over-estimate of the forces already stated about 1000 men, leaving the amount of the whole available force, irrespective of course of the garrison at Hong Kong, in round numbers about 14,000 men. With respect to the wives and children of those regiments which had been despatched from India to China, the moment the Government here heard that the Indian government intended to despatch them to England they telegraphed to the Indian government desiring them to keep all the wives and children of these regiments in India till further orders. As regards the question of additional forces for China, it was impossible yet to say what would be the course of events; but if it should be such as to lead to a commencement of hostilities and to a protraction of operations, then certainly due notice would be given to the House of any motion for making provision for that state of things by any aditional vote of credit.

INDIA.

Governor-General's Camp, Lahore.
17th Feb., 1860.

MY DEAR SIR,—Your troop is about to leave the Governor-General's escort, and His Excellency desires me to express the regret he feels at parting with it. You have now marched in His Excellency's escort for four months, during which time the orderly conduct of the troop as well as its appearance, has been most exemplary, and Lord Canning wishes me to convey to yourself, your officers and men, the assurance of his entire satisfaction at the manner in which the duty entrusted to you has been performed.

The Governor-General wishes this letter to be published in Troop Orders. Believe me yours very truly,

(Signed) EDWARD CAMPBELL,
Military Secretary to the Governor-General.

To Lieutenant W. D. Milman, commanding E Troop, Royal Horse Artillery.

Since leaving Seetapore, this troop marched 900 miles with the Governor-General, and fired 1354 rounds blank cartridge for salutes.

Ghazeepore, April 2nd, 1860.

We had a tremendous fire here on the 27th ult., luckily in the middle of the day. There were no casualties; but the barracks of four companies of Her Majesty's 37th were entirely destroyed. They were cheap thatched barracks; and as a very high wind was blowing, it is a wonder that the whole lines were not destroyed. The engines were bad, and water scarce. What between the fire and the sun it was warmish work, trying to arrest the flames. Colonel Milman, 37th, commanding the station, published an order next day, extolling the bravery and determination of the men of the 37th and 77th in getting the ammunition out of a store-house which was in flames—a most dangerous service, and it was providentially effected, otherwise the hospital might have been blown up, and the loss of life would have been enormous. Had this service been performed in action, the men would have well deserved the Victoria Cross. Much clothing, arms, and accoutrements were destroyed, for which the men must get compensation. Some band instruments were melted in the conflagration also. The loss to Government is estimated at 30,000 rupees.

Colonel Egerton Milman, 37th Foot, has been appointed by His Excellency the Commander-in-Chief in India, to the command of the Rohilcund division, head-quarters Bareilly, with the local rank of Brigadier-General, vice Sir R. Walpole, transferred to the command of the Lucknow Division.

THE ARMSTRONG GUN FACTORIES.—Although the whole of the new buildings are not yet completed, since the formation of the Armstrong gun establishment at the Royal Arsenal, 48 complete field batteries of rifled ordnance have been proved and equipped for service, in addition to 200 40-pounder guns for the Royal Navy. A large number of 100-pounder guns are now in course of manufacture. A further course of experiments are ordered to be carried out with cast-iron guns of the old pattern, rifled and hooped on Sir W. Armstrong's principle. They are to be fired with increased charges until the gun experimented on is destroyed, for the purpose of ascertaining the exact power of endurance. From the previous bursting of these hooped guns, a strong feeling against them exists among naval and military officers; and the production of these weapons appears to be questionable policy, as they cost nearly as much as the genuine Armstrong gun, and when completed cannot be depended on. The Armstrong gun factories are now at work on a most extensive scale night and day, and it is expected that at least 1200 guns, chiefly of the larger sizes, will be turned out by the end of the present year.

In the House of Commons the other evening, Major Stuart asked the Secretary of State for War whether the British Government had not undertaken the transmission of the 20,000 Turkish medals from Constantinople previous to their loss in the Mediterranean; and whether it was the intention of the Government to defray the expense of replacing them? Mr. S. Herbert said that the British Government did not undertake the shipping of these medals. They were shipped by the Turkish government, and the responsibility rested with them. Under these circumstances, Sir H. Bulwer had been instructed to ask the Turkish government if they would be willing to replace the value of the medals. In the meantime the men were entitled to wear the ribbon.

The expenditure at Enfield factory during the financial year ending with March last amounted to 215,577*l.*, more than half of which went in wages, about 56,000*l.* in stores, and 32,000*l.* in buildings and machinery. During the year there were delivered into store from this factory 87,405 musket rifles complete of the pattern of 1853.

HOUSE OF COMMONS.—FRIDAY.

GUN AND MORTAR BOATS.

Mr. William Ewart asked the Secretary for the Admiralty what were the measures adopted for subjecting to a strict system of inspection, while they were being built, gun-boats and other vessels built on contract by the Government.

Sir John Pakington desired to know what was the real extent of injury by decay which had been discovered in Her Majesty's mortar vessels and gun-boats; whether it was true that improper workmanship and fastenings had also been discovered; and what steps the Board of Admiralty had taken or intended to take in consequence of the present state of those vessels.

Lord Clarence Paget hoped that the statement he was about to make would have the effect of allaying some of the anxiety which prevailed on this subject if he stated to the House the truth, the whole truth, and nothing but the truth respecting it. It was true that a number of the gun-boats had been built of unseasoned timber, but it was only fair to the contractors to state that it was done with the knowledge of the Admiralty. The contractors stated that they had not seasoned timber, but the Admiralty notwithstanding ordered them to go on with the work. The question of short bolts however, was of a different nature. The use of those bolts was horrible to contemplate; for, in consequence of those imperfect bolts being used, it might be that a ship in a rough sea might go to the bottom in a moment. The Admiralty were taking advice as to adopting proceedings against contractors who had used short bolts. Twenty-three boats in the yards had been found defective and fully repaired, and six were now in hand. There remained to be examined sixteen boats, which were hauled up on Haslar slip. There were forty of the steam reserve afloat, which had not yet been examined, but as far as he was aware, they had not shown any signs of decay. With respect to the mortar-boats, some which had been opened had been found to be extremely defective, and two had been ordered to be broken up because they were a mass of decay. Of Government-built boats eleven were undergoing considerable repair. When vessels were built in contractors' yards the work was superintended by officers from the Government yards.

Sir C. Napier said that the names of the contractors who had used short bolts ought to be proclaimed in the House. Was it true, as reported, that ships of the line were being converted with unseasoned timber?

Mr. Whitbread thought that course would hardly be fair, inasmuch as it might prejudice their case before a legal tribunal. There was no foundation for the rumour that ships were being converted with unseasoned timber.

Admiral Herbert said that two years ago the boats on Haslar slip were so rotten, that he put the end of his umbrella through them.

NAVY SURGEONS.

Sir E. Grogan wished to know what steps had been taken since the 24th of February last to carry into effect the provisions of the late naval warrant as regarded medical officers in the Navy.

Lord Clarence Paget said that the Admiralty had approved of a new uniform of a more ornamental character for surgeons in the Navy; but he could hold out no hope that surgeons would obtain cabins of the same class as those assigned to captains of ships.

COOKING FOR THE ARMY.

In the House of Commons Colonel Lindsay brought under notice the system of cooking in the Army invented by Captain Grant, and asked the Secretary for War whether he intended to recommend that some remuneration should be given to that officer for the services he had rendered in improving and economising the system. The gallant Colonel dwelt upon the great advantages which had resulted from the introduction of Captain Grant's system. Previous to its introduction, the only mode of cooking for the Army was by boiling, but, under that system, stewing, frying, and baking could be effected, by which means the comforts of the soldier had been greatly promoted. The saving to the country by the adoption of Captain Grant's system was enormous. Under it the cost of cooking had been reduced to a halfpenny per week per man. At present the food of sixty thousand men was cooked by Captain Grant's system. Captain Grant had also invented an ambulatory cooking apparatus, which the Government had directed to be sent to China for the use of the troops—a proof of the estimation in which it was held. It had also been extensively adopted in reformatories and workhouses. He wished to know whether the Government intended to make any remuneration to Captain Grant for his valuable invention.

General Buckley and Mr. Cave bore testimony to the value of Captain Grant's system, and the important results which had flowed from it, and said it was unworthy of the country to avail themselves of its advantages without making any compensation to its author.

Mr. Sidney Herbert said, that, although Captain Grant's cooking apparatus was the best and most economical at the time it was first invented, it was now surpassed by Captain Gordon's. For a body of men not fewer than 500 Captain Grant's was still the most economical, but the expense increased in proportion as the number to be cooked for decreased. In consideration of the merit of Captain Grant's invention, and of the fact that he was the first who had directed his attention to the subject, he (Mr. Herbert) had presented him with the sum of 500*l*. Captain Grant accepted the money, but declared it an insufficient recognition of the merits of his invention. As guardian of the public purse as regarded military expenditure, he could not recommend that he should receive further compensation without, at the same time, making it to others who produced cooking apparatus which competed successfully with his.

SIR C. TREVELYAN.

In reply to a question from Mr. Danby Seymour, Sir C. Wood stated that in consequence of Sir C. Trevelyan having published the protests of himself and the members of the Madras Council against Mr. Wilson's financial scheme, the government had recalled him, and appointed as his successor Sir Henry Ward.

PENSIONS FOR WOUNDS.

Colonel North moved that a humble address be presented to Her Majesty, praying that she will be graciously pleased to reconsider the warrant granting pensions and allowances to officers of the land forces, limited to wounds and injuries received in action. The motion was supported by Sir C. Napier, Colonel Dickson, and Mr. Wyld, and opposed by Mr. Sidney Herbert and Lord Palmerston; but ultimately, his lordship seeing that the feeling of the House was decidedly in favour of the motion, his lordship gave way, and the motion was agreed to.

Obituary.

DEATH OF A VETERAN.—We have been so accustomed of ate to read of the exploits of our soldiers in the Crimea and India, that a little relief to the strain may be afforded by recording the services of a thorough good soldier of the great war, of which we are beginning fast to lose sight. The following is a statement of distinguished past service which will favourably contrast with any record of individual services of the present day. John Rowley, a well-known sergeant of the Royal Artillery, enlisted into that regiment at a time (1803) when the nation was in alarm about the threatened invasion of Napoleon. In August 1808, gunner Rowley, belonging to the famed Major Lawson's company, commenced his active career in the Peninsula, and left it at the peace in 1814. During that stormy period, he fought in fifteen battles and sieges, besides numerous lesser affairs, and was twice wounded. The mention of the contests in which he bore a part will at once show the hard nature of his service, his fatigues, his dangers and privations. He was at Rolica, Vimiera, Oporto, Talavera, Busaco, Fuentes d'Onor, Badajoz, Ciudad Rodrigo, Salamanca, Burgos, Vittoria, St. Sebastian, Neville, and the sortie from Bayonne; in all of which he conducted himself as a firm and steady artillerist, combining energy with courage, and a faithful discharge of duty with every other military excellence. For these services he received the war medal and eleven clasps! perhaps the greatest number awarded to any soldier in the British army. Twice he served at Gibraltar, and the rest of his time was passed in Guernsey and at Woolwich, where he was discharged in 1827. Subsequently he was employed for more than a year as a clerk in the military repository at Woolwich; from whence he was removed to Portsmouth, where he filled the office of Steward of the Ordnance Hospital for twenty-two years. In this way he was close on fifty years in the service of his country. He died at Woolwich on the 30th April, 1860, in his 75th year. His excellent widow, now suffering from paralysis, was a daughter of Sergeant-Major Collins of the Irish Artillery, who died at the good old age of 90. For nearly twenty-three years she was Matron and Stewardess of the Ordnance Hospital at Portsmouth, and is happily in receipt of one shilling a-day pension for her approved services, which, if it do nothing else, "will keep the wolf from the door."

We regret to record in our obituary of to-day the death of Captain Ward, who expired suddenly on Sunday last, at his residence, in Paradise Row, Chester. This veteran officer, who had reached his 80th year, had seen considerable active service. He served in the Peninsula with the 30th Regiment from March, 1809, to June, 1813, including the defence of Cadiz from 4th June to 25th September, 1810; occupation of the lines of Torres Vedras, pursuit of Massena, actions of Sabagul, Almeida, and Barba del Puerco; battle of Fuentes d'Onor, siege of Badajoz, battle of Salamanca, and action of Villa Muriel; served the campaign of 1814 in Holland, under Sir Thomas Graham, and that of 1815 under the Duke of Wellington; he had received a medal for the Peninsula and three clasps. The deceased officer on his retirement from the service took up his residence in Chester, where he was held in the highest respect by all classes for those qualities which adorn the Christian and the soldier.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CANNON—May 5, at Bownham Cottage, Stroud, the wife of Captain R. J. Cannon, half-pay, Royal Artillery, of a daughter.
GRANT—May 5, at her father's residence, Greenwich Hospital, the wife of Commander Henry D. Grant, R.N., of a daughter.
HUME—May 9, at 16, Wilton Street, Belgrave Square, the wife of Lieut.-Colonel Hume, C.B., Grenadier Guards, of a daughter.
KEMPT—May 2, at Lower Clapton, the wife of Captain Kempt, Bombay Fusiliers, of a son.
NASH—March 15, at Bezwarah, East Indies, the wife of Dr. Pearson Nash, H.M.'s Madras Army, of a son.
PROTHEROE—April 4, at Port Louis, Mauritius, the wife of Edward Schaw Protheroe, Esq., Royal Artillery, of a son.
SAWYER—May 3, at Claverton, near Bath, the wife of Edward Sawyer, Esq., Captain 14th Somerset Volunteer Rifles, of a daughter.
SUTHERLAND—May 8, at Gaines, the wife of Captain Sutherland (late Scots Greys), of a son.
THURSBY—May 6, at 1, Eccleston Terrace South, the wife of Captain Thursby, Coldstream Guards, of a son.

MARRIAGES.

BALL—MASON—May 3, at the Church of St. Marylebone, by the Rev Thomas Percy Garrick, Major-General Ball, to Charlotte, third daughter of the late William Wallis Mason, Esq., of Beverley.
BROKE—GURDON—May 8, at St. George's, Hanover Square, by the Rev. Philip Gurdon, Horace, only son of Major-General Broke, to Charlotte, eldest daughter of Brampton Gurdon, Esq., M.P., of Letton, Norfolk.
EATON—BUTLER—May 5, at Holy Trinity Church, Walton Breck, by the Rev. Jas. Butler Kelly, M.A., vicar of Kirkmichael, Isle of Man, cousin of the bride, Francis James Eaton, Esq., Captain 15th Division Lancashire Volunteer Rifles, to Lucy Mary, eldest daughter of James Henry Butler, Esq., of Newbie Terrace, Walton Breck, Liverpool.
FOSTER—RAMSBOTTOM—May 10, at St. James's Church, Dover, by the Rev. W. E. Light, rector, Major Charles Marshall Foster, 32nd Light Infantry, third son of the late Lieut.-Colonel Foster, to Sophia Augusta, eldest daughter of John Ramsbottom, Esq.
HOUSTOUN—MONTEITH—May 8, at Trinity Church, Marylebone, by the Rev. Murdoch Kirby, vicar of Mayfield, Sussex, Captain Wallace Houstoun, Royal Navy, son of Sir Robert Houstoun, of Clerkington, N.B., to Caroline Frederica, only surviving child of Lieut.-General Monteith.

DEATHS.

BARROW—April 30, Lieut.-Colonel Thomas James Barrow, formerly of the Coldstream Guards, aged 73.
BAYLY—May 3, in Dublin, George Augustus Bayly, Esq., of Clyda, county Cork, formerly of the 71st Light Infantry, youngest son of the late Rev. H. L. Bayly, of Ballyarthur, county Wicklow, aged 40.
BEECROFT—Supposed to have been lost with the passengers and crew of the ship Andromache, near the Cape, on his return from Ceylon, which he left April 6, 1859, John Macgregor Beecroft, midshipman, only son of the late John Beecroft, Esq., Her Majesty's Consul for Western Africa, and Governor of Fernando Po, of Whitby, Yorkshire, and late of Clifton Park, Birkenhead, aged 20.
BYERS—May 9, at his residence, 4, Dawson Place, Bayswater, William C. Byers, Esq., of the War Office, aged 46, deeply regretted.
CARTER—March 23, at Barrackpore, India, Arthur Henry Carter, Esq., Lieutenant 74th B.N.I., third son of the late Thomas Stead Carter, Esq., of Moor Place, Great Hadham, Herts, aged 28.
CHANDLER—April 7, at Port Royal, Jamaica, aged 27, Charlotte Olivia, only surviving daughter of the late Captain Chandler, 17th Lancers.
COLLINGWOOD—March 7, at Kamptee, of traumatic tetanus, Captain Carlton Thomas Collingwood, of the Madras Artillery, aged 35.
EBRINGTON—May 4, at Southsea, Major William Sandy Ebrington, late of the 11th Regiment of Foot, which he commanded for some years. The late gallant officer served with that distinguished regiment in all its campaigning and engagements during the Peninsular War.
HAMILTON—May 2, at Killyleagh Castle, county Down, Archibald Rowan Hamilton, Esq., late 5th Dragoon Guards, aged 41.
HORN—March 17, at Gondah, Oude, of cholera, aged 21, Frederick Gowland Horn, Esq., Lieutenant H.M.'s 20th Regiment of Infantry, eldest son of the late Henry Horn, Esq., Recorder of Hereford.
HUTCHINSON—May 5, at his residence, Brotton Hall, Cleveland, Yorkshire, Thomas Hutchinson, Esq., Deputy-Lieutenant for the North Riding, aged 76.
HUTT—May 5, in Albemarle Street, Mary, Countess of Strathmore, wife of the Right Hon. W. Hutt, M.P.
KINKEAD—Feb. 9, in Camp at Saugor, Brevet-Major Kinkead, H.M.'s Madras Artillery.
LEE—April 8, at Walmer, aged 92, Elizabeth Honora, widow of the late Vice-Admiral Sir Richard Lee, K.C.B.
LILLIE—May 6, at Dover, Dame Louisa Lillie, wife of Sir John Scott Lillie, C.B.
MACBEAN—May 7, at Bexley Heath, Ann Macbean, daughter of the late Colonel W. F. Macbean, aged 77.
MONK—March 16, at Port Louis, Mauritius, aged 22, Ellen, the beloved wife of W. Monk, Esq., Medical Staff, and youngest daughter of the late Mr. Hy. Keed, of Stockwell Street, Greenwich.
MORISON—May 7, James Morison, Esq., of White Rose Hall, Barkingside, Essex, late of Her Majesty's Hon. Corps of Gentlemen-at-Arms.
NIXON—March 6, at the Parsonage, Cook's River, Sydney, the Rev. Edward J. Nixon, only son of the late Lieut.-Colonel Nixon, of the 1st Royals.
PAGE—May 5, at Marine Villa, Ryde, aged 19, Selwyn Valentine Page, late Lieutenant in the 2nd Battalion of 12th Regiment of Foot.
ROBERTSON—April 3, at Seeonie, near Nagpore, Captain Colin Charles Robertson, 11th Bengal Native Infantry, eldest son of the late William Tulloh Robertson, Bengal Civil Service, aged 40.
STONE—May 2, the Chevalier Thomas Corner Stone, Attaché at the Portuguese Embassy in London, eldest and only surviving son of the late Rear-Admiral Thomas Stone, K.T.S., of His Most Faithful Majesty's Service.
TARDREW—May 4, at Knightsbridge Barracks, Thomas Tardrew, Surgeon 2nd Life Guards, aged 41.

There is no association of the many which the charity of the wealthiest capital in the world sustains and nourishes, more deserving of support than that which devotes its energies to the improvement of the condition of the wives of our soldiers and sailors. The meeting the other day was much smothered by the pressure which politics and news placed upon the space in the papers, but the names of those who attended, and the facts which were stated will not fail to command the attention of the public at large, who are deeply interested in the question. It may be said that the State ought not to let a private body take on hand a matter of this kind, but the state unfortunately cannot do all that should be done in such cases. Soldiers and sailors will marry—often recklessly—and their children and wives if not unjustly treated, are not much cherished by the State. As the Duke of Cambridge said of the married officers the other day—it would be very well if there were none, but officers will marry and so will men. The association of which Major Powys is the indefatigable, warm-hearted, and kindly secretary, supplementises the work of the State, and the amount of good it has done, and does, is enormous. In our next number we will place before the officers of both Services, and our general readers, a statement of what the association has effected, and the claims it has upon the support of the country.

In reply to a question put in the House this week respecting the British graves in the Crimea, Lord John Russell said—"There have been three despatches sent, dated respectively January 31, February 4, and April 24, remonstrating with the Russian government upon the subject of the desecration of the graves at Sebastopol. The Russian government promised a full inquiry, and they said they had every desire to maintain these graves in decent order, but that they were numerous and scattered, some being in lands which were the property of private individuals, who were not amenable to the Russian government. We have instructed the Consul-General at Odessa to appoint a person with a salary of 100*l*. a year to watch over these graves in future."

A general meeting of the members of the National Rifle Association was announced for this week at Willis's Rooms, under the presidency of Mr. S. Herbert, M.P. Mr. Herbert, however, being detained at a Cabinet meeting, Lord Elcho said that it would be the most satisfactory course for them to adjourn the meeting until Mr. Herbert could really give them an assurance that he would attend and make a statement. The intention was, after Mr. Herbert had made his statement, to make an appeal to the public for support to enable the association to carry out and give effect to the objects of an institution with which everybody cordially sympathised. It had most completely met the public approval, but what the association wanted was funds.

THE ORDER OF THE BATH.—Sir H. Stracey asked the Secretary of State for War this week whether the Secretary of State for India had not sent to him the names of certain officers of Her Majesty's Indian Army, who had for their distinguished services been recommended by the Governor-General of India and the Commander-in-Chief for the Companionship of the Bath; and, if so, why this honour had not been conferred; and whether there was any objection to their names being recorded in the *Gazette*? Mr. S. Herbert said that the names of officers in both the Queen's and the East India Service had been received; but the number of knights companions was already considerably in excess of the statute; and on that account alone they had not been gazetted. It would not be correct to publish the names of those officers before they had received the order, which he hoped would be given them before long.

FRAS. MAUDE, } Captains, R.N.,
GEORGE HOPE, } Hon. Secretaries.

10th May, 1860.—32, Sackville Street, London, W.

PORTSMOUTH ROYAL SAILORS' HOME.

The Directors of this Institution have resolved, with the approbation of the Bishop of the Diocese, to appropriate and fit up a large store in HAWKE STREET, belonging to and adjoining the Sailors' Home, as a temporary CHAPEL, for the FREE USE of all Seafaring Persons—SEAMEN, MARINES, BOATMEN, or FISHERMEN, frequenting the Port of Portsmouth. It will accommodate from 160 to 170 persons.

They have also resolved to APPOINT a Permanent CHAPLAIN to the Home, in accordance with the notice given when the Home was first established, to minister in this Chapel, and to visit among the Seafaring people of the *port*, at a Salary of £120 per annum.

A SUBSCRIPTION LIST is OPENED at the SAILORS' HOME, Queen-street, Portsea, and also at Messrs. GRANT, GILLMAN, & Co., Bankers, Portsmouth, and it is hoped that the British public will care for the welfare of the Seamen of their country, by giving ANNUAL SUBSCRIPTIONS towards the CHAPLAIN'S SALARY, and DONATIONS towards the EXPENSE of FITTING-UP the CHAPEL.

May 9th, 1860. R. F. GAMBIER, Chairman.

GEORGE CUTCLIFFE, Actuary and Secretary.

13, St. James's Square, London, S.W.

SERVICE IN ANY VOLUNTEER CORPS allowed within the United Kingdom without the payment of any extra Premium.

CUNNINGHAM'S PATENT SELF-REEFING TOPSAILS, &c.

Copy of a letter from Captain J. M. OUTRIDGE, of the Champion of the Seas, 1946 tons register, belonging to Messrs. J. BAINES & Co., dated Liverpool, April 14, 1860.

"To H. D. P. Cunningham, Esq., R.N.

"I have great pleasure in reporting to you upon the admirable working of your patent topsails, on board the Champion of the Seas, under my command. I can reduce sail with half the crew required on the ordinary plan, and in much less time. I have heard it said that your topsails are not suitable for such large ships as the Champion of the Seas; but, my experience of their working, proves this to be a great mistake. My main topsail-yard is upwards of eighty feet long, and weight of it five tons; a very (I think) satisfactory proof they are suitable for any vessel now afloat. The officer of the watch can always take the mizentopsail into a close reef himself."

Office, 12, London Street, Fenchurch Street, London, E.C.

N.B. The Champion of the Seas has been fitted about four years.

DIVING APPARATUS.

C. E. HEINKE, SUBMARINE ENGINEER, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

DUTY OFF FRENCH PERFUMERY.

ED. PINAUD'S Choice Perfumes, Fancy Soaps, Pomades, Philocomes, Aromatic and Oriental Vinegar, Cosmetics, Elixir Dentifrice, and Brillantine, to be had of all Chemists and Perfumers throughout the Country. Wholesale Depot, and for Export, 27, Cannon Street West, London, E.C.

WESTERTON'S LIBRARY, Hyde Park Corner, W., unsurpassed for liberal supplies of new books, and for its liberal scale of subscriptions.

Books may be exchanged daily.

DOG CARTS.

THOMSON'S REGISTERED excels other inventions of the kind in commodiousness, elegance, lightness, and economy. Manufacturer and inventor, WILLIAM THOMSON, Coachbuilder, Perth.

In addition to the testimonials already published in *The Field* and elsewhere, the following have been recently received:—

"Dalhousie Castle.

"SIR,—I have tried the Dog Cart several times, and am much pleased with it. I consider it a most perfect carriage of its kind. W. MAULE RAMSAY, Colonel.

"Jan. 20, 1860."

"Edmondstown, Feb. 29, 1860.

"MR. THOMSON,—I have just received the Dog Cart safely. In justice to you, I must say that a neater, lighter, or roomier cart I have not seen. I shall have pleasure in recommending it. I remain, &c., &c.,

"ARTHUR COSTELLO, late 7th Dragoon Guards."

Drawings sent on application.

The Price of the Registered Dog-Cart, complete, with Hand-Drag, best Lamps, Aprons for both Seats, all finished in the highest style, with Shafts for one Horse, and delivered at any Station on the Great Northern or London and North-Western, FIFTY GUINEAS. If for a pair, with Pole, Bar, and polished-steel Chains, FIFTY-FIVE GUINEAS.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 21. 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

KOHLER'S PATENT HARMONIC CORNOPEAN.—An entirely new invention, and is in every respect worthy the attention of all Amateurs and Professors of Music. It is also most effective in a Military Band. Price 10*l.* 10*s.*

Estimates and drawings sent on application to JOHN KOHLER, Military Musical Instrument Maker to Her Majesty's Army and Navy, 35, Henrietta Street, Covent Garden, London, W.C.

FOR CORRECT FAMILY ARMS, CREST, OR PEDIGREE, send name and county and 7*s.* 6*d.* to J. LOCK'S City Heraldic Office, 2, Old Jewry, London, E.C., and in a few days you will receive a neat drawing of your Arms, &c., in Heraldic Colours, to be engraved on Seal, Ring, or Family Plate. On y parle Français, Italien, Allemand, et Hollandais. Wedding orders executed. Stamped envelopes and paper. Embossing presses and dies.

TO VOLUNTEER CORPS.

MR. CLARKINGTON, PHOTOGRAPHIC ARTIST, Sponsalia, 246, Regent Street, W., begs to inform Members of Volunteer Corps that he makes a reduction of one-fourth on all Portraits of Volunteers taken in Uniform.

Every description of Photographic Portraiture taken daily from 9 till 6.

PHOTOGRAPHY. — MESSRS. CALDESI, BLANFORD, & CO. (late Caldesi & Montecchi), beg leave to state that their sole *Establishments* are at Messrs. P. & D. Colnaghi, Scott, & Co.'s, Pall Mall East, S.W., and at 16, Victoria Grove, Kensington Gate, W., where their business in all its varieties of Portraiture, Reproduction of Pictures, Instantaneous Photographs of Groups, of *Animals*, and the celebrated "Cartes des Visites," is carried on as usual under the superintendence of Mr. Caldesi and of his partners.

THE VOLUNTEERS' PICTURE FRAMES.—The Cheapest House for every description of Picture Frames. Country dealers supplied with every description of Gold and Fancy Wood Moulding. Three-quarter Gilt Beads at 7*s.* per doz. 6 feet, at

GEORGE REES, 129, Drury Lane, W.C.

SOUTHSEA STEAM MARBLE WORKS,
COTTAGE GROVE, SOUTHSEA, PORTSMOUTH.
ESTABLISHED 1849.

A. W. BAKER respectfully informs his Friends, Patrons, and the Public in general, that he has erected improved Steam Machinery, and will now be enabled to execute all orders without delay, at London prices.

A large stock of marble and enamelled slate chimney-pieces in show-rooms, monuments, tombs, tablets, headstones, &c.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

JOHN ROBERTS, JUN., SOLE INVENTOR OF THE PATENT PROCESS.—All Tobaccos and Snuffs manufactured by the said process are sold in packets only, having the name and address of JOHN ROBERTS & COMPANY, No. 126 and 127, Whitechapel Road, E., on each packet, with the words "By Patent Process," in medallion, and "Duly Registered." N.B. None other is genuine.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS,
(and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

TEETH.—MR. ESKELL, SURGEON DENTIST, 314, Regent Street, W. (facing the Polytechnic), supplies his PATENTED INCORRODIBLE TEETH, which can be matched so closely in shape and colour to those left in the mouth, and are formed so exactly to nature, that the closest observer cannot detect the difference, and in all cases they restore perfect articulation and mastication. These teeth are fixed from one to a complete set upon Mr. Eskell's never-failing and painless principle of Self-adhesion, without extracting any teeth or stumps, or giving any pain whatever; and being incorrodible they possess the superior advantage of never changing colour nor decaying. Mr. Eskell's celebrated Osteoplastic Enamel, post free for thirty stamps, for Stopping Decayed Teeth, is a preparation which never changes colour nor affects the colour of the tooth, and is free from any injurious properties either as regards the teeth or general health. Its application is easily performed, and without giving the slightest pain. Deficiencies of palate effectually remedied. Loose teeth fastened. Teeth regulated. Discoloured teeth restored, &c. Hours, ten to six. Consultation, free. Charges strictly moderate.—314, Regent Street, W. (*opposite* the Polytechnic), London.—Established 1847.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any *metal*, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, *Ludgate Hill*, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the *private* passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

YOUTH, BEAUTY, AND ARTICULATION.—Mr. EDWARD DAVIESON, for many years dentist to the Court of Spain, begs to inform the British public that he has taken up his permanent residence at 448, West Strand, London, W.C., adjoining the Electric Telegraph office, where he is prepared to supply ARTIFICIAL TEETH of a manufacture superior in beauty and durability to any known in this country at 10*s.* per tooth, which price can only be exceeded by expensive mountings. Among the wonderful discoveries he made during his residence in the south of Europe, none exceeds the Liquid Enamel, which not only imparts a pearly whiteness to natural and artificial teeth, but renders them impossible to discolour or decay. Sold, with full directions for use, at 10*s.* 6*d.* per case. It is also used in a highly condensed form for stopping decayed teeth, and is invaluable for those who have decay in their front teeth. Mr. Edward Davieson has to announce that the Fleur de l'Age, or bloom of youth, that will add youth and beauty to any complexion, is now ready. Sold in cases, price 11*s.*, 22*s.*, and four quantities in one for 33*s.* Attendance daily, from 10 till 6.

A BOON TO NERVOUS SUFFERERS.

THE NEW MEDICAL GUIDE for gratuitous circulation. A NERVOUS SUFFERER having been effectually cured of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, by following the instructions given in the MEDICAL GUIDE, he considers it his duty, in gratitude to the author, and for the benefit of others, to publish the means used. He will, therefore, send post free, on receipt of a directed envelope, and two stamps, a copy of the book, containing every information required

"Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind."—*British Critic.*

Address, JAMES WALLACE, Esq., Wilford House, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 to 8 Evening.

ANOTHER CURE OF ASTHMATIC COUGH BY

DR. LOCOCK'S PULMONIC WAFERS.—From Mr. J. Richardson, Bookseller, Seaham, May 1, 1860.—"Gentlemen,—Having for some time been troubled with asthma and cough, and not being able to get any medicine that would relieve me, I was recommended to try Dr. Locock's Pulmonic Wafers, and before I had finished one box I was nearly well. Whenever I get a cold and return of cough I take some of the wafers, which give me immediate relief. I am, Gentlemen, yours, &c., T. B. BROWN."

TO SINGERS AND PUBLIC SPEAKERS, Dr. Locock's Wafers are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.* per box. Sold by all druggists.
